THE COMPANY AND ITS PRODUCTION SECTORS

Cugher Glass, the industrial company based in Novate Milanese, Milano, northern Italy, celebrated its 50 years of activity by exhibiting at glasstec in Duesseldorf with its brand new Fast Line.

The company, designs and manufactures machines, plants and complete solutions for screen printing processes on flat glass for the automotive sector, of which is leader thanks to the long standing experience and the numerous installations all over the world.

Other production fields for Cugher Glass are those dedicated to the architectural and home appliance sectors.

Company production is completed by integrating solutions dedicated to automation, process control, handling and storage, quality control.

THE NEW FAST LINE – FOR THE HOME APPLIANCE SECTOR

The new Fast line, protagonist of this edition of glasstec, is dedicated to the Home Appliance sector, with technological upgrades generated by Cugher's deep-rooted orientation to meet customer needs.

The continuous boost towards the satisfaction of customer requirements is the prerequisite for the technological development of production in the company's three application areas.

The Fast line, extremely rapid and offering excellent performance with regards to cycle times (it can print up to 600 glasses per hour), is very reliable thanks to the top quality components and highly versatile in format changes. The line meets the features of the sector perfectly.

Format change is a basic

task in the Home Appliance industry: with Fast it takes only a few minutes, thanks to the self-learning system of the glass format and the operation can be performed by a single operator.

The new version has improved the automated centring and pre-centring systems to guarantee even more precise printing with outstanding printing times. The Fast Series can also be equipped with several options that in some specific cases generate a remarkable added value for the industrial processes of customers

Cugher's R&D department has also improved maintenance operations, further simplified thanks to some recent interventions on the design of the machine.

WORKING WITH TECHNOLOGICAL PARTNERS

This year, moreover, Cugher has coordinated with its technological partners in order to be on the market as the right supplier of fully automated and extremely high-tech complete lines for screen printing on glass. Together with Triulzi Special Equipments, Iocco Group and Mappi International, Cugher Glass set up an archipelago of technology inside Hall 16: four exhibition islands linked by common architectural elements that recalled the high technological content provided by the production ranges of the partners and offered visitors a tangible experience of their respective productive qualities.
