

# OMS Group: COMPETENCE AND EXPERIENCE IN INTEGRATED PACKAGING LINES

From complete strapping stretch and shrink film hooding to pallet protection, this is what the product range of the company in this article – OMS Group – covers. But let's not stop there because these products, some of which are presented here, are backed by more than half a century of competence and experience.

**O**MS Group is a world leader in the development and production of equipment and systems for the glass industry. Established in 1949 and based in Paruzzaro, 50 kilometres west of Milan, northern Italy, OMS Group has a long-established tradition of designing and manufacturing world-class strapping, wrapping and hooding systems for end-of-line packaging of palletized products for all market sectors.

In addition to its Italian headquarters, the group also has

11 subsidiaries located in Italy, Europe, US, Asia and Oceania.

At glasstec this year, OMS Group will be present with its integrated systems for packaging lines and facilities, offering ever improved performance and cost savings for glassmakers.

### THE COMPANY – EXPERIENCE, MACHINES AND PHILOSOPHY

The Group's competence and experience in the field of integrated systems for packaging lines and facilities, accumulated in more than half a century, are without equal.

OMS constantly develops and updates its technological platforms aimed at customized and

innovative solutions for its clients, offering the benefits of improved performance and cost savings.

A complete production of end-of-the-line packaging machines for the glass sector: complete strapping stretch and shrink film hooding.

Our machines' reliability is guaranteed by years of experience, a qualified staff and a structure which exploits the most modern organizational criteria.

Consolidation and enlargement of the worldwide sales and assistance network as well as continuous research to continuously improve machine performance in order to reduce costs and to use materials with the least possible environmental impact.

## PRODUCT RANGE

### AT530

This combined automatic machine is specifically designed for the hollow glass industry and, on a single work station, applies and thermo shrinks the hood onto the pallet of bottles. Depending on the chosen model, the machine can use and automatically select up to three different coils of film with side gussets. The film is retracted onto the product by four independent flameless burners.

### Top pallet protection

OMS' automatic system can apply and thermo-shrink a sheet of plastic film on top of the load, hermetically and mechanically to protect the top part of the load, which is generally subject to tears due to stacking. This operation guarantees improved hermetic and mechanic sealing.

### Horizontal strapping 06CL

OMS' horizontal strapping machine for palletized hollow glass features an arch driven on a linear rack where a light compactor is mounted on four sides to guarantees the perfect positioning of the strap on the pallet, simplified head maintenance with quick release connectors and strapping programs that can be easily managed from the operator panel.

### Vertical Pressing & Strapping 078RP

The vertical strapping machine for palletized products has a top press capacity of up to 3,000 Kilos. The machine can apply multiple strapping patterns in both directions (from 2x0 up to 4x4), thanks to the programmable side shifting device working in combination with the turntable placed below the machine. ■
