Supplemento al n. 140 - September/October - no. 5/2011 di Glass Machinery Plants & Accessories, Artenergy Publishing S.r.l., Dir. Resp. Marco Pinetti, Poste Italiane Spa - Sped. in a. p. - D.L. 353/2003 (conv. in L. 27/02/2004 n° 46) art. 1, comma 1 - DCB Milano • Prezzo di copertina € 2 - Copia omaggio

Does the great leap towards innovation tempt you?

Innovation – it's talked about a lot but few do it like we do.
Our research policy is unique and our research centres mobilise powerful and innovative forces.

Powerful, because we have the largest research centre in the world specialising in refractories and their interactions with different types of glass. Innovative, because we have 140 engineers and technicians who use the most progressive, multidisciplinary technologies.

You produce float glass, hollow glass, insulation fibre, reinforcement fibre or special glasses (glass ceramics, borosilicates, LCD / PDP...)
We have the expertise to help you do it better. Find out more at **www.sefpro.com**

SAINT-GOBAIN
SEFPRO

FLUORITAL

A new generation of top quality organic spray paints and screen inks for decoration at low temperature of tableware, perfume packaging, bottles and lighting glass.

ISO 9001 / UNI EN ISO 9001:2008

We give colour to your imagination

NASA Technology applied to Glass Melting

F.I.C. (UK) LIMITED

Emisshield®

High Emissivity Nano Particle Ceramic Coatings improve the radiant heat transfer from furnace superstructure to batch and molten glass

- Fuel savings of 4-10% or increase output
- Short payback period
- Also has significant advantages elsewhere in the glass process

Contact us for more details on use in forehearths, lehrs and forming

Completely glazed over

and therefore
no dusting.

Batch leaving the SORG IRD concept doghouse is completely glazed over. Which means NO DUSTING and therefore less batch carry-over in the regenerators.

Batch and Cullet Systems

EME-NEND batch charger

The EME-NEND batch charger

Enclosed doghouse gives :

- no uncontrolled air ingress, which reduces furnace NO_X emissions
- no external dusting, which reduces in-factory emissions

Twin screw and
pusher combination gives :

- improved charging pattern in the furnace
- much better operational security

The EME-NEND
– the future of batch charging

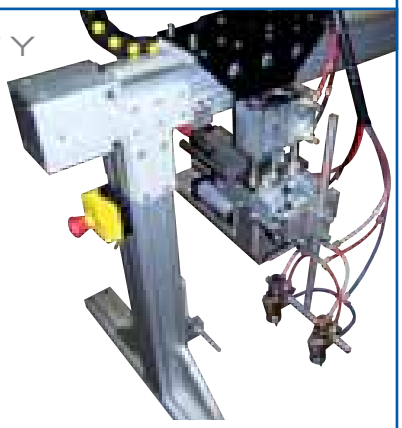
AREAS OF ACTIVITY



This new enterprise was set up after thorough observations and following considerations of the glass market. The necessity of the presence of a company, which could combine many years of experience, professionalism and credibility, looking, at the same time, at the future, at innovation and new technologies, pushed us to undertake this new adventure.

The result is this interesting company, which represents the perfect union between experience and innovation with the common aim of the maximum satisfaction of ever more exigent and experienced clients. For this reason, our machines are designed and manufactured exclusively in Italy, they are flexible and modulated according to the requests of clients and built using resistant materials. Thanks to high technology, important energy savings and, above all, easy and high-speed use are possible.

The product range of AB. Technologies includes Scrapers, Accessories, Runspray Cold-End Spray, Supply Mixing and Dosing Pump for emulsions used in gob cutting, Supply Mixing and Dosing Pump with automatic feeding of products for the cold treatment of glass.

Runspray is our Cold-End spray system that operates between bottle lines with high precision, always and automatically considering all production variables (no bottles or non-aligned bottles).

Its software is very easy to set and use, the operator can change all parameters also while the machine is working.

Runspray is equipped with a Siemens touch-screen that works with a Siemens PLC.

The mechanical transmission and motorization are excellent: the motor is a 800w Yaskawa brushless and the planetary motor reductor is Wittenstein.

The guns system is hydro pneumatic and the guns can have traditional or atomizing nozzles that guarantee perfect spraying.

Supply is our standard dosing pump.

The machine is used in all sectors where there is the need for continuous mixing of two liquids. In the glass industry, Supply takes care of cold end spraying and lubrication of the shears.

The operator can simply set the parameters to obtain the desired percentage from the PLC-controlled operator panel.

The system can check if the mixing is taking place correctly by monitoring the pressure in the pneumatic pump which doses and extracts the product.

The pressure inside the mixing tank is also continuously monitored.

In the case of failure, the machine indicates the anomaly by means of an emergency lamp and displays the alarm on the operator panel.

We can also provide a Supply Hf (high flow) and Supply dosing system with double flow.

RANGE OF PRODUCTS

- **COATING OF GLASS - SYSTEMS & MATERIALS (HOT/COLD END)**
- **CULLET SEPARATION & TREATMENT SYSTEMS • HOT GLASS SCRAPERS**

AREAS OF ACTIVITY

We are Acrotecna: a small company with big ideas.

Acrotecna is a System Integrator and Solution Provider for Industrial Application.

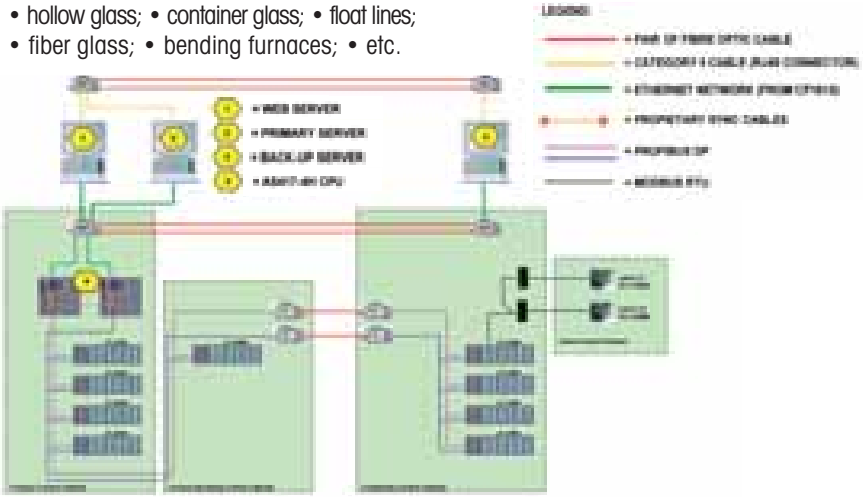
Our expertise is in Hardware, Application Software, Project Engineering, Installation and the entire life cycle; maintenance and full support to our customer and their plants.

We combine 25 years of experience and professionalism of our team in the glass market with the passion of young engineers using the latest technologies for innovative solutions for application in Automation and Process Control Systems for glass.

We can provide a complete Process Control System, based on DCS or PLC, for the following applications:
• hollow glass; • container glass; • float lines; • fiber glass; • bending furnaces; • etc.

Company applications can be found in the following areas:
• batch houses; • melting furnaces; • forehearth controls; • lehr controls; • bath roof and lehr power control for float lines; • boosting systems (including power cabinets and solutions); • plant utilities such as cooling water, compressed air, energy monitoring, scraper control systems, etc.

We work through all life cycle phases of a Process Control System:
• feasibility studies; • engineering; • construction; • installation; • commissioning and start-up; • life cycle system maintenance.



RANGE OF PRODUCTS

• AUTOMATION • CONSULTING SERVICES • CONTROL & AUTOMATION SYSTEMS • ENGINEERING & CONSTRUCTION OF PLANTS • MEASUREMENT & CONTROL SYSTEMS • SOFTWARE • TEMPERATURE MEASUREMENT & CONTROL

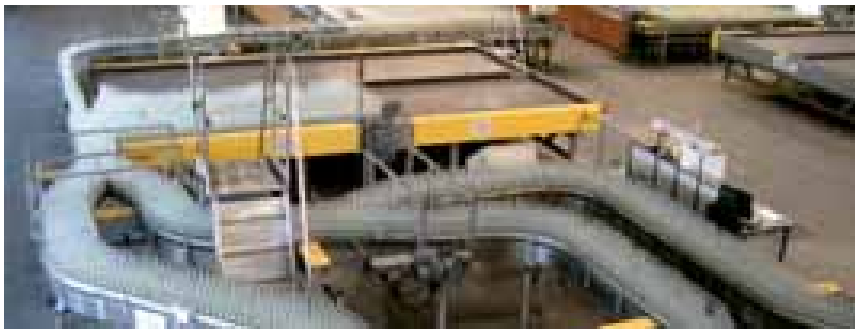
AREAS OF ACTIVITY

ALL GLASS S.r.l. is a well-known reliable supplier in the glass industry.

We are able to design and supply turnkey cold-end lines from lehrs to palletizers, including cullet conveyors, accumulating tables, bottle inverters, elevators and lowerators.

Our range of products can also provide customers with the following, according to their requests:

- special devices such as vibrating tables, dividers, sorters, spacers, orientators, motorized edges, etc.;



- manual and automatic depalletizers;
- pallet transport lines fully equipped with all necessary accessories such as deviators, rotating and modular built chain and roller conveyors, shuttle cars;
- semi-automatic and automatic shrink packaging machines for pharmaceutical and food-glass containers;
- mould pre-heating furnaces.

With the aim of increasing the flexibility of its pal-depal systems, ALL GLASS started installing 4- and 6-axes robots some years ago, and thanks to their simple use and reduced maintenance, the number of such installations is growing monthly.

Moreover, the technical management, with his wide and varied experience in the glass industry, is in a position to follow its customers step by step, providing reliable after-sales service and assistance.

RANGE OF PRODUCTS

• **PALLETIZING/DEPALLETIZING SYSTEMS** • **COLD-END LINES**

AREAS OF ACTIVITY

AMIG has been producing both automatic and semi-automatic glass forming and processing machinery for over 25 years.

AMIG's present scope of production includes:

- ***Pressing***
  - Full electric linear presses, with servomotor operated pressing mechanism, especially for the production of high-quality large-sized articles.
  - Automatic single- and double-gob, electronically controlled, hydraulic turntable presses.
  - Fire polishers, both linear and rotary, equipped with either gas/air or gas/oxygen reburning system.
  - Semi-automatic hydraulic presses.
- ***Spinning***
  - Automatic turntable spinning machines with individual spinning motors.
  - Semi-automatic electric spinning machines.
- ***Press-&-blow***
  - Automatic, single turntable jug forming machines models PAS9 and PAS12 can be equipped with Geneva Wheel mechanism or Torque motor for table motion.

- ***Glass blocks lines, for standard and high capacity.***
- ***High voltage insulators lines and plants.***

M*T Forni Industriali and OCMI-OTG can perform turnkey projects from batch plant to final take out for the production of different glassware articles: tableware, containers, stemware, jugs, lighting ware, electric insulators, glass blocks, etc. under the AMIG brand name.

AREAS OF ACTIVITY

AREAS OF ACTIVITY

Thanks to a century of experience in the mechanical industry, over half a century in the field of glass, and a further 20 years in electronics, BDF INDUSTRIES is a leading industry in the research and development of new technologies for the industry of hollow glass containers.

BDF now offers extremely advanced products based on rock-solid expertise, research and innovation guaranteeing top level quality and efficiency.

GOB FORMING MECHANISMS

- Feeders
- Servo Parallel Shears
- Servo Plungers
- Servo gob distributors
- Operations: SG - DG – TG

IS FORMING MACHINES

The long experience in the design and manufacturing of IS machines enables BDF to cover the complete range of sizes from single section forming machines and from 2 to 12 sections, also available in tandem systems.

- Operations:
  - SG
  - DG 4 $^1/_4$" - 5"B - 5"S - 5 $^1/_2$" - 6 $^1/_4$"
  - T.G. 3" - 3" $^1/_8$" - 190 - 4" $^1/_4$"
- Processes: BB, PB and NNPB, with or without vacuum systems.
- Variable Equipment for 4 $^1/_4$", 5", 5 $^1/_2$", 6 $^1/_4$". Manufactured according to the highest standards of quality and interchangeability with other types of IS machines, they are available for Single, Double and Triple Gob, as well as the different types of Centre Distances generally used in the glass industry.

ELECTRONIC CONTROL SYSTEMS

- Integrated Control Systems:
  - BDF-ADV8000
  - BDF-ADV1000
  - BDF-INTEGREX
- Stand Alone Components: timer – drive – pusher – servo feeder – servo gob distributor – servo mechanisms

WARE HANDLING

- Servo Take-Out
- Servo Pushers Dual Axes
- Transfer Wheels
- Cross Conveyors
- Servo Stackers

OTHER MACHINES

- Thermal-shock Testing Machines
- Mould Polishing Machines

SERVICES

BDF provides customers with technical assistance for installation, commissioning and service on site.

BDF assistance continues with after-sale and periodical visits for complete customer's satisfaction.

In addition to that, a special production line has been dedicated to the manufacturing and reconditioning of modules complete with mechanisms for exchange with customer's sections due for repair.

BDF Engineering Division is able to provide customers with complete design of turnkey glass plants. According to customer's requirements and needs, BDF engineers design the composition of a complete structure for the production of hollow glass: from the composition of production plants up to the most modern automatic storage systems.

BDF ENERGY DIVISION

Always attentive to the developments and demands of automation in the glass industry, BDF has continued its evolution towards the use of renewable energy sources by means of heat recovery from the exhaust fumes in the glass factories. Products:

- Cogeneration
- Trigeneration
- Pollution Control (Filtration)

RANGE OF PRODUCTS

AREAS OF ACTIVITY

Bock Energietechnik was founded in 1984 by graduate engineer Werner Bock.

The objective of the company is the efficient utilization of electric energy in the glass industry.

We design, manufacture and install electrical heating systems for a variety of applications in the glass industry.

Thirty years of experience in this area is helpful.

We have started up many installations to the complete satisfaction of our clients.

Electric heating systems for the glass industry

- Physical modelling with measurement of the electric power density in molten baths
- Electric additional heating systems (boosting facilities), complete installations from planning to commissioning
- Transformers and thyristors with corresponding adjustment controls
- Electrode supports with accessory installation equipment for side-, ground- and top-electrodes
- Heating facilities for throats
- Cooling equipment for electrodes
- Forehearth-boosting
  -> Direct heating by electrodes in the feeder
- Feeder bowl heating
  -> Indirect heating by special heaters
- Electric heating of working ends and forehearths
- Glass Level Measurement with established principle - in high-tech measurement processes
- Automatic control engineering: (Temperature, Flow, Ratio, Glass Level, Visualization)
- Special furnaces according to customer specifications

AREAS OF ACTIVITY

First and foremost – specialization!

Busellato Glass Moulds means innovation and technology and, thanks to the experience of its well-trained staff and technicians, the company is able to satisfy the most demanding client requests with the creation of par excellence moulds for the most complex glass container sectors – pharma and perfume.

Busellato's production can be any shape and size – triangular, square, rectangular, animals, etc. – ranging from the smallest and most complex containers for perfumery and pharma, from 5cc up to those of 8 litres, all carried out in-house, including welding, polishing and packaging.

Detailed studies regarding the techniques and metallization materials for glass-contact surfaces of moulds used in hollow glass production has enabled Busellato to develop a history of the process referred to in order to analyze possible defects, even in post-production phases. Thanks to the results obtained, ideal parameters for the HVOF technology can be defined, with considerable advantages on the glass-contact surfaces, both in terms of finishing and durability of the mould itself. This in turn results in advantages on distribution, stretching, and workability of the filling material.

Studies also concern the reconstruction of the surfaces of damaged moulds after production, resulting in advantages with regards to metallization when using a thermal post-metallization process, thus avoiding migration and subsequent thickening of non-melted particles, guaranteeing better distribution of the filling material. This process also eliminated the possibility of metallization detachment usually caused by thermal gradient among layers.

This continuous commitment and a series of generational changes over the past few years have made for higher quality requirements which Busellato Glass Moulds meets thanks to continuously ongoing developments of new technologies.

- **MOULD PRE-HEATING OVENS**
- **CROSS CONVEYORS**
- **SCRAPERS • STACKERS**

AREAS OF ACTIVITY

Since 1965 CAR-MET has been working in the glass industry supplying technological machinery. During these years CAR-MET has gained experience, knowledge and enhancements in glass production thanks to its skilled personnel. The internal workforce is dedicated to the engineering and manufacture of machinery such as:

- Annealing lehrs for containers and special glasses
- Decorating lehrs
- Lehrs with double belts
- Toughening lines on belt and spindle
- Mould preheating ovens
- Cross conveyors
- Stackers two and three axes
- Brushes for all the type of lehrs
- Hot glass scrapers
- Lehrs for special purposes

All machinery is manufactured entirely at CAR-MET's premises, in the north-east of Italy. Our services for clients include the pre-testing and inspection of machinery before delivery.

Annealing and decorating lehrs are among the best known products of the company; research and development is the guarantee that our technology is continuously evolving.

Gas or electrical heated lehrs are manufactured by means of modular design. The burners installed on the lehrs are patented by CAR-MET, adapted to almost any type of gas, having controlled air consumption. Size and configuration of each lehr is based on the space available for the installation and type of production. Heating and cooling systems installed have been developed in accordance with European energy-saving regulations; which reduce operating costs in energy consumptions.

Attention to the environment is not only reduction in energy consumption but also controlled emissions of exhausted fumes. A new technology of heat exchangers and radiant tubes has been developed, manufactured and installed by CAR-MET with the satisfaction of clients. This indirect heating technology is widely used in decorating processes to ensure the best results of final product quality.

AREAS OF ACTIVITY

Technology at the heart of our moulds and attachments for hollow glass.

CO.MI.T is an engineering company founded in 1988 and based in southern Italy.

Its core-business is to design, develop and manufacture moulds and accessories for hollow glass.

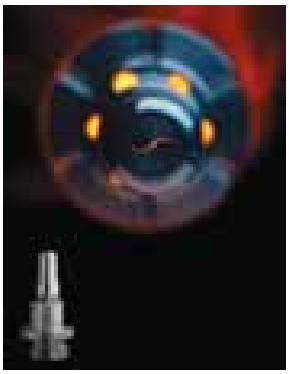
CO.MI.T has inherited Marcon's 30-year experience and background **in glass mould production**.

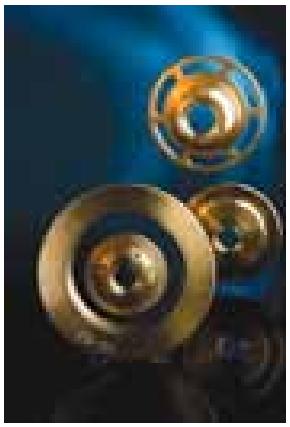
CO.MI.T's manufacturing expertise is enhanced thanks to our close contacts with the world's leading glass container manufacturers, thus taking CO.MI.T to its position as one of the leading suppliers of mould parts both in Italy and in the rest of the world.

We firmly believe that our continuous investment in state-of-the-art **technology** is the best way to deal with the fast changing market. To best meet our customers' needs, CO.MI.T offers an effective and complete assistance at your own locations.

Manufacturing compliance is monitored under our quality management system which is recognized internationally and certified according to **UNI EN ISO 9001.2000**.

Our goal is to be the best partner for the glass container industry in the design and manufacture of moulds and accessories for hollow glass.





Our main characteristics:
- State-of-the-art technical department
- Exclusive use of certified raw materials
- Cnc machines of the latest generation
- Qualified and skilled working team
- Full versatility of internal production
- Great sensitivity to the environment

Our production:

Comit manufactures MOULDS and ACCESSORIES FOR THE HOLLOW GLASS INDUSTRY, such as:
- METALLIZED (OR NOT) BRONZE-ALUMINIUM NECK-RINGS;
- METALLIZED CAST-IRON NECK-RINGS;
- NICKEL INSERT NECK-RINGS;
- NICKEL GUIDE RINGS;
- METALLIZED CAST-IRON AND BRONZE GUIDE RINGS;
- METALLIZED CAST-IRON AND STEEL PLUNGERS;
- PLUNGERS N.N.P.B.
- PLUNGERS B.B.

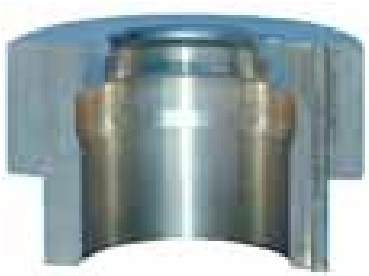
Glassman Europe 2011
Barcelona, Spain - 25/26 May 2011



RANGE OF PRODUCTS

- **COATING OF MOULDS**
- **MOULD MAINTENANCE EQUIPMENT**
- **WELDING OF MOULDS & ACCESSORIES**

AREAS OF ACTIVITY

ISO 9002 certification for welding materials

Commersald was founded in 1973 and became a joint stock company in 1980. The company's premises, located in Modena, Italy, cover an area of 2,800 sq.m. Commersald has a branch in Milan and sales agents all over Italy.

