

Tyrolit

presence in the Asian market

Tyrolit, is one of the world's largest producers of innovative solutions for grinding, dressing, cutting, sawing, drilling and polishing and is part of the Swarovski group. Tyrolit recently released two important products to enhance its presence both in the automotive and flat glass industries. Tyrolit Vincent, based in Thiene (VI) Italy, is the headquarters of Tyrolit's Stone, Glass and Ceramic

Division and is one of its main production sites. All Glass Division projects are developed in Italy where Tyrolit product specialists constantly work with end customers, in order to be able to provide them with the best advice and support whenever needed.

PRESENCE IN CHINA

TYROLIT (Suzhou) Superabrasive Tools Co., Ltd. is located in Suzhou China and opened in 2001 as a local manufacturing plant. The plant has recently added a re-profiling service center and acts as the regional hub to support the whole Asian region

with sales, technical support and logistics. In this way the Asian glass industry can count not only on the highest standard tools in the market but also direct and fast support from the best engineers. This investment reflects the Tyrolit Group's strong commitment towards investing in a country which has enormous potential for growth, and represents the

company's natural evolution in its 'Local Worldwide' strategy, whereby it operates at local level through the knowledge of the specific characteristics of each country.

A NEW GRINDING CONCEPT

Halo

With the single use grinding ring Halo, Tyrolit introduced a new concept for

HALO

As a member of one of the leaders in the global glass industry — the Swarovski Group — Tyrolit is continuing to expand and enhance its presence. In this article, we take a look at one of the Group's recent projects — a plant based in Suzhou, China, and the release of two important products for the automotive and flat glass industries.

edge grinding of automotive glass, offering several economic benefits: minimized investment in new wheels, reduced spindle maintenance due to a lighter wheel that reduces vibrations during work, 100 per cent saving of logistic costs because no re-profiling is required. Moreover, Halo guarantees significant cost reduction due to minimum start-up time, no need for machine set up and the possibility to work continuously installing more wheels on the same cone.

STARFLEX

Starflex

For the flat glass industry, Tyrolit has just released Starflex, a set of flat edge grinding diamond wheels for double edging machines, specifically designed to ensure outstanding edge finishing with the same tools on all glasses, ranging from 3-millimetre mirror glass to thick glass, or even laminated glass. Its specifically developed bonds and geometry and the perfect match of the metal and resin wheels allow excellent removal capacity at high speed.
