glassOnline
 the world's leading Glass Industry Portal

Does the great leap towards innovation tempt you?

Innovation – it's talked about a lot but few do it like we do. Our research policy is unique and our research centres mobilise powerful and innovative forces.

Powerful, because we have the largest research centre in the world specialising in refractories and their interactions with different types of glass. Innovative, because we have 140 engineers and technicians who use the most progressive, multidisciplinary technologies.

You produce float glass, hollow glass, insulation fibre, reinforcement fibre or special glasses (glass ceramics, borosilicates, LCD / PDP...) We have the expertise to help you do it better. Find out more at www.sefpro.com

Plant Manager: Andrea Morelli

Products: Accessories for glass industries

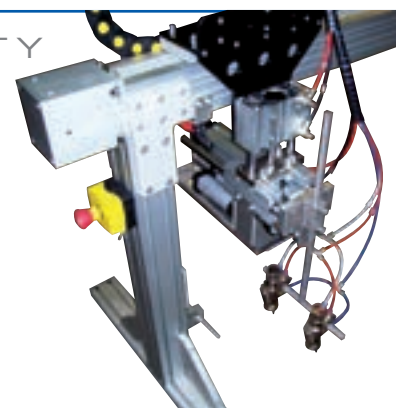

AREAS OF ACTIVITY

This new enterprise was set up after thorough observations and following considerations of the glass market. The necessity of the presence of a company, which could combine many years of experience, professionalism and credibility, looking, at the same time, at the future, at innovation and new technologies, pushed us to undertake this new adventure.

The result is this interesting company, which represents the perfect union between experience and innovation with the common aim of the maximum satisfaction of ever more exigent and experienced clients. For this reason, our machines are designed and manufactured exclusively in Italy, they are flexible and modulated according to the requests of clients and built using resistant materials. Thanks to high technology, important energy savings and, above all, easy and high-speed use are possible.

The product range of AB. Technologies includes Scrapers, Accessories, Runspray Cold-End Spray, Supply Mixing and Dosing Pump for emulsions used in gob cutting, Supply Mixing and Dosing Pump with automatic feeding of products for the cold treatment of glass.

Runspray is our Cold-End spray system that operates between bottle lines with high precision, always and automatically considering all production variables (no bottles or non-aligned bottles).

Its software is very easy to set and use, the operator can change all parameters also while the machine is working.

Runspray is equipped with a Siemens touchscreen that works with a Siemens PLC.

The mechanical transmission and motorization are excellent: the motor is a 800w Yaskawa brushless and the planetary motor reductor is Wittenstein.

The guns system is hydro pneumatic and the guns can have traditional or atomizing nozzles that guarantee perfect spraying.

Supply is our standard dosing pump.

The machine is used in all sectors where there is the need for continuous mixing of two liquids. In the glass industry, Supply takes care of cold end spraying and lubrication of the shears.

The operator can simply set the parameters to obtain the desired percentage from the PLC-controlled operator panel.

The system can check if the mixing is taking place correctly by monitoring the pressure in the pneumatic pump which doses and extracts the product.

The pressure inside the mixing tank is also continuously monitored.

In the case of failure, the machine indicates the anomaly by means of an emergency lamp and displays the alarm on the operator panel.

We can also provide a Supply Hf (high flow) and Supply dosing system with double flow.

ACROTECNA

automazione e controllo

AREAS OF ACTIVITY

We are Acrotecna: a small company with big ideas.

Acrotecna is a System Integrator and Solution Provider for Industrial Application.

Our expertise is in Hardware, Application Software, Project Engineering, Installation and the entire life cycle; maintenance and full support to our customer and their plants.

We combine 25 years of experience and professionalism of our team in the glass market with the passion of young engineers using the latest technologies for innovative solutions for application in Automation and Process Control Systems for glass.

We can provide a complete Process Control System, based on DCS or PLC, for the following applications:

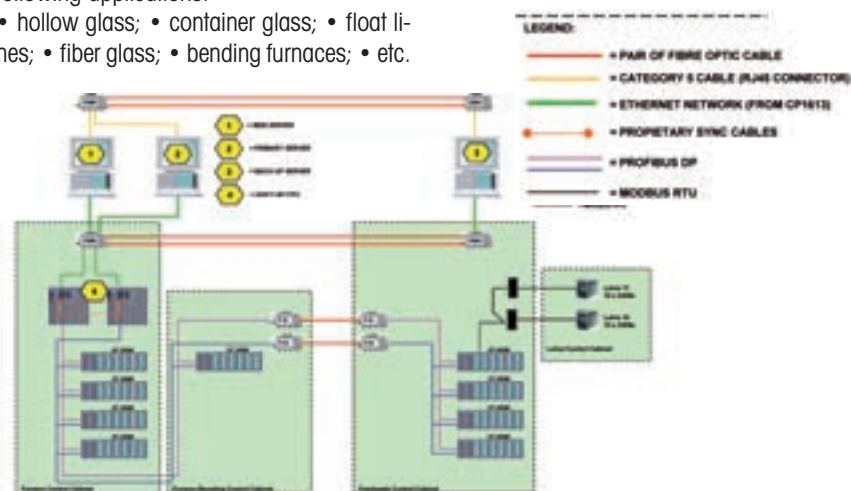

• hollow glass; • container glass; • float lines; • fiber glass; • bending furnaces; • etc.

Company applications can be found in the following areas:

• batch houses; • melting furnaces; • forehearth controls; • lehr controls; • bath roof and lehr power control for float lines; • boosting systems (including power cabinets and solutions); • plant utilities such as cooling water, compressed air, energy monitoring, scraper control systems, etc.

We work through all life cycle phases of a Process Control System:

• feasibility studies; • engineering; • construction; • installation; • commissioning and start-up; • life cycle system maintenance.

AREAS OF ACTIVITY

Air Products and Chemicals, Inc. and its subsidiaries serve customers in technology, energy, healthcare and industrial markets worldwide. The company offers a broad and unique portfolio of products, services and solutions providing atmospheric gases, process and specialty gases, performance materials and chemical intermediates. Founded in 1940, Air Products has built leading positions in the glass, metals, metals processing, non-ferrous metals, cement, foods and cryogenic segments as well as in key growth markets such as semiconductor materials, refinery hydrogen, healthcare, natural gas liquefaction, and advanced coatings and adhesives. Geographically diverse with operations in over 40 countries,

the company had sales of USD 10.1 billion in fiscal year 2011, operating income of USD 1.7 billion and a worldwide workforce of over 18,000 employees.

Air Products is a supplier of industrial gases and chemicals (nitrogen, oxygen, argon, hydrogen), patented technologies and hardware (oxy-fuel burners, flow controls), CFD modelling and services (feasibility studies, start-up/commissioning). Specializing in oxygen applications for fuel savings, production increase, pollution control (NOx, SOx, CO2, particulates), and glass quality improvement. Patented Cleanfire® oxy-fuel and hybrid air-oxy-fuel combustion technologies ensure improved melting.

AREAS OF ACTIVITY

ALL GLASS S.r.l. is a well-known reliable supplier in the glass industry.

We are able to design and supply turnkey cold-end lines from lehrs to palletizers, including cullet conveyors, accumulating tables, bottle inverters, elevators and lowerators.

Our range of products can also provide customers with the following, according to their requests:

- special devices such as vibrating tables, dividers, sorters, spacers, orientators, motorized edges, etc.;
- manual and automatic depalletizers;
- pallet transport lines fully equipped with all necessary accessories such as deviators, rotating and modular built chain and roller conveyors, shuttle cars;
- semi-automatic and automatic shrink packaging machines for pharmaceutical and food glass containers;
- mould pre-heating furnaces.

With the aim of increasing the flexibility of its pal-depal systems, ALL GLASS started installing 4- and 6-axes robots some years ago, and thanks to their simple use and reduced maintenance, the number of such installations is growing monthly.

Moreover, the technical management, with his wide and varied experience in the glass industry, is in a position to follow its customers step by step, providing reliable after-sales service and assistance.

AREAS OF ACTIVITY

AMIG has been producing both automatic and semi-automatic glass forming and processing machinery for over 25 years.

AMIG's present scope of production includes:

• Pressing

- Full electric linear presses, with servomotor operated pressing mechanism, especially for the production of high-quality large-sized articles.

- Automatic single- and double-gob, electronically controlled, hydraulic turntable presses.

- Fire polishers, both linear and rotary, equipped with either gas/air or gas/oxygen reburning system.

- Semi-automatic hydraulic presses.

• Spinning

- Automatic turntable spinning machines with individual spinning motors.

- Semi-automatic electric spinning machines.

• Press-&-blow

- Automatic, single turntable jug forming machines models PAS9 and PAS12 can be equipped with Geneva Wheel mechanism or Torque motor for table motion.

- **Glass blocks lines, for standard and high capacity.**

- **High voltage insulators lines and plants.**

MT Forni Industriali and OCMI-OTG can perform turnkey projects from batch plant to final take out for the production of different glassware articles: tableware, containers, stemware, jugs, lighting ware, electric insulators, glass blocks, etc. under the AMIG brand name.

AREAS OF ACTIVITY

AREAS OF ACTIVITY

Thanks to a century of experience in the mechanical industry, over half a century in the field of glass, and a further 20 years in electronics, BDF INDUSTRIES is a leading industry in the research and development of new technologies for the sector of hollow glass containers.

BDF now offers extremely advanced products based on rock-solid expertise, research and innovation, guaranteeing top level quality and efficiency.

GOB FORMING MECHANISMS

- Feeders
- Servo Parallel Shears
- Servo Plungers
- Servo gob distributors
- Operations: SG - DG - TG

IS FORMING MACHINES

The long experience in the design and manufacturing of IS machines enables BDF to cover the complete range of sizes from single section forming machines and from 2 to 12 sections, also available in tandem systems.

- Operations:
 - SG
 - DG 4 1/4" - 5"B - 5"S - 5 1/2" - 6 1/4"
 - T.G. 3" - 3 1/8" - 190 - 4 1/4"
- Processes: BB, PB and NNPB, with or without vacuum systems.
- Variable Equipment for 4 1/4", 5", 5 1/2", 6 1/4". Manufactured according to the highest standards of quality and interchangeability with other types of IS machines, they are available for Single-, Double- and Triple-Gob, as well as the different types of Centre Distances generally used in the glass industry.

ELECTRONIC CONTROL SYSTEMS

- Integrated Control Systems:
 - BDF-ADV8000
 - BDF-ADV1000
 - BDF-INTEGREX

- Stand Alone Components: timer - drive - pusher - servo feeder - servo gob distributor - servo mechanisms

WARE HANDLING

- Servo Take-Out
- Servo Pushers Dual Axes
- Transfer Wheels
- Cross Conveyors
- Servo Stackers

OTHER MACHINES

- Thermal-shock Testing Machines
- Mould Polishing Machines

SERVICES

BDF provides customers with technical assistance for installation, commissioning and service on site.

BDF assistance continues with after-sale and periodical visits for complete customer satisfaction.

In addition, a special production line has been dedicated to the manufacturing and reconditioning of modules complete with mechanisms for exchange with customers' sections due for repair.

BDF Engineering Division is able to provide customers with complete design of turnkey glass plants. According to customers' requirements and needs, BDF engineers design the composition of complete structures for the production of hollow glass: from the composition of production plants up to the most modern automatic storage systems.

BDF ENERGY DIVISION

Always attentive to the developments and demands of automation in the glass industry, BDF has continued its evolution towards the use of renewable energy sources by means of heat recovery from exhaust fumes in glass factories. Products:

- Cogeneration
- Trigereneration
- Pollution Control (Filtration)

RANGE OF PRODUCTS

- IS MACHINES • FEEDERS • VARIABLE EQUIPMENT
- ELECTRONIC CONTROL SYSTEMS • ENERGY RECOVERY

- **SERVICE**

AREAS OF ACTIVITY

Bock Energietechnik was founded in 1984 by graduate engineer Werner Bock.

The objective of the company is the efficient utilization of electric energy in the glass industry.

We design, manufacture and install electrical heating systems for a variety of applications in the glass industry.

Forty years of experience in this area is helpful.

We have started up many installations to the complete satisfaction of our clients.

Electric heating systems for the glass industry

- Physical and mathematical modelling with representation of the electric power density in molten glass
- Electric additional heating systems (boosting facilities), complete installations from planning to commissioning
- Transformers and thyristors with corresponding adjustment controls
- Electrode supports with accessory installation equipment for side-, bottom- and top-electrodes
- Cooling equipment for electrodes
- Forehearth - heating by heating elements and direct heating by electrodes
- Feeder bowl heating
 -> Indirect heating by special heaters
- Glass Level Measurement with established principle - in high-tech measurement processes
- Automatic control engineering: (Temperature, Flow, Ratio, Glass Level, Visualization)
- Special furnaces according to customer specifications

GLASS MOULDS Busellato

AREAS OF ACTIVITY

First and foremost – specialization!

Busellato Glass Moulds means innovation and technology and, thanks to the experience of its well-trained staff and technicians, the company is able to satisfy the most demanding client requests with the creation of par excellence moulds for the most complex glass container sectors – pharma and perfume.

Busellato's production can be any shape and size – triangular, square, rectangular, animals, etc. – ranging from the smallest and most complex containers for perfumery and pharma, from 5cc up to those of 8 litres, all carried out in-house, including welding, polishing and packaging.

Detailed studies regarding the techniques and metallization materials for glass-contact surfaces of moulds used in hollow glass production has enabled Busellato to develop a history of the process referred to in order to analyze possible defects, even in post-production phases. Thanks to the results obtained, ideal parameters for the HVOF technology can be defined, with considerable advantages on the glass-contact surfaces, both in terms of finishing and durability of the mould itself. This in turn results in advantages on distribution, stretching, and workability of the filling material.

Studies also concern the reconstruction of the surfaces of damaged moulds after production, resulting in advantages with regards to metallization when using a thermal post-metallization process, thus avoiding migration and subsequent thickening of non-melted particles, guaranteeing better distribution of the filling material. This process also eliminated the possibility of metallization detachment usually caused by thermal gradient among layers.

This continuous commitment and a series of generational changes over the past few years have made for higher quality requirements which Busellato Glass Moulds meets thanks to continuously ongoing developments of new technologies.

RANGE OF PRODUCTS

- TEMPERING LINES
- ANNEALING AND DECORATING LEHRs
- MOULD PRE-HEATING OVENS
- CROSS CONVEYORS
- SCRAPERS • STACKERS

AREAS OF ACTIVITY

Since 1965 CAR-MET has been working in the glass industry supplying technological machinery. During these years CAR-MET has gained experience, knowledge and enhancements in glass production thanks to its skilled personnel. The internal workforce is dedicated to the engineering and manufacture of machinery such as:

- Annealing lehrs for containers and special glasses
- Decorating lehrs
- Lehrs with double belts
- Toughening lines on belt and spindle
- Mould preheating ovens
- Cross conveyors
- Stackers with two and three axes
- Brushes for all the type of lehrs
- Hot glass scrapers
- Lehrs for special purposes

All machinery is manufactured entirely at CAR-MET's premises, in the north-east of Italy. Our services for clients include the pre-testing and inspection of machinery before delivery.

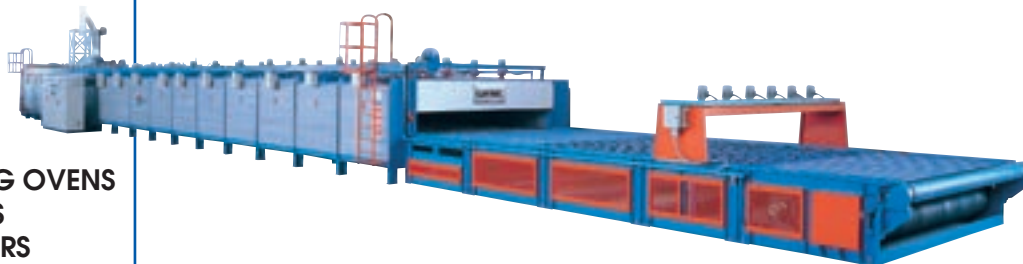

Annealing and decorating lehrs are among the best known products of the company; research and development is the guarantee that our technology is continuously evolving.

Gas or electrical heated lehrs are

manufactured by means of modular design. The burners installed on the lehrs are patented by CAR-MET, adapted to almost any type of gas, having controlled air consumption. Size and configuration of each lehr is based on the space available for the installation and type of production. Heating and cooling systems installed have been developed in accordance with European energy-saving regulations; which reduce operating costs in energy consumptions.

Attention to the environment is not only reduction in energy consumption but also controlled emissions of exhausted fumes. A new technology of heat exchangers and radiant tubes has been developed, manufactured and installed by CAR-MET with the satisfaction of clients. This indirect heating technology is widely used in decorating processes to ensure the best results of final product quality.

AREAS OF ACTIVITY

Located in Jiangsu province, China, and established in 1976, Changshu Jianhua Die Sets Co., Ltd. (Jianhua Mould) has almost 40 years' experience in manufacturing glass moulds. As a leading glass mould manufacturer in Asia, Jianhua Mould mainly produces bottle container glass moulds and tableware glass moulds. Jianhua Mould's mission is to maintain first-class staff, manufacture high-grade moulds, create a top brand, provide services for high-class customers and become a first-class supplier.

The company is dedicated to providing worldwide first-class customers with various bottle and container moulds and accessories, which are applicable to NNPB, B&B and P&B processes, and also to supplying moulds, mould holders and accessories for tableware and kitchenware that are produced under press, blow and P&B processes.

Jianhua Mould has more than 40 experienced engineers who use advanced CAD/CAM/CAE software to design the moulds, set the programmes and simulate

real samples. In addition, to meet the demand of customers regarding complicated designs, the company's engineers always analyze heat distribution and simulate the glass forming process in the moulds using advanced software.

Jianhua Mould has established its leading position in the glass mould industry due to its complete quality control system, highly-trained quality control personnel, advanced inspection facilities, as well as the aim of continuous improvement in quality systems.

Jianhua Mould has always been upholding the philosophy of eternal golden triangle: customer's satisfaction, company's profitability, and employees' sense of achievement.

AREAS OF ACTIVITY

Technology at the heart of our moulds and attachments for hollow glass.

CO.MI.T is an engineering company founded in 1988 and based in southern Italy.

Its core-business is to design, develop and manufacture moulds and accessories for hollow glass.

CO.MI.T has inherited Marcon's 30-year experience and background **in glass mould production.**

CO.MI.T's manufacturing expertise is enhanced thanks to our close

contacts with the world's leading glass container manufacturers, thus taking CO.MI.T to its position as one of the leading suppliers of mould parts both in Italy and in the rest of the world.

We firmly believe that our continuous investment in state-of-the-art **technology** is the best way to deal with the fast changing market. To best meet our customers' needs, CO.MI.T offers an effective and complete assistance at your own locations.

Manufacturing compliance is monitored under our quality management system which is recognized internationally and certified according to **UNI EN ISO 9001.2000.**

Our goal is to be the best partner for the glass container industry in the design and manufacture of moulds and accessories for hollow glass.

