We keep the Aim and the Spirit of the Age of Discovery

Following in the footsteps of fourteenth-century Portuguese navigators, the LIZMONTAGENS THERMAL TECHNOLOGIES Group, based in Lisbon, Portugal, has expanded its industrial services worldwide over the past three decades, becoming the global leader in glass furnace construction and one of the leading references in heat containment for industry.

With a network of more than 30 subsidiaries and partners, from America to Japan, the Group's industrial services cover the construction and maintenance of industrial furnaces, the design, construction and maintenance of industrial chimneys, supply of materials for the thermal industry and other technical services.

Your projects are our projects

LET THE COLORS OF YOUR MIND RUN FREE

We give color to your imagination

With more than **25 years of experience** in the research and production of organic paints and silk-screen inks for **glass decoration,** Fluorital produces different types of spray paints, roller varnishes, and screen printing inks: water-base, UV-curable and solvent-based inks. The application fields of its products include perfume and cosmetic packaging, wine and spirit bottles, tableware, flat glass for furniture and interiors, and lighting glass.

All products are lead and heavy metal free, and can be applied directly on glass, as they do not require any primer. All products are curable at **low temperature** or with UV lamps, enabling important energy savings compared with other products. The physical and mechanical resistance to the most severe tests required in the different market fields make Fluorital's products the top reference on the market. Fluorital **invests a lot in Research** and in its laboratories; beside the continuous update of more consolidated products, the research is oriented on developing new finishing and new products with even more efficient resistances and environmentally friendly characteristics.

Fluorital produces top quality products to give colour to your imagination.

Plant Manager: Andrea Morelli
Products: Accessories for glass industries

This enterprise was set up after thorough observations and following considerations of the glass market. The necessity of the presence of a company, which could combine many years of experience, professionalism and credibility, looking, at the same time, at the future, at innovation and new technologies, pushed us to undertake this new adventure.

The result is this interesting company, which represents the perfect union between experience and innovation with the common aim of the maximum satisfaction of ever more exigent and experienced clients. For this reason, our machines are designed and manufactured exclusively in Italy, they are flexible and modulated according to the requests of clients and built using resistant materials. Thanks to high technology, important energy savings and, above all, easy and high-speed use are possible.

The product range of **AB. Technologies** includes Scrapers, Accessories, Runspray Cold-End Sprays, Supply Mixing and Dosing Pumps for emulsions used in gob cutting, Supply Mixing and Dosing Pumps with automatic feeding of products for the cold treatment of glass.

Runspray is AB. Technologies' Cold-End spray system that operates between bottle lines with high precision, always and automatically considering all production variables (no bottles or non-aligned bottles).

Its software is very easy to set and use,;the operator can also change all parameters while the machine is working.

Runspray is equipped with a Siemens touchscreen that works with a Siemens PLC.

Mechanical transmission and motorization are excellent: the motor is an 800w Yaskawa brushless and the planetary motor reductor is from Wittenstein.

The guns system is hydro pneumatic and the guns can have traditional or atomizing nozzles that guarantee perfect spraying.

Supply is AB. Technologies' standard dosing pump. The machine is used in all sectors requiring continuous mixing of two liquids. In the glass industry, Supply takes care of cold-end spraying and lubrication of the shears.

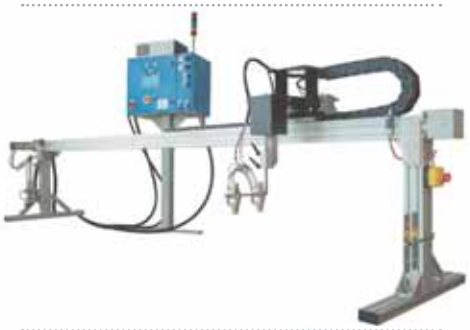

The operator can simply set the parameters to obtain the desired percentage from the PLC controlled operator panel.

The system can check if mixing is taking place correctly by monitoring the pressure in the pneumatic pump which doses and extracts the product. The pressure inside the mixing tank is also continuously monitored.

In the case of failure, the machine indicates the anomaly by means of an emergency lamp and displays the alarm on the operator panel.

AB. Technologies also provides a Supply Hf (high flow) and Supply dosing system with double flow.

Agr International, Inc. offers a broad line of products and services specifically designed to help bottle manufacturers around the world produce high-quality containers while improving efficiencies, reducing costs and contributing to the responsible management of resources.

Whether the need is for specialized testing equipment to support the quality of production efforts; a certified, independent laboratory to supplement your testing program or the assistance of expert consultants to better manage container filling and packaging related problems, Agr has a range of products and services that are uniquely designed to fit the needs of glass bottle manufactures, as well as brand owners.

