THE CONFERENCE

The Glass Performance Days (GPD) is an independent forum dedicated to the development of the global glass industry through education. This is achieved by holding conferences in different countries. Currently the main conference takes place every two years in Finland (where GPD also holds workshops and a glass exhibition). In 2016, GPD will land in the Caribbean Region with GPD CUBA, in conjunction with CUBA GLASS, which will be held on 6th and 7th December in Havana.

Over the years, GPD has organized countless smaller local events, to share the latest knowledge with local specialists who cannot attend the main GPD event in Finland. These events are a great way to inform and educate industry leaders and designers alike as to what the most recent advances in glass technology can offer. These events are also a great way for professionals from around the world to meet and talk business with local specialists.

Following the end of the embargo, Cuba is starting to open up to modernization and development in all sectors. Glass is certain to be at the forefront of Cuba's development and with this a great deal can be done to modernize and recreate this beautiful country. CUBA GLASS is the first international event that allows you to help renew, revolutionize and invest in the island but also gives you the opportunity of enjoying this experience with your customers from North and South America. Cuba's wonderful scenery and climate are an outstanding addition to this cooperative event. We guarantee that you and your clients will return from the event informed, inspired and relaxed.

GPD CUBA is your opportunity to enter a new market, strengthen your brand and your relationship with your clients in South and North America as a whole, while making a good impression through your educational presentation. Moreover, it may be your last chance to experience Cuba before the changes which modernization could bring.

THE VENUE

Meliá Cohiba Havana, Calle Paseo e/1ra y 3ra, Vedado, Havana - Cuba, www.meliacuba.com/cubahotels/hotel-melia-cohiba.

Boasting spectacular views over the city and the seafront, the 22-storey Meliá Cohiba offers comfort and elegance in keeping with its 5 star status. Located in the central business district of Vedado, the most modern area of downtown Havana, and just 50 meters from the famous Malecon esplanade (Avenida del Maceo), the hotel is a metropolitan landmark for business and conventions.