Our main characteristics:

- State-of-the-art technical department
- Exclusive use of certified raw materials
- Cnc machines of the latest generation
- Qualified and skilled working team
- Full versatility of internal production
- Great sensitivity to the environment

Our production:

Comit manufactures MOULDS and ACCESSORIES FOR THE HOLLOW GLASS INDUSTRY, such as:

- METALLIZED (OR NOT) BRONZE-ALUMINIUM NECK-RINGS;
- METALLIZED CAST-IRON NECK-RINGS;
- NICKEL INSERT NECK-RINGS;
- NICKEL GUIDE RINGS;
- METALLIZED CAST-IRON AND BRONZE GUIDE RINGS;
- METALLIZED CAST-IRON AND STEEL PLUNGERS;
- PLUNGERS N.N.PB.
- PLUNGERS B.B.

AREAS OF ACTIVITY

EN-ISO 9001:08

Numerical controlled automation is being introduced to glass mould production and repair by Italian welding equipment supplier **COMMERSALD IMPIANTI srl**. This task had remained dependent on the manual application of spray-fused canisters and powder products long after other aspects of the manufacturing process had been automated. Now Commersald Engineering believes that its *Robo* series of workstations can perform all the necessary functions of manufacturing and repairing moulds and other glassmaking accessories. The welding equipment, complete with torches and power supplies compatible with various movements, designed and manufactured entirely by Commersald Engineering, can be selected according to need. It is available in various configurations and with power ranging from 200-400 A.

All these work centres are managed by numerical control, (NC) with dedicated software for both management of movements and for welding parameters. Programming is ISO standard, the same as normal NC machines for removing shavings.

The plants have the following characteristics:

- a torch with a copper tapering nozzle able to work in 200A continuous cycle on moulds and accessories of all dimensions for the glass industry, with constant penetration on the whole profile;
- 80kg max surfacing moulds, with pre-heating of pieces at temperatures up to 300°C for cast iron moulds and 400°C for bronze moulds;
- 20mm-thick metal structure, arc welded, quench and tempered steel with machined locator tables;
- programming simplified by the use of icons and windows.

All this equipment can be accessorized with Commersald Engineering induction heating units **HEAT 12-24** Kw for correct, fast, precise and economic pre-heating of the pieces.

Commersald Group's KOY trademark is one of the most complete, well-known and used line of welding materials and **PTA powders** in particular in Europe. The quality sales system of the group's welding consumables has been certified EN-ISO 9001:08 as a further warranty of excellence of its products. Commersald Group's range of PTA powders includes specific Ni/Co/Fe grades for the glass industry with different hardness and with specific features for cast iron, bronze or steel moulds.

Commersald claims to be the leading European supplier of **Plasma Transferred Arc** equipment, as well as focusing on developing new products and improving its machinery in every aspect. It also places emphasis in the assistance it provides, often external, for customers. This includes customizing machines for their specific requirements.

AREAS OF ACTIVITY

Ecotecne, located in Galliera Veneta, Italy, is a leading manufacturer of ultrasonic cleaning equipment.

The company has recently released a new line of solid chemicals to foster the ultrasonic action of its system for cleaning the moulds used in the hollow glass industry. The new chemicals – Ecobasic and Ecoacid – continue Ecotecne's tradition of integrating the latest technologies into its high-quality, easy-to-use plants. The chemicals have been developed in-house with the assistance of regional universities and with the collaboration and technical expertise of a private laboratory specialized in formulating new chemicals for current industrial use.

The new chemicals now feature:

- powder form = products are added on site into the cleaning tanks and no longer transported and manipulated in liquid form;
- low concentration = 8%-9%;
- increased chemical efficiency;
- less volume, which also means minimum storage, reduced transportation costs, reduced ecological impact, reduced transportation risks – solid compared to liquid form.

Products are supplied with instructions and can be easily managed by any operator without additional precautionary measures, unlike those normally in usage.

Ecotecne's team has, moreover, during the past two years, reviewed and innovated all parts of its patented machinery and its ultrasonic generators are now more powerful and multi-frequency, and can provide surplus energy whenever needed to achieve in-depth cleaning of particularly dirty items.

Transducers have been re-designed and upgraded in order to support and transmit maximum power efficiently, while the cleaning cycle has also been revised. In this way, Ecotecne can now offer the same quality of service and cleaning effect with different system sizes, ranging from the manual single-tank ECO1 to the most sophisticated, fully automated seven-tank ECO7.

AREAS OF ACTIVITY

Founded in 1976, Electroglass is an established independent specialist in all-electric glass melting and conditioning, electric boosting and related systems.

Based on decades of experience and ongoing technical development, Electroglass provides the most up-to-date technology for electric furnaces, forehearths and boosting systems for all glass types, as well as precision control bubbling and ancillary equipment, such as glass level sensors, throat heating and drain systems.

Supply scope includes design and specification, equipment supply and installation, plus commissioning of individual specialized equipment or complete system packages.

Electric furnaces ranging from 200kg to approximately 250 tonnes/day provide operating economy and glass quality assurance in volatile and non-volatile glass types. High efficiency Convection Current Control boosting for fuel fired furnaces with installed capacity between 50kW and over 3MW enable significant tonnage increases, improved glass quality, reduced energy consumption and extended furnace life.

Electroglass Temptrim forehearth heating systems allow compensation for temperature imbalance across wide fuel-fired forehearths and can greatly reduce gob weight variations in container glass production.

Electroglass insulated Moly-cool and Splashguard water cooled electrode holders are designed for vertical, angled or horizontal applications and are available in a range of sizes to suit customer needs.

The company is based in south-east England, close to all major international connection points and able to offer worldwide installation

and service, with specific representation in China, Korea, Japan, Taiwan and the United States.

AREAS OF ACTIVITY

EME is a leading supplier of batch and cullet handling equipment and systems for the glass industry. Established more than 75 years ago, the Company has a long history of service to the glass industry and has been part of the SORG Group since 1987.

One of the main activities of EME is the design, engineering and supply of turnkey batch plants, comprising equipment for raw material acceptance and storage, transport, dosing, weighing and mixing. Modern glass manufacturing operations demand high quality standards and EME installations offer high levels of accuracy and reproducibility coupled with fully automatic operation. The use of environmentally friendly technology minimizes emissions.

Computer control systems are used to provide both accurate and transparent control. EME visualization technology presents the operator with a clear and detailed picture of the operational status of all parts of the system at all times. In most cases operator masks can be configured in the local language.

EME can offer a range of equipment for cullet treatment, including the double roller ZWB crusher. The company is also able to supply complete cullet treatment plants.

After preparation, the batch and cullet has to be charged into the melting furnace, and EME can offer a batch charger design to suit all types of furnaces, including the innovative EME-NEND® charger that is currently revolutionizing charging in the container sector.

In recent years, EME has supplied and installed complete batch house systems for the manufacture of a range of different types of glass products, including containers, float glass, lighting ware, E-glass textile fibres, display glass and low iron solar glass. These installations are to be found throughout Europe, North and South America, Africa, the Middle East and Asia. Many of the installations have been made on a turnkey basis in which EME has been responsible for the supply and installation of the complete batch house with the exception of the building itself.

RANGE OF PRODUCTS

- GLASS CONTAINER AND GOB FORMING
- COLD-END INSPECTION
- REFRACTORY PARTS

AREAS OF ACTIVITY

As the world's leader in equipment, services, and technology solutions, Emhart Glass continually sets new standards for glass container production flexibility. Offering the widest array of products available, Emhart Glass is able to meet the requirements of glass-makers regardless of their technology level, to become the solution provider for the glass container industry.

Forming Machines

As the inventor of the modern-day IS machine, Emhart Glass revolutionized the glass production process. Today the machine portfolio includes:

- IS 4 1/4" → SG, 4 1/4" DG, 3" TG
- IS 5" → SG, 5" DG, 85mm TG
- IS 5 1/2" → SG, 5 1/2" DG
- IS 6 1/4" → SG, 6 1/4" DG, 4 1/4" TG
- AIS 6 1/4" → 6 1/4" DG, 4 1/4" TG
- NIS 5" → 5" TG, 95mm QG, 6 1/4" DG
- BIS → 140mm DG, 95mm TG, (70mm QG)

Glass Conditioning and Gob Forming

From the advanced design of the 555 servo feeders to plungers, gob distributors, and shears, Emhart Glass offers a full range of glass conditioning and gob forming equipment incorporating the latest technologies.

Control Technology

Controls from Emhart Glass are at the heart of the forming machine, which direct the key processes – ranging from conditioning the molten glass, to the seamless integration of complex mechanisms in the glass production process. Today, the FlexIS Process Control System is the primary control system for the forming machine, and will be the foundation

for advanced process feedback and automation systems.

Ware Handling

Emhart Glass products include a complete line of leading technology servo-electric mechanisms that include take-out, the Flex Pusher, ware transfers, and conveyors.

Inspection Systems

Emhart Glass provides quality assurance solutions designed to meet almost any inspection requirement. The Emhart Glass "total choice" portfolio includes the new FlexInspect family, consisting of the most precise mechanical and vision inspection machines, as well as high-precision on-line statistical sampling systems.

Hot End and Cold End Technical Services

As the technology leader and solution provider in the glass container industry for more than 90 years, Emhart Glass is able to offer a comprehensive portfolio of customer service, training, customer process support and project management.

A modern training center in Sundsvall, Sweden offers modern and up-to-date theoretical and practical training on all Emhart Glass hot-end equipment. In addition to the training center in Sundsvall Emhart Glass established a satellite hot end training center in Johor Bahru, Malaysia.

For the cold end, Emhart Glass opened a Technical Service Center in Cham Switzerland which serves as the central training, service and demonstration facility for the Central and Eastern European, as well as Middle Eastern and African markets. Other cold-end technical service centers are located in St. Petersburg, Florida and in Johor Bahru, Malaysia.

EMMETI SIPAC

AREAS OF ACTIVITY

Automatic handling of non-round containers is becoming a strong challenge of the glass market and Emmeti/Sipac are world leaders in designing, manufacturing and commissioning turnkey lines with tool-less replacement of job change parts.

Reverse tapered, flask, rectangular bottles are easily handled by our layer forming device equipped with tulips, bladders or sweeping guides depending on shape and stability of bottles. Our new continuous robotic "stacker" for highly unstable bottles can achieve the speed of 16 cycles/min on a single row, thus reducing the number of required in-feed lanes; consequently eliminating the need of a bottle divider and minimizing space requirements.

A new self-adjustable tulip head with two brushless motors has been designed to pick up complete layers of bottles, space and place them into thermoformed trays to avoid any contact between bottles during packaging process and transportation to customer's plants.

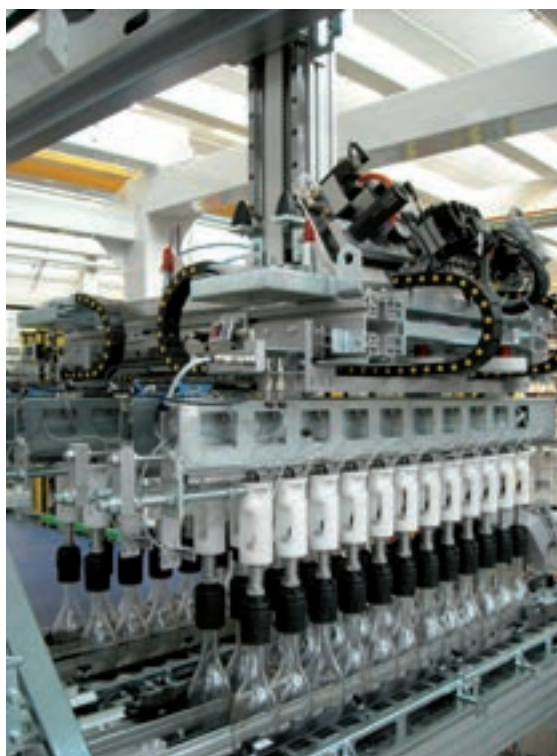

You can rely on the expertise of our companies and the numerous successful installations all over the world, with technology that begins immediately after the annealinglehr with vibrating plates designed to move unstable bottles to the conveying line without touching each other.

Beside complete cold-end lines, we also supply bottle orienting machines for non round containers.

They are supplied in three stages: bottle spacer, camera vision system, bottle orienting device by lateral belts. Speed approx. 300 bpm depending on stability of bottles.

The close synergy of our two companies enables customers to rely on a single supplier for their turnkey projects, from lehrs to finished pallets into the warehouse.

Nowadays a key factor for the success of your project!

AREAS OF ACTIVITY

Famor Engineering supports glass processing by means of dedicated engineering.

The company has been present on the industrial mechanical market for over 40 years, occupying a highly prestigious position, thanks to its high professionalism, ability and reliability of the technical structures and quality of the work carried out.

The company's areas of expertise include:

- the use of new alloys and surface treatments aimed at increasing the working life of critical parts in glass-making machinery;
- the development of equipment and devices to improve the automation and efficiency of glass forming lines;
- overhauling of blowing-, press- and press-blow machines, according to client demands. Famor Engineering offers different levels of overhauling: from partial check-up right up to complete renovation, supplying a manufacturer's warranty;
- design and/or construction of spare parts for most glass forming machine types;
- global spare parts service

RANGE OF PRODUCTS

- **SCREEN PRINTING MACHINES FOR HOLLOW GLASS CONTAINERS AND AUXILIARY EQUIPMENT FOR IN-LINE INTEGRATION**

AREAS OF ACTIVITY

FERMAC has the most complete range of screen printing machines on the market for the hollow glass container sector.

The range is composed of:

- M series (semi-automatic mechanical printing machines for cylindrical tumblers or bottles using thermoplastic ceramic enamel process);
- T series (automatic printing machines for cylindrical or conical tumblers with mechanical or numerical technology using thermoplastic ceramic enamel process or UV inks on numerical versions);
- R series (automatic printing machines for cylindrical, oval, flat or conical bottles/tumblers with mechanical or numerical technology using thermoplastic ceramic enamel process or UV inks on numerical versions);
- RUV series (automatic numerical printing machines for cylindrical or flat bottles/tumblers using hybrid process thermoplastic ceramic enamels or UV inks);
- FXX series (automatic CNC printing machines rotary base for cylindrical or shaped bottles tumblers in contouring using hybrid process thermoplastic ceramic enamels or UV printing);
- CLXX (automatic CNC printing machines linear

from the mould: (line, relief, transparent windows on acid-etched bottles, flux for overprinting gold on flux, previous print. Accuracy up to: $\pm 0,1$ mm at 75 p/min.);

- UV curing system: with air cooling version, water cooling version, UV LED version;
- quality control system with linear colour camera type SPECTRUM which can control the printed artwork at the end of the cycle in automatic mode. Only on automatic mechanical version: conical printing stations. System proven at 70 p/min on complex artwork up to 8-colour design;
- only on automatic numerical version: oval or flat printing stations or UV curing systems;
- only on automatic CNC version: self learning device with laser beam for reading the shaped profile of containers;
- on the automatic CNC version: for the linear CLXX series, it is possible to install flat printing stations (front-back);
- on rotary base FXX series, this device is standard.

version for cylindrical or shaped bottles/tumblers in contouring using hybrid process thermoplastic ceramic enamels or UV printing).

The following devices can be installed on all numerical and CNC versions:

- angular positioning system with CENTRUM type linear camera, which can record any element

On all the new versions: numerical and CNC, FERMAC has developed user-friendly software in order to reduce changeover time by memorizing all printing parameters and main adjustment.

FERMAC uses an energy recycling concept on the CNC version which enables to save energy during braking phases and deliver the saved energy during acceleration. This concept enables to save energy by maintaining a very high level of performance and high level of reliability of the complete system.

FERMAC R&D worked for more than two years on the development of a complete line combining a hot foil stamping process on UV printing. This capacity is operational on shaped or cylindrical containers giving high productivity and low scrap rates with premium quality.

This line has been presented at many exhibition such as: glasstec and Cosmoprof, as well as during Open Houses at Fermac's premises giving excellent results.

AREAS OF ACTIVITY

F.I.C.'s reputation for leading the world in glass furnace technology enables it to call on unparalleled expertise and experience when fulfilling client's needs. Its innovative and technology led approach, allows a unique degree of customising to ensure that client needs are met with optimum efficiency and cost-effectiveness.

Part of the BMT Group of Companies, F.I.C., based in Cornwall, England was the first company in the industry to be accredited with ISO 9001. Able to call on the specialization of over 200 experts worldwide, it continues to lead where others follow.

F.I.C.'s expertise lies in the design and manufacture of electro-heat systems for melting, boosting and conditioning in a wide range of glass types and manufacturing processes.

The F.I.C. Distributed Electric Boost Systems cover all glass types and end users. F.I.C. is the only supplier of boost systems to the float glass segment with more than 50 float furnaces boosted worldwide and this experience in a demanding high quality glass market flows through to other segments such as continuous fibre, PDP and TFT glasses, tableware and containers. Electric boost offers the flexibility needed to respond to today's unpredictable market forces, additional glass for little capital outlay, improved quality, especially with coloured glass, as well as rescue operation, buying time until a furnace repair can be carried out.

Within the range of electrode holders manufactured by F.I.C. to achieve 'in-glass' heating is the unique High 'Q' Holder, the ultimate in cooling efficiency and trouble-free maintenance. Its cooling circuit, replaceable in minutes by only one person with three tools and no specialist skill needed, obviates the need to remove electrode and holder body. Devoid of critical welds, it eliminates hazardous water leaks.

Ideal for more aggressive glasses or cold top all-electric furnaces with top electrode

systems. F.I.C.'s Maxi 'Q' No-Weld Electrode Holder has no weld inside the furnace refractory blocks, with the result that there can be no leakage of water into the furnace itself in the event of inevitable wear to the furnace refractories.

A solid end-piece with specially designed waterways allows for a 55% increase in the flow of water, thereby improving efficiency.

F.I.C. also supplies a full range of electrode holders to include splash-cooled and conventional holders.

A major improvement in glass conditioning practice is embodied in the F.I.C. High Vapour Pressure (HVP) Forehearth, the unique design of which incorporates thin 'muffle tiles' made of strong, highly conductive fused-cast refractory to eliminate volatilization losses of glasses such as lead and borosilicates.

Particularly suitable for the coloured glasses and NNPB production the company's Isothermal Unit ensures increased thermal efficiency in the forehearth and consequent homogeneity in the gob, crucial to good quality production and maximizing capacity.

F.I.C. is a worldwide sales and marketing partner for the High Emissivity Nano-Particle coating technology by Emisshield®. These ceramic coatings improve the radiant heat transfer from the furnace superstructure to batch and molten glass and is proven to offer the following benefits: Fuel savings of up to 10% and protection of refractory surfaces leading to longer furnace life.

These coatings also offer advantages in other areas of the furnace such as forehearth, lehrs and moulds and other areas of the process.

F.I.C. provides a full range of on-site services to include: hot drilling, electrode advancing and re-positioning, pre-emptive maintenance and the very latest in mathematical modelling.

AREAS OF ACTIVITY

Fima Olimpia Fonderie is a foundry producing castings in special cast iron for glass moulds. Thanks to highly technological production facilities and advanced control instruments, we offer the market high quality products at competitive prices.

The logistic and technical organization allows the company to have quick solutions in productive terms as well as in customer service.

Fima Olimpia Fonderie is a customer-oriented company placing client needs as its priority from smaller to larger companies.

The company is concentrated on research and development in order to offer the highest quality products and has had ISO 9001 certification since 1997.

