Europe, etc. In this article we will take a look at some of the steps along the Maritime Silk Road covered by LandGlass, stopping at three clients using three different types of LandGlass technology.

FUJIAN, CHINA

Xinfuxing Glass

Fujian is an important point of the Maritime Silk Road. Located at the intersection of the East and South China Seas, it was the original starting point of 'Zheng He's Voyages' and the Maritime Silk Road in history. It was also economic congregation point at sea. Since its inception in 1980, Xinfuxing Glass, which specializes in high-end construction glass manufacturing and processing, is located in the Fujian province. The company has consecutively received the various certifications of ISO9001, 3C Certification and CE Certification for many years. In addition, it was also the reputable winner of the 'Top 30 China Glass Processing Enterprises for four consecutive years. In recent years, with meticulous selection, Xinfuxing Glass has procured several LandGlass glass tempering furnaces to be used in the expansion of its manufacturing facilities and at the same time, to raise its

The Belt and Road Initiative refers to The Silk Road Economic Belt and the 21st-century Maritime Silk Road. As an inaugural national strategy driven by the higher management, the Belt and Road Initiative has a far-reaching strategic significance in relations to the modernization drive of

China as well as its leading position in the global economy. Meanwhile, it is also the beginning of the 'Global 4.0' lead by China. As such, as a leading player in the Chinese glass processing industry, LandGlass has already started on its own '21st-Century Maritime Silk Road', bringing Chinese glass processing

equipment to the countries and regions along the 'Belt and Road.'

As everyone knows, the 21st-Century Maritime Silk Road starts from China, heading toward the West, and connecting each and every important economic continent such as ASEAN, South Asia, West Asia, North Africa,

product quality. To date, the products of Xinfuxing Glass have been sold to countries such as the US, Australia, UK, Germany, Korea, Vietnam, Iran, Egypt, Saudi

Arabia, etc. other than receiving excellent feedback from its customers, local and abroad, the company has also undergone rapid development.

GUANGDONG, CHINA Ngai Wah Glass

Navigating along the Maritime Silk Road, the next station is Guangdong, a

coastal province in South China. Guangdong has always been the pioneer of the country's economy, culture and technological development. Ngai Wah

Machine: LandGlass Cyclone Series Glass Tempering Furnace

Mall and other renowned construction landmarks. In the spacious and well-lit workshops of the company, the LandGlass' Cyclone series glass tempering furnaces and the new generation of Cyclone™ Convection Heating System and isotherm heating technology work to maintain a uniform convection air pressure, significantly elevating the uniformity of glass heating. Besides, coupled with a series of advanced, leading technologies such as GeniusCool tempering technology, highly intelligent eAdapt System, comprehensive, precise data analysis, etc., while ensuring the quality of the tempered glass, at the same time, they also effectively achieve the smart controls, meeting the requirements and needs of its clients in terms of quality, cost and intelligentization.

HAINAN, CHINA

Hainan Haibo Engineering Glass

Located in the southernmost part of China, near to the north of Qiongzhou Straits, approaching the West of Beibu Gulf; facing east of the South China Sea, the Hainan province is the second largest island in China after Taiwan. The Hainan Special Economic Zone is the largest

Glass Company Limited is a subsidiary of Hong Kong Ngai Wah Glass. It is a glass processing company with an outstanding, ancient reputation of more

than 50 years of history. Besides selling its products all over the country and in other countries and regions such as Hong Kong, Macau, Singapore, Europe,

America and so on, its projects include Shanghai Jinmao Tower, MOKO New Century Mall (Hong Kong), The Landmark Macau, Singapore POLO

in China and it is the only province designated as a special economic zone. In 2018, a pilot program was launched to build the free trade zone island. Hainan Haibo Engineering Glass Co., Ltd. Is the most mod-

Company Name: Ngai Wah Glass Company Limited;

Machine: Flat and Bent Bi-Directional Glass Tempering Furnace

over 30,000 square meters. Over the years, the company has purchased three glass tempering furnaces from LandGlass. Two of them are LandGlass LD-AB JetConvection Flat & Bent Bi-Directional Glass Tempering Furnaces. This type of equipment is fitted with a flat and B-type bent quenching

section at each side of the heating furnace. By loading the glasses in different direction, single equipment can successfully meet the requirements of two products namely the flat tempering and the B-type bent

tempering. As only a single machine is used to meet two types of product processing requirements, it can effectively control the costs and space usage, producing high-end, high-quality tempered glass.