Commersald's Koy trademark is the most complete and best diffused line of welding materials in Italy. The sales quality system of our welding materials has been certified UNI-ISO 9002/94 since December 1996. Later, we gained prestige and experience in selling metal super-alloys in powder deposited largely by P.T.A. (Plasma Transferred Arc with powder), and we built a plant for producing P.T.A. welding machines, followed by automized systems for Tig, Mig and Plasma weldings.

ROBO 90 is the latest evolution in welding stations for cast iron and bronze surfacing on glass moulds using the P.T.A. filler method. There are already several automated Commersald plants in operation in Europe for surfacing glass moulds (for use on mould bottoms, mould neck rings - both fully-surfaced and partially-surfaced along single edges, rings, moulds). Some mouldmakers have already purchased a second welding station identical to the first and others have purchased a third. This clearly shows their satisfaction with Commersald's products. The CNC+PLC programming system now includes the new ISO language system and can be used for a twin welding station. The plants have the following characteristics:

- a torch with a tapering nozzle, able to work in 200 A continuous cycle on neck rings of all diameters, with constant penetration on the whole profile;

- 80kg max surfacing moulds, with pre-heating of pieces at temperatures up to 300°C for cast iron moulds and 400°C for bronze moulds;
- 20mm-thick metal structure, arc-welded, quench and tempered steel with machined locator tables;
- programming simplified by the use of icons and windows.

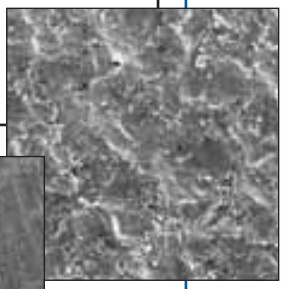
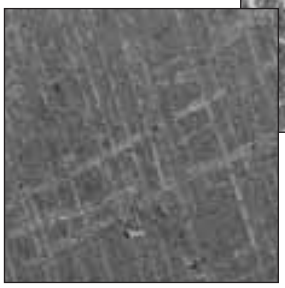
ULTRASOUNDS VERSUS SANDBLASTING

Ultrasounds	Sandblasting
1,800,000 bottles	800,000 bottles
Maintains brilliance and smooth flow of forming glass inside the mould	Mechanically aggressive with altered roughness of moulds
Saving of raw material due to unchanged dimensions of the mould cavity	





AREAS OF ACTIVITY

Ecotecne, located in Galliera Veneta, Italy, is a leading manufacturer of ultrasonic cleaning equipment.

The company has recently released a new line of solid chemicals to foster the ultrasonic action of its system for cleaning the moulds used in the hollow glass industry. The new chemicals – Ecobasic and Ecoacid – continue Ecotecne's tradition of integrating the latest technologies into its high-quality, easy-to-use plants. The chemicals have been developed in-house with the assistance of regional universities and with the collaboration and technical expertise of a private laboratory specialized in formulating new chemicals for current industrial use.

The new chemicals now feature:

- powder form = products are added on site into the cleaning tanks and no longer transported and manipulated in liquid form;
- low concentration = 8%-9%;
- increased chemical efficiency;
- less volume, which also means minimum storage, reduced transportation costs, reduced ecological impact, reduced transportation risks – solid compared to liquid form.

Products are supplied with instructions and can be easily managed by any operator without additional precautionary measures, unlike those normally in usage.

Ecotecne's team has, moreover, during the past two years, reviewed and innovated all parts of its patented machinery and its ultrasounds generators are now more powerful and multi-frequency, and can provide surplus energy whenever needed to achieve in-depth cleaning of particularly dirty items.

Transducers have been re-designed and upgraded in order to support and transmit maximum power efficiently, while the cleaning cycle has also been revised. In this way, Ecotecne can now offer the same quality of service and cleaning effect with different system sizes, ranging from the manual single-tank ECO1 to the most sophisticated, fully automated seven-tank ECO7.

AREAS OF ACTIVITY

Founded in 1976, Electroglass is an established independent specialist in all-electric glass melting and conditioning, electric boosting and related systems.

Based on decades of experience and ongoing technical development, Electroglass provides the most up-to-date technology for electric furnaces, forehearths and boosting systems for all glass types, as well as precision control bubbling and ancillary equipment, such as glass level sensors, throat heating and drain systems.

Supply scope includes design and specification, equipment supply and installation, plus commissioning of individual specialized equipment or complete system packages.

Electric furnaces ranging from 200kg to approximately 250 tonnes/day provide operating economy and glass quality assurance in volatile and non-volatile glass types. High efficiency Convection Current Control boosting for fuel fired furnaces with installed capacity between 50kW and over 3MW enable significant tonnage increases, improved glass quality, reduced energy consumption and extended furnace life.

Electroglass Temptrim forehearth heating systems allow compensation for temperature imbalance across wide fuel-fired forehearths and can greatly reduce gob weight variations in container glass production.

Electroglass insulated, water-cooled electrode holders - Super "Molycool" and "Splashguard" are available for horizontal and vertical applications.

The company is based in south-east England, close to all major international connection points and able to offer worldwide installation and service, with specific representation in China, Korea, Japan, Central and South America, Taiwan and the United States.

AREAS OF ACTIVITY

EME is a leading supplier of batch and cullet handling equipment and systems for the glass industry. Established more than 75 years ago, the company has a long history of service to the glass industry and has been part of the SORG Group since 1987.

One of the main activities of EME is the design, engineering and supply of turnkey batch plants, comprising equipment for raw material acceptance and storage, transport, dosing, weighing and mixing. Modern glass manufacturing operations demand high quality standards and EME installations offer high levels of accuracy and reproducibility coupled with fully automatic operation. The use of environmentally friendly technology minimizes emissions.

Computer control systems are used to provide both accurate and transparent control. EME visualization technology presents the operator with a clear and detailed picture of the operational status of all parts of the system at all times. In most cases operator masks can be configured in the local language.

EME can offer a range of equipment for cullet treatment, including the new generation ZWB crusher. The company is also able to supply complete cullet treatment plants.

After preparation, the batch and cullet has to be charged into the melting furnace, and EME can offer a batch charger design to suit all types of furnaces, including the innovative EME-NEND® charger that is currently revolutionizing charging in the container sector.

In recent years, EME has supplied and installed complete batch house systems for the manufacture of a range of different types of glass products, including containers, float glass, lighting ware, E-glass textile fibers and TV tubes. These installations are to be found throughout Europe, North and South America, Africa, the Middle East and Asia. Many of the installations have been made on a turnkey basis in which EME has been responsible for the supply and installation of the complete batch house with the exception of the building itself.

RANGE OF PRODUCTS

- **GLASS CONTAINER AND GOB FORMING**
- **COLD-END INSPECTION**
- **REFRACTORY PARTS**

AREAS OF ACTIVITY

As the world's leader in equipment, services, and technology solutions, Emhart Glass continually sets new standards for glass container production flexibility. Offering the widest array of products available, Emhart Glass is able to meet the requirements of glass-makers regardless of their technology level, to become the solution provider for the glass container industry.

FleXinspect T

Forming Machines

As the inventor of the modern-day IS machine, Emhart Glass revolutionized the glass production process. Today the machine portfolio includes:

- IS 4 $^1/_4$" → SG, 4 $^1/_4$" DG, 3" TG
  IS 5" → SG, 5" DG, 85mm TG
  IS 5 $^1/_2$" → SG, 5 $^1/_2$" DG
  IS 6 $^1/_4$" → SG, 6 $^1/_4$" DG, 4 $^1/_4$" TG
- AIS 6 $^1/_4$" → 6 $^1/_4$" DG, 4 $^1/_4$" TG
- NIS 5" → 5" TG, 95mm QG, 6 $^1/_4$" DG
- SIS Machine
  Package → 4 $^1/_4$, 5", 5 $^1/_2$, 6 $^1/_4$

Glass Conditioning and Gob Forming

From the advanced design of the 555 servo feeders to plungers, gob distributors, and shears, Emhart Glass offers a full range of glass conditioning and gob forming equipment incorporating the latest technologies.

Control Technology

Controls from Emhart Glass are at the heart of the forming machine, which direct the key processes – ranging from conditioning the molten glass, to the seamless integration of complex mechanisms in the glass production process. Today, the FlexIS Process Control System is the primary control system for the forming machine, and will be the foundation for advanced process feedback and automation systems.

Ware Handling

Emhart Glass products include a complete line of leading technology servo-electric mechanisms that include take-out, the Flex Pusher, ware transfers, and conveyors.

Inspection Systems

Emhart Glass provides quality assurance solutions designed to meet almost any inspection requirement. The Emhart Glass "total choice" portfolio includes the new FleXinspect family, consisting of the most precise mechanical and vision inspection machines, as well as high-precision on-line statistical sampling systems.

95mm Quad Gob configuration for NIS

Hot End and Cold End Technical Services

As the technology leader and solution provider in the glass container industry for more than 90 years, Emhart Glass is able to offer a comprehensive portfolio of customer service, training, customer process support and project mangement.

A modern training center in Sundsvall, Sweden offers modern and up-to-date theoretical and pratical training on all Emhart Glass hot-end equipment. In addition to the training center in Sundsvall Emhart Glass established a satellite hot end training center in Johor Bahru, Malaysia.

For the cold end, Emhart Glass opened a new Technical Service Center in Cham Switzerland which serves as the central training, service and demonstration facility for the Central and Eastern European, as well as Middle Eastern and African markets. Other cold-end technical service centers are located in Clearwater, Florida and in Johor Bahru, Malaysia.

AREAS OF ACTIVITY

Automatic handling of non-round containers is becoming a strong challenge of the glass market and Emmeti/Sipac are world leaders in designing, manufacturing and commissioning turnkey lines with tool-less replacement of job change parts.

Reverse tapered, flask, rectangular bottles are easily handled by our layer forming device equipped with tulips, bladders or sweeping guides depending on shape and stability of bottles. Our new continuous robotic "stacker" for highly unstable bottles can achieve the speed of 16 cycles/min on a single row, thus reducing the number of required in-feed lanes; consequently eliminating the need of a bottle divider and minimizing space requirements.

A new self-adjustable tulip head with two brushless motors has been designed to pick up complete layers of bottles, space and place them into thermoformed trays to avoid any contact between bottles during packaging process and transportation to customer's plants.

You can rely on the expertise of our companies and the numerous successful installations all over the world, with technology that begins immediately after the annealing lehr with vibrating plates designed to move unstable bottles to the conveying line without touching each other.

Beside complete cold-end lines, we also supply bottle orienting machines for non round containers. They are supplied in three stages: bottle spacer, camera vision system, bottle orienting device by lateral belts. Speed approx. 300 bpm depending on stability of bottles.

The close synergy of our two companies enables customers to rely on a single supplier for their turnkey projects, from lehrs to finished pallets into the warehouse.

Nowadays a key factor for the success of your project!

RANGE OF PRODUCTS

- **CONTINUOUS FURNACES**
- **FOREHEARTHS**
- **POT AND DAY TANK FURNACES**

AREAS OF ACTIVITY

Falorni has been consolidating its experience for 25 years in ready-to-use furnaces for glass factories.

We take care of your furnace step by step; highly experienced personnel will skilfully engineer each phase, including design, assembly, transporting, installation, running and after-sales service.

Each plant is specifically designed according to the customer's needs. Our key words are: high-quality building materials, high-tech research, optimized and reliable solutions, user-friendly plant management.

The range of our products is:

MELTING FURNACES MACHINES
- Continuous melting furnaces
- Working-ends and forehearths
- Colouring forehearths
- Oxy-fuel melting furnaces
- Fully electric Day Tanks
- Day Tank furnaces
- Pot furnaces

COMBUSTION AND CONTROL SYSTEMS
- Combustion and control systems for continuous melting furnaces
- Furnace pressure control systems
- Glass level control systems
- Temperature measurement instruments
- Thermocouples and optical pyrometers

COMPLETE BATCH PLANTS
- Batch charging machinery
- Batch mixers
- Conveyor belts
- Dedusting and filtering systems

HOT FORMING MACHINES
- 4-, 5-, 6-Axes Gathering Robots
- Semi-automatic blowing
- Spinning
- Pressing
- Hydraulic Injections
- Press-blowing
- Second-hand machinery

FALORNI is able to provide complete plants starting from raw materials storage and mixing plants up to annealing furnaces.

Customers can refer to Falorni with a glass sample or with a drawing and request consulting regarding the feasibility of their project. We will analize the feasibility of the project taking into account: investment costs, production costs, attainable quality referring to the number of pieces that they need to produce.

We supply turnkey plants, it means that the plant will be delivered launched and with all the machines in production, whether it be the supply of a complete plant, a single furnace or machine.

AREAS OF ACTIVITY

FAMOR has been working in the industrial mechanics sector for over 40 years, holding a highly prestigious position, achieved by providing a high level of professionalism, skill and reliability in both our technical structures and the quality of the production entrusted to us.

Our area of expertise include:
- design, construction and revamping of mechanical equipment used in glass production;
- design and construction of moulds and equipment used in manufacturing friction linings (wear rings, brake shoes, brake pads, etc.) Adherence to delivery times, client references and productive potential constitute our main strengths.

Our clientele is represented mainly by leading national and international industries.

The experience gained in all these years has enabled us to become specialized in the reconditioning and construction of spare parts for H28 machines, as well as for other machinery for the production of hollow glass.

Glasstec 2012
Düsseldorf, Germany - 23/26 October 2012

RANGE OF PRODUCTS

- **SCREEN PRINTING MACHINES**
- **DECORATION LINE ACCESSORIES**

AREAS OF ACTIVITY

Fermac has been manufacturing screen printing equipment for hollow glass items for almost 20 years.

Fermac supplies its clients - from small workshops to big international glassmakers - in more than 50 countries through a complete network of agents.

Fermac, which has delivered more than 300 machines worldwide, is now recognized and well-known for the quality and the reliability of its machines.

The range of products is composed of: R series (for bottles), T series (for tumblers), M series (semi automatic version).

In each series, we propose different versions from 4 up to 8 colours and from 55 up to 100 parts/min.

The mechanical concept of the first RVB128 version became the semi-electronic R122, then the fully electronic R123.

Fermac has improved the existing system by introducing CNC technology, which provides improved characteristics (speed and accuracy) and a more user friendly interface for operators.

Most parameters of the machines can be saved in the memory bank and recalled for production changeover.

For some specific products recently on the market (bottles without mechanical notches), it is now possible to realize angular registration with a camera vision system: the CENTRUM device, which has been developed exclusively by Fermac and an Italian partner specialized in camera vision system for printing machines.

This system can register the mould line on the bottle, or a transparent window on acid etched glass, as well as a flux to overprint gold on flux or simply a previous printing to increase the number of colours.

With the new output of its machines, and motivated by the will to fully automate its lines, Fermac has also developed a camera vision system – SPECTRUM – to check print quality.

This enables to create fully automated modules and allows the lines to be running with lower labour cost.

Continuously following market expectations: more sophisticated shapes, different printing processes: thermoplastic enamels or UV inks; Fermac has developed the F08 fully CNC controlled machine for printing developable shaped objects with up to 10 colours of thermoplastic enamels and up to 5 colours of UV inks.

This machine is the latest development and reaches very high output with extreme accuracy on any type of developable profile.

Most of the main decorating companies have formulated the need to have very flexible equipment able to fulfil any client request in terms of decoration, along with very good productivity.

The focus has been brought to an easy and very quick changeover following the SMED philosophy.

With the technology of UV inks, Fermac started to change the original concept of the conventional process studying systems to realize pre-treatment on glass objects: UVITREAT to realize a silane coating on the glass surface in order to improve the adhesion of UV inks.

Most of Fermac's machines can be retrofitted to receive UV dryers.

A new market, which is always very dynamic and innovative, is that of cosmetic glass bottles, where marketing of big cosmetic groups is always looking for innovative printing capacity to respond to new creative designs.

Fermac has decided to develop a linear machine with a modular concept from 1 to 4 colours in order to be able to decorate any developable shaped cosmetic bottle.

This system will have the possibility to additionally receive a UV dryer or a quality control system according to the evolution of market needs, and in response to client expectation and outlooks.

As per Fermac's after-sales service, most of the machines now benefit from teleassistance by modem or Ethernet card which enables very quick troubleshooting, upgrade or maintenance, even at very long distance.

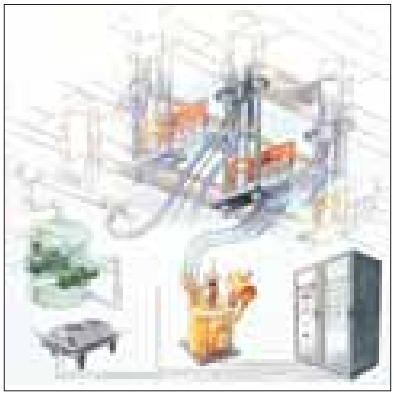
Glasstec 2012
Düsseldorf, Germany - 23/26 October 2012



AREAS OF ACTIVITY

F.I.C's reputation for leading the world in glass furnace technology enables it to call on unparalleled expertise and experience when fulfilling client's needs. Its innovative and technology led approach, allows a unique degree of customising to ensure that client needs are met with optimum efficiency and cost-effectiveness.

Part of the BMT Group of Companies, F.I.C., based in Cornwall, England was the first company in the industry to be accredited with ISO 9001. Able to call on the specialization of over 200 experts worldwide, it continues to lead where others follow.

F.I.C's expertise lies in the design and manufacture of electro-heat systems for melting, boosting and conditioning in a wide range of glass types and manufacturing processes.

The F.I.C. Distributed Electric Boost Systems cover all glass types and end users. F.I.C. is the only supplier of boost systems to the float glass segment with more than 50 float furnaces boosted worldwide and this experience in a demanding high quality glass market flows through to other segments such as continuous fibre, PDP and TFT glasses, tableware and containers. Electric boost offers the flexibility needed to respond to today's unpredictable market forces, additional glass for little capital outlay, improved quality, especially with coloured glass, as well as rescue operation, buying time until a furnace repair can be carried out.

Within the range of electrode holders manufactured by F.I.C. to achieve 'in-glass' heating is the unique High 'Q' Holder, the ultimate in cooling efficiency and trouble-free maintenance. Its cooling circuit, replaceable in minutes by only one person with three tools and no specialist skill needed, obviates the need to remove electrode and holder body. Devoid of critical welds, it eliminates hazardous water leaks.

Ideal for more aggressive glasses or cold top all-electric furnaces with top electrode systems. F.I.C's Maxi 'Q' No-Weld Electrode Holder has no weld inside the furnace refractory blocks, with the result that there can be no leakage of water into the furnace itself in the event of inevitable wear to the furnace refractories.

A solid end-piece with specially designed waterways allows for a 55% increase in the flow of water, thereby improving efficiency.

F.I.C. also supplies a full range of electrode holders to include splash-cooled and conventional holders.

A major improvement in glass conditioning practice is embodied in the F.I.C. High Vapour Pressure (HVP) Forehearth, the unique design of which incorporates thin 'muffle tiles' made of strong, highly conductive fused-cast refractory to eliminate volatilization losses of glasses such as lead and borosilicates.

Particularly suitable for the coloured glasses and NNPB production the company's Isothermal Unit ensures increased thermal efficiency in the forehearth and consequent homogeneity in the gob, crucial to good quality production and maximising capacity.

F.I.C. is a worldwide sales and marketing partner for the High Emissivity Nano-Particle coating technology by Emisshield©. These ceramic coatings improve the radiant heat transfer from the furnace superstructure to batch and molten glass and is proven to offer the following benefits:- Fuel savings of up to 10% and protection of refractory surfaces leading to longer furnace life.

These coatings also offer advantages in other areas of the furnace such as forehearth, lehrs and moulds and other areas of the process.

F.I.C. provides a full range of on-site services to include: hot drilling, electrode advancing and re-positioning, pre-emptive maintenance and the very latest in mathematical modelling.

AREAS OF ACTIVITY

Fima Olimpia Fonderie is a foundry producing castings in special cast iron for glass moulds. Thanks to highly technological production facilities and advanced control instruments, we offer the market high quality products at competitive prices.

The logistic and technical organization allows the company to have quick solutions in productive terms as well as in customer service.

Fima Olimpia Fonderie is a customer-oriented company placing client needs as its priority from smaller to larger companies.

The company is concentrated on research and development in order to offer the highest quality products and has had ISO 9001 certification since 1997.

Fima Olimpia Fonderie employs over 50 people and offers its clients:

- more than 30 years of foundry experience
- all the new technologies in terms of design and production of moulds
- new plants in order to have the maximum productive capacity
- 14 different kinds of special cast iron that allow to satisfy all customer needs
- a modern analysis laboratory that gives us the capacity to monitor production constantly
- high speed deliveries within 7 days from the date of the order to all European countries
- competitive price on international markets.

AREAS OF ACTIVITY

The company consists of a technical department with advanced computer technology (CAD 2D, CAD 3D, FEM, CFD) for the design of machines, plants, forehearths and furnaces with a capacity of up to 1,000 tonnes/day.