Fima Olimpia Fonderie employs over 50 people and offers its clients:

- more than 30 years of foundry experience
- all the new technologies in terms of design and production of moulds
- new plants in order to have the maximum productive capacity
- 14 different kinds of special cast iron that allow to satisfy all customer needs
- a modern analysis laboratory that gives us the capacity to monitor production constantly
- high speed deliveries within 7 days from the date of the order to all European countries
- competitive price on international markets.

New plant Otto Junker induction melting, capacity of 7 tons per hour.
This installation has greatly increased the capacity of production flexibility and improved the quality of products.

AREAS OF ACTIVITY

Fluorital is a dynamic company located near Venice, Italy, which boasts 20 years' experience in the research and production of organic paints and silk-screen inks for glass decoration. The application fields of its products include **perfume/cosmetic packaging, wine and spirit bottles, tableware, flat glass** for furniture and interiors and **lighting glass**. Fluorital produces spray varnishes, roller varnishes, and screen printing inks of different types: water-based, UV-curable and solvent-based. All products are lead- and heavy-metal free. All products can be applied directly onto glass, as they do not require any expensive primer or other special surface treatments. These products are curable at low temperature or with UV lamps, enabling important energy savings compared with traditional high temperature products. Mechanical characteristics of adhesion on glass and scratch resistance, as well as chemical-physical resistance to water, steam, pasteurization, alcohol, detergents and strong solvents, make Fluorital products the top reference for the market. Fluorital invests considerably in research and today, beside the continuously updated more consolidated products, the company also offers a complete range of organic products for glass decoration at low temperature. Fluorital research is now even more concentrated on water-based products and UV reticulation products, for spray application, screen printing, curtain coating application plants and roller machines, the latter specifically for flat glass decoration. Finishing and colours are an integral part of Fluorital research to satisfy architects' requirements following and anticipating fashion trends. So far, special finishing such as water-based soft touch with elevated scratch-resistance or water-based mirror-like effect were created for the first time by the company's research department. ISO EN 9001 certified, Fluorital produces quality and elevated performances to colour the imagination.

AREAS OF ACTIVITY

Fonderie Bartalesi was founded in 1962 and is one of the main manufacturers of bronze alloys for moulds for the production of glass bottles and jars.

The company concentrates on research and development in order to offer the highest quality products on the worldwide market and has ISO 9001, ISO 14001 and SA 8000 certificates.

Fonderie Bartalesi can offer its customers:

- more than 30 years' experience in the glass sector;
- new plants and machines to improve production and decrease delivery times;
- more than 5 cast tons per day of bronze alloys for the glass industry;
- specialized production of bronze neck rings with Ni-insert;
- 6 different types of bronze alloys for the glass industry;
- catalogues of standard models of bottom plates, baffles and neck rings;
- dimensional tests, chemical analysis, hardness tests, metallographies and x-rays
- new machine and high tech programme to produce new toolings, in order to improve casting precision and to decrease delivery times;

- very fast deliveries of 7/10 days from the order date to all European countries;
- continuous updating regarding new technologies;

- new bronze alloy studied and tested for mould production, with very good thermal conductivity - very good hardness - very good cleaning - easy weldability - doubling of production capacity.

RANGE OF PRODUCTS

- BRONZE ALLOYS FOR MOULDS, NECK RINGS, BAFFLES AND BOTTOM PLATES

AREAS OF ACTIVITY

Fonderie Valdelsane – 50 years of activity!

Fifty years of continuous research and development that have enabled the company to reach a high level of specialization regarding its production and services for the worldwide hollow glass sector.

In the past few years, Fonderie Valdelsane has developed its ability to understand the needs and demands of the market, creating strong partnerships with the most important glassworks groups, which have led to the development of innovative materials, now worldwide references in the hollow glass moulds sector.

At the same time, the company has also developed its services, now entirely customized as per the individual needs of each client.

Research in technologies, production and organizational processes, along with continuous training and updating of human resources, have been and are the winning combination of Fonderie Valdelsane in reaching its present position of worldwide leadership.

Technology:

- catalogue of material with 15 types of cast iron and 5 types of specific copper alloys for glassmaking moulds;
- possibility of developing materials as per clients' demands;
- daily production capacity of 50 tons of cast iron and 3 tons of copper alloys;
- continuous development of new materials for the market.

Services:

- production of materials as per specific client requests;
- fast delivery of up to 7 days from order;
- direct organization of shipment to final destination;
- in-house laboratory offering – other than in-line production controls – specific testing as per client requests;
- direct pre- and post-sales assistance;
- processes and services conform to ISO 9000/2008;
- competitive prices and services on international markets.

Future investments:

- continuous investments with regards to production technologies for constant renewal and updating of plants aimed at automation;
- expansion of production buildings and external areas.

Fonderie Valdelsane: The development of ideas hand in hand with the courage of people.

RANGE OF PRODUCTS

- **ELECTRONIC CONTROL AND INFORMATION SYSTEMS**

AREAS OF ACTIVITY

The German company futronic GmbH is an electronics industry enterprise, involved in the development, manufacturing and distribution of technical systems, particularly of electronic control and information systems for hollow glass production, the packing and the mechanical engineering industry.

E-Timing systems CIMOG and EPRO

The company's family of reliable, proved microprocessor-based controllers is capable of meeting a wide range of customer specification from IS-machine to hot-end rejection control. The E-Timing systems comply with both basic as well as the most advanced control demands over the entire glass production line.

The permanent development of the system, as well as the implementation of customer-specific functions, provides security to the investment of the customer. Today, futronic offers a set of processor boards for its CIMOG E-Timing system, which features, beneath the data integration of futronic's drive system and synchronization unit (machine processor), the execution of PLC-compatible system functions. The PLC-compatible system functions, which are defined in a STEP5 compatible programming language, offer a member of possibilities to process external events, e.g. cullet water waste rejection in the case of jamming at hot-end coating, monitoring the air pressure and so on.

E-Timing system FMT24S

The FMT24S is a state-of-the-art distributed machine control system. It consists of modules which are networked with each other and use, to a large degree, industrial busses for their communication. Expansions with FMT24S specific modules, but also with standard, bus-capable digital I/O modules, analog I/O modules and interface converters etc. are possible. Further features to those above include:

- Full servo integration,
- CANopen® safety bus,
- Valve current monitoring,
- Analogue actuating elements,

- Integrated electric overrides,
- Networked PLCs,
- Mushroom-head push-button without additional wiring,
- Internet technology.

The modular technology used in the system, and its style of integration, offer customers a high degree of flexibility. Each installation is manufactured specifically for that particular customer, taking into account special local conditions, environmental conditions and investments already made.

Training Systems CIMOG, EPRO, FMT24S

For all E-Timing systems (CIMOG and EPRO, FMT24S), futronic offers a training system which contains the same processor boards as

the E-Timing system. It is an ideal piece of equipment for soft- and hardware training, trouble-shooting testing and repair, and it can also be used as stock for genuine processor boards. By adding a separate power supply, it can drive two sections of an IS machine, providing all functions.

Synchronous Drive System (FDU24S)

Based on the experience of more than 190 installations of drive systems, futronic has introduced its latest co-production: The Synchronous Drive FDU24S allows the use of Servo motors and is completely operated by means of a PC.

The Synchronous Drive FDU24S can be integrated into a futronic E-Timing System enabling the operator to control both E-Timer and Drive System with the same terminal and control software (OT), eliminating the need for separate adjustment.

AREAS OF ACTIVITY

Rotary bottle blowing machines

The rotary machine, in a technically perfected design, enables the manufacture of bottles that are of the same quality as those produced on IS machines by the conventional blow-blow method.

The main features of the rotary machines today:

- simple operations and maintenance;
- blowing head in finish mould;
- Verti Flow cooling system for finish mould;
- low level of glass required from 2.5 to 3.5m (up to 6.0m is possible);
- glass gobs fall freely into rotating blank moulds (no lubrication of the scoops);
- the use of moulds made of grey cast iron without cladding;
- the production range with rotating machines is up to 80 bottles per minute;
- the production of small batch numbers from 100,000 units onwards becomes more economical through the quick replacement of the moulds.

In order to improve the yield of the existent furnaces and increase the bottle range, the kind of rotary machines that are offered for sale today can be installed next to the IS machines on the same melting furnace.

Today Glasmashinenbau Freital GmbH offers three types of machines for bottles and small jars with maximum neck diameter up to 53 mm:

U8K/3	5 ...	250 ccm,	3 ... 12 t / day
U8M/3	100 ...	1000 ccm,	10 ... 35 t / day
U12/1	100 ...	2000 ccm,	20 ... 50 t / day

Freital's qualified engineers will be pleased to help you with your special requests and technical enquiries.

AREAS OF ACTIVITY

Glass Service provides the highest standards of technology applied to the hollow glass industry. The Italian company designs, produces and maintains a wide and complete range of equipment.

GLASS MELTING TECHNOLOGY DIVISION

- automatic and semi-automatic batch plants and cullet recycling plants
- day tanks and pot furnaces
- recuperative and regenerative continuous melting furnaces
- boosting systems
- forehearths
- colouring forehearths with frit dosing systems
- batch chargers
- heat recuperators for day tanks and continuous furnaces
- automatic control level machines with platinum probe, with or without electro-nic controller

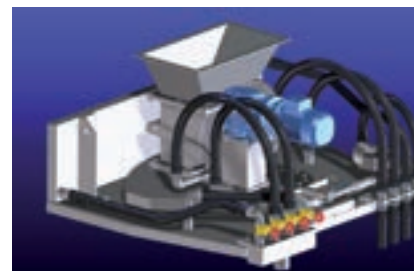

- stirrers and stirring machines
- control boards
- combustion systems for any kind of fuel, gas, oil and reversal plants
- burners for any kind of fuel, gas, oil
- special machinery for the glass industry

Moreover, the company provides complete assistance service for customers, assembling and maintaining all the supplied plants. Start-up and training are also provided.

ROBOTICS DIVISION

Glass service is, today, a leader in the field of robotics for the glass industry.

- Gathering robots (4-, 5- and 6-axes)
- Blowing robots
- Suction robots
- Fire polishing robots
- Handling robots

AREAS OF ACTIVITY

Gruppo Minerali Maffei S.p.A. is the holding company of four firms, which have been operating in the glass and ceramic raw materials sector for many years. Currently, the following companies produce raw materials for the glass and ceramic industries:

- MAFFEI SARDA SILICATI S.p.A. - sands for flint glass and coloured glass;
- MINERALI INDUSTRIALI S.p.A. - sands for containers, technical and float glass; blast furnace slag (Vitrite) for container, tableware, technical glass (Grade F) and for float glass (Grade VP);
- MINERALI INDUSTRIALI TUNISIA SA - sand for float glass and container glass;
- EGYPTIAN INTERNATIONAL INDUSTRIAL MINERALS S.a.e. - sands for containers, technical, float and solar glass.

Gruppo Minerali Maffei products are able to satisfy all the most demanding sectors of flint glass: food and perfumery containers, articles for tableware and lighting, artistic, technical glass and solar glass. The following table contains the chemical characteristics of some of the raw materials produced by Gruppo Minerali Maffei companies. Constant product quality is assured by a strict process control system and by systematic chemical and granulometric analysis.

CHEMICAL COMPOSITION	SAND TYPE			
	V2FA/E	EIM 120	Float Grade	Extra Grade
SiO2	95,7	99,6	99,2	99,5
Al2O3	2,00	0,20	0,30	0,10
Fe2O3	0,016	0,012	0,060	0,023
K2O	1,60	0,01	0,10	0,05
TiO2	0,01	0,01	0,04	0,02

Gruppo Minerali Maffei staff is able to give all necessary information about the company's products and provide technical assistance. They can also advise clients on the most economic solutions.

AREAS OF ACTIVITY

With almost 100 years experience in innovative research, engineering development, and manufacturing execution, H.C. Starck is uniquely positioned with a diverse product portfolio of high performance, refractory metal solutions for critical glass melting applications. H.C. Starck is an international company with close to 3,000 employees at 12 ISO-certified production locations in America (US, Canada), Asia (China, Japan, Thailand), and Europe (Germany, UK) as well as sales and business offices in more than 30 countries.

sourced raw materials into the manufacturing supply chain, and has received its second consecutive certification by the Electronics Industry Citizenship Coalition (EICC) as a supplier of conflict-free materials.

Glass Melting Electrodes:

Molybdenum Glass Melting Electrodes from H.C. Starck provide the industry with high standards for efficient glass melting and electric boosted melting. The high-tempera-

ture strength and rigidity of molybdenum electrodes, plus the inherent electrical properties of molybdenum, provide maximum operating efficiency. The exceptional purity level of H.C. Starck's molybdenum electrodes (99.95% minimum) achieves outstanding resistance to chemical corrosion and degradation, and minimizes detrimental glass discoloring.

Oxidation Resistant Coating:

Reliable and reproducible, MURIDE coating gives protection against oxidation from air, oxygen-rich atmospheres, oxidizing chemicals and flames. Chemically bonded to metal surfaces, they will not separate or spall. The coatings are applied uniformly to all surfaces by a chemical vapor deposition.

Molybdenum Rotary Targets:

H.C. Starck provides molybdenum or tungsten fabrications of rotary targets for large area coating and solar cell applications. Our best-in-class extrusion facilities can produce molybdenum rotary targets with inside diameters of 125 mm (monolithic) and 135 mm (bonded) applications in molybdenum up through the current largest rotary target requirement.

At H.C. Starck's premier extrusion and forging facility, large diameter molybdenum tubing suitable for quartz melting vessels, orifice plates, and mandrels is extruded. Fabrications from molybdenum sheet with forged molybdenum internals are manufactured as value-added products: glass melting electrodes, crucibles, extruded tubes, and other components for the glass industry. H.C. Starck's molybdenum, with its exceptional purity level (99.95% minimum), has outstanding resistance to chemical corrosion, degradation, and minimal detrimental glass discoloring.

Regarded as an environmental leader in ethical sourcing and reclamation of materials, H.C. Starck offers its customers recycling services of its refractory metal products. With a vertically integrated supply chain and the recycling of refractory metal products, H.C. Starck is driving innovation in material reclamation and sustainability. In addition, H.C. Starck's Responsible Supply Chain Management (RSCM) system prevents the introduction of illicitly

AREAS OF ACTIVITY

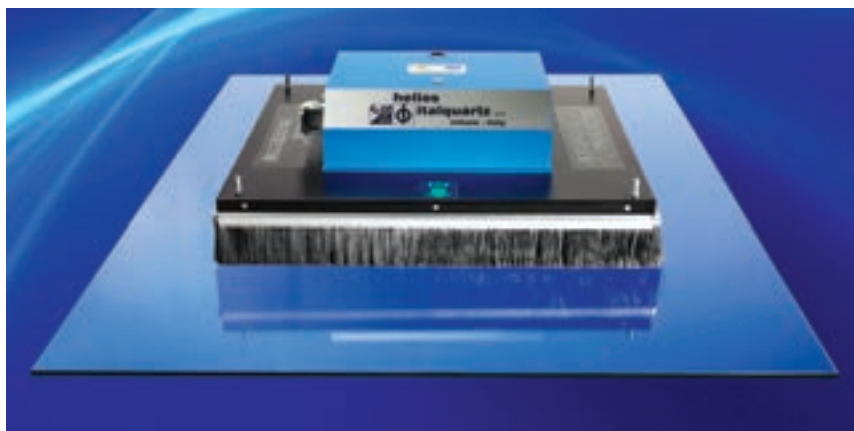

Since the 1940s, Helios Italquartz, based in Milan, Italy, has been manufacturing quartz equipment such as Ultra-violet lamps, Infrared heaters and production machinery. The company's production is utilized for a wide range of applications in various sectors.

The Helios Italquartz product range destined for the glass industry includes:

- IR Short, Medium and Fast Medium Wave quartz emitters in single and twin tube with or without coating reflectors; utilized for the production and cutting of laminated glass, glass bending, drying screen printing and back mirror drying processes for any furnace range;
- UV high pressure lamps for enamelling, drying screen printing inks, paints, UV reactive coatings and adhesives for the decorating and furnishing sector;
- UV Photo-polymerization equipment;
- Float Glass Tin Side Detector Analyzer in manual and automatic option to be installed directly on the production line;

Thanks to the company's experience, Helios Italquartz is able to successfully solve any technical problems in the UV and IR radiation field.

We are Glass People - Combining Passion and Experience in glass engineering technology

At Heye International, our goal is very simple: to be the leading supplier of expert services & solutions and high performance equipment to the container glass industry.

For more than 50 years we have set the standard in container glass technology.

Our reputation for quality and innovation has been established by developing high-productivity machines and equipment together with sophisticated glass production technologies, and by building a team of highly skilled engineers and technicians.

Heye has extensive knowledge of the day-to-day issues of glass manufacturing.

We specialise in the engineering and construction of complete glass container manufacturing plants and enjoy a world-wide reputation in the transfer of high-performance technologies and manufacture of high-performance machinery.

Our product portfolio is based on:

- **HiPERFORM - Forming Technology for Efficient Production**
- **HiSHIELD - Inspection Technology and Quality Solutions**
- **HiTRUST - Expert services from plant design to production support**

AREAS OF ACTIVITY

HORN Glass Industries AG has a wealth of experience in a wide spectrum including the **design, manufacture and supply of different furnace types**, such as regenerative-, recuperative continuous tank furnaces, float furnaces and electrical tank furnaces for the production of lighting ware, tableware, containers, cast glass, float glass, solar glass and technical glassware.

HORN's range of **utility equipment** includes combustion systems, control and safety equipment, electrical boosting and mixings systems, to name but a few. HORN Glass Industries AG also offers all forehearth systems, supply stations for oil, gas, oxygen, water, regenerative and recuperative burner systems, combustion equipment, boosting systems and process controlling systems of the highest standard. HORN has developed products such as the OPTIBEAM; the internationally applied laser glass level control system.

HORN has a further business section: machinery for thermal glass processing such as roller annealing-, decorating lehrs, hot- and cold-end coating stations and much more.

HORN Glass Industries AG activities generally split as follows:

Furnace engineering and supply

- engineering and planning of complete glass melting furnaces;
- individual planning and design by CAD-technology;
- supply of combustion-, control- and peripheral equipment
- start-up
- training

Furnace service

- setting-up and mounting of complete furnaces;
- hot and cold repairs of all furnace types;
- drilling and draining of tank furnaces;
- heat-up, melt-up and run-in of all furnaces;

Thermoprocess machinery

- roller annealing lehrs and decorating lehrs, which are in operation at internationally renowned glass producers and decorators
- hot- and cold-end coating stations
- special thermoprocessing machinery

AREAS OF ACTIVITY

With a workforce of 40 engineers in Research and Development, IRIS is recognized as a leading and innovative supplier of camera glass containers inspection.

IRIS has recently launched new developments for better fault recognition in container base and sidewall. These new algorithms are focused on more sophisticated image processing able to make the difference between engraved areas and faults. The aim is to reduce the amount of faulty rejection on decorated containers such as vodka and spirits bottles. This happens with traditional technologies when the engravings produce a shadow area seen as a defect by the cameras. The solution has already been successfully tested in some European glass plants and gives amazing results.

Inventor of the 12 cameras concept

The success of IRIS' EVOLUTION 12 in such a short period of time is based on both the advantage of a multi camera system allowing a 100 per cent inspection of bottles and jars of any shape and colour and on the simplicity of operation of a fully automatic camera machine with a very user friendly Man-Machine Interface.

Easy upgrade

The name EVOLUTION chosen for the range of equipment illustrates the possibility given to the end user of the machine to easily upgrade it with the latest algorithms developed by IRIS engineers.

Glassmakers using IRIS machines can rely on the latest software version for their EVOLUTION machines at any time.

A full range of inspection machines

EVOLUTION 1 is a stand alone finish inspector enabling to detect faults such as LOF (Line Over Finish), blisters, stones, scaly finish, unfilled finish, overpressed and wire edge. Finish inspection is, therefore, available as a stand-alone machine, but also as an option of **EVOLUTION 5**, a machine designed for base, as well as base stress inspection and mould number reading. In **EVOLUTION 12**, the number of cameras – 12 for sidewall inspection – can be extended to 16, including 4 cameras for stress detection. EVOLUTION machines have already proven their enhanced capabilities on products as various as penicillin and pharmaceutical containers, Nutella jars, wine, beer, champagne and spirit bottles.

An international SERVICE TEAM

A reactive service team of multilingual engineers (French, English, German, Spanish, Russian, Italian, Chinese...) ensures not only installation and training but also servicing of the EVOLUTION equipment during the entire life cycle of the machines.

RANGE OF PRODUCTS

- **MELTING: REFRATORIES**

AREAS OF ACTIVITY

Linco Baxo Industrie Refrattari Spa started its production in 1949 with the first two production plants in Milan.

After several acquisitions, today LB can count on five modern and integrated plants which are able to produce a large volume of high quality refractory materials.

Overall production is in excess of 150,000 tons per year and the whole organisation employs more than 250 people.

Thanks to experience gained over the years, today LB has become one of the worldwide leading producers of refractory materials.

LB has developed a range of refractories tailored to the constructions of every type of lining for Hollow and Float Glass Industries.

Our target is to develop a range of refractory products with **high strength within the whole temperature range, very good corrosion resistance and excellent thermal shock resistance.**

LB normally supplies the biggest Worldwide Glassmaking Groups with:

CHANNEL BLOCKS, SUPERSTRUCTURE BLOCKS, BURNER BLOCKS, TV BLOCKS,

DOGHOUSE BLOCKS, SUSPENDED BLOCKS AND ROOF, THERMOCOUPLE BLOCKS, PORT NECK, BOTTOM PAVING, SPECIAL SHAPES, STANDARD AND NOT STANDARD DENSE AND INSULATING BRICKS, MEGA SLABS, LARGE MONOLITHIC SHAPES UP TO 6 TONS, CASTABLES, MORTARS AND PATCHES.

LB standard range of quality products includes insulation materials class 23, 26, 28, 30, 32, High-Allumina products from 38% up to 99% Al₂O₃, Sillimanite, Mullite, Zirconmullite, Zircon, Tabular Alumina Zircon free and more.

All five production plants have been manufacturing continuously under ISO 9001 quality management system since 1990.

This is just a short presentation of our company and we would like to invite you visit to our facilities at any time so that you can see for yourself the structure and organization of our plants and the quality of our operating system, machinery and raw materials used in the manufacture our products.

AREAS OF ACTIVITY

LubroTech Solutions operates in the field of coolant lubrication and is a leader in the field of advanced and Minimum Quantity Lubrication.

For anyone working in the field of metal machining with chipping, cold pressing or in the production of hollow glass, the time has come to improve production processes and increase efficiency by saving lubricants with a minimum investment in money, technique and time.

Everything you need to optimize your hollow glass manufacturing process and improve the quality of finished ware: lubricants, coatings, sticks, swabs, release agents, spray equipment.

LubroTech Solutions is the exclusive European distributor for the products of Renite Company, Columbus, Ohio, US.

Renite Company was founded in 1932, a pioneer in the lubrication of glass-forming moulds in the manufacture of containers, tableware, lenses, scientific ware, radio tubes, block and light bulbs.

Among its best-selling products ever, Renite F-72 - a general purpose high polish blank swab dope. Competitive price and excellent performance finally combined in the very same product!

PLANNED EXHIBITIONS
Glasstec 2012

Düsseldorf, Germany - 23/26 October 2012

AREAS OF ACTIVITY

Thanks to its unique combined expertise of graphite materials, C/C composites and carbon felt insulation, MERSEN (formerly Carbone Lorraine) is able to propose solutions for the high temperature methods used in the glass processing industry.

Under the **CERBERITE®** brand, MERSEN has developed a complete range of systems and solutions dedicated to hollow glass production lines.

The use of **graphite** and **C/C composites** have become major elements in these production lines, as these materials offer numerous advantages:

- their contact does not damage hot glass;
- they are entirely resistant to thermal shocks;
- they are self-lubricating;
- they offer better resistance to wear;
- they have lower thermal conductivity than metals.

MERSEN's **CERBERITE®** solutions thus combine metal supports and carbon consumables. The design of these systems therefore offers numerous advantages, such as:

- rapid disassembly of worn expendables;
- easy access on the production line;
- a design developed with the main equipment manufacturers;
- high mechanical properties at high temperatures.

MERSEN offers an extended range of take out tongs (TOT) that can fit all your requirements: float style with five different sizes available and round style TOT with various sizes possible.

CERBERITE® offers a full range of top plate systems. These are available in various diameters and thicknesses. The top plate systems help to eliminate finish defects and are extensively used in Europe. Recently this system has been adapted to incorporate top plate inserts as a vent plate for specialized bottle production.

Finally, MERSEN offers the assurance of the same quality level worldwide. This is achieved through local service everywhere, including machining in accordance with your unique specifications.

- **AMPOULE & VIAL MAKING MACHINES**
- **AFTERFORMING FINISHING LINES**
- **VISION SYSTEMS**

AREAS OF ACTIVITY

Moderne Mecanique produces machinery for the manufacture and finishing of pharmaceutical and cosmetic glass containers, such as ampoules and vials, from glass tubes.

The present range of production includes:

- **MM 30 Ampoule Forming Machine**, the most popular machine for ampoule production.
The MM 30 can be equipped with the Roboglass automatic tube loading system, which is able to load the forming machine continuously. The machine can be integrated with:
 - **Optistem/2**, an automatic stem vision device checking the forming operation by self-adjusting the oxygen flow in the last two heating burners. The new OPTISTEM/2 system will allow full dimensional control IN REAL TIME of the ampoules in order to realize 100% quality control during the forming process.
- **LA 502 Ampoule Afterforming Finishing Lines**, which handle all glass container finishing operations, such as controlling, printing, annealing and packing.
These lines can be integrated with:
 - **Opticut™, OPTICUT/2** an electronic device for creating the easiest and safest way of opening ampoules, using a predetermined breaking point;
 - **Closing device** for the production of ISO form "D" ampoule;
 - Extra **colour rings** devices.
- **LF 520 and 535 Vial Afterforming Finishing Lines** are able to perform important operations such as control, printing, annealing and packing.
The lines are produced using the well renowned technology of the Ampoule Afterforming Lines type LA and are able to match the high speed vial machines produced by OCMI-OTG S.p.A. such as **FLA 20E, FLA 20/S** and **FLA 35**.

- MCAL • MULTI • M
- CHECK
- ATLAS AND COSMETIC ARGOS

Atlas = vision non-contact detection

AREAS OF ACTIVITY

Thanks to their 50 years' experience in the container glass market, MSC & SGCC represent today the only provider of a global inspection solution for the glass industry. We offer a complete range of hot-end and cold-end equipment:

- I-CARE: hot-end device for production trends and stability analysis, critical defect recognition and process optimization (consistent operator-oriented tools).
- TOTAL TRACER: laser hot end engraving system for traceability down to the single container.
- MCAL: powerful vision machines for sidewall, dimensional and stress inspection.
- MULTI: base vision and base stress inspection with enhanced functionalities, an extended finish inspection range including wide mouth jars, and dot or digital codes mould number reader by camera.
- M, CHECK, Atlas & Cosmetic Argos: check detection and multi inspection (mouth gauging, leakage and tightness, wall thickness, ovalization, etc...) on the widest range of containers.
- Laboratory devices such as Seedlab (device counting and categorizing seeds to measure the glass refining mark), iAFIS, Laser +...

With their combined know-how MSC & SGCC offer a wide range of innovative and high-performance inspection devices.

AREAS OF ACTIVITY

MSK Covertech Group - Your Cold End partner

More than 30 years of experience at the **cold end** have made MSK one of the leading equipment suppliers from lehrs to warehouses with **different levels of automation**. Customers appreciate MSK engineering, software and automation competence, as well as our unique and innovative systems.

The modular construction of **MSK bottle conveying technology** guarantees a high degree of flexibility, the best possible layer pre-forming and fully automatic flow of bottle transport.

MSK's palletizing systems offer solutions whatever performance and flexibility is required. **MSK robots and palletizers** can handle bulk and cases. Thanks to **patented innovations**, down times for job changes are minimized.

MSK shrink-wrapping solutions rank among the most sold machines in the glass industry:

user-friendliness, availability and safety are the distinguishing MSK characteristics, as well as efficiency and profitability. More than 500 reference projects or proven efficiencies of more than 99.5% underline MSK's leading position in the industry.

MSK EMSY visualization system controls the complete cold end with a uniform international interface. As development and enhancements have been carried out 100% in-house, MSK can tailor the system to individual needs and is independent from third parties for adaptation.

With subsidiaries and representations, MSK is located close to its customers, also with fast and economic help thanks to its 24-hour emergency and online service.

RANGE OF PRODUCTS

- GLASS MELTING FURNACES
- ANNEALING AND DECORATION LEHRs
- BENDING FURNACES

AREAS OF ACTIVITY

MT Forni Industriali, with 40 years' experience in the glass industry and successfully completed installations in 35 countries, designs and manufactures a wide range of products and services for glassmakers.

- **Melting furnaces**, gas and oil fired, for pull up to 50 tonnes and for different types of glass: unit-melter furnaces, end-fired furnaces, oxy-fired furnaces;
- **All-electric cold top furnaces** for lead crystal and fluoride, special glasses;
- **Forehearths**, gas fired or electric heated, with colouring and stirrer technology;
- **Batch chargers** and glass level control systems;
- **Heat recuperators**, double shell and tube cage type;
- **Day-tanks furnace** from 50 to 4,000kg,

gas fired and all electric, complete all auxiliary equipment, heat recuperators and combustion, control systems;

- **Pot furnaces**, for single and multiple pot, gas fired and all electric, complete with all auxiliary equipment, particularly suitable for lead crystal and coloured glasses;
- **Annealing and decoration lehrs**, with belts up to 4 metres wide, for hollowware, tableware, special glass, etc. Main features are the automatic temperature control system, optimized insulation for very low energy consumption, temperature uniformity, modular design and zero maintenance;
- **Static annealing and decoration kilns**, from 1m³ to 5.5m³;
- **Bending furnaces** for flat glass, specially designed for decorative and architectural purposes, for the lighting industry; bending furnaces for glass basins and special shapes;
- **Tempering lines** for tableware, belt and spindles type;
- **Complete production lines** for high voltage glass insulator shells;
- **Mould preheating furnaces**, preheating tunnels for stems and bowls;
- **Conveyors, cross conveyors**, transfers for hollow glass;
- **Glory-holes, pot arches, laboratory – studio furnaces** and equipment such as polariscopes and polarimeters;

Thanks to a partnership with Amig and OCMI, Mt Forni Industriali is able to supply **complete custom-built projects**, from batch plants to packaging.

MT Forni Industriali, since 1968 the reliable partner for glass manufacturers.

AREAS OF ACTIVITY

TUBULAR GLASS CONTAINER FORMING MACHINES FOR PHARMACEUTICAL AND COSMETIC USE:

- **FA 36S** ampoule making machines. These machines are prepared for the installation of different optional devices, including control by electronic programmers and continuous automatic loaders type "ROBOGLASS".
- **FLA 20E, FLA 20/S** and **FLA 35** vial making machines. All models are able to produce all main types of vial necks, such as Penicillin, Blow-Back, Screw Neck. The continuous motion system and the mechanical structure allow performance speeds impossible to achieve with other index systems.
- **FLA 20E-CAR** machine able to produce all types of cartridges used for dental and pharmaceutical uses.
- **CG 20 NEW** machine and line for the production of glass "Dropper" accordingly to the different ISO 11418-5 standards.
- **PM-A NEW** automatic ampoules packing machine ready to be connected with after-forming lines made by Moderne Mecanique or by different suppliers. This machine has been studied in very compact configuration in order to enable normal logistic operations between production lines. The vacuum picking device enables perfect gripping of the containers. The operator can be sure to insert the same number of ampoules in each box without missing products.
- All our machines can be fitted with Vision Systems that allow 100% consistent control of products' critical dimensions and surface defectiveness.

AUTOMATIC MACHINES FOR STEMWARE PRODUCTION:

- The **SA 42, SA 48** and the **SA 60** sealing machines for stemware are the answer to every market-oriented tableware factory. They allow to match the highest efficiency and production speed with a flexibility never before achieved by alternative systems. Equipped with a complete range of intelligent control systems able to control and maintain the final quality of products.

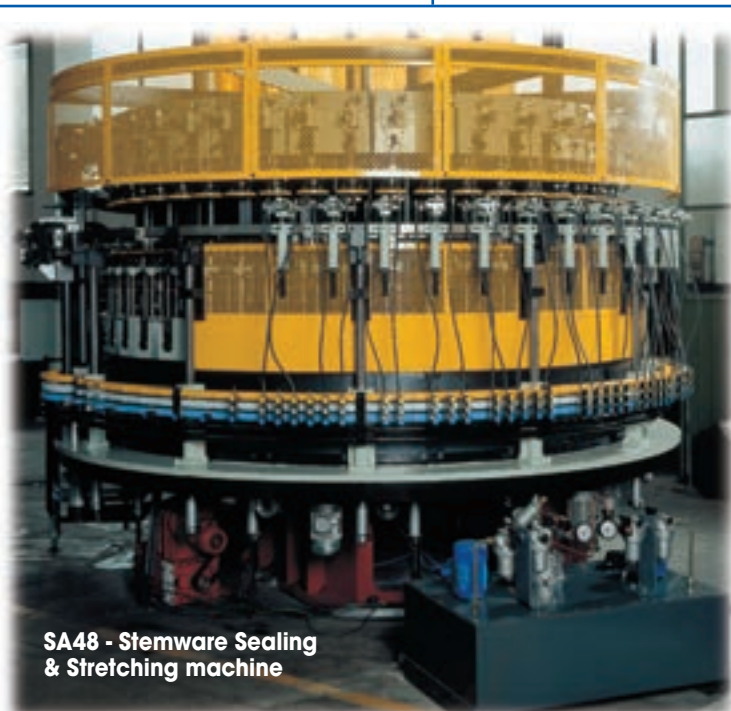

- The **ST 42, ST 48** and **ST 60** are the new line of continuous rotary machines with 36, 42, 48 and 60 spindles for the processing of one-piece stemware. These machines can be integrated with an electronic control system, able to manage production changeover parameters and control and adjust the distance between the grippers, thus ensuring maximum stretching quality.

AUTOMATIC LASER CRACK-OFF MACHINES TYPE SCA FOR TABLEWARE PRODUCTION:

- A new line of machines using Laser Technology as an alternative to traditional crack-off systems. The **SCA 36** is the latest model of crack-off machines using laser technology with integrated equipment for the grinding and bevelling or direct fire-polishing of glass items.

RANGE OF PRODUCTS

- **AMPOULE AND VIAL MACHINES**
- **STEMWARE PRODUCTION LINES**
- **CRACK-OFF MACHINES**

**SA48 - Stemware Sealing
& Stretching machine**

RANGE OF PRODUCTS

• MOULDS & ACCESSORIES

AREAS OF ACTIVITY

Officine S.L. produces moulds of any type, from moulds for manual and semi-automatic processing (for blowing machines, presses, centrifugal machines, injection machines, etc.), to moulds for automatic processing (presses, IS machines, H28s, centrifugal machines, etc.), which can be single-block or can be opened in 2, 3 or more parts. Officine S.L. pays particular attention to the choice of precisely selected materials: melting in cast iron or steel, bronze, stainless steel and a high content of NiCr, and powders for the metallization of mould parts.

In addition, the company has attained exclusive contracts for the creation of new lines of giftware, goblets, household articles and similar items, with designers of prestige in the crystal and glass sectors. The designers chosen have considerable experience as a result of years of collaboration with companies in Europe, America and Asia. Therefore, the company is able to comply better with clients' demands, irrespective of stylistic aspects and the range of the market to be covered.

This development is in response to customers' needs, and the company now guarantees a service which encompasses the development and manufacture of new products - from the definition of the product through to the design and, ultimately, the experience necessary for its realization.

Of course, the exclusiveness of every accepted line is guaranteed. Officine S.L. considers quality and customer satisfaction as a fundamental part of its business strategy.

The Quality System of Officine S.L. is UNI EN ISO 9001:2008 certified.

supplying the global
market with a new range
of products

AREAS OF ACTIVITY

Olimerk is a subsidiary of Olivotto Glass Technologies (OGT), world leader in the supply of machinery for glass industries, and is established in Istanbul, Turkey.

Starting from the important knowhow of its mother company, Olimerk's mission consists of supplying the world market

with a new range of products, complementary to the ones produced by OGT, completing the typical OGT production lines (conveying systems and ancillary equipment) and to fulfil the demand of low-speed and semiautomatic machines for the glass industry.

Moreover and above all, Olimerk is now the official "new face" of W. Lindner Maschinen (Germany), a well-known company, part of the OGT group, with considerable experience in machines for high quality production, for any type of glass (lead crystal, soda-lime, borosilicate).

Technologies, products and service coming from the best know-how of Lindner will be transferred by Olimerk to its customers.

Olimerk's present scope of supply includes the following machines and equipment, engineered and designed in cooperation with Olivotto Glass Technologies and complementary to OGT's range of machineries for the glass industry:

- Handling and conveying systems (conveyors, transfers, stackers, etc.), and relevant silent belts;
- Automatic and semiautomatic press machines, fed by ball gatherers;
- Linear and rotary fire polishing machines, including combustion equipment (with gas/oxygen/air burners);
- Spinning machines (1-, 2-, 4-, and up to 6-sections), fed by ball gatherers;
- Shear blades for feeders and delivery chutes for all types of forming machines.

This important scope of supply completes OGT's range of products and has been made possible thanks to the long experience of Olimerk's team matured after years in the glass industry, as well as to the collaboration of its mother company.

RANGE OF PRODUCTS

- **HANDLING AND CONVEYING SYSTEMS (CONVEYORS, TRANSFERS, STACKERS, ETC.);**
- **SHEAR BLADES FOR FEEDERS AND DELIVERY CHUTES FOR ANY FORMING MACHINES;**
- **AUTOMATIC AND SEMI-AUTOMATIC PRESS MACHINES, FED BY BALL GATHERERS;**
- **LINEAR AND ROTARY FIRE POLISHING MACHINES;**
- **SPINNING MACHINES (1-, 2-, 4-, UP TO 6 SECTIONS), FED BY BALL GATHERERS.**

AREAS OF ACTIVITY

A Century of Technology and Innovation around the World

OLIVOTTO (Italy) has been working in the hollow glass sector since 1946, when it began marketing its first rotary-type glass blowing machine. Research, innovation, ongoing technological development have enabled the company to become a leading brand the world over, supplying turnkey systems and services made to measure for any production need.