F.I.R.E. s.r.l. can also supply customers with:

- Turnkey plants
- Single engineering services and design
- Design and supply of plants, steelwork and piping
- Certified machines and equipment
- Furnace, distributor, forehearth and boosting system automation
- Technical consultancy to optimize furnace physical processes
- Industrial electrical plants
- Water treatment plants
- Industrial automation and instrumentation
- Process control
- Signal transport with both traditional technologies and bus field technology
- PLC and PC (SCADA/HMI) software for supervision of plants

International Patented SHP Forehearth

F.I.R.E. s.r.l. is able to supply both partial and turnkey furnace repairs involving the following:

- Glass drainage
- Demolition
- Waste management
- Construction
- Hot-sealing
- Commissioning

International patented Flat Burner

F.I.R.E. s.r.l.'s core skill is technology. F.I.R.E. has developed and patented innovation such as the Flat Burner (to improve combustion and reduce NOx) and the SHP Foreheart (to save gas-energy and building costs). More details will be released upon request.

AREAS OF ACTIVITY

Fluorital is a dynamic company located near Venice, Italy, which boasts 20 years' experience in the research and production of organic paints and silk-screen inks for glass decoration.

The application fields of its products include the perfume/cosmetic industry, wine and spirit bottles, tableware, flat glass for furniture and interiors and lighting glass.

Fluorital produces spray varnishes, roller varnishes, and screen printing inks of different types: water-base, UV-curable and solvent base. All products are lead and heavy-metal free.

All products can be applied directly onto glass, as they do not require any expensive primer or other special surface treatments. They are curable at low temperature or with UV lamps, enabling important energy savings compared with traditional high temperature products.

Mechanical characteristics of adhesion on glass and scratch resistance, as well as chemical-physical resistance to water, steam, pasteurization, alcohol, detergents and strong solvents, make Fluorital products the top reference for the market.

Fluorital invests considerably in research and today, beside the more consolidated products continuously updated, the company offers a complete range of organic products for glass decoration at low temperature.

Fluorital research is now even more concentrated on water-based products and UV reticulation products, for spray application, screen printing, curtain coating application plants and roller machines, these latter specifically for flat glass decoration.

Finishing and colours are an integral part of Fluorital research to satisfy architects' requirements following and anticipating fashion trends. So far, special finishing such as water-based soft touch with elevated scratch-resistant or water base mirror-like effect were created for the first time by our research department.

Certified ISO EN 9001, Fluorital produces quality and elevated performances to colour your imagination.

AREAS OF ACTIVITY

Fonderie Bartalesi was founded in 1962 and it is now one of the primary manufacturers of alloys for moulds, neck rings, bottom plates and baffles for the production of glass bottles and jars.

The company concentrates on research and development in order to offer the highest quality products on the worldwide market and has ISO 9001, ISO 14001 and SA 8000 certifications. Fonderie Bartalesi has got about 30 employees and can offer its customers:

- more than 30 years of experience in glass line;
- a new plant in order to have maximum production capacity;
- more than five cast tons per day of bronze alloys for the production of moulds for the glass industry;
- specialized production of bronze neck rings with Ni-inserts;
- five different types of bronze aluminium for the glass industry;
- catalogues for standard models of bottom plates, baffles and neck rings;
- special production on customers' request;
- dimensional tests, chemical analysis, laboratory trials, metallographies;
- high speed deliveries within 7/15 days from the date of the order to all European countries;
- competitive prices on international markets;
- continuous updating regarding new technologies;
- specialized production of alloys to be welded;
- new bronze alloy studied and tested by the company to produce moulds. Maximum thermal conductivity - maximum hardness - maximum mould cleaning - facility in welding - production redoubling.

AREAS OF ACTIVITY

Fonderie Valdelsane – 50 years of activity!

Fifty years of continuous research and development that have enabled the company to reach a high level of specialization regarding its production and services for the worldwide hollow glass sector.

In the past few years, Fonderie Valdelsane has developed its ability to understand the needs and demands of the market, creating strong partnerships with the most important glassworks groups, which have led to the development of innovative materials, now worldwide references in the hollow glass moulds sector.

At the same time, the company has also developed its services, now entirely customized as per the individual needs of each client.

Research in technologies, production and organizational processes, along with continuous training and updating of human resources, have been and are the winning combination of Fonderie Valdelsane in reaching its present position of worldwide leadership.

Technology:
- catalogue of material with 15 types of cast iron and 5 types of specific copper alloys for glassmaking moulds;
- possibility of developing materials as per clients' demands;
- daily production capacity of 50 tons of cast iron and 3 tons of copper alloys;
- continuous development of new materials for the market.

Services:
- production of materials as per specific client requests;
- fast delivery of up to 7 days from order;
- direct organization of shipment to final destination;
- in-house laboratory offering – other than in-line production controls – specific testing as per client requests;
- direct pre- and post-sales assistance;
- processes and services conform to ISO 9000/2008;
- competitive prices and services on international markets.

Future investments:
- continuous investments with regards to production technologies for constant renewal and updating of plants aimed at automation;
- expansion of production buildings and external areas.

Fonderie Valdelsane: The development of ideas hand in hand with the courage of people.

RANGE OF PRODUCTS

- **ELECTRONIC CONTROL AND INFORMATION SYSTEMS**

AREAS OF ACTIVITY

The German company futronic GmbH is an electronics industry enterprise, involved in the development, manufacturing and distribution of technical systems, particularly of electronic control and information systems for hollow glass production, the packing and the mechanical engineering industry.

E-Timing systems CIMOG and EPRO

The company's family of reliable, proved microprocessor-based controllers is capable of meeting a wide range of customer specification from IS-machine to hot-end rejection control. The E-Timing systems comply with both basic as well as the most advanced control demands over the entire glass production line.

The permanent development of the system, as well as the implementation of customer-specific functions, provides security to the investment of the customer. Today, futronic offers a set of processor boards for its CIMOG E-Timing system, which features, beneath the data integration of futronic's drive system and synchronization unit (machine processor), the execution of PLC-compatible system functions. The PLC-compatible system functions, which are defined in a STEP5 compatible programming language, offer a member of possibilities to process external events, e.g. cullet water ware rejection in the case of jamming at hot-end coating, monitoring the air pressure and so on.

E-Timing system FMT24S

The FMT24S is a state-of-the-art distributed machine control system. It consists of modules which are networked with each other and use, to a large degree, industrial busses for their communication. Expansions with FMT24S specific modules, but also with standard, bus-capable digital I/O modules, analog I/O modules and interface converters etc. are possible. Further features to those above include:

- Full servo integration,
- CANopen® safety bus,
- Valve current monitoring,
- Analogue actuating elements,
- Integrated electric overrides,
- Networked PLCs,
- Mushroom-head push-button without additional wiring,
- Internet technology.

The modular technology used in the system, and its style of integration, offer customers a high degree of flexibility. Each installation is manufactured specifically for that particular customer, taking into account special local conditions, environmental conditions and investments already made.

Training Systems CIMOG, EPRO, FMT24S

For all E-Timing systems (CIMOG and EPRO, FMT24S), futronic offers a training system which contains the same processor boards as the E-Timing system. It is an ideal piece of equipment for soft- and hardware training, trouble-shooting testing and repair, and it can also be used as stock for genuine processor boards. By adding a separate power supply, it can drive two sections of an IS machine, providing all functions.

Synchronous Drive System (FDU24S)

Based on the experience of more than 190 installations of drive systems, futronic has introduced its latest co-production: The Synchronous Drive FDU24S allows the use of Servo motors and is completely operated by means of a PC.

The Synchronous Drive FDU24S can be integrated into a futronic E-Timing System enabling the operator to control both E-Timer and Drive System with the same terminal and control software (OT), eliminating the need for separate adjustment.

AREAS OF ACTIVITY

Glass Service provides the highest standards of technology applied to the hollow glass industry. The Italian company designs, produces and maintains a wide and complete range of equipment.

GLASS MELTING TECHNOLOGY DIVISION

- automatic and semi-automatic batch plants and cullet recycling plants
- day tanks and pot furnaces
- recuperative and regenerative continuous melting furnaces
- boosting systems
- forehearths
- colouring forehearths with frit dosing systems
- batch chargers
- heat recuperators for day tanks and continuous furnaces
- automatic control level machines with platinum probe, with or without electronic controller
- stirrers and stirring machines
- control boards
- combustion systems for any kind of fuel, gas, oil and reversal plants
- burners for any kind of fuel, gas, oil
- special machinery for the glass industry

Moreover, the company provides a complete assistance service for customers, assembling and maintaining all the supplied plants. Start-up and training are also provided.

ROBOTICS DIVISION

Glass service is, today, a leader in the field of robotics for the glass industry.

- Gathering robots (4-, 5- and 6-axes)
- Blowing robots
- Suction robots
- Fire polishing robots
- Handling robots

AREAS OF ACTIVITY

Gruppo Minerali Maffei S.p.A. is the holding company of four firms, which have been operating in the glass and ceramic raw materials sector for many years. Currently, the following companies produce raw materials for the glass and ceramic industries:

- MAFFEI SARDA SILICATI S.p.A. - sands for flint glass and solar glass;
- MINERALI INDUSTRIALI S.p.A. – sands for containers, technical and float glass; blast furnace slag (Vitrite) for container, tableware, technical glass (Grade F) and for float glass (Grade VP);
- MINERALI INDUSTRIALI TUNISIA SA – sand for float glass and container glass;
- EGYPTIAN INTERNATIONAL INDUSTRIAL MINERALS S.a.e.- sands for containers, technical and float glass, solar glass.

Gruppo Minerali Maffei products are able to satisfy all the most demanding sectors of flint glass: food and perfumery containers, articles for tableware and lighting, artistic, technical glass and solar glass. The following table contains the chemical characteristics of some of the raw materials produced by Gruppo Minerali Maffei companies. Constant product quality is assured by a strict process control system and by systematic chemical and granulometric analysis.

CHEMICAL COMPOSITION		SAND TYPE			
		V2FA	120ppm	Float Grade	Extra Grade
SiO_2	%	96.8	99.6	99.2	99.5
Al_2O_3	%	1.40	0.20	0.40	0.10
Fe_2O_3	%	0.012	0.012	0.055	0.023
K_2O	%	1.10	0.05	0.10	0.10
TiO_2	%	0.01	0.01	0.04	0.01

Gruppo Minerali Maffei staff is able to give all necessary information about the company's products and provide technical assistance. They can also advise clients on the most economic solutions.

AREAS OF ACTIVITY

Glass Technologies Srl, a member of the BDF Group, is a leading supplier of Engineering Services to the worldwide glass industry, specializing in the design and supply of Furnaces and Forehearths for hollowware, tableware, tubing and fiber.

A complete range of furnace types are available, recuperative and regenerative, from 5 to 500 tonnes/day, together with conventional and advanced forehearth systems providing control levels appropriate for NNPB Production. Forehearth pull rates range from 5 to 170 tonnes/day for containers, cosmetics, tableware, neutral and standard tubing and fiber.

With fuel savings and low emissions in mind, we design and produce all furnace system equipment including:

- Waste gas reversal and pressure dampers
- Fuel oil and gas combustion systems
- The most advanced batch chargers in the world
- The most advanced non-contact glass level control systems
- Electric boost systems
- Bubblers
- Advanced process control and data logging
- Video cameras

AREAS OF ACTIVITY

With almost 100 years experience in innovative research, engineering development, and manufacturing execution, H.C. Starck is uniquely positioned with a diverse product portfolio of high performance, refractory metal solutions for critical glass melting applications. H.C. Starck is an international company with more than 3,000 employees at 12 ISO-certified production locations in America (USA, Canada), Asia (China, Japan, Thailand), and Europe (Germany, UK) as well as sales and business offices in more than 30 countries.

At H.C. Starck's premier extrusion and forging facility, large diameter molybdenum tubing suitable for quartz melting vessels, orifice plates, and mandrels is extruded. Fabrications from molybdenum sheet with forged molybdenum internals are manufactured as value-added products: glass melting electrodes, crucibles, extruded tubes, and other components for the glass industry. H.C. Starck's molybdenum, with its exceptional purity level (99.95% minimum), has outstanding resistance to chemical corrosion, degradation, and minimal detrimental glass discoloring.

Regarded as is one of the environmental leaders in ethical sourcing and reclamation of materials, H.C. Starck offers its customers recycling services of refractory metal products. With a vertically integrated supply chain and the recycling of refractory metal products, H.C. Starck is driving innovation in material reclamation and sustainability. In addition, H.C. Starck's Responsible Supply Chain Management (RSCM) system prevents the introduction of illicitly sourced raw materials into the manufacturing supply chain, and has received certification by the Electronics Industry Citizenship Coalition (EICC) as a supplier of conflict-free tantalum materials.

Glass Melting Electrodes:
Molybdenum Glass Melting Electrodes from H.C. Starck provide the industry with high standards for efficient glass melting and electric boosted melting. The high-temperature strength and rigidity of molybdenum electrodes, plus the inherent electrical properties of molybdenum, provide maximum operating efficiency. The exceptional purity level of H.C. Starck's molybdenum electrodes (99.95% minimum) achieves outstanding resistance to chemical corrosion and degradation, and minimizes detrimental glass discoloring.

Oxidation Resistant Coating:
Reliable and reproducible, MURIDE coating gives protection against oxidation from air, oxygen-rich atmospheres, oxidizing chemicals and flames. Chemically bonded to metal surfaces, it will not separate or spall. The coatings are applied uniformly to all surfaces by a chemical vapor deposition.

Molybdenum Rotary Targets:
H.C. Starck provides molybdenum or tungsten fabrications of rotary targets for large area coating and solar cell applications. Our best-in-class extrusion facilities can produce molybdenum rotary targets with inside diameters of 125mm (monolithic) and 135mm (bonded) applications in molybdenum up through the current largest rotary target requirement.

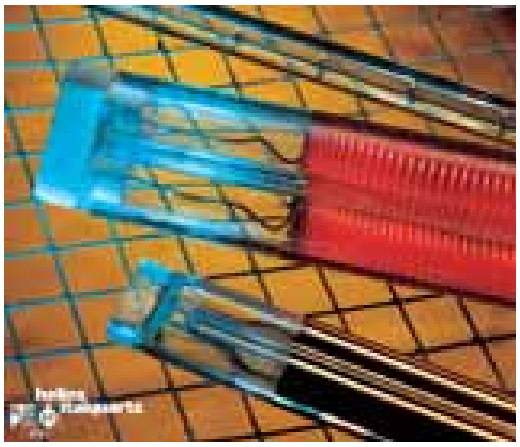
AREAS OF ACTIVITY



Since 1940's Helios Italquartz, based in Milan, Italy, has been manufacturing quartz equipment such as ultraviolet lamps, infrared tubes and production machinery. The company's production is utilized for a wide range of applications in various sectors.

The Helios Italquartz product range destined for the glass industry includes:

- quartz IR short-, medium- and fast-medium-wave mono- and twin-tube emitters with or without gold-coated reflectors, utilized for cutting laminated glass with PVB annealing, bending, plastic film coupling and screen printing, float glass and mirror processing for any oven range;
- UV high-pressure lamps for enamelling, drying and screen printing inks, paints, UV reactive coatings and adhesives for the decorating and furnishing sector;
- Helios-Italquartz Polymer equipment;
- Automatic tin side detector;
- Helios Italquartz Manwood-25 equipment for tinned glass sheet coated side recognition.

Thanks to the company's experience, Helios Italquartz is able to successfully solve any technical problems in the UV and IR radiation field.

AREAS OF ACTIVITY

Quality and Innovation in glass engineering technology
At Heye International, our goal is very simple: to be the leading supplier of expert services & solutions and high performance equipment to the container glass industry.

For more than 50 years we have set the standard in container glass technology. Our reputation for quality and innovation has been established by developing high-productivity machines and equipment together with sophisticated glass production technologies, and by building a team of highly skilled engineers and technicians.

Heye has extensive knowledge of the day-to-day issues of glass manufacturing.
We specialise in the engineering and construction of complete glass container manufacturing plants and enjoy a worldwide reputation in the transfer of high-performance technologies and manufacture of high-performance machinery.

Our product portfolio is based on:
- **HiPERFORM - Forming Technology for Efficient Production**
- **HiSHIELD - Inspection Technology and Quality Solutions**
- **HiTRUST - Expert services from plant design to production support**

AREAS OF ACTIVITY

HORN Glass Industries AG has a wealth of experience in a wide spectrum including the **design, manufacture and supply of different furnace types**, such as regenerative-, recuperative continuous tank furnaces, float furnaces and electrical tank furnaces for the production of lighting ware, tableware, containers, cast glass, float glass, solar glass and technical glassware.

HORN's range of **utility equipment** includes combustion systems, control and safety equipment, electrical boosting and mixings systems, to name but a few. HORN Glass Industries AG also offers all forehearth systems, supply stations for oil, gas, oxygen, water, regenerative and recuperative burner systems, combustion equipment, boosting systems and process controlling systems of the highest standard. HORN has developed products such as the OPTIBEAM; the internationally applied laser glass level control system.

HORN has a further business section: machinery for thermal glass processing such as roller annealing-, decorating lehrs, hot- and cold-end coating stations and much more.

HORN Glass Industries AG activities generally split as follows:

Furnace engineering and supply
- engineering and planning of complete glass melting furnaces;
- individual planning and design by CAD-technology;
- supply of combustion-, control- and peripheral equipment
- start-up
- training

Furnace service
- setting-up and mounting of complete furnaces;
- hot and cold repairs of all furnace types;
- drilling and draining of tank furnaces;
- heat-up, melt-up and run-in of all furnaces;

Thermoprocess machinery
- roller annealing lehrs and decorating lehrs, which are in operation at internationally renowned glass producers and decorators
- hot- and cold-end coating stations
- special thermoprocessing machinery

EVOLUTION 20, EVOLUTION 16, EVOLUTION 12, EVOLUTION 5, EVOLUTION 1, SELECTOR

AREAS OF ACTIVITY

With a workforce of 40 engineers in Research and Development, IRIS is recognized as a leading and innovative supplier of camera glass containers inspection.

IRIS has recently launched new developments for better fault recognition in container base and sidewall. These new algorithms are focused on more sophisticated image processing able to make the difference between engraved areas and faults. The aim is to reduce the amount of faulty rejection on decorated containers such as vodka and spirits bottles. This happens with traditional technologies when the engravings produce a shadow area seen as a defect by the cameras. The solution has already been successfully tested in some European glass plants and gives amazing results.

Inventor of the 12 cameras concept

The success of IRIS' EVOLUTION 12 in such a short period of time is based on both the advantage of a multi camera system allowing a 100 per cent inspection of bottles and jars of any shape and colour and on the simplicity of operation of a fully automatic camera machine with a very user friendly Man-Machine Interface.

Easy upgrade

The name EVOLUTION chosen for the range of equipment illustrates the possibility given to the end user of the machine to easily upgrade it with the latest algorithms developed by IRIS engineers.

IRIS machines in line

The production department at IRIS

Glassmakers using IRIS machines can rely on the latest software version for their EVOLUTION machines at any time.

A full range of inspection machines

EVOLUTION 1 is a stand alone finish inspector enabling to detect faults such as LOF (Line Over Finish), blisters, stones, scaly finish, unfilled finish, overpressed and wire edge. Finish inspection is, therefore, available as a stand-alone machine, but also as an option of **EVOLUTION 5**, a machine designed for base, as well as base stress inspection and mould number reading. In **EVOLUTION 12**, the number of cameras – 12 for sidewall inspection – can be extended to 16, including 4 cameras for stress detection. EVOLUTION machines have already proven their enhanced capabilities on products as various as penicillin and pharmaceutical containers, Nutella jars, wine, beer, champagne and spirit bottles.

An international SERVICE TEAM

A reactive service team of multilingual engineers (French, English, German, Spanish, Russian, Italian…) ensures not only installation and training but also servicing of the EVOLUTION equipment during the entire life cycle of the machines.

AREAS OF ACTIVITY

KYP Accessories is specialized in the manufacture of machines that produce pharmaceutical ampoules. The company was created in 1992 and, since then, has brought new solutions to the market.

KYP technicians have more than two decades of experience with ampoule machines before working in KYP, but wanted to innovate because the machines had not been undergone innovations for many years. This means that our experience is 19 years more than the history of our company.

One of our specializations is the refurbishing and update of Moderne Mecanique forming machines MM30, which we have been carrying out for more than a decade.

Our production is tailored to your needs, providing the right solution for all your requirements, using highly advanced software and mechanical design, and using the best technology in the market.

KYP, a company with a tradition of looking to the future, offers solutions adapted to each of your requirements. It is also a firm which is devoted to real international ambitions, as it already works with more than 36 countries. Furthermore, KYP has a permanent design department at its disposal for the development of its products and the completion of projects in partnership with you; caring about the ease of use of its products.

KYP offers you the possibility of after-sales service as well as maintenance on site or in its workshops. We also offer ampoule production consulting services. But above all, KYP is a team of professionals who ensure quality and performance.

We have systems and quality norms that fall in line with international guidelines. It is our commitment to ensure the quality of final products. All the manufacturing process is carried out as per a very strict quality control, checking and assembling the pieces before each shipment.

But, for us, the most important acknowledgment is being chosen by the major companies of groups in the hollow glass sector all over the world.