In August 2003, **Olivotto Glass Technologies S.p.A.** acquired the glass branch of **ANTAS (Italy)**, a company with long-standing traditions and experience in the service of the hollow glass industry.

Later, in June 2007, Olivotto Glass Technologies S.p.A. acquired the assets of **Lynch Systems (USA)**, a corporation that traces its roots back to 1914, one of the oldest hollow glass forming machine manufacturers in the world.

In April 2008, Olivotto Glass Technologies S.p.A. acquired the assets of **W. Lindner Maschinen (Germany)** a very well known company with large experience for high quality production machines in all types of glass (lead crystal, soda-lime, borosilicate).

As a result, **OLIVOTTO, ANTAS, LYNCH** and **LINDNER**, leaders in their respective market sectors, have combined their capabilities to become the benchmark in the international scenario of hollow glass manufacturing plants, systems and machines.

At present, the **Olivotto Glass Technologies Group** is the leader in the engineering, production, installation and commissioning of hollow glass forming plants, systems and machines and is an all-round technological partner, that can address most effectively any problem connected with the production of a variety of glass articles: stemware, tumblers, dishes, bowls, lamps and bulbs, glass tubes, glass bricks, etc.

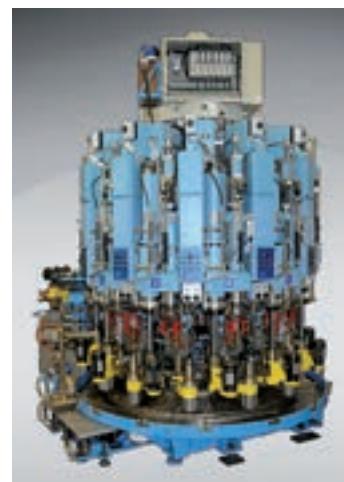

We ensure the perfect matching of all forming machines, combined with full assistance and services at each project stage, until the manufacturing process is on stream.

As a function of the complex requirements of a vast, heterogeneous market, the Olivotto Glass Technologies Group has a philosophy that enables it to offer its Customers technological solutions designed and implemented so as to achieve synergetic effects with their production strategies.

Technologies, products and services coming from the best know-how of **OLIVOTTO, ANTAS, LYNCH** and **LINDNER**.

Machines, complete lines and turnkey plants for the production of:

Stemware (all processes)	Lightingware
Tableware	Lenses and reflectors
Ovenware	Glass insulators
Jars	Glass tubes
Large containers	Laboratory articles
Lamps	Glass bricks

Omstrap

Via Casale, 94 - 13876 Sandigliano - Italy

E-mail: omstrap@omsspa.com

Plant Manager: Roberto Grisoni

Products: PP and PET strap

AREAS OF ACTIVITY

The OMS Group, made up of 10 companies located in Italy, Europe, the Americas and Asia, is a world leader in the development and manufacture of packaging systems, equipment and consumables. The Group's competence and experience in this field has been accumulated in more than 50 years of activities.

OMS Group constantly develops and updates its technological platforms aimed at customized and innovative solutions for its customers, offering the benefits of better performance and cost savings.

OMS manufactures a complete range of end-of-the-line packaging machines: complete strapping, stretch and shrink hooding. The reliability of our machines is guaranteed by years of experience, qualified staff and a company structure that exploits the most modern organizational criteria.

Horizontal strapping 06RP

OMS' horizontal strapping machine for palletized products features an arch driven on a linear rack that guarantees a perfect positioning of the strap on the pallet, simplified head maintenance with quick-action connectors and different strapping programmes that can be easily managed from the operator panel.

Vertical strapping 08RP

The vertical strapping machine for palletized products has a top press capacity up to 3,000 Kg. The machine can apply multiple strapping patterns in both directions (from 2x0 up to 4 x4), thanks to the programmable side shifting device working in combination with the turntable placed under the machine.

Top Pal protection

OMS' automatic system to apply and thermo-shrink a sheet of plastic film on top of the load, hermetically and mechanically protecting the top part of the load, which is generally subject to tears due to stacking.

This operation also ensures a better hermetic seal of the welding of the hood.

Combined hooding machine

AT530 is a combined automatic machine specifically designed for the hollow glass industry which, on a single work station, applies and thermo shrinks the hood on the pallet of bottles.

Depending on the chosen model, the machine can use up to three different coils of tubular thermo-shrinkable film with side gussets.

The film is shrunk onto the product by a flameless ring gas oven.

The presence of an operator is needed only to change the film coil.

AREAS OF ACTIVITY

With its experience of more than 60 years, Pennekamp is the leading manufacturer of high-technology lehrs and hot-end handling systems in the glass industry, as well as for the cold-end coating of container glass. This does not just refer to the manufacturing quality of the equipment, but also to the performance and specifically the low energy usages within the thermal processes. By use of the fully automatic draft system and optimized thermal insulations, energy consumption may be reduced significantly.

In the area of hot glass handling, as well as glass coating, the major aspect is performance and reliability in order to minimize down times. This may be achieved by the optimization of designs as well as the high quality of materials.

Pennekamp products include high-performance ware transfers, special cross conveyors, also available in water-cooled execution; various types of lehr stackers (with one, two, three or four axis); energy-saving lehrs such as annealing lehrs of container and tableware, decorating and toughening lehrs; roller anneal-

ing lehrs for float and figured glass; automotive glass bending and speciality lehrs; cold end sprays.

RANGE OF PRODUCTS

• INVERTED TOOTH CONVEYOR CHAINS & SPROCKETS

AREAS OF ACTIVITY

Pennine Industrial is one of the world's leading manufacturers of Silent Inverted Tooth Conveyor Chain and Sprockets that are used in the transportation and handling of hollow glass, container glass, tableware and stemware. Our conveyor chains are also used to transport larger items such as glass bricks and automotive glass light covers.

The company was founded in 1967 and has been involved in the conveying of hot glassware for over 30 years. Pennine now employs over 70 people at its two manufacturing plants in the UK and has agents and partners working in 30 countries throughout the world. Chain manufactured by Pennine in the UK is now used in glass plants in 60 countries.

Over the last 10 years, Pennine has continued to develop its range of Pennine Conveyor chains, not only offering the standard All Link and Link and Spacer Chains, but now becoming the market leader in Double Assembly, and Special Assembly Conveyor chains that improve under belt cooling and increase container stability.

Customers can also maximize the life of their Conveyor Chains by using one of the 12 standard Head Protector Links that can be fitted onto all chains and used without sprocket modification. As the original designer of the Head Protector Link, Pennine can advise customers on the best type of Protector Link to meet the customer's individual requirements.

RANGE OF PRODUCTS

• **MOULDS & ACCESSORIES**

AREAS OF ACTIVITY

M Modern technology - More than 50 completely automatic CNC machines including 4 plasma welding robots. The main requirements for all the machines in our production line are precision, reliability, safety and versatility.

O Organization - Giancarlo Perego has completely restructured its organization, from senior management to the delivery department. Every single piece is checked during the working stage.

U UNI EN ISO 9001/2008 certification - obtained in July 1995 and renewed in 2003. The company has so far passed all the inspections carried out by the DNV certification body renewed in June 1998. This quality certification has clearly enabled us to improve our products by rationalizing production procedures.

L Layout design - Our technical department is equipped with ultra-modern software (CAD-CAM) and can provide technical support for mould designing. Our staff regularly attend training courses on the various technologies used by glassworks today.

D Delivery - Thanks to our new technological potential and to the reorganization of our production structure, our output has already increased considerably and we can now be more flexible in terms of delivery dates.

S Service - Giancarlo Perego Spa's quality, customer and post-sales services are always available at clients' disposal along with the on-line direct technical service +39.02.48405818 available 6 days a week. Giancarlo Perego S.p.A.,

a company at the forefront in the production of moulds for the glass industry, has invested heavily in new machinery and technology, with the aim of consolidating its leading position in the world mould market. In July 2001 the acquisition of a mould shop facility in Eastern Europe was settled; these new premises give Giancarlo Perego S.p.A. a total covered area of 12,000 square metres. Its new technological potential, together with the reorganization of the firm's production structure, has allowed for a considerable increase in output (around 4,000 moulds a month are now being turned out). 80% of production is for non-European markets, with sales to nations across the globe.

Besides the standard manufacturing of all kinds of moulds for container production with any type of machine, technology or process, our company has also been particularly successful in the development of moulds for direct pressing thanks to its exclusive cold deformation technology.

Well aware of the difficulty of communicating the full scope of our activity in a few lines, Giancarlo Perego wishes to invite anyone interested in finding out more about our company to visit us.

FIXED INSERT

FLOATING INSERT

AREAS OF ACTIVITY

Areas of Activity

Marketed worldwide, POCO materials and products for the glass industry provide proven solutions for hot glass handling applications that include take-out assemblies, deadplates, sweep-out assemblies, transfer pads, Lehr bar assemblies and custom parts.

GLASSMATE® Holder and Insert Assemblies

The GLASSMATE family of materials and products are engineered to meet the needs of the container glass industry. The original GLASSMATE (GM) graphite grade offers the best wear resistance for high performance take-out inserts. Precision machined insert and holder assemblies feature quick and accurate mounting of holders and easy insert change outs for reduced downtime. POCO's take-out assemblies offer excellent performance combined with reduced mechanical damage for increased pack rates.

Take-out Holders

The classic POCO style holder gives long service life and will take all popular finishes up to 87mm. Styles include standard that can be used with fixed or floating inserts; covered to prevent contamination of ware; double stacked to prevent swing on tall, narrow neck ware; extended for tall finishes found on tamper-evident closures; modified for precision set up process with very tight shoulder-to-bead dimensions; and lightweight for triple gob machines.

Take-out Inserts

POCO maintains a library of standard finishes. GLASSMATE inserts are available as semi-finished blanks or can be precision machined to a specified finish. Inserts are available to fit both existing holders and POCO style holders. High strength grades should be used for thread transfer, under thread transfer, fine bead transfer with minimum clearance, or for long production runs. Economical grades are available for short runs or thick bead transfer applications. For closed mould pickup, bossed inserts machined with threads or finish profiles provide better clearance between the top of the mould and the take-out holder.

Complete Product Line

Visit www.poco.com for information on complete product lines and new product announcements.

RANGE OF PRODUCTS

• TECHNICAL SERVICES FOR GLASS FURNACES

AREAS OF ACTIVITY

Draining of furnaces

Preriscaldo Forni is a service and design company for glassworks and has been operating in the national and overseas market for the past 35 years.

The company name and the trademark "prerfor" clearly indicate the features of the main technical service offered: furnace pre-heating, in particular of glass furnaces.

Integrating with this service, others have been added, such as:

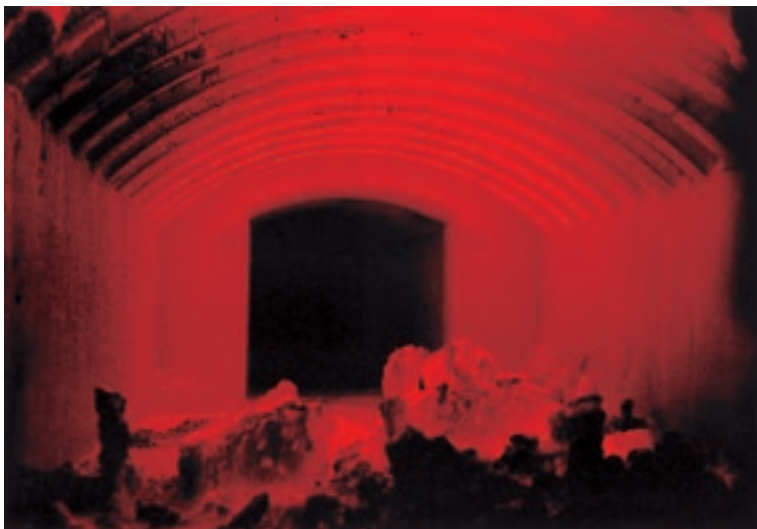

- draining of furnaces;
- filling of furnaces with granulation of glass;
- drilling of holes for the installation of electrodes, thermocouples and bubblers;
- drilling of holes for electric furnace tapping;
- hot repairs with sealing;
- grenillage with electrofuse crushed stones;
- thermal cleaning with appropriate burners.

Plant design and installation has also been expanded, now including:

- heating and combustible oil pumping sections;
- electrode-holders with accessories;
- pipe-coil heat exchangers for gas preheating;
- oil and gas burners;
- bubbler installations complete with control and adjustment box;
- tube-bundle or tube-cage heat recuperators;
- steel refractory electrode holders with reduced welding;
- water circulation and softening units.

Fitting out of:

- electric boosters with collateral equipment.

AREAS OF ACTIVITY

Ramsey Products Corporation is a leading manufacturer of silent chain and sprockets for glass bottle conveying and industrial power transmission. Established in 1923, Ramsey products are now used throughout the world in demanding glass production settings and power transmission applications. Products include wear resistant chains such as Lifeguard and Allguard FX, as well as industry favorites Ultralife and RPV silent chain. Silent chain and sprockets have been Ramsey's focus for almost 90 years, and, today, the company remains committed to providing customers with the world's widest range of top quality silent chain products.

Because Ramsey specializes in silent chain, it provides solutions that take full advantage of the benefits silent chain has to offer. Not only does Ramsey offer a full range of standard chains, it also custom designs and manufactures chains to meet customers' exact requirements. All Ramsey products are backed by the com-

pany's warranty and commitment to service. With a network of distributors, representatives, and warehouses that stretches across the globe, customer service and support is never far away.

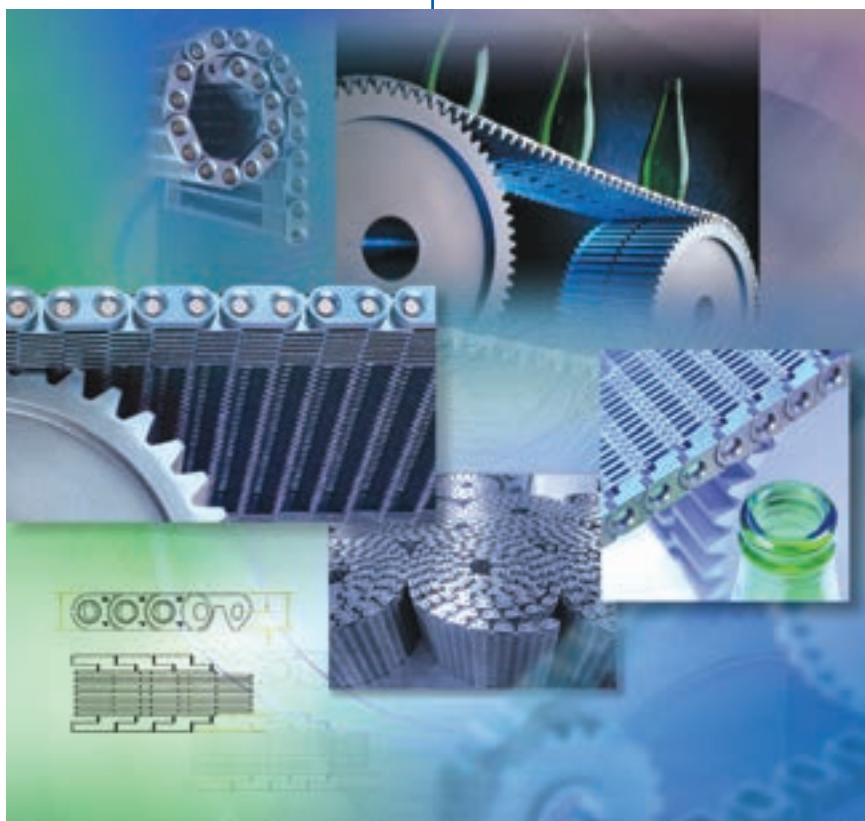

The engineers at Ramsey understand how important it is to choose the right silent chain and sprockets for each application. They also understand that practical, cost-effective solutions are important to every customer. With this in mind, company staff is available to assist in selecting the best solution for each application. Ramsey make this commitment to every customer: If a job can be done with silent chain, Ramsey will help find the best chain for the job at the lowest possible cost.

As a leading manufacturer of silent conveying chains for the glass industry, Ramsey Products has worked with glass equipment manufacturers and bottle producers in every part of the world. This experience, coupled with Ramsey's internal research and development work, has led to a number of exciting new products. The company's most recent product development, Lifeguard chain, is the only conveyor chain that provides a smooth, gap free profile to enhance transport, coupled with recessed pin heads for maximum wear resistance. As glass producers continue to explore every opportunity to increase production and reduce costly downtime, Ramsey is focused on developing and producing conveying chain products that will continue to serve the exacting requirements of glass production.

Contact Ramsey about putting top quality, highly reliable silent chain drives to work for your company.

AREAS OF ACTIVITY

Refractories Experience Srl is a company specialized in the demolition and following reconstruction – total or partial – of furnaces, working with specialists with many years of experience in the sector. The company was founded in 2010 by a group of businessmen with considerable experience in the hollow glass sector.

The core business of Refractories Expe-

rience, which is based in Montale (near Piacenza), is:

- Emptying
- Demolition of Furnaces
- Reconstruction of Furnaces
- Preheating

The company is also involved in hot work repairs as per the needs and demands of clients, regarding the reconstruction of sidewalls using 'AZS', as well as the installation of fused silica furnaces, firing, preheating and sealing of furnaces.

The company's skilled staff have worked in major glassworks around Italy and Europe and it is able to offer to customers an excellent turnkey service from emptying to the complete reconstruction and pre-heating of new furnaces.

AREAS OF ACTIVITY

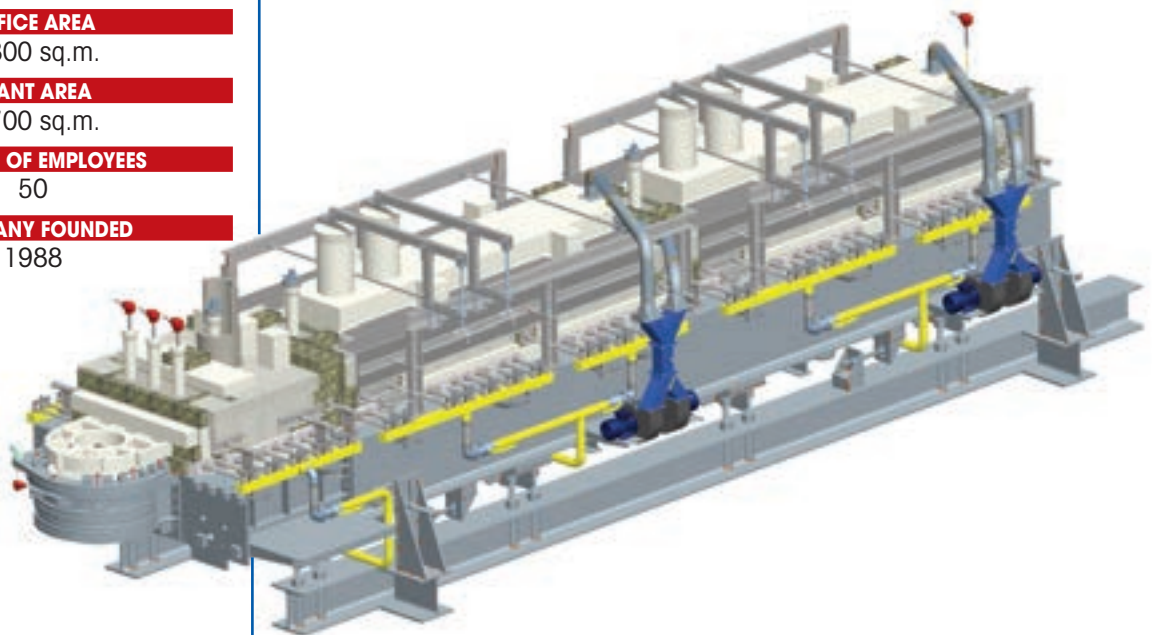

Revimac is a member of the Bottero group of companies.