AREAS OF ACTIVITY

The world's leading manufacturer of IS machines spares and variables. We continually strive to develop innovative solutions to improve ware handling and efficiency.
Products include:

- Mould Holders - A wide range available from single- to quad-gob, made from high quality ductile castings with hardened and ground steel bushings fitted as standard.
- Mould Holder Inserts - A range of inserts to accommodate any size of glass container required. Inserts can be specified with localized hardness for added wear protection.
- Blowhead Arms – Either Hinged Pin or Quick Change equipped with or without pressure plate or finish cooling. Bespoke customer specials are available.
- Takeout Tong Arms – Belt or Chain driven takeout arms are available for most machine makes, including servo driven units.
- Takeout Tong Heads - A range of lightweight Take Out Tong Heads are available from SG to QG, with Anti-Wink tong holders and X-Y adjustment.
- Pusher Units - Lattimer are the sweep-out unit of choice throughout the world. The Lattimer Pusher is designed specifically for speed, ease of maintenance and reliability.
- Neck Ring Mechanisms - Precise cylinder flights eliminate backlash, ensuring perfect forming every time. A range of standard and bespoke Neck Ring Mechanisms are available.
- Neckring Arms – A wide range of arms are available in both cast iron or cast steel.
- Baffle Arms – A wide range of baffle arms are available including a pantograph unit offering improved airflow over standard units.

AREAS OF ACTIVITY

LubroTech Solutions operates in the field of coolant lubrication and is a leader in the field of advanced and Minimum Quantity Lubrication.

For anyone working in the field of metal machining with chipping, cold pressing or in the production of hollow glass, the time has come to improve production processes and increase efficiency by saving lubricants with a minimum investment in money, technique and time.

Everything you need to optimize your hollow glass manufacturing process and improve the quality of finished ware: lubricants, coatings, sticks, swabs, release agents, spray equipment.

LubroTech Solutions is the exclusive European distributor for the products of Renite Company, Columbus, Ohio, US.

Renite Company was founded in 1932, a pioneer in the lubrication of glass-forming moulds in the manufacture of containers, tableware, lenses, scientific ware, radio tubes, block and light bulbs.

Among its best-selling products ever, Renite F-72 - a general purpose high polish blank swab dope. Competitive price and excellent performance finally combined in the very same product!

Düsseldorf, Germany - 23/26 October 2012

AREAS OF ACTIVITY

Thanks to its unique combined expertise of graphite materials, C/C composites and carbon felt insulation, MERSEN (formerly Carbone Lorraine) is able to propose solutions for the high temperature methods used in the glass processing industry.

Under the **CERBERITE®** brand, MERSEN has developed a complete range of systems and solutions dedicated to hollow glass production lines.

The use of **graphite** and **C/C composites** have become major elements in these production lines, as these materials offer numerous advantages:

- their contact does not damage hot glass;
- they are entirely resistant to thermal shocks;
- they are self-lubricating;
- they offer better resistance to wear;
- they have lower thermal conductivity than metals.

Round style TOT holders

MERSEN's **CERBERITE®** solutions thus combine metal supports and carbon consumables. The design of these systems therefore offers numerous advantages, such as:

- rapid disassembly of worn expendables;
- easy access on the production line;
- a design developed with the main equipment manufacturers;
- high mechanical properties at high temperatures.

MERSEN offers an extended range of take out tongs (TOT) that can fit all your requirements: float style with five different sizes available and round style TOT with various sizes possible.

CERBERITE® offers a full range of top plate systems. These are available in various diameters and thicknesses. The top plate systems help to eliminate finish defects and are extensively used in Europe. Recently this system has been adapted to incorporate top plate inserts as a vent plate for specialized bottle production.

Top plate insert system

Finally, MERSEN offers the assurance of the same quality level worldwide. This is achieved through local service everywhere, including machining in accordance with your unique specifications.

RANGE OF PRODUCTS

- **AMPOULE & VIAL MAKING MACHINES**
- **AFTERFORMING FINISHING LINES**
- **VISION SYSTEMS**

AREAS OF ACTIVITY

Moderne Mecanique produces machinery for the manufacture and finishing of pharmaceutical and cosmetic glass containers, such as ampoules and vials, from glass tubes.
The present range of production includes:

- **MM 30 Ampoule Forming Machine**, the most popular machine for ampoule production.
  The MM 30 can be equipped with the Roboglass automatic tube loading system, which is able to load the forming machine continuously. The machine can be integrated with:
  - **OPTISTEM/2**, an automatic stem vision device checking the forming operation by self-adjusting the oxygen flow in the last two heating burners. The new OPTISTEM/2 system will allow full dimensional control IN REAL TIME of the ampoules in order to realize 100% quality control during the forming process.
- **LA 502 Ampoule Afterforming Finishing Lines**, which handle all glass container finishing operations, such as controlling, printing, annealing and packing.
  These lines can be integrated with:
  - **Opticut™**, **OPTICUT/2** an electronic device for creating the easiest and safest way of opening ampoules, using a predetermined breaking point;
  - **Closing device** for the production of ISO form "D" ampoule;
  - Extra **colour rings** devices.
- **LF 520 and 535 Vial Afterforming Finishing Lines** are able to perform important operations such as control, printing, annealing and packing.
  The lines are produced using the well renowned technology of the Ampoule Afterforming Lines type LA and are able to match the high speed vial machines produced by OCMI-OTG S.p.A. such as **FLA 20E**, **FLA 20/S** and **FLA 35.**

AREAS OF ACTIVITY

MOTIM Fused Cast Refractories Ltd. was established in September 2000, but we have been carrying out the same activity since 1957 through our predecessors.

Being one of the world's leading producers of fused cast refractories, production capacity reaches 6.000 tons/year. The product range includes fused cast AZS and alumina refractories. Our products are mainly used in the glass and ceramic industry as well as in reheating furnaces of the steel industry. The magnesium industry is also an important market, we supply the refractories to the furnaces that electrolyze and melt metal magnesium.

Our traditional markets are Western- and Central-Europe, but we are present on all continents with our products, including America and the Far East.

AREAS OF ACTIVITY

Thanks to their 50 years' experience in the container glass market, MSC & SGCC represent today the only provider of a global solution for the glass industry. We offer a complete range of hot-end and cold-end equipment:

- I-CARE: hot-end device for production trends and stability analysis, critical defect recognition and process optimization (consistent operator-oriented tools).
- TOTAL TRACER: laser hot end engraving system for traceability down to the single container.
- MCAL: powerful vision machines for sidewall, dimensional and stress inspection.
- MULTI: base vision and base stress inspection with enhanced functionalities, an extended finish inspection range including wide mouth jars, and dot or digital codes mould number reader by camera.
- M, CHECK, Atlas & Cosmetic Argos: check detection and multi inspection (mouth gauging, leakage and tightness, wall thickness, ovalization, etc…) on the widest range of containers.
- Laboratory devices such as Seedlab (device counting and categorizing seeds to measure the glass refining mark), iAFIS, Laser +…

With their combined know-how MSC & SGCC offer a wide range of innovative and high-performance inspection devices.

AREAS OF ACTIVITY

MSK Covertech Group - Your Cold End partner

More than 30 years of experience at the **cold end** have made MSK one of the leading equipment suppliers from lehrs to warehouses with **different levels of automation**. Customers appreciate MSK engineering, software and automation competence, as well as our unique and innovative systems.

The modular construction of **MSK bottle conveying technology** guarantees a high degree of flexibility, the best possible layer pre-forming and fully automatic flow of bottle transport.

MSK's palletizing systems offer solutions whatever performance and flexibility is required. **MSK robots and palletizers** can handle bulk and cases. Thanks to **patented innovations**, down times for job changes are minimized.

MSK shrink-wrapping solutions rank among the most sold machines in the glass industry: user-friendliness, availability and safety are the distinguishing MSK characteristics, as well as efficiency and profitability. More than 500 reference projects or proven efficiencies of more than 99.5% underline MSK's leading position in the industry.

MSK EMSY visualization system controls the complete cold end with a uniform international interface. As development and enhancements have been carried out 100% in-house, MSK can tailor the system to individual needs and is independent from third parties for adaptation.

With subsidiaries and representations, MSK is located close to its customers, also with fast and economic help thanks to its 24-hour emergency and online service.

DECORATION LEHR

MT Forni Industriali, with 40 years' experience in the glass industry and successfully completed installations in 35 countries, designs and manufactures a wide range of products and services for glassmakers.

- **Melting furnaces**, gas and oil fired, for pull up to 50 tonnes and for different types of glass: unit-melter furnaces, end-fired furnaces, oxy-fired furnaces;
- **All-electric cold top furnaces** for lead crystal and fluoride, special glasses;
- **Forehearths**, gas fired or electric heated, with colouring and stirrer technology;
- **Batch chargers** and glass level control systems;
- **Heat recuperators**, double shell and tube cage type;
- **Day-tanks furnace** from 50 to 4,000kg, gas fired and all electric, complete all auxiliary equipment, heat recuperators and combustion, control systems;
- **Pot furnaces**, for single and multiple pot, gas fired and all electric, complete with all auxiliary equipment, particularly suitable for lead crystal and coloured glasses;
- **Annealing and decoration lehrs**, with belts up to 4 metres wide, for hollowware, tableware, special glass, etc. Main features are the automatic temperature control system, optimized insulation for very low energy consumption, temperature uniformity, modular design and zero maintenance;
- **Static annealing and decoration kilns**, from 1m^3 to 5,5m^3;
- **Bending furnaces** for flat glass, specially designed for decorative and architectural purposes, for the lighting industry; bending furnaces for glass basins and special shapes;
- **Tempering lines** for tableware, belt and spindles type;
- **Complete production lines** for high voltage glass insulator shells;
- **Mould preheating furnaces**, preheating tunnels for stems and bowls;
- **Conveyors, cross conveyors**, transfers for hollow glass;
- **Glory-holes, pot arches, laboratory – studio furnaces** and equipment such polariscopes and polarimeters;

Thanks to a partnership with Amig and OCMI, Mt Forni Industriali is able to supply **complete custom-built projects**, from batch plants to packaging.

MT Forni Industriali, since 1968 the reliable partner for glass manufacturers.

TUBULAR GLASS CONTAINER FORMING MACHINES FOR PHARMACEUTICAL AND COSMETIC USE:

- **FA 36S** ampoule making machines. These machines are prepared for the installation of different optional devices, including control by electronic programmers and continuous automatic loaders type **"ROBOGLASS"**.
- **FLA 20E**, **FLA 20/S** and **FLA 35** vial making machines. All models are able to produce all main types of vial necks, such as Penicillin, Blow-Back, Screw Neck. The continuous motion system and the mechanical structure allow performance speeds impossible to achieve with other index systems.
- **FLA 20E-CAR** machine able to produce all types of cartridges used for dental and pharmaceutical uses.
- **CG 20 NEW** machine and line for the production of glass "Dropper" accordingly to the different ISO 11418-5 standards.
- **CS 20 NEW** forming machine and line for the production of glass syringe bodies.
- All our machines can be fitted with Vision Systems that allow 100% consistent control of products' critical dimensions and surface defectiveness.

AUTOMATIC MACHINES FOR STEMWARE PRODUCTION:

- The **SA 42, SA 48** and the **SA 60** sealing machines for stemware are the answer to every market-oriented tableware factory. They allow to match the highest efficiency and production speed with a flexibility never before achieved by alternative systems. Equipped with a complete range of intelligent control systems able to control and maintain the final quality of products.
- The **ST 42, ST 48** and **ST 60** are the new line of continuous rotary machines with 36, 42, 48 and 60 spindles for the processing of one-piece stemware. These machines can be integrated with an electronic control system, able to manage production changeover parameters and control and adjust the distance between the grippers, thus ensuring maximum stretching quality.

SA48 - Stemware Sealing & Stretching machine

AUTOMATIC LASER CRACK-OFF MACHINES TYPE SCA FOR TABLEWARE PRODUCTION:

- A new line of machines using Laser Technology as an alternative to traditional crack-off systems. The **SCA 36** is the latest model of crack-off machines using laser technology with integrated equipment for the grinding and bevelling or direct fire-polishing of glass items.

RANGE OF PRODUCTS

- **AMPOULE AND VIAL MACHINES**
- **STEMWARE PRODUCTION LINES**
- **CRACK-OFF MACHINES**

RANGE OF PRODUCTS

- **MOULDS & ACCESSORIES**

AREAS OF ACTIVITY

OFFICINE S.L. produces moulds of any type, from moulds for manual and semi-automatic processing (for blowing machines, presses, centrifugal machines, injection machines, etc.), to moulds for automatic processing (presses, IS machines, H28s, centrifugal machines, etc.), which can be single-block or can be opened in 2, 3 or more parts.

OFFICINE S.L. pays particular attention to the choice of precisely selected materials: melting in cast iron or steel, bronze, stainless steel and a high content of NiCr, and powders for the metallization of mould parts.

In addition, the company has attained exclusive contracts for the creation of new lines of giftware, goblets, household articles and similar items, with designers of prestige in the crystal and glass sectors. The designers chosen have considerable experience as a result of years of collaboration with companies in Europe, America and Asia. Therefore, the company is able to comply better with clients' demands, irrespective of stylistic aspects and the range of the market to be covered.

This development is in response to customers' needs, and the company now guarantees a service which encompasses the development and manufacture of new products - from the definition of the product through to the design and, ultimately, the experience necessary for its realization.

Of course, the exclusiveness of every accepted line is guaranteed. OFFICINE S.L. considers quality and customer satisfaction are a fundamental part of its business strategy.

The Quality System of OFFICINE S.L. is UNI EN ISO 9001:2008 certified.

AREAS OF ACTIVITY

A Century of Technology and Innovation around the World

OLIVOTTO (Italy) has been working in the hollow glass sector since 1946, when it began marketing its first rotary-type glass blowing machine. Research, innovation, ongoing technological development have enabled the company to become a leading brand the world over, supplying turnkey systems and services made to measure for any production need.

In August 2003, **Olivotto Glass Technologies S.p.A.** acquired the glass branch of **ANTAS (Italy)**, a company with long-standing traditions and experience in the service of the hollow glass industry.

Later, in June 2007, Olivotto Glass Technologies S.p.A. acquired the assets of **Lynch Systems (USA)**, a corporation that traces its roots back to 1914, one of the oldest hollow glass forming machine manufacturers in the world.

In April 2008, Olivotto Glass Technologies S.p.A. acquired the assets of **W. Lindner Maschinen (Germany)** a very well known company with large experience for high quality production machines in all types of glass (lead crystal, soda-lime, borosilicate).

As a result, **OLIVOTTO**, **ANTAS**, **LYNCH** and **LINDNER**, leaders in their respective market sectors, have combined their capabilities to become the benchmark in the international scenario of hollow glass manufacturing plants, systems and machines.

At present, the **Olivotto Glass Technologies Group** is the leader in the engineering, production, installation and commissioning of hollow glass forming plants, systems and machines and is an all-round technological partner, that can address most effectively any problem connected with the production of a variety of glass articles: stemware, tumblers, dishes, bowls, lamps and bulbs, glass tubes, glass bricks, etc.

We ensure the perfect matching of all forming machines, combined with full assistance and services at each project stage, until the manufacturing process is on stream.

As a function of the complex requirements of a vast, heterogeneous market, the Olivotto Glass Technologies Group has a philosophy that enables it to offer its Customers technological solutions designed and implemented so as to achieve synergetic effects with their production strategies.

Technologies, products and services coming from the best know-how of **OLIVOTTO**, **ANTAS**, **LYNCH** and **LINDNER**.

Machines, complete lines and turnkey plants for the production of:

Stemware (all processes)	Lightingware
Tableware	Lenses and reflectors
Ovenware	Glass insulators
Jars	Glass tubes
Large containers	Laboratory articles
Lamps	Glass bricks

PLANNED EXHIBITIONS
Interpack 2011
Düsseldorf, Germany -12/18 May 2011

AREAS OF ACTIVITY

OMS Group, which is made up of 10 companies located in Italy, Europe, the Americas and Asia, is a world leader in the development and manufacture of systems, equipment and consumables. The Group's competence and experience in the sector of integrated systems for packaging lines and facilities, has been accumulated in more than 50 years of activities.

OMS Group constantly develops and updates its technological platforms aimed at customized and innovative solutions for its clients, offering the benefits of better performance and cost savings.

OMS manufactures a complete range of end-of-the-line packaging machines: complete strapping, stretch and shrink film hooding. The reliability of our machines is guaranteed by years of experience, qualified staff and a company structure that exploits the most modern organizational criteria.

Horizontal strapping
OMS' horizontal strapping machine for palletized products, has a rack-type arch lifting system to guarantee perfect positioning of the strap on the pallet, simplified head maintenance with quick-action connectors and different strapping programmes managed by an operator panel.

Vertical strapping
The vertical strapping machine has top press capacity of 2000 Kg. for palletized products. The strapping machine is designed to carry out binding both along the vertical plane and crosswise thanks to the rotation of a rotary table located in correspondence with the machine's vertical axis.

Top Pal protection
Top Pal is OMS' automatic system to apply and thermo-shrink a sheet of plastic film on the top of a load, thus hermetically and mechanically protecting the top part of the load, generally subject to tears due to stacking. This operation also ensures a better hermetic seal of the welding of the hood.

Combined hooding machine
The AT530 automatic hooding machine is a combined automatic machine which uses a single work station to shrink hood the productions to be packed, especially designed for the hollow glass industry.

The machine uses coils of tubular thermo-shrinking film with side gussets. The coils can be 1, 2 or 3, depending on the chosen version of the machine.

The film is shrunk onto the product by a ring-like gas over. All automatic and manual use and maintenance functions are controlled by a PLC.

The operator must be present only to change the film coil, we suggest being present also to check that the product to be wrapped enters the machine correctly.

AREAS OF ACTIVITY

With its experience of more than 60 years, Pennekamp is the leading manufacturer of high-technology lehrs and hot-end handling systems in the glass industry, as well as for the cold-end coating of container glass. This does not just refer to the manufacturing quality of the equipment, but also to the performance and specifically the low energy usages within the thermal processes. By use of the fully automatic draft system and optimized thermal insulations, energy consumption may be reduced significantly.

In the area of hot glass handling, as well as glass coating, the major aspect is performance and reliability in order to minimize down times. This may be achieved by the optimization of designs as well as the high quality of materials.

Pennekamp products include high-performance ware transfers, special cross conveyors, also available in water-cooled execution; various types of lehr stackers (with one, two, three or four axis); energy-saving lehrs such as annealing lehrs of container and tableware, decorating and toughening lehrs; roller annealing lehrs for float and figured glass; automotive glass bending and speciality lehrs; cold end sprays.

AREAS OF ACTIVITY

Pennine Industrial is one of the world's leading manufacturers of Silent Inverted Tooth Conveyor Chain and Sprockets that are used in the transportation and handling of hollow glass, container glass, tableware and stemware. Our conveyor chains are also used to transport larger items such as glass bricks and automotive glass light covers.

The company was founded in 1967 and has been involved in the conveying of hot glassware for over 30 years. Pennine now employs over 70 people at its two manufacturing plants in the UK and has agents and partners working in 30 countries throughout the world. Chain manufactured by Pennine in the UK is now used in glass plants in 60 countries.

Over the last 10 years, Pennine has continued to develop its range of Pennine Conveyor chains, not only offering the standard All Link and Link and Spacer Chains, but now becoming the market leader in Double Assembly, and Special Assembly Conveyor chains that improve under belt cooling and increase container stability.

Customers can also maximize the life of their Conveyor Chains by using one of the 12 standard Head Protector Links that can be fitted onto all chains and used without sprocket modification. As the original designer of the Head Protector Link, Pennine can advise customers on the best type of Protector Link to meet the customer's individual requirements.

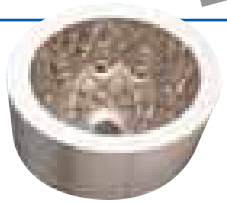
RANGE OF PRODUCTS

- **MOULDS & ACCESSORIES**



AREAS OF ACTIVITY

M Modern technology - More than 50 completely automatic CNC machines including 4 plasma welding robots. The main requirements for all the machines in our production line are precision, reliability, safety and versatility.

O Organization - Giancarlo Perego has completely restructured its organization, from senior management to the delivery department. Every single piece is checked during the working stage.

U UNI EN ISO 9001/2008 certification - obtained in July 1995 and renewed in 2003. The company has so far passed all the inspections carried out by the DNV certification body renewed in June 1998. This quality certification has clearly enabled us to improve our products by rationalizing production procedures.

L Layout design - Our technical department is equipped with ultra-modern software (CAD-CAM) and can provide technical support for mould designing. Our staff regularly attend training courses on the various technologies used by glassworks today.

D Delivery - Thanks to our new technological potential and to the reorganization of our production structure, our output has already increased considerably and we can now be more flexible in terms of delivery dates.

S Service - Giancarlo Perego Spa's quality, customer and post-sales services are always available at clients' disposal along with the on-line direct technical service +39.02.48405818 available 6 days a week.

Giancarlo Perego S.p.A., a company at the forefront in the production of moulds for the glass industry, has invested heavily in new machinery and technology, with the aim of consolidating its leading position in the world mould market. In July 2001 the acquisition of a mould shop facility in Eastern Europe was settled; these new premises give Giancarlo Perego S.p.A. a total covered area of 12,000 square metres. Its new technological potential, together with the reorganization of the firm's production structure, has allowed for a considerable increase in output (around 3,500 moulds a month are now being turned out). 80% of production is for non-European markets, with sales to nations across the globe.

Besides the standard manufacturing of all kinds of moulds for container production with any type of machine, technology or process, our company has also been particularly successful in the development of moulds for direct pressing thanks to its exclusive cold deformation technology.

Well aware of the difficulty of communicating the full scope of our activity in a few lines, Giancarlo Perego wishes to invite anyone interested in finding out more about our company to visit us.

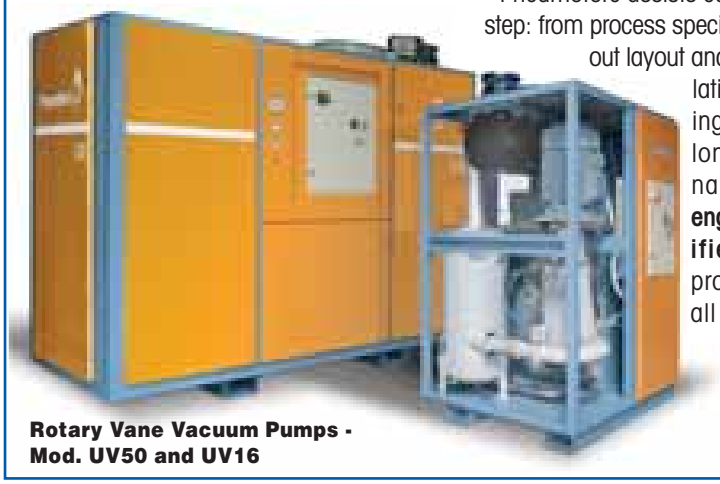
- **VACUUM SYSTEM ENGINEERING**
- **ROTARY VANE AIR COMPRESSOR**



Rotary Vane Vacuum Pumps - Mod. UV50 and UV16

AREAS OF ACTIVITY

Pneumofore has been specialized in **rotary vane technology** since 1923, when its founder invented and started the production of single stage rotary compressors.

With a solid reputation for reliability and durability established over eight decades of research and development, Pneumofore is experienced in vacuum systems for the **moulding of hollow glass**. Vacuum on IS machines improves the forming process, especially for complicate shapes of containers, and is also used on the blank side to increase the speed of production and to improve quality by reducing settle blow marks. For these reasons, our UV range of vacuum pumps are installed for various IS machines in more than 40 countries. Pneumofore systems are ready-to-use with dedicated accessories for each specific glass application and for round-the-clock operation, also under tough climatic circumstances: tropical or polar, using exclusively air cooling to **reduce operational costs**.

Pneumofore simply offers the solution for the **lowest Life Cycle Cost** with **up to five years warranty** on efficiency and functionality of the air end. Three divisions within Pneumofore cover various activity fields: **Compressed Air, Vacuum and Service**.

CUSTOMER SATISFACTION

Pneumofore assists customers at every step: from process specifications throughout layout and definition, installation, commissioning, operation and long-term maintenance needs. Our **engineers and qualified technicians** provide support to all clients in order to ensure the choice of the right product and the best solution. In our design process, we strive for simplicity as a final condition necessary for true success. An initial set of ideas are researched and developed, then elaborated, and finally simplified through elimination of all superfluous complexities. The result is an essential, original and powerful solution satisfying a wide range of requirements. We are committed to constantly develop and improve our products in full respect of the environment. Pneumofore also offers a complete **after-market service** for evaluation, maintenance, spares delivery, and on- or off-site repair and overhaul of the units.

ROTARY VACUUM PUMPS

Sliding vane, single-stage, oil lubricated, from 3 to 3,240 m3/h and 0.5 mbar residual pressure. For fast and reliable production of quality hollow glass containers, we have developed the **variable speed** version of our UV Series. This option allows constant adaptation of the electrical motor's rotation speed in rpm in order to keep the same vacuum level all year through, independent from size and shape or weight of bottles.

LUBRICATED AIR COMPRESSORS

Rotary vane with power from 5.5 to 230 kW: each model has three different motor sizes for the pressure ranges from 2.5 to 4, from 4 to 8 and from 8 to 10 bar. Designed to run 24/7.

MAIN FEATURES

Our units are "Ready to use", complete with sound proof canopy, control and power panel, inlet valve, lubricating- and cooling-system by oil-air heat exchange, direct coupling for low rotation speed, **air** (or water) **cooling**, active sealing, aluminium vanes, **variable speed** option (VS) for pumps, without need of any foundation. Pneumofore units represent the solution for the lowest ownership cost.

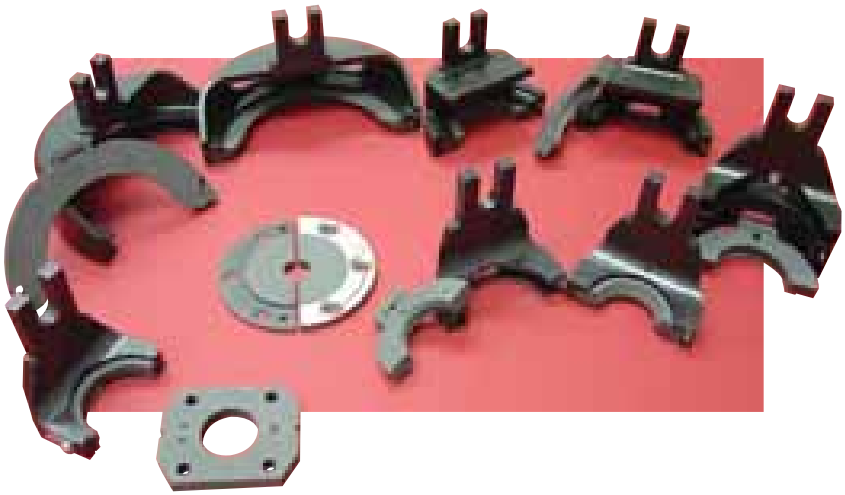
AREAS OF ACTIVITY



Areas of Activity

Marketed worldwide, POCO materials and products for the glass industry provide proven solutions for hot glass handling applications that include take-out assemblies, deadplates, sweep-out assemblies, transfer pads, lehr bar assemblies and custom parts.

GLASSMATE® Holder and Insert Assemblies

The GLASSMATE family of materials and products are engineered to meet the needs of the container glass industry. The original GLASSMATE or GM graphite grade offers the best wear resistance for high performance take-out inserts. Precision machined insert and holder assemblies feature quick and accurate mounting of holders and easy insert change outs for reduced downtime. POCO's take-out assemblies offer excellent performance combined with reduced mechanical damage for increased pack rates.

Take-out Holders

The classic POCO style holder gives long service life and will take all popular finishes up to 87mm. Styles include standard that can be used with fixed or floating inserts; covered to prevent contamination of ware; double stacked to prevent swing on tall, narrow neck ware; extended for tall finishes found on tamper-evident closures; modified for precision set up process with very tight shoulder-to-bead dimensions; and lightweight for triple gob machines.

Take-out Inserts

POCO maintains a library of standard finishes. GLASSMATE inserts are available as semi-finished blanks or can be precision machined to a specified finish. Inserts are available to fit both existing holders and POCO style holders. High strength grades should be used for thread transfer, under thread transfer, fine bead transfer with minimum clearance, or for long production runs. Economical grades are available for short runs or thick bead transfer applications. For closed mould pickup, bossed inserts machined with threads or finish profiles provide better clearance between the top of the mould and the take-out holder.

Complete Product Line

AREAS OF ACTIVITY

Draining of furnaces

Preriscaldo Forni is a service and design company for glassworks and has been operating in the national and overseas market for the past 35 years.

The company name and the trademark "prefor" clearly indicate the features of the main technical service offered: furnace pre-heating, in particular of glass furnaces.

Integrating with this service, others have been added, such as:

- draining of furnaces;
- filling of furnaces with granulation of glass;
- drilling of holes for the installation of electrodes, thermocouples and bubblers;
- drilling of holes for electric furnace tapping;
- hot repairs with sealing;
- grenaillage with electrofuse crushed stones;
- thermal cleaning with appropriate burners.

Plant design and installation has also been expanded, including:

- heating and combustible oil pumping sections;
- electrode-holders with accessories;
- pipe-coil heat exchangers for gas preheating;
- oil and gas burners;
- bubbler installations complete with control and adjustment box;
- tube-bundle or tube-cage heat recuperators;
- steel refractory electrode holders with reduced welding;
- water circulation and softening units.

Fitting out of:

- electric boosters with collateral equipment.

AREAS OF ACTIVITY

Revimac is a member of the Bottero group of companies.

It was founded in the late 1980s to cater for an ever-growing market demand for hollow glass forming machinery and allied ancillary equipment.

Revimac is now the largest and best equipped IS machine re-manufacturing shop worldwide.

During its 23 years of operations, Revimac has supplied and commissioned over 150 IS machines in a range that spans from 2 to 12 sections operation in Single, Double, Triple and even Quadruple gob configuration.

In the same period, more than 100 mechanical gob feeders type 144, 81 and 503 have been delivered to several glass factories.

In the early 1990s, Revimac started manufacturing and supplying ware handling equipment. In about 20 years, more than 1,000 ware transfers, stackers and cross conveyors have been delivered to more than 40 countries, making Revimac one of the fastest growing supplier in this market segment worldwide.

The staff of Revimac is now more than 50 people strong and its management and engineering team includes a number of professionals with no less than 20 years of experience in the glass container industry.

RANGE OF PRODUCTS

- **FUSED-CAST AND SINTERED REFRACTORIES**
- **CRUCIFORMS AND MORTARS FOR GLASS FURNACES AND FOREHEARTHS**

AREAS OF ACTIVITY

Saint-Gobain SEFPRO is the only refractory group worldwide fully dedicated to and streamlined for offering top-of-the-line refractory solutions specifically for the glass industries.

- With its 10 manufacturing sites around the world, Saint-Gobain SEFPRO offers total reactivity to glassmakers' needs, combining the power of a global player and its large available resources with the proximity of local partners.
- Saint-Gobain SEFPRO also has the largest research centres in the world specializing in refractories and their interaction with all types of glasses, and has been leading the industry for decades in the development of new materials.

The latest examples of this innovation power are:

- ER 2010 RIC & ERSOL SL. New AZS and Unshaped products to improve life and reduce defects in furnaces melting RICG.
- XiLEC 5& XiLEC 9. Two new products adding, to the usual properties of a HZFC material, the highest electrical resistivity on the market.
- New types of cruciforms. Type 8 shape to improve the thermal efficiency of your checker work. ER 55XX material to sustain either oxidizing or reducing furnace running conditions.
- ER 2001 SLX, a completely new generation of AZS fused-cast refractory with practically no exudation at furnace working temperatures.
- New ZA33LB and ZA33HR feeder expendables materials, bringing innovative answers to the issues of transitory blistering of plungers or random breakage of tubes.
- HPAL, a second generation of high alumina sintered material for feeder channels, with exceptional performance both in corrosion resistance and glass quality.
- Zirchrom 85, the ultimate high chromia material for the most demanding applications in insulation fiber and soda lime glasses (throats), with its unequalled thermal shock resistance.

Other well known solutions proposed by Saint-Gobain SEFPRO include:

- Dense chromes with improved thermal shock resistance, in large, complex shapes.
- Dense zircons with improved thermal shock resistance.
- Dense tin oxide electrodes.
- Fused mullite for melter crowns and superstructure applications.
- High zirconia fused-cast products for TV and special glasses.
- The cruciform range for higher thermal efficiency and greater resistance against silica carry-over and alkaline vapours.
- Spout Lip casing "ready-for-installation" in float glass furnaces.

To help glassmakers reach their goals, the team works closely with each of them throughout the life of the furnace, providing an entire range of additional services:

- Furnace design assistance.
- Assistance in the choice of refractories, optimization of blocks sizes.
- Assistance in the choice of refractories optimization of blocks sizes and feedback to improve the desing of the next furnaces.
- Supply of complete, pre-assembled sub-units.
- Periodic check-up of the furnace performance, wear, evolution forecasts, etc.
- Organization of rapid trouble-shooting for exceptional emergency evaluations.
- Management of worn refractories.
- Glass defect analysis.

AREAS OF ACTIVITY

S.I.G.MA. supplies a full high quality range of products for the glass industry including refractories for furnaces, forehearths & working ends and feeder expendables.

Notwithstanding the global crisis, in these last years S.I.G.MA. has invested considerably both in the factory and laboratory to improve production capacity and quality level.

By the end of 2011 S.I.G.MA. will be equipped with a very high temperature kiln (1750°C) from Bickley.

This new kiln, the eighth in the plant, will increase production capacity as well as sinter new highly refractory products with improved performances and longer operation life.

Other recent investments in the factory are:

1. Raw material weighing equipment
2. A 200 m2 pre-assembly area
3. A new oil pressure press
4. A new laser control grinding machine dedicated to furnace bottom blocks, channels and forehearth superstructures.

S.I.G.MA. has also developed a technical solution for regenerator structures with better performances than those associated with the traditional use of silica and magnesite.

RANGE OF PRODUCTS

- **MELTING FURNACES**
- **FOREHEARTH TECHNOLOGY**
- **ENGINEERING**
- **EQUIPMENT**

AREAS OF ACTIVITY

Companies belonging to the SORG® group offer unrivalled service to the glass industry, covering design and engineering, supply of equipment, installation and commissioning, maintenance and service for all areas of the glass manufacturing process, from raw material handling to the gob.

The group's subsidiary Sorg Karrena Service provides a wide range of services for the glass industry, including difficult hot work such as drilling and overcoating. EME, another subsidiary, designs and manufactures systems and equipment for all aspects of batch and cullet handling.

- **Melting furnaces**

SORG® has unique experience in the design and engineering of most types of furnaces for continuous or discontinuous glass melting. At any time, more than 250 furnaces designed by SORG® are in operation throughout the world.

- **Glass conditioning systems**

Distributors and forehearths for pulls from 2 to 200t/24h, and a broad spectrum of forebays and overflows are available for a variety of applications. The latest standard forehearth design is the 340S, based on a fusion of the glass conditioning technologies of SORG® and Emhart Glass.

- **Glass types**

SORG® installations are used to manufacture almost all commercial glasses, including lead crystal, fluoride opal, and all types of borosilicate glasses, such as C glass, E glass, Pyrex® and neutral glass.

- **Engineering**

SORG® offers an engineering package specifically tailored to customer requirements, and normally including the detailed engineering for refractories, steelwork, heating, control and ancillary systems.

- **Equipment**

SORG® supplies a comprehensive range of equipment for furnaces, distributors and forehearths. The scope of supply may extend from individual components through to complete turnkey contracts.

- **The environment**

SORG® can also offer tried and tested solutions to the problem of NOx emissions, ranging from the redesign of existing furnaces to the advanced OxEcon® Melter, which is specifically designed to operate at less than 500 mg NOx per Nm3 waste gases. SORG® has substantial experience in oxy-fuel firing, with installations ranging from 12 to 400 tons per day.

AREAS OF ACTIVITY

SKS provides refractory installation, maintenance and repair services to the glass industry. The company itself is a joint venture encompassing the glass industry refractory installation interests of the two partners: Karrena and SORG.

SKS has extensive experience of refractory installation in all major sectors of the glass industry, ranging from the provision of supervisors to complete turnkey contracts using SKS specialists and a local Karrena workforce. The organization and management of large, complex building sites is an area in which SKS excels.

Over the past 10 years, SKS Group companies have built more than 200 furnaces in 30 countries worldwide, including 25 float furnaces, 89 for containers, 38 fiber furnaces and 48 for special glasses.

Difficult hot work on operating furnaces is a particular SKS speciality, with experienced specialist technicians available for work such as hot repairs, drilling, electrode holder exchange and overcoating. An emergency service is also available which includes the supply of refractories for unplanned repair work.

The company is also able to supply and install furnace bracing steelwork.

In 2008 a new company joined the SKS Group. Called Fuse Tech International, it is a joint venture between SKS and the US Company Fuse Tech Inc., specialists in ceramic welding. Fuse Tech International now offers ceramic welding services for hot and cold faces on operating installations, and has already successfully completed a number of contracts in European glass factories. The addition of ceramic welding expertise to the SKS Group effectively completes the range of services on offer.

Sorg Karrena Service can be contacted through a worldwide network of local offices of SKS subsidiaries, Karrena subsidiary companies and strategic partners, as well as SORG representatives.

AREAS OF ACTIVITY

The story of Sorma

Founded in 1950 by Alberico Sorgato and Zoe Marano, Sorma had the opportunity to apply the most innovative technology in the abrasion field in the nearby glass district of Murano. When the first flexible diamond tools were produced 30 years ago, Sorma introduced the technology of diamond cloths in Italy, thus becoming a market leader.

In ten years, from 1980 to 1990, the marketing of diamond cloths became a key element of the company's business. This great commercial success depended on the efforts and passion of those who were involved in it. Soon after, these same people had to face an even more difficult challenge when Sorma decided to produce its own diamond cloths, which were, until then, only distributed by the company.

Innovative production systems were tested and improved and new products were created for the most diverse industrial applications.

Nowadays, there are no applications of flexible abrasives in which the diamond products of Sorma are not successfully used.

Diaface® and Moonflex® are the available standards and are produced with the most advanced techniques according to ISO 9001 requirements.

Moonflex® diamond belts for glass working

Moonflex® diamond belts for glass grinding were developed by Sorma to replace abrasive silicon carbide belts. The combination of Moonflex® diamond cutting action with the versatility of the belt working enables precision processing with consistent levels of removal on all materials such as flat glass, rolled section, mirrors, crystal, art and technical glass.

The different types of backings used guarantee high mechanical resistance and smoothness of processing with various levels of flexibility, in order to meet any requirement. Compared to traditional belts, Moonflex® diamond belts avoid damage to the structure of the material, enable increased production, as well as a more accurate finishing with consequent reduced costs. Moonflex® belts are available in any length and width for application on all machines presently on the market.

Moonflex® belts are successfully used in the following applications:

- portable belt machines
- automatic chamfering machines for insulating glass
- robotized systems for car windscreens
- single belt stationary sanding machines
- crossed belts stationary sanding machines

The advantages of Moonflex® belts are:

- the long working life reduces considerably machine down times for tool changing
- productivity clearly higher compared to traditional belts
- reduced rejects due to grinding defects of tempered glass
- joints that guarantee delicate cutting without scratches
- 18.2 typology combines cutting action and finishing, thus reducing the number of grits used

Products: Machinery for the production and visual inspection control of glass tubing containers

AREAS OF ACTIVITY

Spami and Optrel make up the Engineering Division of the Stevanato Group, which is among the leading suppliers of primary glass packaging for the global pharmaceutical industry.

The Engineering Division is strongly connected to the Glass Division, consisting of Nuova Ompi, Alfamatic, Medical Glass, Ompi of America. These companies specialize in the design, manufacture, installation and after-sales support of high speed precision machinery for the production and control of glass containers as well as vision inspection systems.

Spami has the technological leadership in design and production of machineries for glass tubing converting for the production of vials, cartridges, syringes, ampoules and special devices.

A team of 80 employees builds complete forming lines based on vertical rotating technology with high capability and precision that includes: integrated fully automatic lines with auto-packaging units; 100% control of dimensional and visual parameters, statistics are collected and made available on line to the operators for appropriate adjustments; needle assembly technology.

Optrel has a long tradition in the inspection machine market for the pharmaceutical industry including parenteral drug, injectable and solid dosage inspection with automatic and semiautomatic equipment.

Now with the merge with the Stevanato Group Optrel has developed, based on the same field proven technology, a range of inspection machine for empty glass articles: ampoules, vials and syringes. The range of defects covered match the requirement from the PDA glass task force and comprise also metrological controls recorded in a SCADA-like interface for production control. The system is 21CFR11 compliant relating to recipes and batch recording.

As Stevanato Group we produce a full range of glass packaging including important traditional products such as vials and ampoules and also strong growth products such as cartridges for pen-injection systems and auto-injectors as well as pre-fillable syringes. Syringes are available in both bulk (stake needle & luer finish) as well as from our EZ-fill™ line. EZ-fill™ offers clients an important new source for reliable, flexible supply of prefillable syringes packaged in convenient nested tub formats. (washed, siliconized, sterile)

The strategic target of the Stevanato Group is to offer the complete range of pharmaceutical containers based on glass tubing. Our global footprint provides not only manufacturing flexibility, but is also an important attribute in Risk Management. Our mission is to exceed customer expectations today, while investing in the future to support a constantly evolving and complex global market.

AREAS OF ACTIVITY

Strada is a leading company in the production of moulds for glass containers, which are manufactured using Blow and Blow, Press and Blow and Narrow Neck Press and Blow technology. In addition to moulds, the company's production range includes mould accessories, finishing moulds and neck rings.

The company was founded in 1945 and since then has grown steadily, now employing more than 50 people in four departments - the Technical, Quality Control and Commercial Departments, and the Production Workshop.