It was founded in the late 1980s to cater for an ever-growing market demand for hollow glass forming machinery and allied ancillary equipment.

Revimac is now the largest and best equipped IS machine re-manufacturing shop worldwide.

During its 23 years of operations, Revimac has supplied and commissioned over 150 IS machines in a range that spans from 2 to 12 sections operation in Single, Double, Triple and even Quadruple gob configuration.

In the same period, more than 100 mechanical gob feeders type 144, 81 and 503 have been delivered to several glass factories.

In the early 1990s, Revimac started manufacturing and supplying ware handling equipment. In about 20 years, more than 1,000 ware transfers, stackers and cross conveyors have been delivered to more than 40 countries, making Revimac one of the fastest growing supplier in this market segment worldwide.

The staff of Revimac is now more than 50 people strong and its management and engineering team includes a number of professionals with no less than 20 years of experience in the glass container industry.

At the beginning of 2001 Revimac started supplying gas fired forehearth. The newly designed high performance generation was then added in 2010. As of now, all together more than 50 Revimac forehearth units have been commissioned worldwide.

RANGE OF PRODUCTS

- FUSED-CAST AND SINTERED REFRACTORIES
- CRUCIFORMS AND MORTARS FOR GLASS FURNACES AND FOREHEARTHS

AREAS OF ACTIVITY

Saint-Gobain SEFPRO is the only refractory group worldwide fully dedicated to and streamlined for offering top-of-the-line refractory solutions specifically for the glass industries.

- With its 10 manufacturing sites around the world, Saint-Gobain SEFPRO offers total reactivity to glassmakers' needs, combining the power of a global player and its large available resources with the proximity of local partners.
- Saint-Gobain SEFPRO also has the largest research centres in the world specializing in refractories and their interaction with all types of glasses, and has been leading the industry for decades in the development of new materials.

The latest examples of this innovation power are:

- ER 2010 RIC & ERSOL SL. New AZS and Unshaped products to improve life and reduce defects in furnaces melting RICG.
- XILEC 5& XILEC 9. Two new products adding, to the usual properties of a HZFC material, the highest electrical resistivity on the market.
- New types of cruciforms. Type 8 shape to improve the thermal efficiency of your checker work. ER 55XX material to sustain either oxidizing or reducing furnace running conditions.

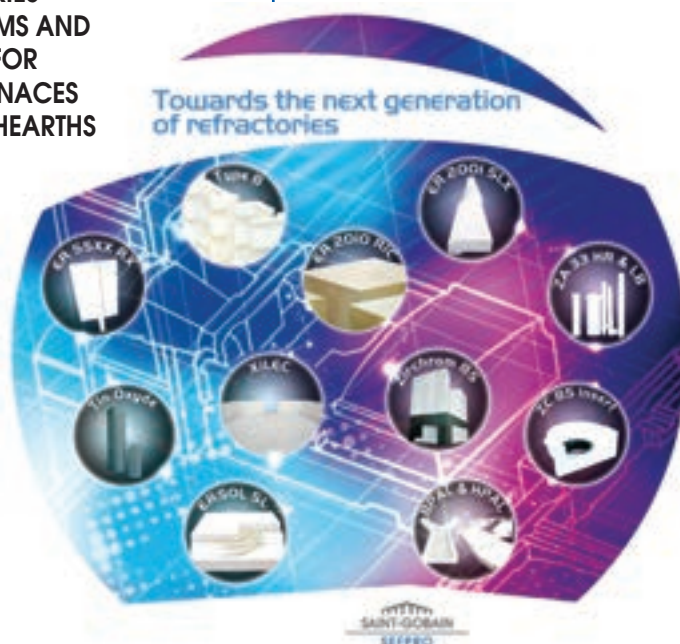

- ER 2001 SLX, a completely new generation of AZS fused-cast refractory with practically no exudation at furnace working temperatures.
- New ZA33LB and ZA33HR feeder expendables materials, bringing innovative answers to the issues of transitory blistering of plungers or random breakage of tubes.
- HPAL, a second generation of high alumina sintered material for feeder channels, with exceptional performance both in corrosion resistance and glass quality.
- Zirchrom 85, the ultimate high chromia material for the most demanding applications in insulation fiber and soda lime glasses (throats), with its unequalled thermal shock resistance.

Other well known solutions proposed by Saint-Gobain SEFPRO include:

- Dense chromes with improved thermal shock resistance, in large, complex shapes.
- Dense zircons with improved thermal shock resistance.
- Dense tin oxide electrodes.
- Fused mullite for melter crowns and superstructure applications.
- High zirconia fused-cast products for TV and special glasses.
- The cruciform range for higher thermal efficiency and greater resistance against silica carry-over and alkaline vapours.
- Spout Lip casing "ready-for-installation" in float glass furnaces.

To help glassmakers reach their goals, the team works closely with each of them throughout the life of the furnace, providing an entire range of additional services:

- Furnace design assistance.
- Assistance in the choice of refractories, optimization of blocks sizes.
- Assistance in the choice of refractories optimization of blocks sizes and feedback to improve the desing of the next furnaces.
- Supply of complete, pre-assembled sub-units.
- Periodic check-up of the furnace performance, wear, evolution forecasts, etc.
- Organization of rapid trouble-shooting for exceptional emergency evaluations.
- Management of worn refractories.
- Glass defect analysis.

AREAS OF ACTIVITY

General description of SKLOSTROJ

"Sklostroj Turnov CZ, s.r.o." - was founded in 1950.

The company employs about 230 people and 98% of turnover is generated from export.

Company VISION:

- SKLOSTROJ is a successful company which has important consideration for clients, employees and suppliers, who, in turn, respect the company too.

- SKLOSTROJ creates values and provides its clients with a competitive advantage and perspective and freedom for creativity to its employees.

Company MISSION:

- Our mission is technical development, production, supplying and servicing of machines and other equipment for container glass production.

- We also support glass as a packaging material and develop mutually advantageous partnership with clients.

List of products

- Forehearths
- Stirrers

• Feeders

- Shear mechanisms
- Gob distributors

• IS forming machines

- SST 06 control and drive system
- E-pushers

- Conveyors, Cross conveyors and Stackers

- LPBB technology

- Glass moulds - with the "bonus programme of mould supplies" - BPMS

• Annealing lehrs

- Mould preheating ovens
- Single liners, cold end conveyors, visual inspection, cullet conveyors

- Glass scrapers (granulators)

- Pallet handling systems

- Shrink wrapping lines

- General machinery production - jobs out of the glass industry

List of services

- "Turnkey" projects - general lay-out, planning, project management and all around new glass plants. Partially by own staff, partially outsourced.

- Personnel training. With regards to hot-end operators, we have a training room equipped with

a single section IS machine. Project "ITT" Interactive, Training Terminal.

- Technology support and implementation. We are experienced with the implementation of NNPB or LPBB advanced technologies.

- Supervised assembling

- Commissioning

- Technical support

- Servicing - regular visits to customers by our service team

- Overhauls, revisions, general repairs, repairs

- Mould design

- Selection and recommendation of variables

- Spare parts and variables management

- Assistance for credits ("Buyer's Credits") on the general OECD rules supported by Czech Export Insurance Agency (www.egap.cz)

- Customizing of systems - modifications upon client requests

RANGE OF PRODUCTS

- **MELTING FURNACES**
- **FOREHEARTH TECHNOLOGY**
- **ENGINEERING**
- **EQUIPMENT**

AREAS OF ACTIVITY

Companies belonging to the SORG® group offer unrivalled service to the glass industry, covering design and engineering, supply of equipment, installation and commissioning, maintenance and service for all areas of the glass manufacturing process, from raw material handling to the gob.

The group has related companies providing a wide range of services for the glass industry, including difficult hot work such as drilling, ceramic welding and overcoating. EME, another subsidiary, designs and manufactures systems and equipment for all aspects of batch and cullet handling.

• Melting furnaces

SORG® has unique experience in the design and engineering of most types of furnaces for continuous or discontinuous glass melting. At any time, more than 250 furnaces designed by SORG® are in operation throughout the world.

• Glass conditioning systems

Distributors and forehearths for pulls from 2 to 200 t/24h, and a broad spectrum of forebays and overflows are available for a variety of applications. The latest standard forehearth design is the 340S, based on a fusion of the glass conditioning technologies of SORG® and Emhart Glass.

• Glass types

SORG® installations are used to manufacture almost all commercial glasses, including lead crystal, fluoride opal, and all types of borosilicate glasses, such as C glass, E glass, Pyrex® and neutral glass.

• Engineering

SORG® offers an engineering package specifically tailored to customer requirements, and normally including the detailed engineering for refractories, steelwork, heating, control and ancillary systems.

• Equipment

SORG® supplies a comprehensive range of equipment for furnaces, distributors and forehearths. The scope of supply may extend from individual components through to complete turn-key contracts.

• The environment

SORG® can also offer tried and tested solutions to the problem of NOx emissions, ranging from the redesign of existing furnaces to advanced solutions. SORG® has substantial experience in oxy-fuel firing, with installations ranging from 12 to 400 tons per day. SORG®'s newest sustainability initiative is the BATCH3 approach to batch preheating.

Products: Machinery for the production
and visual inspection control
of glass tubing containers

AREAS OF ACTIVITY

Spami and Optrel make up the Engineering Division of the Stevanato Group, which is among the leading suppliers of primary glass packaging for the global pharmaceutical industry.

The Engineering Division is strongly connected to the Glass Division, consisting of Nuova Ompi, Alfamatic, Medical Glass, Ompi of America. These companies specialize in the design, manufacture, installation and after-sales support of high speed precision machinery for the production and control of glass containers as well as vision inspection systems.

Spami has the technological leadership in design and production of machineries for glass tubing converting for the production of vials, cartridges, syringes, ampoules and special devices.

A team of 100 employees builds complete forming lines based on vertical rotating technology with high capability and precision that includes: integrated fully automatic lines with auto-packaging units; 100% control of dimensional and visual parameters, statistics are collected and made available on line to the operators for appropriate adjustments; needle assembly technology.

Optrel has a long tradition in the inspection machine market for the pharmaceutical industry including parenteral drug, injectable and solid dosage inspection with automatic and semi-automatic equipment.

Now with the merge with the Stevanato Group Optrel has developed, based on the same field

proven technology, a range of inspection machine for empty glass articles: ampoules, vials and syringes. The range of defects covered match the requirement from the PDA glass task force and comprise also metrological controls recorded in a SCADA-like interface for production control. The system is 21CFR11 compliant relating to recipes and batch recording.

As Stevanato Group we produce a full range of glass packaging including important traditional products such as vials and ampoules and also strong growth products such as cartridges for pen-injection systems and auto-injectors as well as prefillable syringes. Syringes are available in both bulk (stake needle & luer finish) as well as from our EZ-fill™ line. EZ-fill™ offers clients an important new source for reliable, flexible supply of prefillable syringes packaged in convenient nested tub formats. (washed, siliconized, sterile)

The strategic target of the Stevanato Group is to offer the complete range of pharmaceutical containers based on glass tubing. Our global footprint provides not only manufacturing flexibility, but is also an important attribute in Risk Management. Our mission is to exceed customer expectations today, while investing in the future to support a constantly evolving and complex global market.

COMPANY DATA

COMPANY FOUNDED

1950

STARA GLASS coordinates all the specific activities of the other Companies of HYDRA Group for the glass market.

AREAS OF ACTIVITY

The Hydra Group developed basing its efforts on the long experience of STARA GLASS, which started with the demolition of glass furnaces and recovery of refractory scraps in the early 1950s.

Since the 1980s, it has been offering complete service to glass manufacturers. The constant progress of the group has allowed new agency agreements to be formed with the most important manufacturers of refractory materials, mechanical plants and electronic control instruments.

- **Design;**
- **Engineering;**
- **Turnkey supply** of glass melting furnaces (end-port, regenerative, recuperative, oxy-fuel, day-tanks) for all kind of glass (container, rolled pattern glass, tableware, sodium silicate, opal and borosilicate glass);
- **Repair jobs:** Demolition, reconstruction, hot repair;
- **Supply** of all refractory materials, combustion systems, recuperators, steel structure, process control, cooling liquid and gas fluid systems;
- **Technical assistance;**
- **Heat balance** calculation on operating furnaces;
- **Endoscopies.**

The new reality for glass furnace advanced heat recovery

The cheap and easy way to have a Unit Melter consume like an End Port

The ideal tool to get optimization in an End Port provided with undersized chambers

AREAS OF ACTIVITY

Strada is a leading company in the production of moulds for glass containers, which are manufactured using Blow and Blow, Press and Blow and Narrow Neck Press and Blow technology. In addition to moulds, the company's production range includes mould accessories, finishing moulds and neck rings.

The company was founded in 1945 and since then has grown steadily, now employing more than 50 people in four departments - the Technical, Quality Control and Commercial Departments, and the Production Workshop.

In the Technical Department, the latest CAD/CAM software is used by skilled technicians to develop moulds for almost any type of glassware that customers may require.

The Production Workshop uses automatic and NC machines at every production stage except for those operations where human ability is still indispensable.

In addition, a production programme follows each item individually from the time the order is placed through to delivery to the customer.

Every stage of production is closely controlled by the Quality Control Department. All raw materials, semi-processed goods and finished products are subjected to rigorous quality control checks so that they conform to the most up-to-date international technical standards.

In 2003, quality certification was upgraded to the strictest ISO 9001:2000 certification.

The Commercial Department is almost a bridge between customers and the rest of the company, and the Technical Department in particular. It is the experience and expertise of the skilled technicians working there that enable Strada to offer solutions to any kind of technical problem or produce the most intricate moulds.

The company is proud of its ability to offer extensive cooperation to glassworks, to help them solve their daily problems. Why not see if it can help you?

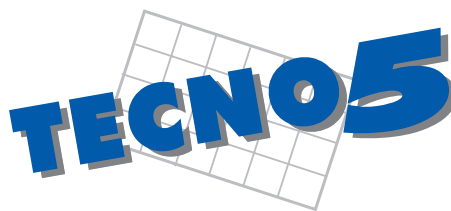

RANGE OF PRODUCTS

- **PLANTS AND EQUIPMENT FOR SILK-SCREEN PRINTING ON GLASS**

AREAS OF ACTIVITY

Tecno5 designs, produces and installs a wide range of machines and accessories for silk-screen printing with up to eight colours on all kinds of cylindrical, conical and other shaped glass items such as: bottles, tumblers, mugs, goblets, stemware, bowls jars, ashtrays and others.

What make the difference in Tecno5 equipment and plants is the great flexibility and profound experience of an exceptionally active and reliable company, having one of the largest decorating groups worldwide, Cerve Spa, as a direct source of its know-how and technological development.

The Cerve Group employs about 700 people, and has a production capacity of up to 2,000,000 decorated items per day. Tecno5's parent company has designed and built its plants and machines with its own patents. As a result of this industrial achievement, Tecno5 has, for over 20 years, provided its advanced know-how and experience, producing decorating machines aimed at the highest users' requirements.

With Tecno5 machinery, multicolour glass decoration becomes achievable for any operator and, most of all, becomes profitable also for small batches. That is why glassworks and independent decorating companies from over 40 different countries worldwide are currently using Tecno5 technology.

Tecno5's mission is to satisfy users' needs by continuous research and development of new technologies which enables the company to anticipate market requests, thanks to intensive market studies and the qualified consultancy of its agent and sales network.

The service provided by Tecno5 includes:

- aimed training at Tecno5's premises or on-site;
- specialized after-sales service and consultancy;
- prompt worldwide technical assistance;
- a wide selection of spare parts in stock; and
- the supply of complementary equipment such as Lehr loaders and unloaders (push-bar, stackers, de-stackers), feeding tables with accumulating conveyors, thermo-plastic ink pre-melters, transfer conveyors, etc.

Thanks to this philosophy, totally oriented to customer satisfaction, Tecno5 has achieved a range of machinery with higher electronics contents, in response to the more and more user demands such as the decoration of square and oval-shaped items.

- **PROCUREMENT**
- **CONSTRUCTION MANAGEMENT
AND COMMISSIONING SERVICES**

AREAS OF ACTIVITY

Henry F. Teichmann (HFT), founded in 1947, is dedicated to providing engineering services, melting furnaces and turnkey plant installations for the glass industry worldwide. During more than 65 years of service to the glass industry, projects have been carried out in more than 40 countries.

Engineering, construction management and commissioning services support the following areas of activity:

Turnkey glass plants: for manufacturing TV glass, float glass, rolled pattern glass, container glass, sodium silicates and fiberglass.

Batch plants: automatic material processing and weighing for precise batching for the complete range of glass compositions.

End-fire regenerative furnace designs: for melting container glass and rolled pattern glass. Over 20 installations of HFT's Dual-Pass Regenerative Furnace System exist worldwide, using a heavy oil and natural gas combustion system.

Cross-fire air-gas regenerative melting furnaces: for melting container glass with maximum size production, float glass furnaces for clear and tinted glass production and large sodium silicate production.

Oxy-fuel fired furnace designs: for melting fiberglass, float glass, TV glass and container glass.

Improved glass qualities and low NOx are major results of the latest designs.

Plant modernization and rebuilds: the staff of engineers and constructors of HFT continues to meet the very short turn-around schedules for float, container, TV and fiberglass producers around the world. Our list of regular customers speaks for itself. Providing state-of-the-art quality installations with excellent safety and environmental performance is our commitment to our clients.

AREAS OF ACTIVITY

The SIL, VERTECH's Production Monitoring System and Quality Control system, offers a clear view of production by supplying information in real time about losses and defects to all actors of a glass plant.

Benefits of the SIL system:

- Save time by sharing information
- Reduce defects by knowing the priority
- Reduce good ware rejections by reacting quickly
- Reduce customer risks with full traceability
- Reduce energy & pollution

The SIL is able to communicate with all types of inspection machines on lines and control devices in the laboratory: Multistation, Check+, M1 from MSC-SGCC, Veritas, Prolaser from Emhart-Powers, SPT from AGR ...

With more than 450 lines equipped worldwide, VERTECH' has become a confident partner of major international glassmakers for the monitoring of production and quality controls.

AREAS OF ACTIVITY

In close cooperation with its customers and glass industry businesses, VIDROMECHANICA is a partner in this market for the last 30 years.

With equipment supplied to over **50 countries** Vidromecanica continues the reputation of providing customers with quality engineered solutions capable of operating on today's modern high speed glass production lines.

Vidromecanica's main equipments are:

- Annealing and decorating lehrs
- Belt tempering lines for tableware
- Spindles toughening lines for stemware
- Chemical tempering machines
- Roller annealing lehrrs for flat glass / U-Glass / Laminated glass
- Special glass thermal treatment ovens
- Moulds pre-heating kilns
- Servo-stackers
- Hot end coating hoods
- Cold-end coating spraying systems
- Scraper conveyors
- Cullet crushers
- Cullet recycling plants

Vidromecanica, is **ISO9001:2008** certified for project, production and after-sales services for machines for the glass industry.

With innovative machinery solutions for many applications of the glass industry, equipment from Vidromecanica are up and running worldwide. VIDROMECHANICA engineering is synonymous of safety for functioning and investment.

Founded in 1920, Zippe has dedicated all its activities to the international glass industry.

Acting as a partner to customers, solving problems in the fields of melting material preparation, design, manufacturing, installation and commissioning of plants on a turn-key basis - if required - Zippe offers the following delivery programme:

- Batch Plants
- Refurbishing and upgrading of existing plants
- Modernization of Electronical Control and Weighing Systems
- Factory Cullet Processing Plants
- Ecologic Glass Recycling Plants
- Processing Plants for Special Glass Waste
- Batch Chargers
- Glass Level Controllers
- Batch and Cullet Preheating Systems
- Engineering
- Maintenance and Service

Zippe engineers and supervisors install and commission plants worldwide.

Comprehensive documentation informs the customer about all plant functions and delivers technological details, providing easy solutions to problems by means of tele-communication dialogue.

Burners: butane, propane and other liquefied gases, combination oil and gaseous fuels, fuel oil, furnace, gas, gas and oil combined, glass blowers, glass melting, heating, industrial, low NO_x, multi-tube, natural gas, oil, oxy-fuel, petcoke, propane gas, solid fuels, ultra low NO_x.

Chemicals: coating, combustion control systems, combustion equipment and systems. Control panels: gas.

Controls: coal burner, combustion, cryogenic, emission, flow, gas, gas burner, oil burner. Cryogenic processing equipment and supply systems. Drying/firing/ melting equipment and technology. Flame cutting and polishing equipment. Flame cutting and polishing applications/technology. Fuel oil equipment. Gas flow measurement systems. Gas handling equipment. Gases: helium, hydrogen, nitrogen, oxygen. Generators: hydrogen, nitrogen, oxygen. Inerting atmosphere applications equipment and technology. Glass heat treating equipment. Helium: gas reclaim/recovery systems and high purity piping. Hydrogen: complete and on-site plants, safety consulting, storage systems, supply systems. Industrial gases and industrial gas equipment. Oxy-fuel combustion equipment and systems. Oxygen. Petcoke combustion. Plants: oxygen, nitrogen and hydrogen. Solid fuel burners and combustion.

PROCESS AND QUALITY CONTROL

Air pollution control equipment and systems. Emission control systems. Environmental control systems. Flow control systems and measurement systems. Furnace air pollution control equipment. Furnace control systems.

SERVICES

Annealing services: Hydrogen. Separation plant services. Cryogenic processing services. Cryogenic services: industrial cutting tool. Glass foundry services. Inerting atmosphere applications services. Nitrogen: plant services, safety consulting, solutions, systems. Oxy-fuel combustion services. Oxygen plant services. Oxygen safety consulting.

BOHEMI CHEMICALS

MATERIALS AND PRODUCTS

Hot- and cold-end coatings.

Chemicals.

EME

MACHINERY AND EQUIPMENT

Batch plants and cullet treatment plants, conveying systems, batch chargers.

PROCESS AND QUALITY CONTROL

Computer-integrated process control.

SERVICES

Engineering, design and supply of complete plants, including assembly and commissioning. Maintenance, staff training and assistance.

GCG - GLASS CONSULTING GROUP

MATERIALS AND PRODUCTS

Raw materials. Cerium and rare earth oxides. Frits for feeder colouring. Coloured glass with feeder colouring system.

MACHINERY AND EQUIPMENT

Batch plants. Cullet treatment.

Scraping conveyors.

PROCESS AND QUALITY CONTROL

Process control for batch houses. Batch composition assistance.

GLASS SERVICE

MACHINERY AND EQUIPMENT

Batch plants. Damping gas and powder plants. Waste gas recycling.

PROCESS AND QUALITY CONTROL

Fully automated control.

SERVICES

Engineering, design and realization of plants.

GT GLASS TECHNOLOGIES

MACHINERY AND EQUIPMENT

Complete batch plants. Batch chargers. Weighing lines. Cullet recovery systems.

PROCESS AND QUALITY CONTROL

Batch plant control systems.

SERVICES

Engineering, design and supply of batch plants. Assembly and commissioning. Staff training, technical assistance.

GRUPPO MINERALI

MATERIALS AND PRODUCTS

Raw materials.

MACHINERY AND EQUIPMENT

Turnkey plants for blast furnace slag and glass raw materials.

SERVICES

Technical consulting. Engineering and design of raw materials decontamination plants.

LUGLI

MATERIALS AND PRODUCTS

Raw materials.

MT FORNI INDUSTRIALI

MATERIALS AND PRODUCTS

Philips pelletized products.

MACHINERY AND EQUIPMENT

Mixers, batch chargers.

PRERISCALDO FORNI

MACHINERY AND EQUIPMENT

Batch chargers. Batch plants.

SERVICES

Engineering and design. Erection assistance. Technical consulting.

TEICHMANN, HENRY F.

MACHINERY AND EQUIPMENT

Turnkey design, material processing and weighing.

ZIPPE

MATERIALS AND PRODUCTS

Preparation of melting materials.

MACHINERY AND EQUIPMENT

Batch plants. Cullet recycling systems. Batch chargers. Glass level controllers. Batch/cullet preheaters.

SERVICES

Turnkey delivery.

2 MELTING

ACROTECNA

PROCESS AND QUALITY CONTROL

Process control system.

SERVICES

Engineering; studies; maintenance.

AMIG

EQUIPMENT AND ACCESSORIES

Glass level control systems.

BOCK ENERGIE-TECHNIK

FOREHEARTHS AND FURNACES

Electric heating systems for furnaces, forehearth and feeders.

EQUIPMENT AND ACCESSORIES

Boost-systems, full electric furnaces, tank and pot furnaces, forehearth and spout heaters, special heater, electrode holders, top-electrode, cooling, g-systems for holders, power supplies (transformers).

PROCESS AND QUALITY CONTROL

Electrode maintenance instruments, glass level control, automatic process control, visualization equipment.

SERVICES

Engineering, design and construction, physical modelling, hot drilling and holder replace, start up.

CAR-MET

FOREHEARTHS AND FURNACES

Structures for melting furnaces.

ELECTROGLASS

FOREHEARTHS AND FURNACES

All-electric furnaces, 200kg/day to over 200T/day and forehearth for all glass types, plus electric boosting systems.

EQUIPMENT AND ACCESSORIES

Equipment for electric furnaces, forehearth and

boosting systems, including electrode holders, drains and bubbling systems.

PROCESS AND QUALITY CONTROL

Glass level sensing/control systems.

SERVICES

Design and engineering for melting and conditioning systems, plus system checking and commissioning.

EME

EQUIPMENT AND ACCESSORIES

Batch and cullet chargers.

PROCESS AND QUALITY CONTROL

Motor and process control.

SERVICES

Engineering, design and supply, including commissioning, maintenance, staff training and assistance.

EMHART GLASS**FOREHEARTH AND FURNACES**

Mechanical/Servo Feeders, Servo Shears, Metering Spout.

EQUIPMENT AND ACCESSORIES

Gob Weight Control Loop System, Shear Spray System, Feeder Expendables, Feeder Tubes, Orifice Rings, Refractory Plungers, Stirrers, Spouts, Rotor Segments, Feeder Expendable Compositions and Clay Pots.

SERVICES

Installation, Training, Maintenance and Production.

F.I.C. (UK)**FOREHEARTH AND FURNACES**

ISO-Thermal forehearth conditioning and HVP FIHs and Electric FIH.

EQUIPMENT AND ACCESSORIES

Glass level controllers, electrode maintenance instruments.

SERVICES

Hot drilling electrode holder replacement, glass conditioning assistance, technical and start-up.

F.O.R.T.E.**FOREHEARTH AND FURNACES**

Regenerative and recuperative furnaces. Electric melters. Working-ends. Forehearth.

EQUIPMENT AND ACCESSORIES

Batch chargers. Burners. Reversal valves. Boosters. Bubblers.

PROCESS AND QUALITY CONTROL

Process supervisory and control systems. Metering systems.

SERVICES

Engineering. Design. Construction of furnaces and forehearth. Tapping. Heat-up with rod adjustment. Filling. Hot repairs. Assembly. Commissioning. Staff training.

GCG - GLASS CONSULTING GROUP**FOREHEARTH AND FURNACES**

End port furnaces. Electric furnaces and forehearth. Infrared thermometers.

EQUIPMENT AND ACCESSORIES

Combustion equipment. Thermocouples, special design thermocouples, control instruments. Glass level controllers, furnace camera systems.

PROCESS AND QUALITY CONTROL

Process controls for furnaces and forehearth.

GLASS SERVICE**REFRACTORIES**

Supply and installation of refractories.

FOREHEARTH AND FURNACES

Planning and realization of furnaces and forehearth from 50kg to 50 tons/day.

PROCESS AND QUALITY CONTROL

Temperature and pressure control systems. Level control systems. Chargers. Heat recuperators for day tanks and continuous furnaces.

SERVICES

Planning, realization and maintenance of furnaces and forehearth, technical assistance and consulting, start-up of turnkey plants.

GT GLASS TECHNOLOGIES**FOREHEARTH AND FURNACES**

Regenerative and recuperative furnaces. Working end. Forehearth. Cullet preheating system.

EQUIPMENT AND ACCESSORIES

Batch chargers. Burners. Reversal valves. Boosters. Bubblers.

PROCESS AND QUALITY CONTROL

Metering systems. Process control.

SERVICES

Engineering. Design. Construction of furnaces and forehearth. Tapping. Heating-up with tie rod adjustment. Filling-up. Assembly. Commissioning. Staff training.

H.C. STARCK**FOREHEARTH AND FURNACES**

Forehearth electrodes.

EQUIPMENT AND ACCESSORIES

Molybdenum glass melting electrodes. Pumps and liners of molybdenum

HORN**FOREHEARTH AND FURNACES**

Regenerative furnaces, recuperative furnaces, electric furnaces, forehearth.

EQUIPMENT AND ACCESSORIES

Combustion systems, batch chargers, glass level measurement.

PROCESS AND QUALITY CONTROL

Control equipment, hardware, software.

SERVICES

Furnace repair, furnace drilling, furnace erection.

LINCO BAXO - MAREF - TEC-REF**REFRACTORIES**

Dense bricks, fireclay high alumina, silicon carbide, magnesite.

Special shapes and blocks (i.e. forehearth): alumina, zircon, zircon mullite, sillimanite, mullite.

Monolithics, dense and insulating castables: alumina, zircon, silicon carbide, sillimanite, mullite, magnesite. Astm insulating bricks, dry and wet mortars, ceramic fibres and back-up insulation.

LUGLI**REFRACTORIES**

Zircon-mullite, magnesite chamotte, silica, andalusite, silicon carbide. Fused-cast materials: AZS, alumina, mortars, castables, channels. Insulating materials: bricks, sandwich-blocks, mortars, castables, eco-boards dielectric, bottom blocks.

MOTIM FUSED CAST REFRACT.**REFRACTORIES**

AZS and corundum-type fused cast refractories, refractory castables, mortars, regenerators, recuperators.

MT FORNI INDUSTRIALI**FOREHEARTH AND FURNACES**

Design, delivery and installation of recuperative furnaces, electric furnaces, oxy-fired furnaces, forehearth, pot furnaces and day-tanks.

EQUIPMENT AND ACCESSORIES

Glass level control, recuperators, batch chargers, combustion systems.

PROCESS AND QUALITY CONTROL

Temperature, pressure, combustion and glass level control systems.

SERVICES

From design to heat-up and commissioning.

OLIMERK MAKINA**EQUIPMENT AND ACCESSORIES**

Stirrer mechanism.

PRERISCALDO FORNI**FOREHEARTH AND FURNACES**

Complete control instrumentation. Combustion systems.

EQUIPMENT AND ACCESSORIES

Heat exchangers, pumping sections, burners, bubblers, heat recuperators, electrode holders.

SERVICES

Furnace pre-heating. Thermal cleaning of regenerator furnaces. Plant design and installation. Furnaces repair and maintenance, technical assistance.

REFRACTORIES EXPERIENCE**FOREHEARTH AND FURNACES**

Demolition, deconstruction, hot working, sealing, pre-heating, ignition.

SAINT-GOBAIN SEFPRO**REFRACTORIES**

Fused-cast refractories: AZS, high zirconia, alumina, cruciforms, monolithics.

S.I.G.M.A.**REFRACTORIES**

Consumable refractories (orifice rings, plungers, tubes, spout).

Alumina, silica, zirconium, zirconium-mullite, sillimanite, insulating material, castable patch, cements, ceramic fiber, fused silica.

FOREHEARTH AND FURNACES

Expandables, working ends and forehearth from insulation to channel blocks and superstructure. Special shapes. Spy blocks. Dog-house blocks. Bottoms. Regenerators. Rider arches. Chamber walls and crown.

SERVICES

Pre-assembly and technical assistance and consulting on refractory applications for forehearth and furnaces.

SKLOSTROJ TURNOV**FOREHEARTH AND FURNACES**

Forehearth.

SORG**FOREHEARTH AND FURNACES**

Regenerative and recuperative furnaces, electric melters, mixed heated furnaces, working ends, forehearth systems and colouring technology.

EQUIPMENT AND ACCESSORIES

Equipment for furnaces and forehearth.

PROCESS AND QUALITY CONTROL

Process supervisory and control systems. Metering systems.

SERVICES

Engineering design and construction of furnaces. Complete service for furnaces, heat-up with bracing adjustments and fill-up.

STARA GLASS**REFRACTORIES**

Supply of all refractories for furnace, working-end and feeder construction (fused-cast and bonded, alumina, silica, magnesite, zirconium, mullite, sillimanite, chromium, insulating, castable and cements), consumable refractories (spouts, plungers, tubes, orifice rings).

FOREHEARTH AND FURNACES

Design and supply of melting furnaces, w.e. and

feeders (regenerative and recuperative furnaces, day tanks), demolition and reconstruction.

EQUIPMENT AND ACCESSORIES

Combustion systems, recuperator.

PROCESS AND QUALITY CONTROL

Monitoring and control systems.

SERVICES

Turnkey supply, technical assistance, hot repairs.

TEICHMANN, HENRY F.

FOREHEARTHES AND FURNACES

Melting furnaces, regenerative end-fired, regenerative cross-fired. Oxyfuel reduced NOx furnaces.

EQUIPMENT AND ACCESSORIES

Hot gas ejection and valving systems for regenerative systems.

SERVICES

Engineering, design, construction of furnaces and related systems. Commissioning services and technical training for melting operations.

VMA

EQUIPMENT AND ACCESSORIES

Glass level control.

PROCESS AND QUALITY CONTROL

Tank level measurement.

4 LUBRICATING

AB. TECHNOLOGIES

MATERIALS AND PRODUCTS

Scissors lubrication pump.

HEYE INTERNATIONAL

MACHINERY AND EQUIPMENT

Hiperform Intelligent.

SERVICES

Temperature, guided lubrication.

GCG - GLASS CONSULTING GROUP

MATERIALS AND PRODUCTS

Hot-end and cold-end products for glass coating. Oleic acid, polyethylene for cold-end treatment.

LUBROTECH SOLUTIONS

MATERIALS AND PRODUCTS

Sprayable lubricants for pressware. Swabbing compounds for container blank moulds and neck rings. Pre-plating compounds for pressware and container moulds. Shear spray lubricants. Transfer area and lehr mat lubricants and coatings.

MACHINERY AND EQUIPMENT

Manual and automatic spray equipment.

SERVICES

Consultation on lubricant and application matters.

SERVICES

Production monitoring systems (supply, installation and training).

5 FORMING/HOT-END

ACROTECNA

PROCESS AND QUALITY CONTROL

Process control system.

SERVICES

Engineering; studies; maintenance.

AMIG

MACHINERY AND EQUIPMENT

Ball gatherers. Hydraulic presses and complete lines for special glasses. Glass block production

lines. Single- and multi-gob presses. Variable index presses. Spinning machines.

Handling and conveying systems for all applications.

Semi-automatic presses.

BDF INDUSTRIES

MACHINERY AND EQUIPMENT

Mechanical feeder mechanisms, servo parallel shears, servo feeders, gob distributors, IS machines, servo invert, servo take-out, stepping motor servo pushers,

ware transfers, cross conveyors, servo stackers, Vacuum pumps for IS machines.

TOOLS AND ACCESSORIES

Full range of interchangeable spare parts, variable equipment for SG, DG, TG for 4 1/4", 5", 5 1/2", 6 1/4" C.D., jigs and fixtures, Vacuum pumps.

PROCESS AND QUALITY CONTROL

New electronic integrated control systems, stand alone invert and take-out systems, plunger-up control systems.

SERVICES

Installation and start-up, training, IS machine and module refurbishing services, Vacuum systems engineering.

BOCK ENERGIE-TECHNIK**PROCESS AND QUALITY CONTROL**

Glass conditioning.

BOHEMI CHEMICALS**PROCESS AND QUALITY CONTROL**

MBTC.

BOTTERO**MACHINERY AND EQUIPMENT**

IS machines. Gob distributors. Feeders.

PROCESS AND QUALITY CONTROL

Electronic timing systems, pusher systems, drives for gob distributors, shears, feeders and plungers

EME**MACHINERY AND EQUIPMENT**

Complete plants for hot- and cold-end cullet treatment.

PROCESS AND QUALITY CONTROL

Motor and process control.

SERVICES

Engineering, design and supply of complete plants, including assembly and commissioning. Maintenance, staff training and assistance.

EMHART GLASS**MACHINERY AND EQUIPMENT**

Servo Gob Distributor, Delivery Equipment (Delivery Suspension Support System and Conversion, Scoop/Troughs/Deflectors), NIS™ Machine, IS Machines, Container Forming Products: 3rd Generation Valve Block with New Section Frame, AIS Blank and Blow Mold Support Mechanism, Blowhead Mechanism (Large/Small), Dynamic Blowhead Balancing Device, Flex Pressure System (FPS™), Funnel Mechanism (Large/Small), Pantographic Baffle Mechanism/Arms and Holder Conversion, Quick Change Plunger Mechanism. Hot-End Ware Handling Products: Cross Conveyors, Main Conveyor (8000 Series), Push Bar Stacker, Pushers (860 AC Servo), Takeout (Constant Cushion, Servo-Electric), Ware Transfers (178/478/878), Hot Bottle Counter, Operator's Assistant I and II.

TOOLS AND ACCESSORIES

Complete line of IS Machine Accessories and Spare Parts.