In the Technical Department, the latest CAD/CAM software is used by skilled technicians to develop moulds for almost any type of glassware that customers may require.

The Production Workshop uses automatic and NC machines at every production stage except for those operations where human ability is still indispensable.

In addition, a production programme follows each item individually from the time the order is placed through to delivery to the customer.

Every stage of production is closely controlled by the Quality Control Department. All raw materials, semi-processed goods and finished products are subjected to rigorous quality control checks so that they conform to the most up-to-date international technical standards.

In 2003, quality certification was upgraded to the strictest ISO 9001:2000 certification.

The Commercial Department is almost a bridge between customers and the rest of the company, and the Technical Department in particular. It is the experience and expertise of the skilled technicians working there that enable Strada to offer solutions to any kind of technical problem or produce the most intricate moulds.

The company is proud of its ability to offer extensive cooperation to glassworks, to help them solve their daily problems. Why not see if it can help you?

AREAS OF ACTIVITY

With over 600 forehearths and 200 working-and in operation Tarkus is a worldwide leader in refractory production, thanks to 20 years experience in glass refractory manufacture.

Our mission "Fully dedicated to the glass industry" is, and has always been, our company slogan.

In fact, Tarkus has, since 2000, being manufacturing refractories only and exclusively for the glass industry.

More than 19,000 shapes have been realized (furnace burner blocks, tv blocks, doghouses, suspended blocks, port necks, bottom paving etc.) and more than 20 thousand tons produced.

Company activity is registered with about 350,000 illustrations and thousands of analyses in our archives.

Tens of daily controls made by dedicated specialists follow all processes, from incoming raw materials right up to the shipping of the final products.

Tarkus' new plant, set up from greenfield, has been active since December 2009, and has a production capacity of 5,000 tons of casting materials.

Tarkus' production includes very large monolithic shapes weighing up to 2.5 tons. The plant is equipped with the best possible technology available today for the manufacture of special shapes.

RANGE OF PRODUCTS

- **PLANTS AND EQUIPMENT FOR SILK-SCREEN PRINTING ON GLASS**

AREAS OF ACTIVITY

Tecno5 designs, produces and installs a wide range of machines and accessories for silk-screen printing with up to eight colours on all kinds of cylindrical, conical and other shaped glass items such as: bottles, tumblers, mugs, goblets, stemware, bowls jars, ashtrays and others.

What make the difference in Tecno5 equipment and plants is the great flexibility and profound experience of an exceptionally active and reliable company, having one of the largest decorating groups worldwide, Cerve Spa, as a direct source of its know-how and technological development.

The Cerve Group employs about 700 people, and has a production capacity of up to 2,000,000 decorated items per day. Tecno5's parent company has designed and built its plants and machines with its own patents. As a result of this industrial achievement, Tecno5 has, for over 20 years, provided its advanced know-how and experience, producing decorating machines aimed at the highest users' requirements.

With Tecno5 machinery, multicolour glass decoration becomes achievable for any operator and, most of all, becomes profitable also for small batches. That is why glassworks and independent decorating companies from over 40 different countries worldwide are currently using Tecno5 technology.

Tecno5's mission is to satisfy users' needs by continuous research and development of new technologies which enables the company to anticipate market requests, thanks to intensive market studies and the qualified consultancy of its agent and sales network.

The service provided by Tecno5 includes:

- aimed training at Tecno5's premises or on-site;
- specialized after-sales service and consultancy;
- prompt worldwide technical assistance;
- a wide selection of spare parts in stock; and
- the supply of complementary equipment such as lehr loaders and unloaders (push-bar, stackers, de-stackers), feeding tables with accumulating conveyors, thermo-plastic ink pre-melters, transfer conveyors, etc.

Thanks to this philosophy, totally oriented to customer satisfaction, Tecno5 has achieved a range of machinery with higher electronics contents, in response to the more and more user demands such as the decoration of square and oval-shaped items.

RANGE OF PRODUCTS

- **ENGINEERING**
- **PROCUREMENT**
- **CONSTRUCTION MANAGEMENT AND COMMISSIONING SERVICES**

AREAS OF ACTIVITY

Henry F. Teichmann (HFT), founded in 1947, is dedicated to providing engineering services, melting furnaces and turnkey plant installations for the glass industry worldwide. During more than 55 years of service to the glass industry, projects have been carried out in more than 40 countries.

Engineering, construction management and commissioning services support the following areas of activity:

Turnkey glass plants: for manufacturing TV glass, float glass, rolled pattern glass, container glass, sodium silicates and fiberglass.

Batch plants: automatic material processing and weighing for precise batching for the complete range of glass compositions.

End-fire regenerative furnace designs: for melting container glass and rolled pattern glass. Over 20 installations of HFT's Dual-Pass Regenerative Furnace System exist worldwide, using a heavy oil and natural gas combustion system.

Cross-fire air-gas regenerative melting furnaces: for melting container glass with maximum size production, float glass furnaces for clear and tinted glass production and large sodium silicate production.

Oxy-fuel fired furnace designs: for melting fiberglass, float glass, TV glass and container glass.
Improved glass qualities and low NOx are major results of the latest designs.

Plant modernization and rebuilds: the staff of engineers and constructors of HFT continues to meet the very short turn-around schedules for the float, container, TV and fiberglass producers around the world. Our list of regular customers speaks for itself. Providing state-of-the-art quality installations with excellent safety and environmental performance is our commitment to our clients.

AREAS OF ACTIVITY

The growth of THIMON is attributable to the development of plastic films for over-wrapping. Shrink and then stretch, these films appeared at the end of the 1960s. Four decades of close cooperation with film manufacturers have provided Thimon with invaluable experience in mastering these two technologies.

With 40 years of research and development in these technologies, Thimon has registered a hundred or so patents covering all the processes. It is a leading company, which is expanding its market on the basis of an average three major innovations per year!

Thimon's philosophy is to support its clients in identifying and implementing the optimum solutions in order to achieve the highest level of competitiveness and profitability. Thimon's main objective is to promote future developments with vigour, imagination and delight by enlarging a circle of loyal and satisfied clients.

Since its first reference in the glass industry in the 1970s, THIMON has constantly developed a very close relationship with worldwide glass-workers to offer them high quality machines both in shrink and stretch technologies.

PLANNED EXHIBITIONS
Glasstec 2012
Düsseldorf, Germany - 23/26 October 2012

AREAS OF ACTIVITY

A new generation of tungsten carbide glass shear blades for Gob Forming Shear Systems has been developed and launched on the market by Turmond Spa Italy.

Using the latest technologies available today in the field of blade materials and geometry, Turmond Shear Blades have achieved impressive results in both cut quality and lifetime in customer trials.

According to claims from the manufacturer these new improved glass shear blades will assist manufacturers of container and hollow glass to improve productivity and quality along with a reduction in cooling water on the blades.

Founded in 1969, this family run company specializes in the production of Tungsten Carbide parts that are used in many industries where longevity of components is crucial to maintaining production.

Following a significant investment at the plant in Italy over the last two years, Turmond now has the ability to control the whole manufacturing process from selecting specific powders from leading suppliers, to forming, sintering, and on through to final finishing of the Shear Blades.

This total in-house control of the entire manufacturing process of the products manufactured, provides a consistent and reliable quality that is passed on to its clients.

Turmond embarked on a study of the problems associated with existing Gob Shear Blades within the container glass industry, starting with the selection of specific materials to combine strength, along with a patented geometry change, with impressive results. To confirm this improved technology, trials were undertaken with a number of well-known container glass companies, and have resulted in significant production gains, with consistent quality improvements. This improved and consistent quality, combined with an impressive working life of the shear blades before changing, offers a cost effective improvement to Gob Shear systems.

AREAS OF ACTIVITY

The SIL, VERTECH's Production Monitoring System and Quality Control system, offers a clear view of production by supplying information in real time about losses and defects to all actors of a glass plant.

Benefits of the SIL system:
- Save time by sharing information
- Improve your output by reacting quickly to important events
- Reduce customer risk thanks to a total traceability of your productions

The SIL is able to communicate with all types of inspection machines on lines and control devices in the laboratory: Multistation, Check+, M1 from MSC-SGCC, Veritas, Prolaser from Emhart-Powers, SPT from AGR …

With more than 450 lines equipped worldwide, VERTECH' has become a confident partner of major international glassmakers for the monitoring of production and quality controls.

Vidromecanica's main equipments are:

- Annealing and decorating lehrs
- Belt tempering lines for tableware
- Spindles toughening lines for stemware
- Rim tempering lines
- Chemical tempering machines
- Glass insulator lines
- Roller annealing lehrs for flat glass / U-Glass / Laminated glass
- Special glass thermal treatment ovens
- Moulds pre-heating kilns
- Stackers / Cross conveyors
- Hot end coating hoods
- Cold-end coating spraying systems
- Scraper conveyors
- Cullet crushers
- Cullet recycling plants

Vidromecanica, is **ISO9001:2008** certified for project, production and after-sales services for machines for the glass industry.

With innovative machinery solutions for many applications of the glass industry, equipment from Vidromecanica are up and running worldwide. VIDROMECANICA engineering is synonymous of safety for functioning and investment.

PLANNED EXHIBITIONS

Glasstec 2010
Düsseldorf, Germany
28 September / 1 October 2010

AREAS OF ACTIVITY

WORKING ALONGSIDE THE CLIENT

Walcast offers its glassware clients a number of different possibilities. A 'creation' department is responsible for the creation of new articles by proposing profiles and decorations corresponding to the manufacturing equipment of the client. Creating a new line of products can be a lengthy process, therefore it is imperative to be able to propose computer assisted drawings of the prototype and subsequently its realization by using a rapid prototyping machine. Once the client has made a choice of several products, a number of test moulds for the creation of the glass items are produced and these constitute the basis for the final project. With his own creation in hand, the client can estimate its success as a sales item and carry out any necessary modifications. The stage following creation takes place in the 'project' department where engineering plans are drawn up in accordance with the specifications of the machines. This study is carried out and discussed with the client's own glassware technicians. This is a time of close collaboration between Walcast's designers and its clients' technicians who are the most acquainted with their production field.

During this collaboration, Walcast's projects are meticulously defined by expert glass craftsmen. Once the engineering plans have been completed and approved by the client, the production department begins its share of work.

AREAS OF ACTIVITY

From Lehr Discharge to Finished Pallet Storage: The Right Solution for any Situation

Flexibility in handling multiple types of containers at the same time

'MPH' Multi-Purpose Palletizing Head

Custom-tailored layout

From the semi-automatic low speed Palletiser to the most sophisticated High Speed one, from the simplest conveyor line to the state-of-the-art one.

Our experience built up in almost 50 years of activity enables us to cope with all possible needs in terms of space problems, container types and shapes, speed requirements, flexibility, quality, reliability, follow-up.

Needs that we have faced and solved, in the field, in different countries around the world.

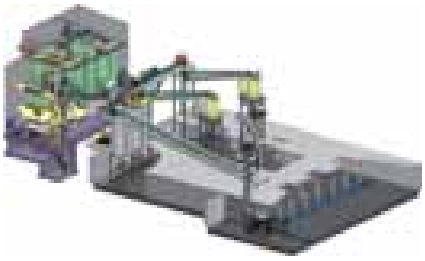
AREAS OF ACTIVITY

Founded in 1920, Zippe has dedicated all its activities to the international glass industry.

Acting as a partner to customers, solving problems in the fields of melting material preparation, design, manufacturing, installation and commissioning of plants on a turnkey basis - if required - Zippe offers the following delivery programme:



- Batch Plants
- Refurbishing and upgranding of existing plants
- Modernization of Electronical Control and Weighing Systems
- Factory Cullet Processing Plants
- Ecologic Glass Recycling Plants
- Processing Plants for Special Glass Waste
- Batch Chargers
- Glass Level Controllers
- Batch and Cullet Preheating Systems
- Engineering
- Maintenance and Service

Zippe engineers and supervisors install and commission plants worldwide.

Comprehensive documentation informs the customer about all plant functions and delivers technological details, providing easy solutions to problems by means of tele-communication dialogue.

1 RAW MATERIALS - HANDLING AND PREPARATION

BOHEMI CHEMICALS

MATERIALS AND PRODUCTS
Hot- and cold-end coatings.
Chemicals.

EME

MACHINERY AND EQUIPMENT
Batch plants and cullet treatment plants, conveying systems, batch chargers.

PROCESS AND QUALITY CONTROL
Computer-integrated process control.

SERVICES
Engineering, design and supply of complete plants, including assembly and commissioning. Maintenance, staff training and assistance.

F.I.R.E.

MATERIALS AND PRODUCTS
Services.

MACHINERY AND EQUIPMENT
Services and installation.

PROCESS AND QUALITY CONTROL
Services.

GCG - GLASS CONSULTING GROUP

MATERIALS AND PRODUCTS
Raw materials. Cerium and rare earth oxides. Frits for feeder colouring. Coloured glass with feeder colouring system.

MACHINERY AND EQUIPMENT
Batch plants. Cullet treatment.
Scraping conveyors.

PROCESS AND QUALITY CONTROL
Process control for batch houses. Batch composition assistance.

GLASS SERVICE

MACHINERY AND EQUIPMENT
Batch plants. Damping gas and powder plants. Waste gas recycling.

PROCESS AND QUALITY CONTROL
Fully automated control.

SERVICES
Engineering, design and realization of plants.

GT GLASS TECHNOLOGIES

MACHINERY AND EQUIPMENT
Complete batch plants. Batch chargers. Weighing lines. Cullet recovery systems.

PROCESS AND QUALITY CONTROL
Batch plant control systems.

SERVICES
Engineering, design and supply of batch plants. Assembly and commissioning. Staff training, technical assistance.

GRUPPO MINERALI

MATERIALS AND PRODUCTS
Raw materials.

MACHINERY AND EQUIPMENT
Turnkey plants for blast furnace slag and glass raw materials.

SERVICES
Technical consulting. Engineering and design of raw materials decontamination plants.

LUGLI

MATERIALS AND PRODUCTS
Raw materials.

MT FORNI INDUSTRIALI

MATERIALS AND PRODUCTS
Philips pelletized products.

MACHINERY AND EQUIPMENT
Mixers, batch chargers.

TEICHMANN, HENRY F.

MACHINERY AND EQUIPMENT
Turnkey design, material processing and weighing.

ZIPPE

MATERIALS AND PRODUCTS
Preparation of melting materials.

MACHINERY AND EQUIPMENT
Batch plants. Cullet recycling systems. Batch chargers. Glass level controllers. Batch/cullet preheaters.

SERVICES
Turnkey delivery.

2 MELTING

ACROTECNA

PROCESS AND QUALITY CONTROL
Process control system.

SERVICES
Engineering; studies; maintenance.

AMIG

EQUIPMENT AND ACCESSORIES
Glass level control systems.

BOCK ENERGIETECHNIK

FOREHEARTHS AND FURNACES
Electric heating systems for furnaces, forehearths and feeders.

EQUIPMENT AND ACCESSORIES
Boost-systems, full electric furnaces, tank and pot furnaces, forehearths and spout heatings, special heater, electrode holders, top-electrode, cooling, g-systems for holders, power supplies (transformers).

PROCESS AND QUALITY CONTROL
Electrode maintenance instruments, glass level control, automatic process control, visualization equipment.

SERVICES
Engineering, design and construction, physical modelling, hot drilling and holder replace, start up.

CAR-MET

FOREHEARTHS AND FURNACES
Structures for melting furnaces.

ELECTROGLASS

FOREHEARTHS AND FURNACES
All-electric furnaces, 200kg/day to over 200T/day and forehearths for all glass types, plus electric boosting systems.

EQUIPMENT AND ACCESSORIES
Equipment for electric furnaces, forehearths and boosting systems, including electrode holders, drains and bubbling systems.

PROCESS AND QUALITY CONTROL
Glass level sensing/control systems.

SERVICES
Design and engineering for melting and conditioning systems, plus system checking and commissioning.

EME

EQUIPMENT AND ACCESSORIES
Batch and cullet chargers.

PROCESS AND QUALITY CONTROL
Motor and process control.

SERVICES
Engineering, design and supply, including commissioning, maintenance, staff training and assistance.

EMHART GLASS

FOREHEARTHS AND FURNACES
Mechanical/Servo Feeders, Servo Shears, Metering Spout.

EQUIPMENT AND ACCESSORIES
Gob Weight Control Loop System, Shear Spray System, Feeder Expendables, Feeder Tubes, Orifice Rings, Refractory Plungers, Stirrers, Spouts, Rotor Segments, Feeder Expendable Compositions and Clay Pots.

SERVICES
Installation, Training, Maintenance and Production.

F.I.R.E.

REFRACTORIES
Services and trading.

FOREHEARTHS AND FURNACES
From 20 to 1000 TPD furnaces / from 5 to 200 TPD forehearths.

EQUIPMENT AND ACCESSORIES
Installation.

PROCESS AND QUALITY CONTROL
Software and installation.

SERVICES
Demolition, Rebuilding, Waste Management, Hot Filling.

FALORNI

FOREHEARTHS AND FURNACES
Small glass furnaces (from 70 to 350kg of glass per day). Pot and day tank furnaces. Continuous furnaces.

EQUIPMENT AND ACCESSORIES
Combustion systems.

PROCESS AND QUALITY CONTROL
Control systems.

F.I.C. (UK)

FOREHEARTHS AND FURNACES
ISO-Thermal forehearth conditioning and HVP FIHs and Electric FIH.

EQUIPMENT AND ACCESSORIES
Glass level controllers, electrode maintenance instruments.

SERVICES
Hot drilling electrode holder replacement, glass conditioning assistance, technical and start-up.

F.O.R.T.E.

FOREHEARTHS AND FURNACES
Regenerative and recuperative furnaces. Electric melters. Working-ends. Forehearths.

EQUIPMENT AND ACCESSORIES
Batch chargers. Burners. Reversal valves. Boosters. Bubblers.

PROCESS AND QUALITY CONTROL
Process supervisory and control systems. Metering systems.

SERVICES
Engineering. Design. Construction of furnaces and forehearths. Tapping. Heat-up with rod adjustment. Filling. Hot repairs. Assembly. Commissioning. Staff training.

GCG - GLASS CONSULTING GROUP

FOREHEARTHS AND FURNACES
End port furnaces. Electric furnaces and forehearths. Infrared thermometers.

EQUIPMENT AND ACCESSORIES
Combustion equipment. Thermocouples, special design thermocouples, control instruments. Glass level controllers, furnace camera systems.

PROCESS AND QUALITY CONTROL
Process controls for furnaces and forehearths.

GT GLASS TECHNOLOGIES

FOREHEARTHS AND FURNACES
Regenerative and recuperative furnaces. Working end. Forehearths. Cullet preheating system.

EQUIPMENT AND ACCESSORIES
Batch chargers. Burners. Reversal valves. Boosters. Bubblers.

PROCESS AND QUALITY CONTROL
Metering systems. Process control.

SERVICES
Engineering. Design. Construction of furnaces and forehearths. Tapping. Heating-up with tie rod adjustment. Filling-up. Assembly. Commissioning. Staff training.

H.C. STARCK

FOREHEARTHS AND FURNACES
Forehearth electrodes.

EQUIPMENT AND ACCESSORIES
Molybdenum glass melting electrodes. Pumps and liners of molybdenum

LUGLI

REFRACTORIES
Zircon-mullite, magnesite chamotte, silica, andalusite, silicon carbide. Fused-cast materials: AZS, alumina, mortars, castables, channels. Insulating materials: bricks, sandwich-blocks, mortars, castables, eco-boards dielectric, bottom blocks.

MOTIM FUSED CAST REFRACT.

REFRACTORIES
AZS and corundum-type fused cast refractories, refractory castables, mortars, regenerators, recuperators.

MT FORNI INDUSTRIALI

FOREHEARTHS AND FURNACES
Design, delivery and installation of recuperative furnaces, electric furnaces, oxy-fired furnaces, forehearths, pot furnaces and day-tanks.

EQUIPMENT AND ACCESSORIES
Glass level control, recuperators, batch chargers, combustion systems.

PROCESS AND QUALITY CONTROL
Temperature, pressure, combustion and glass level control systems.

SERVICES
From design to heat-up and commissioning.

PRERISCALDO FORNI

FOREHEARTHS AND FURNACES
Complete control instrumentation. Combustion systems.

EQUIPMENT AND ACCESSORIES
Heat exchangers, pumping sections, burners, bubblers, heat recuperators, electrode holders.

SERVICES
Furnace pre-heating. Thermal cleaning of regenerator furnaces. Plant design and installation. Furnaces repair and maintenance, technical assistance.

SAINT-GOBAIN SEFPRO

REFRACTORIES
Fused-cast refractories: AZS, high zirconia, alumina, cruciforms, monolithics.

S.I.G.MA.

REFRACTORIES
Consumable refractories (orifice rings, plungers, tubes, spout). Alumina, silica, zirconium, zirconium-mullite, sillimanite, insulating material, castable patch, cements, ceramic fiber, fused silica.