SERVICES

Installation, Training, Maintenance and Production.

FAMOR ENGINEERING**SERVICES**

Revamping H28 machine and blowing machine.

F.I.C. (UK)**PROCESS AND QUALITY CONTROL**

Glass conditioning.

FUTRONIC**MACHINERY AND EQUIPMENT**

Electronic timing systems, drive systems, hotenol reject systems.

GCG - GLASS CONSULTING GROUP**MACHINERY AND EQUIPMENT**

Hot-end and cold-end products for glass coating.

GLASMASCHINENBAU FREITAL**MACHINERY AND EQUIPMENT**

Feeder, press machines and rotating blowing machines for bottles, flacons and small jars.

TOOLS AND ACCESSORIES

Neck mould holder for TO 53 mm synchronization, cooling conveyor.

SERVICES

Setting-up, starting-up, inspection, maintenance.

GLASS SERVICE**MACHINERY AND EQUIPMENT**

Gathering robots, up to 10 and 20kg of glass, automatic shears, pick-and-place robots to place hot pieces in the lehr, feeder mechanism channel.

TOOLS AND ACCESSORIES

Gathering balls and special suction cups.

PROCESS AND QUALITY CONTROL

Electronic timing systems, driving systems, feeder control.

SERVICES

Engineering, technical assistance, staff training, transfer of expertise.

HELIOS ITALQUARTZ**TOOLS AND ACCESSORIES**

Infrared quartz emitters.

HEYE INTERNATIONAL**MACHINERY AND EQUIPMENT**

IS Machines with Simotion Servodrive.

TOOLS AND ACCESSORIES

NNPB - kits, variables, spare parts.

PROCESS AND QUALITY CONTROL

Heye Process Control for IS Machines.

SERVICES

TAA - Technical Assistance Agreement.

KYP ACCESORIES**MACHINERY AND EQUIPMENT**

Ampoule forming machines.

SERVICES

Maintenance, consulting and development.

MERSEN FRANCE**TOOLS AND ACCESSORIES**

Universal fitting stacker bars, take-out tongs with floating inserts, guide gobs, dead plates, sweep-out ams, sweep-out fingers.

MODERNE MECANIQUE**MACHINERY AND EQUIPMENT**

MM30 and LA ampoule and vial making machines/lines.

PROCESS AND QUALITY CONTROL

Optistem (ampoule stem forming). Opticut (one point cut system). Opticom (optical measurement forming and control).

SERVICES

Customer service. Engineering and installation.

MSC & SGCC**PROCESS AND QUALITY CONTROL**

I-care, hot-end engraving system.

MT FORNI INDUSTRIALI**MACHINERY AND EQUIPMENT**

Furnaces for stem and bowl pre-heating.

TOOLS AND ACCESSORIES

Combustion systems for fire polishing machines, oxy-burners, special burners.

NOVAXION**MACHINERY AND EQUIPMENT**

Glass gathering robots. Glass blowing robots. Fire polishing robots. Handling robots.

PROCESS AND QUALITY CONTROL

Spinning machines. Shear mechanisms.

SERVICES

Engineering. Start up of production lines. Training.

OCCI OTG**MACHINERY AND EQUIPMENT**

Ampoule making machines: FA 30, FA 36, FA 36D. Vial making machines: FLA 20E, FLA 35. Automotive lamp blowing machines: LAMP 20.

PROCESS AND QUALITY CONTROL

Electronic devices for ampoule machines to produce first bottom of each glass tube.

SERVICES

Engineering and design. Technical assistance. Training.

OLIMERK MAKINA**MACHINERY AND EQUIPMENT**

Press & spinning machines, conveying system.

TOOLS AND ACCESSORIES

Shear Blades, delivery chutes.

OLIVOTTO - ANTAS - LYNCH - LINDNER**MACHINERY AND EQUIPMENT**

Feeder mechanisms. Presses. Multiple index presses. Blowing machines for lightware and large containers. Press and blow machines for soda-lime and lead crystal. Blow-blow machines and complete glass tubing lines. Automatic glass brick lines. Multifunction machines for stemware production. Ball gatherers. Stemware production lines. Paste moulding machines. Press machines. Injection machines. Shears. Gob feeder systems. Ball gatherers. Suction gatherers. Billet casting machines. Shears, gob delivery, press machines, press-blow machines, production lines for glass blocks.

TOOLS AND ACCESSORIES

Computer touch-screen line controls.

PROCESS AND QUALITY CONTROL

Electronic timing systems, driving systems, feeder control. Instrumentation and control. Mould tracker control systems, synchronous drive systems, electronic computer controls and timing.

SERVICES

Assembling start-up and commissioning of production lines. Engineering for turnkey projects. Engineering and machine design. Training and after-sales service.

PENNINE**MACHINERY AND EQUIPMENT**

Inverted tooth conveyor chains and sprockets.

SERVICES

Special modifications to give better bottle stability.

POCO GRAPHITE, AN ENTEGRIS COMPANY**TOOLS AND ACCESSORIES**

Glassmate® hot-glass handling materials: take-out holders, take-out inserts.

LUBROTECH SOLUTIONS**MACHINERY AND EQUIPMENT**

Manual and automatic spray equipment.

SERVICES

Consultation on lubricant and application matters.

RAMSEY PRODUCTS**MACHINERY AND EQUIPMENT**

Conveyor chains for bottle transport.

REVIMAC-BOTTERO**MACHINERY AND EQUIPMENT**

Re-built IS machines. Ware handling equipment.

SERVICES

Installation and commissioning.

SKLOSTROJ TURNOV

MACHINERY AND EQUIPMENT

IS machines, feeders, stackers, mould preheating ovens.

SERVICES

Commissioning, training, supervision, assistance.

SPAMI-OPTREL-STEVENATO GROUP

MACHINERY AND EQUIPMENT

Machinery for glass tubing converting for the production of vials, cartridges, syringes, ampoules and special devices.

TOOLS AND ACCESSORIES

Auto-packaging units

PROCESS AND QUALITY CONTROL

Inspection machine, 100% control of dimensional and visual parameters.

SERVICES

Customer service, engineering and installation.

Multi-Station Inspection Machines: Combined Inspection Machine, Triple Inspection Machine, Total Inspection

Machine (B+LAN), Total Inspection Machine (E+LAN), Total Inspection Machine (Mid-Ware Range).

Vision Products: PRISM™ 4000 T Vision Body Check Inspector, PRISM™ 4000 T Vision Sidewall Inspector, PRISM™ 5000 Sidewall/Dimensional Gauge, ProScanner™ 3200 - Sealing Surface Inspector, ProScanner™ 5200 - Base Inspector, ProScanner™ 8200

ANTONINI & Install Forget

ATS 250 - ANNEALING LEHRS - DECORATING LEHRS TEMPERING LINES - LEHRS UPGRADING

ANTONINI Srl • Via Medaglie d'Oro Resistenza, 2 • 50053 Ponte a Elsa (FI) • Italy | ANTONINI NORTH AMERICA - Pittsburg, U.S.A.
Tel.: +39-0571-93221 • Fax: +39-0571-931828 • E-mail: antoninisrl@leonet.it • www.antoninisrl.com

- Combined Base & Sealing Surface Inspector, Vision Mold Number Reader.

Electro-Mechanical Products: Check Detector, Dual Head Gager, High Speed Squeeze Tester.

Cold-End Ware Handling: Bottle Orienter, Bottle Spacer, By-Pass Conveyor, Synchronous Bottle Spacer, Two Wheel Bottle Spacer, Ware Transporter.

Cold-End Spray Systems: Cold-End Spray Mix System, Traverse Spray.

SERVICES

Installation, Training, Maintenance and Production.

EMMETI - SIPAC

MACHINERY AND EQUIPMENT

Complete cold-end lines. Palletizers.

GCG - GLASS CONSULTING GROUP

MACHINERY AND EQUIPMENT

Cold-end products, oleic acid, polyethylene for cold-end treatments.

HEYE INTERNATIONAL

MACHINERY AND EQUIPMENT

Hi Shield inspection systems.

PROCESS AND QUALITY CONTROL

HIS - Heye Information System.

HORN

MACHINERY AND EQUIPMENT

Cold-end coating.

IRIS INSPECTION MACHINES

MACHINERY AND EQUIPMENT

Evolution 12; Evolution 5; Evolution 1.

PROCESS AND QUALITY CONTROL

Sidewall base. Finish, stress, inspection. Ndd reading.

SERVICES

Training. Installation on site. Technical assistance.

KYP ACCESORIES

MACHINERY AND EQUIPMENT

Packing sets.

PROCESS AND QUALITY CONTROL

Electronic calibrating.

SERVICES

Maintenance, consulting and development.

MSC & SGCC

MACHINERY AND EQUIPMENT

Inspection machines for the container glass industry. Products: Complete cold-end lines. Mcal3: sidewall/stress. Multi3: base / stress / Finish / Mould reading. Check+: Checks detection machine laser+: Non contact thickness measurement Profiler: Internal Profile Analyser.

SERVICES

Cold end and engineering.

MSK COVERTECH

MACHINERY AND EQUIPMENT

Palletizers. Pallet handling, pallet conveyors. Pallet shuttle cars. Pallet elevators. Pallet shrink wrapping systems.

PROCESS AND QUALITY CONTROL

EMSY (Electronic Management System).

SERVICES

Spare parts. 24-hour support.

OLIVOTTO - ANTAS - LYNCH - LINDNER

MACHINERY AND EQUIPMENT

Palletizers. Depalletizers. Conveying equipment.

OMS - OFFICINA MECCANICA SESTESE

MACHINERY AND EQUIPMENT

Shrink wrap equipment - stretching machines

SERVICES

Customer service

PENNEKAMP

MACHINERY AND EQUIPMENT

Cold-end coating equipment.

SKLOSTROJ TURNOV

MACHINERY AND EQUIPMENT

Shrink wrap systems.

SERVICES

Assistance.

VERTECH

SERVICES

Production monitoring systems (supply, installation and training).

VMA

PROCESS AND QUALITY CONTROL

Inspection systems for quality certified production. Control of dimensions and defects. Thickness measurement of containers, flat glass and hollow glass.

VIDROMECHANICA

MACHINERY AND EQUIPMENT

Cold-end coatings.

ZECCHETTI

MACHINERY AND EQUIPMENT

Complete cold-end lines. Conveyor belts. Stackers. Take-out devices and equipment. Cross-conveyors. Automatic palletizing/depalletizing and packaging lines. Rotating tables. Shrink wrap equipment. Complete unit handling and moving systems.

PROCESS AND QUALITY CONTROL

Electronic control systems.

SERVICES

Design, engineering and construction of systems.

11 PLANT UTILITIES

AB. TECHNOLOGIES

MACHINERY AND EQUIPMENT

Hot cullet scraper.

ACROTECNA

PROCESS AND QUALITY CONTROL

Process control system.

SERVICES

Engineering, studies, maintenance.

BDF INDUSTRIES

MACHINERY AND EQUIPMENT

Thermoshock testing machines, Vacuum pumps air compressors.

GCG - GLASS CONSULTING GROUP

MACHINERY AND EQUIPMENT

Turnkey laboratory for chemical-physical analysis.

GT GLASS TECHNOLOGIES

MACHINERY AND EQUIPMENT

Technical supplies.

SERVICES

Demolition/construction services, commissioning of complete plants, modernization of existing plants.

HORN

MACHINERY AND EQUIPMENT

Special machines.

MSC & SGCC

PROCESS AND QUALITY CONTROL

Icam and mcal, multi and deltacam, M, check, cosmetic argos.

MT FORNI INDUSTRIALI

MACHINERY AND EQUIPMENT

Laboratory furnaces.

PROCESS AND QUALITY CONTROL

Polariscopes, lathes for verticality control.

SKLOSTROJ TURNOV

SERVICES

Assistance.

STARA GLASS

MACHINERY AND EQUIPMENT

Electrostatic precipitators and bag filters.

SERVICES

CAD projects, technical supplies and services.

FMT 24S

The FMT24S is a state of the art distributed machine control system. It consists of modules networked with industrial bus systems.

Highlights:

servo technology fully integrated · integrated electrical overrides · safe stop functionality via CANopen® · monitoring of valve current control of servo proportional valves · interface to commercial PLC systems · internet technology

For more information: futronic GmbH · Tolnauer Strasse 3-4 · D-88069 Tettnang

GLASS MAGAZINES

Glass-Technology International

THE LEADING MAGAZINE FOR THE INTERNATIONAL FLAT GLASS INDUSTRY

since 1989

GLASS-TECHNOLOGY INTERNATIONAL is the leading international magazine for professionals involved in the flat and bent glass industry, from building to automotive, and from furniture to household appliances. **G-TI** is useful for those working in float glass plants as well as glass processors/fabricators, glazing contractors, automotive glass installers, window and door manufacturers, glass merchants, wholesalers, etc. With about 100 pages per issue, it is the bi-monthly tool for keeping abreast of new technology, new products, company life and all innovations in the world of flat and bent glass. A Suppliers Guide/Yellow Pages survey in four languages - English, French, German and Spanish - is published in every issue.

glassmachinery world of plants & accessories

since 1988

GLASS MACHINERY PLANTS & ACCESSORIES is the leading international magazine for glass manufacturing, and is targeted at glassworks involved in the production and processing of hollowware and special glass (bottles, containers, household, lighting, technical, scientific, industrial and medical glassware) and fiberglass.

GLASS MACHINERY PLANTS & ACCESSORIES is a bi-monthly periodical with about 100 pages of product news, current world news, focus on..., country dossiers, technical articles and dossiers, worldwide exhibitions, glassworks in the world, Yellow Pages, etc.. In the last issue of each year, the magazine includes the **GLASS INDUSTRY AGENTS GUIDE**.

ANNUAL GUIDE

WORLD GLASS DIRECTORY

since 1990

In its 23rd edition, the **WORLD GLASS DIRECTORY** is a unique international annual guide which gives a complete overview of international glassworks and suppliers involved in hollowware and special glass manufacturing. About 200 pages of complete company profiles: addresses, management, sister companies, plants, number of employees, turnover, banks, year of company foundation, capital, trademarks, areas of activity, innovations, product-by-product and country-by-country breakdowns. It has summaries in five languages (English, French, German, Spanish and Italian).

The **WORLD GLASS DIRECTORY** is the annual reference point for the international glass manufacturing industry comprising bottles and containers, domestic glassware, tubing, vials and ampoules, lighting glassware, technical and industrial glassware, scientific, laboratory and medical glassware and automotive glassware.

ALL INDIA GLASS MANUFACTURERS' FEDERATION (THE)

812, New Delhi House
27, Barakhamba Road
New Delhi 110 001 - India
Tel: +91-11-23316507
Fax: +91-11-23350357
E-mail: info@aigmf.com
Website: www.aigmf.com

Type of Organization
AIGMF is a Federation of 5
Regional Associations (viz., Western
India Glass Manufacturers' Association-Mumbai, Eastern India Glass
Manufacturers' Association-Kolkata,
U.P. Glass Manufacturers' Syndicate-
Firozabad, Northern India Glass
Manufacturers' Association-Bahadur-
garh (Haryana) and South India
Glass Manufacturers' Association-
Chennai).

It is the sole representative body of
all segments of Indian Glass Industry
consisting of large, medium and
small-scale manufacturers

Type of Association:
AIGMF was incorporated as a non-
profit making association, under sec-
tion 25 of the Companies Act, 1956
since 25.06.1970.

**The Association
was founded in:**
1944

The main objectives of the Federation include:

To encourage, promote and develop
the manufacture of glass articles of
all kinds and to safeguard and
protect the interests of glass industry
and glassware business in India.
Form a common link amongst Glass
Manufacturers' in India and thus
develop a spirit of mutual help and
co-operation with one another.

The main activities of the Fed- eration are:

Promote, research and development
of Glass Technology; Organize Sem-
inars, Symposiums, Trade Fairs etc.
Publication of Quarterly Magazine
KANCH (Glass)
<http://www.aigmf.com/kanch.php>
Make representations whenever nec-
essary to the Union Government or
any unit of the Union of India for the
removal of difficulties that might ham-
per the trade manufacture of glass
articles or for grant of special facili-
ties for the glass industry.
Draw Government or public attention
to the difficulties in the way of Glass
Industry and to solve the problems
confronting it and to solicit their help
and support through concerted
action.
Organize a united front on behalf of
all glass manufacturers and thus
strive to gain all those advantages
which may not be possible through
individual effort.

E-mail: info@ativ-online.it

Website: www.ativ-online.it

President: Alessandro Bandini

Vice-President: Gianni Royer

Carfagni

General Secretary:

Barbara Ferrari

Type of Organization

No profit association

Type of Association:

of glass producers:

Domestic,

container glass, etc.

of connected industries:

Refractories,

machinery, etc.

The Association represents:

no. 70 glass technologists

The Association is a:

National organization

No profit association

The Association was founded in:

1985

The main scope of the Association is:

To the present day the fundamental function of the association has been to update its members, organizing a yearly conference, seminars and meetings in order to foster the technical choices necessary to improve, with knowledge, the quality and productivity of glass plants. The conferences attended by outstanding Italian and foreign speakers, have always been an opportunity for representatives of the national and international glass world to meet. All conferences and seminars are organized in co-operation with the Department of General

and Inorganic Chemistry, Physical Chemistry, Analytical Chemistry and, for some years, with the Department of Civil Engineering, Environmental Engineering and Architecture.

The main activities of the Association are:

Organization of conferences, seminars and technical courses.

GLASS ALLIANCE EUROPE

89, Avenue Louise, Box 2
B-1050 Bruxelles - Belgium
Tel: +32-2-5384446
Fax: +32-2-5378469
E-mail: info@glassallianceeurope.eu
Website: www.glassallianceeurope.eu

The Association is:

The European Alliance of Glass
Industries. It has the unique feature of
regrouping all the glass industries to
work on common issues. It is com-
posed of 13 national glass associa-
tions and of the main sectors of the
glass industries: container glass, flat
glass, special glass, domestic glass
and continuous filament glass fibres.

List of members:

Five European trade associations:

FEVE - Container glass
Glass for Europe - Building, automo-
tive and solar-energy glass
EDG - Domestic glassware
ESGA - Special glass
GlassFibreEurope - Continuous fila-
ment glass fibres (CFGF) - Reinforce-
ment glass fibres
Thirteen National Federations:
Austria - Fachverband der Glasindus-
trie Österreichs
Belgium - Fédération de l'Industrie du
Verre (FIV-VGI)
Czech Republic - Association of the
Glass and Ceramic Industries of the
Czech Republic (ASKPCR)
France - Fédération des Chambres
Syndicales de l'Industrie Du Verre
(FCSIV); Fédération des Cristalleries
Verreries à la main et mixtes (FCVMM)
Germany - Bundesverband Glas (BV
Glas)
Great Britain - British Glass Manufac-
turers' Confederation
Hungary - Magyar Üvegipari Szövet-
ség (MUSZ)
Italy - Assovetro
The Netherlands - Verenigde Neder-
landse Glasindustriën (VNG)
Poland - Polish Glass Manufacturers
Federation (ZPPS)
Spain - Vidrio España
Turkey - Türkiye Sise Ve Cam Fab-
rikaları (TSVCF)