FOREHEARTHS AND FURNACES
Expandables, working ends and forehearths from insulation to channel blocks and superstructure. Special shapes. Spy blocks. Dog-house blocks. Bottoms. Regenerators. Rider arches. Chamber walls and crown.

SERVICES
Pre-assembly and technical assistance and consulting on refractory applications for forehearths and furnaces.

SKS - SORG KARRENA SERVICE

SERVICES
Installation and all types of maintenance and repair services for furnace/forehearth refractories.
Supply and installation of supporting and bracing steelwork.

SORG

FOREHEARTHS AND FURNACES
Regenerative and recuperative furnaces, electric melters, mixed heated furnaces, working ends, forehearth systems and colouring technology.

EQUIPMENT AND ACCESSORIES
Equipment for furnaces and forehearths.

PROCESS AND QUALITY CONTROL
Process supervisory and control systems. Metering systems.

SERVICES
Engineering design and construction of furnaces. Complete service for furnaces, heat-up with bracing adjustments and fill-up.

STARA GLASS

REFRACTORIES
Supply of all refractories for furnace, working-end and feeder construction (fused-cast and bonded, alumina, silica, magnesia, zirconium, mullite, sillimanite, chromium, insulating, castable and cements), consumable refractories (spouts, plungers, tubes, orefice rings).

FOREHEARTHS AND FURNACES
Design and supply of melting furnaces, w.e. and feeders (regenerative and recuperative furnaces, day tanks), demolition and reconstruction.

EQUIPMENT AND ACCESSORIES
Combustion systems, recuperator.

PROCESS AND QUALITY CONTROL
Monitoring and control systems.

SERVICES
Turnkey supply, technical assistance, hot repairs.

TARKUS REFRACTORIES

REFRACTORIES
Allumina, mullite, fused mullite, zilconmullite, bonded AZS, zilcon.

FOREHEARTHS AND FURNACES
Allumina, mullite, fused mullite, zilconmullite, bonded AZS, zilcon.

TEICHMANN, HENRY F.

FOREHEARTHS AND FURNACES
Melting furnaces, regenerative end-fired, regenerative cross-fired. Oxyfuel reduced NOx furnaces.

EQUIPMENT AND ACCESSORIES
Hot gas ejection and valving systems for regenerative systems.

SERVICES
Engineering, design, construction of furnaces and related systems. Commissioning services and technical training for melting operations.

3 MOULDS: ALLOYS, PARTS, PROCESSING

BDF INDUSTRIES
MACHINERY AND EQUIPMENT
Mould polishing machines.

BUSELLATO GLASS MOULDS
MOULDS AND ACCESSORIES
Moulds. Neck rings. Accessories.

CAR-MET
MACHINERY AND EQUIPMENT
Mould pre-heating furnaces.

COMIT
ALLOYS
Bronze, cast-iron.

MACHINERY AND EQUIPMENT
Numerical control lathes, numerical control milling machines.

MOULDS AND ACCESSORIES
Complete moulds, neck rings, guide rings, plungers, holders.

SERVICES
Design.

COMMERSALD
MACHINERY AND EQUIPMENT
P.T.A. welding plants.

SERVICES
Welding filter materials.

ECOTECNE
SERVICES
Ultrasonic cleaning equipment. Mould polishing and maintenance machines.

EMHART GLASS
MACHINERY AND EQUIPMENT
Vertiflow® Blank and Blow Mould Cooling System, Neck Ring Cooling, and Mould Cooling Software Packages. Complete line of Mould Equipment, Accessories and Parts.

SERVICES
Mould Design.

FAMOR
MOULDS AND ACCESSORIES
Moulds holder.

SERVICES
Revamping moulds holder.

F.I.R.E.
MACHINERY AND EQUIPMENT
Services.

MOULDS AND ACCESSORIES
Services.

FIMA-OLIMPIA FONDERIE
MOULDS AND ACCESSORIES
Special cast irons for glass moulds, bottom plates and neck rings.

FONDERIE BARTALESI
ALLOYS
Bronze alloys for moulds and neck rings.

MOULDS AND ACCESSORIES
Moulds, neck rings, bottom plates, blank moulds, finishing moulds.

FONDERIE VALDELSANE
ALLOYS
Special cast iron and bronze alloys for glass moulds.

LUBEN GLASS
MOULDS AND ACCESSORIES
Mould holders, inserts.

LUBROTECH SOLUTIONS
SERVICES
Consultation on lubricant and application matters.

MT FORNI INDUSTRIALI
MACHINERY AND EQUIPMENT
EVM Roventa and CD mould pre-heating furnaces.

OFFICINE S.L.
MOULDS AND ACCESSORIES
Moulds.

SERVICES
Mould projects. Sample moulds. Consulting and advising in mould use and maintenance.

PEREGO GIANCARLO
MOULDS AND ACCESSORIES
Moulds.

STRADA
ALLOYS
Cast iron. Bronze-aluminium.

MACHINERY AND EQUIPMENT
Numerical control lathes. Numerical control milling machines. Work centres.

MOULDS AND ACCESSORIES
Moulds, neck rings and general accessories.

VERTECH
SERVICES
Production monitoring systems (supply, installation and training).

WALCAST
ALLOYS
Hot work tool steel - H.I.P. processing.

MACHINERY AND EQUIPMENT
Smelting and machining works.

MOULDS AND ACCESSORIES
Pressing and spinning tableware moulds.

SERVICES
Training in mould maintenance. Testing of glass samples.

4 LUBRICATING

AB. TECHNOLOGIES
MATERIALS AND PRODUCTS
Scissors lubrification pump.

GCG - GLASS CONSULTING GROUP
MATERIALS AND PRODUCTS
Hot-end and cold-end products for glass coating. Oleic acid, polyethylene for cold-end treatment.

LUBROTECH SOLUTIONS
MATERIALS AND PRODUCTS
Sprayable lubricants for pressware. Swabbing compounds for container blank moulds and neck rings. Pre-plating compounds for pressware and container moulds. Shear spray lubricants. Transfer area and lehr mat lubricants and coatings.

MACHINERY AND EQUIPMENT
Manual and automatic spray equipment.

SERVICES
Consultation on lubricant and application matters.

5 FORMING/HOT-END

ACROTECNA

PROCESS AND QUALITY CONTROL
Process control system.

SERVICES
Engineering; studies; maintenance.

AMIG

MACHINERY AND EQUIPMENT
Ball gatherers. Hydraulic presses and complete lines for special glasses. Glass block production lines. Single- and multi-gob presses. Variable index presses.Spinning machines. Handling and conveying systems for all applications. Semi-automatic presses.

BDF INDUSTRIES

MACHINERY AND EQUIPMENT
Mechanical feeder mechanisms, servo parallel shears, servo feeders, gob distributors, IS machines, servo invert, servo take-out, stepping motor servo pushers, ware transfers, cross conveyors, servo stackers, Vacuum pumps for IS machines.

TOOLS AND ACCESSORIES
Full range of interchangeable spare parts, variable equipment for SG, DG, TG for 4 1/4", 5", 5 1/2", 6 1/4" C.D., jigs and fixtures, Vacuum pumps.

PROCESS AND QUALITY CONTROL
New electronic integrated control systems, stand alone invert and take-out systems, plunger-up control systems.

SERVICES
Installation and start-up, training, IS machine and module refurbishing services,Vacuum systems engineering.

BOCK ENERGIETECHNIK

PROCESS AND QUALITY CONTROL
Glass conditioning.

BOHEMI CHEMICALS

PROCESS AND QUALITY CONTROL
MBTC.

BOTTERO

MACHINERY AND EQUIPMENT
IS machines. Gob distributors. Feeders.

PROCESS AND QUALITY CONTROL
Electronic timing systems, pusher systems, drives for gob distributors, shears, feeders and plungers

EME

MACHINERY AND EQUIPMENT
Complete plants for hot- and cold-end cullet treatment.

PROCESS AND QUALITY CONTROL
Motor and process control.

SERVICES
Engineering, design and supply of complete plants, including assembly and commissioning. Maintenance, staff training and assistance.

EMHART GLASS

MACHINERY AND EQUIPMENT
Servo Gob Distributor, Delivery Equipment (Delivery Suspension Support System and Conversion, Scoop/Troughs/Deflectors), NIS™ Machine, IS Machines. Container Forming Products: 3rd Generation Valve Block with New Section Frame, AIS Blank and Blow Mold Support Mechanism, Blowhead Mechanism (Large/Small), Dynamic Blowhead Balancing Device, Flex Pressure System (FPS™), Funnel Mechanism (Large/Small), Pantographic Baffle Mechanism/Arms and Holder Conversion, Quick Change Plunger Mechanism.
Hot-End Ware Handling Products: Cross Conveyors, Main Conveyor (8000 Series), Push Bar Stacker, Pushers (860 AC Servo), Takeout (Constant Cushion, Servo-Electric), Ware Transfers (178/478/878), Hot Bottle Counter, Operator's Assistant I and II.

TOOLS AND ACCESSORIES
Complete line of IS Machine Accessories and Spare Parts.

SERVICES
Installation, Training, Maintenance and Production.

FAMOR

SERVICES
Revamping H28 machine and blowing machine.

F.I.C. (UK)

PROCESS AND QUALITY CONTROL
Glass conditioning.

F.I.R.E.

MACHINERY AND EQUIPMENT
Services.

FUTRONIC

MACHINERY AND EQUIPMENT
Electronic timing sistems, drive systems, hotenol reject systems.

GCG - GLASS CONSULTING GROUP

MACHINERY AND EQUIPMENT
Hot-end and cold-end products for glass coating.

GLASS SERVICE

MACHINERY AND EQUIPMENT
Gathering robots, up to 10 and 20kg of glass, automatic shears, pick-and-place robots to place hot pieces in the lehr, feeder mechanism channel.

TOOLS AND ACCESSORIES
Gathering balls and special suction cups.

PROCESS AND QUALITY CONTROL
Electronic timing systems, driving systems, feeder control.

SERVICES
Engineering, technical assistance, staff training, transfer of expertise.

HELIOS ITALQUARTZ

TOOLS AND ACCESSORIES
Infrared quartz emitters.

HEYE INTERNATIONAL

MACHINERY AND EQUIPMENT
Servo plungers for gob feeders, shear drive for gob feeders, dual motor shears, gob distributors, delivery systems, IS forming machines, servo blank mould closing mechanism, servo blow mould closing mechanism, process control, servo-invert, blow mould bottom mechanism, spherical blowhead holder 5 DG, blowhead mechanism, servo takeout, modular servo technology, takeout arms, E-pusher for IS machines, silent chain, ware transfer, cross conveyors, lehr loaders.

PROCESS AND QUALITY CONTROL
Lightweight technology, Heye production information systems HPIS, quality assurance systems.

SERVICES
Container glass design.

KYP ACCESSORIES

MACHINERY AND EQUIPMENT
Ampoule forming machines.

SERVICES
Maintenance, consulting and development.

LATTIMER

MACHINERY AND EQUIPMENT
Variable equipment and repair parts.

LUBEN GLASS

MACHINERY AND EQUIPMENT
Equipment and spare parts for IS machines.

LUBROTECH SOLUTIONS

MACHINERY AND EQUIPMENT
Manual and automatic spray equipment.

SERVICES
Consultation on lubricant and application matters.

MODERNE MECANIQUE

MACHINERY AND EQUIPMENT
MM30 and LA ampoule and vial making machines/lines.

PROCESS AND QUALITY CONTROL
Optistem (ampoule stem forming). Opticut (one point cut system). Opticom (optical measurement forming and control).

SERVICES
Customer service. Engineering and installation.

MSC & SGCC

PROCESS AND QUALITY CONTROL
I-care, hot-end engraving system.

MT FORNI INDUSTRIALI

MACHINERY AND EQUIPMENT
Furnaces for stem and bowl pre-heating.

TOOLS AND ACCESSORIES
Combustion systems for fire polishing machines, oxy-burners, special burners.

NOVAXION

MACHINERY AND EQUIPMENT
Glass gathering robots. Glass blowing robots. Fire polishing robots. Handling robots.

PROCESS AND QUALITY CONTROL
Spinning machines. Shear mechanisms.

SERVICES
Engineering. Start up of production lines. Training.

OCMI OTG

MACHINERY AND EQUIPMENT
Ampoule making machines: FA 30, FA 36, FA 36D. Vial making machines: FLA 20E, FLA 35. Automotive lamp blowing machines: LAMP 20.

PROCESS AND QUALITY CONTROL
Electronic devices for ampoule machines to produce first bottom of each glass tube.

SERVICES
Engineering and design. Technical assistance. Training.

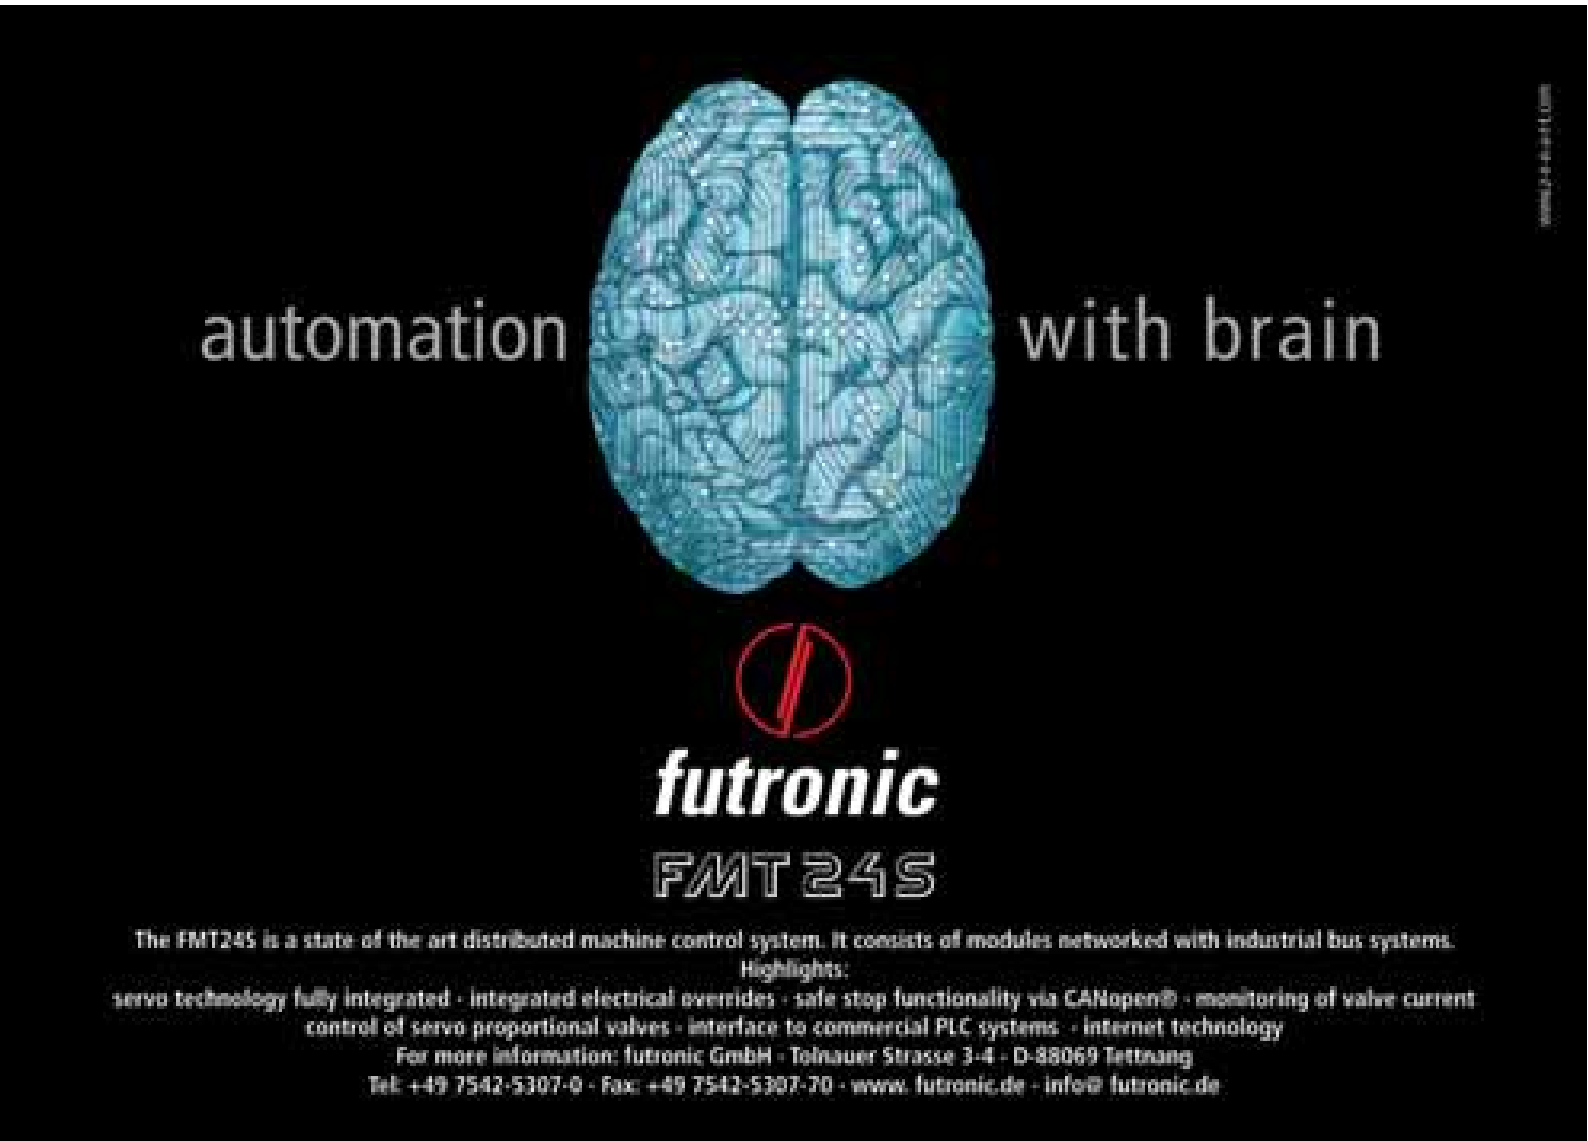
OLIVOTTO - ANTAS - LYNCH - LINDNER

MACHINERY AND EQUIPMENT
Feeder mechanisms. Presses. Multiple index presses. Blowing machines for lightware and large containers. Press and blow machines for soda-lime and lead crystal. Blow-blow machines and complete glass tubing lines.
Automatic glass brick lines. Multifuction machines for stemware production. Ball gatherers. Stemware production lines.
Paste moulding machines. Press machines. Injection machines. Shears. Gob feeder systems. Ball gatherers. Suction gatherers.
Billet casting machines. Shears, gob delivery, press machines, press-blow machines, production lines for glass blocks.

TOOLS AND ACCESSORIES
Computer touch-screen line controls.

PROCESS AND QUALITY CONTROL
Electronic timing systems, driving systems, feeder control. Instrumentation and control. Mould tracker control systems, synchronous drive systems, electronic computer controls and timing.

SERVICES
Assembling start-up and commissioning of production lines.
Engineering for turnkey projects. Engineering and machine design. Training and after-sales service.



PNEUMOFORE

MACHINERY AND EQUIPMENT
Vacuum pumps for IS machines.

TOOLS AND ACCESSORIES
Vacuum pumps.

SERVICES
Vacuum system engineering.

POCO GRAPHITE, AN ENTEGRIS COMPANY

TOOLS AND ACCESSORIES
Glassmate® hot-glass handling materials: take-out holders, take-out inserts.

REVIMAC-BOTTERO

MACHINERY AND EQUIPMENT
Re-built IS machines. Ware handling equipment.

SERVICES
Installation and commissioning.

SPAMI-OPTREL-STEVANATO GROUP

MACHINERY AND EQUIPMENT
Machineries for glass tubing converting for the production of vials, cartridges, syringes and special devices

PROCESS AND QUALITY CONTROL
Automatic and semi-automatic inspection machine for prefilled vials, ampoules, cartridges and syringes

TURMOND

TOOLS AND ACCESSORIES
Shear blades.

VERTECH

SERVICES
Production monitoring systems (supply, installation and training).

VIDROMECANICA

MACHINERY AND EQUIPMENT
Hot-end coatings.

glassOnline
the world's leading Glass Industry Portal

NEW FUNCTIONS & SERVICES:

6 COOLING

EMHART GLASS

MACHINERY AND EQUIPMENT
Vertiflow® Blank and Blow Mold Cooling System.

SERVICES
Installation, Training, Maintenance and Production.

F.I.R.E.

MACHINERY AND EQUIPMENT
Services.

GLASS SERVICE

MATERIALS AND PRODUCTS
Special forehearths for controlling glass cooling.

PROCESS AND QUALITY CONTROL
Control panels.

SERVICES
Consultancy, engineering and technical assistance.

KYP ACCESSORIES

MACHINERY AND EQUIPMENT
Coolers.

7 ANNEALING AND TOUGHENING

AMIG

MACHINERY AND EQUIPMENT
Lehr loaders and stackers.

TOOLS AND ACCESSORIES
Conveyor belts.

ANTONINI

MACHINERY AND EQUIPMENT
Lehr conveyors and stackers.

PROCESS AND QUALITY CONTROL
Electronic controls.

BOCK ENERGIETECHNIK

MACHINERY AND EQUIPMENT
Annealing and decorating kilns.

CAR-MET

MACHINERY AND EQUIPMENT
Lehrs for hollow glass, tableware, special glasses, etc. Lehrs with more than one belt. Stackers and cross-conveyors.

F.I.R.E.

MACHINERY AND EQUIPMENT
Services.

GCG - GLASS CONSULTING GROUP

MACHINERY AND EQUIPMENT
Scraping conveyors.

KYP ACCESSORIES

MACHINERY AND EQUIPMENT
Furnaces.

SERVICES
Maintenance, consulting and development.

MT FORNI INDUSTRIALI

MACHINERY AND EQUIPMENT
Annealing lehrs, special annealing furnaces, annealing kilns, pot pre-heating furnaces (pot arches). Conveyors, cross conveyors, stackers. Polariscopes. Toughening lines for hollowware.

NOVAXION

MACHINERY AND EQUIPMENT
Lehr loading robots.

OLIVOTTO - ANTAS - LYNCH - LINDNER

MACHINERY AND EQUIPMENT
Stackers, lehr conveyors and loaders.

PROCESS AND QUALITY CONTROL
Computer touch-screen controls.

VIDROMECANICA

MACHINERY AND EQUIPMENT
Annealing lehrs, toughening lehrs.

8 PROCESSING

AMIG
MACHINERY AND EQUIPMENT
Semi-automatic sandblasting and drilling machines. Fire polishers.

TOOLS AND ACCESSORIES
Drills.

BATISTI MECCANICA
MACHINERY AND EQUIPMENT
Finishing, polishing, cutting, and flattening machines.

CAR-MET
MACHINERY AND EQUIPMENT
Special combustion systems. High speed/efficiency burners.

EMHART GLASS
PROCESS AND QUALITY CONTROL
Process Control: Advanced Motion Control Components, Drive Systems, T6000™ Forming Process Control System, VLAN™ Forming Process Control System. Hot-End Networking: Control Room Console, Production Line Console. Cold-End Networking: Anti-Dither Optical Line Counter, Data Concentrator System, Gateway, Process Management System, QualiTrac™ System. Software Packages: Versa-Cam™ .

SERVICES
Installation, Training, Maintenance and Production.

FAMOR
PROCESS AND QUALITY CONTROL
Spare parts.

F.I.R.E.
MACHINERY AND EQUIPMENT
Services.

H.C. STARCK
THIN FILM COATINGS
Molybdenum Rotary Targets.

KYP ACCESSORIES
MACHINERY AND EQUIPMENT
Finishing lines.

TOOLS AND ACCESSORIES
Rota-colour break OPC-printing.

PROCESS AND QUALITY CONTROL
Electronic calibrating vision systems.

SERVICES
Maintenance, consulting and development.

MT FORNI INDUSTRIALI
MACHINERY AND EQUIPMENT
Furnaces for stem and bowl pre-heating. Glory holes.

TOOLS AND ACCESSORIES
Combustion systems for fire polishing machines, oxy-burners, special burners.

OCMI OTG
MACHINERY AND EQUIPMENT
Sealing machines for stemware. Laser crack-off machines with grinding, bevelling, washing or fire polishing equipment.

PROCESS AND QUALITY CONTROL
CNC for stemware height control, stem stretching and machine set-up. CNC systems for crack-off, grinding and bevelling operations.

OLIVOTTO - ANTAS - LYNCH - LINDNER
MACHINERY AND EQUIPMENT
Stretching machines. Stemware sealing machines. Crack-off machines. Fire polishing machines. Burn-off machines. Tube gauging and sorting machines. Tube glazing and trimming machines. Welding machines.Moil cutting-off and rim grinding machines. Flat grinding machines. Burn-off machines. Take-out systems. Handling devices. Transport equipment.

PROCESS AND QUALITY CONTROL
Full pressing line computer controls. Instrumentation.

SERVICES
Engineering and machine design.
Consultancy and construction. Installation and commissioning.
Training and after-sales service.

SORMA
PROCESS AND QUALITY CONTROL
Diamond tools. Flexible diamond tools. Air tools.

STARA GLASS
MACHINERY AND EQUIPMENT
Hardware and software for automatic equipment.

SERVICES
Turnkey projects and technical assistance.

9 DECORATING

AMIG
MACHINERY AND EQUIPMENT
Semi-automatic sandblasting and drilling machines.

ANTONINI
MACHINERY AND EQUIPMENT
Decorating lehrs.

TOOLS AND ACCESSORIES
Conveyor belts.

PROCESS AND QUALITY CONTROL
Instrumentation.

SERVICES
Engineering, design. Technical services.

BATISTI MECCANICA
MACHINERY AND EQUIPMENT
Saws, grinders, belts, drills, lathes.

CAR-MET
MACHINERY AND EQUIPMENT
Decorating lehrs.

TOOLS AND ACCESSORIES
Water-cooled bar cross-conveyors. Stackers of various sizes. CNC stackers. Scrapers for hot glass.

FERMAC
MACHINERY AND EQUIPMENT
Manual, semi-automatic and fully automatic direct silk-screen printing machines and lines for glass hollowware (tumblers, stemware, tableware, bottles, food containers, perfume and pharmaceutical containers). Decorating systems and equipment (banding, spraying, paintbrush systems). Electronic patented feeding and accumulation tables. Conveyors and trasportation systems, automatic loading systems for decorating lehr fixtures, outfits and accessories for silk-screen printing.

SERVICES
Design and line layouts on request. Technical assistance for decorating process.

FLUORITAL
MATERIALS AND PRODUCTS
Varnishes and inks for low temperature applications.

GCG - GLASS CONSULTING GROUP
MATERIALS AND PRODUCTS
Hot-end lustrage products.

MT FORNI INDUSTRIALI
MACHINERY AND EQUIPMENT
Decorating lehrs, special decorating lehrs, decorating kilns.

TOOLS AND ACCESSORIES
Conveyors, cross conveyors, stackers.

TECNO 5
MACHINERY AND EQUIPMENT
Semi-automatic and automatic silk-screen printing machines for hollowware. Push bars for decorating lehrs. Loading and feeding tables. Conveyors. Colour (thermoplastic) distributors.

SERVICES
Technical assistance for silk-screen printing process. Decorating line layout.

VIDROMECANICA
MACHINERY AND EQUIPMENT
Decorating lehrs.

10 COLD-END/PACKAGING

AB. TECHNOLOGIES
MACHINERY AND EQUIPMENT
Cold end spray treatment and mixing pump.

ALL GLASS
MACHINERY AND EQUIPMENT
Complete packaging systems with multi-function palletizers. Shrink-wrapping machines. Conveyors.

EMHART GLASS
MACHINERY AND EQUIPMENT
Veritas™ Inspection Systems: - Veritas™ iM - Multi-station Mechanical-Handler Inspector, Veritas™ iB - Multi-station Belt-Handler Inspector, Veritas™ iT - Top Inspector. Multi-Station Inspection Machines: Combined Inspection Machine, Triple Inspection Machine, Total Inspection Machine (B+LAN), Total Inspection Machine (E+LAN), Total Inspection Machine (Mid-Ware Range).
Vision Products: PRISM™ 4000 T Vision Body Check Inspector, PRISM™ 4000 T Vision Sidewall Inspector, PRISM™ 5000 Sidewall/Dimensional Gauge, ProScanner™ 3200 - Sealing Surface Inspector, ProScanner™ 5200 - Base Inspector, ProScanner™ 8200 - Combined Base & Sealing Surface Inspector, Vision Mold Number Reader.
Electro-Mechanical Products: Check Detector, Dual Head Gager, High Speed Squeeze Tester.
Cold-End Ware Handling: Bottle Orienter, Bottle Spacer, By-Pass Conveyor, Synchronous Bottle Spacer, Two Wheel Bottle Spacer, Ware Transporter.
Cold-End Spray Systems: Cold-End Spray Mix System, Traverse Spray.
SERVICES
Installation, Training, Maintenance and Production.

EMMETI
MACHINERY AND EQUIPMENT
Complete cold-end lines. Palletizers.

F.I.R.E.
MACHINERY AND EQUIPMENT
Services.

GCG - GLASS CONSULTING GROUP
MACHINERY AND EQUIPMENT
Cold-end products, oleic acid, polyethylene for cold-end treatments.

KYP ACCESSORIES
MACHINERY AND EQUIPMENT
Packing sets.
PROCESS AND QUALITY CONTROL
Electronic calibrating.
SERVICES
Maintenance, consulting and development.

MSC & SGCC
MACHINERY AND EQUIPMENT
Inspection machines for the container glass industry. Products: Complete cold-end lines. Mcal3: sidewall/stress. Multi3: base / stress / Finish / Mould reading. Check+: Checks detection machine laser+: Non contact thickness measurement Profiler: Internal Profile Analyser.
SERVICES
Cold End and engineering.

MSK COVERTECH
MACHINERY AND EQUIPMENT
Palletizers. Pallet handling, pallet conveyors. Pallet shuttle cars. Pallet elevators. Pallet shrink wrapping systems.
PROCESS AND QUALITY CONTROL
EMSY (Electronic Management System).
SERVICES
Spare parts. 24-hour support.

OLIVOTTO - ANTAS - LYNCH - LINDNER
MACHINERY AND EQUIPMENT
Palletizers. Depalletizers. Conveying equipment.

OMS - OFFICINA MECCANICA SESTESE
MACHINERY AND EQUIPMENT
Shrink wrap equipment - stretching machines
SERVICES
Customer service

SIPAC
MACHINERY AND EQUIPMENT
Complete cold-end lines.

THIMON
MACHINERY AND EQUIPMENT
Stretch and shrink film wrapping machines, shrink frame and ovens, conveyors for pallets.
PROCESS AND QUALITY CONTROL
Packaging design, R&D, laboratories.
SERVICES
Erection, maintenance and repair. After Sales Service.

VERTECH
SERVICES
Production monitoring systems (supply, installation and training).

VIDROMECANICA
MACHINERY AND EQUIPMENT
Cold-end coatings.

ZECCHETTI
MACHINERY AND EQUIPMENT
Complete cold-end lines. Conveyor belts. Stackers. Take-out devices and equipment. Cross-conveyors. Automatic palletizing/depalletizing and packaging lines. Rotating tables.
Shrink wrap equipment. Complete unit handling and moving systems.
PROCESS AND QUALITY CONTROL
Electronic control systems.
SERVICES
Design, engineering and construction of systems.

11 PLANT UTILITIES

AB. TECHNOLOGIES
MACHINERY AND EQUIPMENT
Hot cullet scraper.

BDF INDUSTRIES
MACHINERY AND EQUIPMENT
Thermoshock testing machines, Vacuum pumps air compressors.

F.I.R.E.
MACHINERY AND EQUIPMENT
Services.

GCG - GLASS CONSULTING GROUP
MACHINERY AND EQUIPMENT
Turnkey laboratory for chemical-physical analysis, Process controls for furnaces and forehearths.

GT GLASS TECHNOLOGIES
MACHINERY AND EQUIPMENT
Technical supplies.
SERVICES
Demolition/construction services, commissioning of complete plants, modernization existing plants.

MSC & SGCC
PROCESS AND QUALITY CONTROL
Icam and mcal, multi and deltacam, check, cosmetic argos.

MT FORNI INDUSTRIALI
MACHINERY AND EQUIPMENT
Laboratory furnaces.
PROCESS AND QUALITY CONTROL
Polariscopes, lathes for verticality control.

PNEUMOFORE
MACHINERY AND EQUIPMENT
Vacuum pumps, Air compressors.

STARA GLASS
MACHINERY AND EQUIPMENT
Electrostatic precipitators and bag filters.
SERVICES
CAD projects, technical supplies and services.

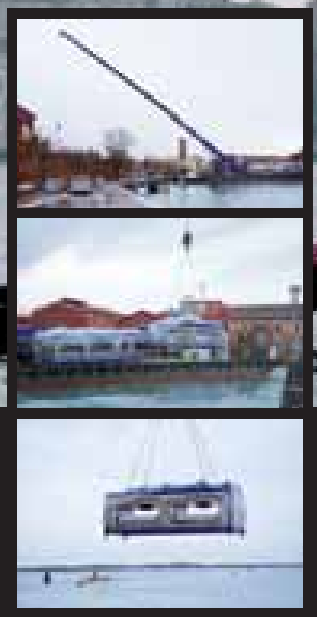
ITALIAN detail

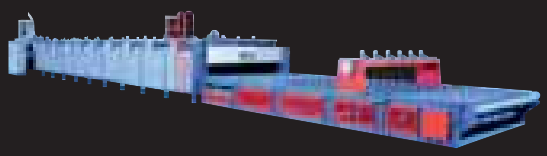


Murano, february 2010
Annealing Lehrs' Unloading for Ferro Murano company.

The right answer to all your needs!

40 years of experience serving the glass industry

- annealing lehrs
- decorating lehrs
- toughening lines
- 2/3 axis servo stackers
- cross conveyors
- hot glass scrapers
- mould pre-heating ovens



made in Italy

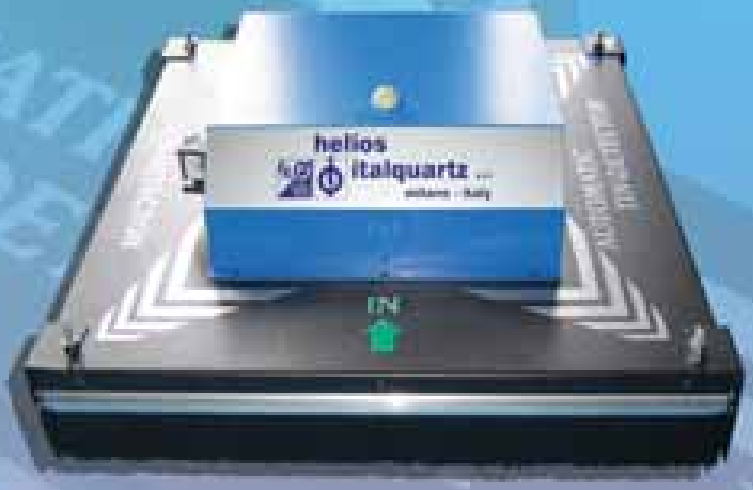
HELIOS ITALQUARTZ FOR THE GLASS INDUSTRY

QUARTZ IR EMITTERS

Short and medium wave, mono and twin tube, with or without gold-coated reflector. Utilized for: glass tempering, annealing, bending, plastic film coupling and screen printing, float glass and mirror processing for any oven range.



AUTOMATIC TIN – DETECTOR

It is the technological development of the Manwood 25 – N. It can be fixed directly on the glass transportation line before the process starts in order to check every piece of glass. Thanks to the simplicity of the installation and its great flexibility it is suited for the mass manufacturing where the methodological control is essential to support the rate of production.

MANWOOD 25 – N

UV black light apparatus, able to identify the tinned coated side of the float glass even under high brightness conditions. Such identification is very important before the laminating, mirroring, printing and decorating processes.

UV POLYMERIZATION EQUIPMENT

With UV medium pressure lamps for enamelling, drying screen printing UV reactive inks, paints, coatings and adhesives for the decorating and furnishing sector.

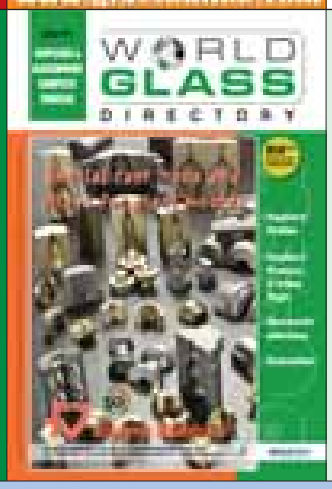
SUBSCRIBE NOW TO THE WORLD'S

GLASS MAGAZINES

Glass-Technology International **since 1989** **GLASS-TECHNOLOGY INTERNATIONAL** is the leading international magazine for professionals involved in the flat and bent glass industry, from building to automotive, and from furniture to household appliances. **G-TI** is useful for those working in float glass plants as well as glass processors/fabricators, glazing contractors, automotive glass installers, window and door manufacturers, glass merchants, wholesalers, etc. With about 100 pages per issue, it is the bi-monthly tool for keeping abreast of new technology, new products, company life and all innovations in the world of flat and bent glass. A Suppliers Guide/Yellow Pages survey in four languages - English, French, German and Spanish - is published in every issue.
The magazine also includes the **GLASS INDUSTRY AGENTS GUIDE**.
GLASS-TECHNOLOGY INTERNATIONAL promotes the **SOLAR GLASS Conference** - The Italian Conference on the use of glass in the solar industry and for energy saving (www.glassonline.com).

glassmachinery world plants&accessories **since 1988** **GLASS MACHINERY PLANTS & ACCESSORIES** is the leading international magazine for glass manufacturing, and is targeted at glassworks involved in the production and processing of hollowware and special glass (bottles, containers, household, lighting, technical, scientific, industrial and medical glassware) and fiberglass.
GLASS MACHINERY PLANTS & ACCESSORIES is a bi-monthly periodical with about 100 pages of product news, current world news, focus on..., country dossiers, technical articles and dossiers, worldwide exhibitions, glassworks in the world, Yellow Pages, etc.. In the last issue of each year, the magazine includes the **GLASS INDUSTRY AGENTS GUIDE**.
GLASS MACHINERY PLANTS & ACCESSORIES promotes **VHG - Vitrum Hollow Glass** - the International Exhibition for Hollow Glass Manufacturing (www.glassonline.com).

ANNUAL GUIDE



WORLD GLASS DIRECTORY **since 1990** In its 22nd edition, the **WORLD GLASS DIRECTORY** is a unique international annual guide which gives a complete overview of international glassworks and suppliers involved in hollowware and special glass manufacturing. About 200 pages of complete company profiles: addresses, management, sister companies, plants, number of employees, turnover, banks, year of company foundation, capital, trademarks, areas of activity, innovations, product-by-product and country-by-country breakdowns. It has summaries in five languages (English, French, German, Spanish and Italian).
The **WORLD GLASS DIRECTORY** is the annual reference point for the international glass manufacturing industry comprising bottles and containers, domestic glassware, tubing, vials and ampoules, lighting glassware, technical and industrial glassware, scientific, laboratory and medical glassware and automotive glassware.

For multiple subscriptions: 10% DISCOUNT

INTERNET

www.glassOnline.com
the world's leading glass industry portal

since 1996 **GLASSONLINE.COM** is the leading web service dedicated to the world of glass.
The service includes an international glass data bank **World Yellow Pages** and the **GLASSONLINE CLUB**, reserved for subscribers, offers: a **Daily World News** bulletin (more than 18,000 news items stored since 1996), **News Items**, and the **online issues of our magazines** in Pdf format. Furthermore, **GLASSONLINE.COM** also has: an illustrated glass dictionary, second-hand equipment, trade opportunities, employment opportunities, exhibitions and meetings, forum, "how to say glass", agents guide, glass antiques and more.

ASSOVETRO
Associazione Nazionale degli Industriali del Vetro

Via Barberini, 67
00187 Roma - Italy
Tel + 39 06 4871130
Fax + 39 06 42011162
E-mail: assovetro@assovetro.it
Website: www.assovetro.it
President: Gianpaolo Caccini
Director: Giorgio De Giovanni

Type of Association:
Of companies working in
- Manufacturing flat and hollow glass (all types of containers), glass tube and technical glasses, glass fibres, traditional glass, Transforming and decorating flat and hollow glass, Lamp

The Association represents:
N. 100 companies. The companies represented constitute 95% of the country's industrial sector

The Association is a:
National Association
No profit Association

The Association is a member of:
Confindustria
CPIV

The Association was founded in:
1947

The main scope of the Association is:
To promote and support the interests of glass industry on the economic and union trade level, To carry out promotional activity for and in favour of glass industry, To protect the competitiveness of the glassworks

The main activities of the Association is:
Welfare, Environment, Energy, Transport, Communication, Statistical data

Type of Organization
Trade Association

Type of Association:
of glass producers:
Domestic, containers glass, etc.
Flat glass, Fiberglass
Crystalware
Others: illumination glassware, costume jewellery, cut glass stones, glass beads, artistic/handmade
Machine made

The Association represents:
no. 60 glassworks/companies
The glassworks/companies represented constitute 100% of the country's industrial sector

The Association is a:
National and Public organization

The Association is part of (other organizations):
Austrian Economic Chamber

List of member companies:

I) Glassworks
Walther-Glas Austria GmbH
Riedel Tiroler Glashütte GmbH
Saint-Gobain Isover Austria AG
Stölzle-Oberglas GmbH
D. Swarovski & Co. KG
Technoglas Produktions GmbH
Vetropack Austria GmbH

II) Glass processing
C. Bergmann KG
Eckelt Glas GmbH
ERTEX Sicherheitsglas AG
ERTL Glas AG
Carl Geyling's Erben Nfg. GmbH & Co. KG
Glas Ziegler Ges M.b.H.
Glastech Produktions - und Verfahrenstechnik GmbH