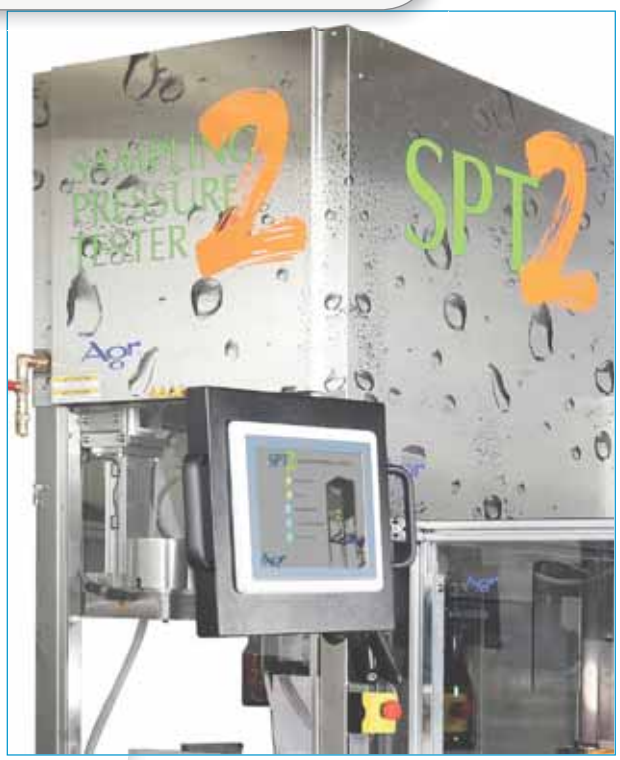

Agr's OmniLab is an automated testing center for glass bottles. It provides a host of high precision measurements including body/ finish dimensioning, weight and ID/Bore/Pushup, thickness, volume and pressure strength on glass bottles.

Agr's product offerings for the glass industry consist of a broad array of equipment for the production line and the laboratorym including on-line thickness management systems, automated gauging and sampling systems, as well as an extensive line of laboratory products for coating measurement, pressure testing, strength testing, volume measurement, and dimensional gauging.

Agr's American Glass Research division offers a host of specialized consulting, training, and analytical services for glass packaging. Experts from the American Glass Research division work with container manufacturers and fillers to lightweight and optimize containers, improve quality and productivity, as well as provide specialized testing services and training to industry personnel worldwide.

Agr International is a fully integrated supplier, from conceptual design to engineering, manufacturing, installation, training and support. Agr maintains worldwide operations with its headquarters in Butler, PA USA and satellite offices in Italy, Germany, Luxembourg, Spain, Poland, Mexico, Thailand and China. Additional information can be found at www.agrintl.com.

Agr's SPT2 incorporates an integrated volume measurement system that performs volume measurements simultaneously with pressure testing, on the plant floor, with laboratory accuracy.

Range of products

- **PALLETIZING/DEPALLETIZING SYSTEMS**
- **COLD-END LINES**

ALL GLASS S.r.l. is a well-known reliable supplier in the glass industry.

The company is able to design and supply turnkey cold-end lines, ranging from lehrs to palletizers, including cullet conveyors, accumulating tables, bottle inverters, elevators and lowerators.

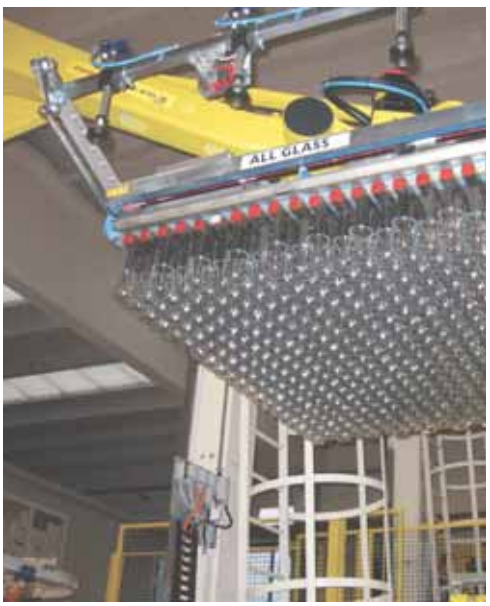

Our range of products can also provide customers with the following, according to their requests:

- special devices such as vibrating tables, dividers, sorters, spacers, orientators, motorized edges, etc.;
- manual and automatic depalletizers;
- pallet transport lines fully equipped with all necessary accessories such as deviators, rotating and modular built chain and roller conveyors, shuttle cars;
- semi-automatic and automatic shrink packaging machines for pharmaceutical and food glass containers;
- mould pre-heating furnaces.

With the aim of increasing the flexibility of its pal-depal systems, ALL GLASS started installing 4- and 6-axes robots some years ago, and, thanks to their simple use and reduced maintenance, the number of such installations is growing monthly.

Moreover, thanks to the extensive and diversified experience of the company's technical management in the glass industry, it can follow its customers step by step, providing reliable after-sales service and assistance.

AMIG S.r.l.

www.ocmigroup.com

AMIG is OCMI and MT Forni's trademark for the supply of automatic and semi-automatic glass forming and processing machinery.

AMIG's present scope of production includes:

- **Pressing machines**
  - Fully automatic rotary presses with pneumatic/hydraulic pressing mechanism, available for double gob processing for the production of small size tumblers and cups, or for single gob processing for the production of medium/large size articles such as beer mugs, plates, trays and other tableware articles.
    Presses are available from a minimum of 6 up to a maximum of 16 stations and can be driven by Geneva Wheel or Torque motor according to index time and type of article required.
  - Semi-automatic hydraulic presses.
- **Fire Polishers**
  - Both linear and rotary fire polishers, equipped with gas/air or gas/oxygen fed polishing area.
- **Spinning machines**
  - Automatic turntable spinning machines with individual spinning motors.
  - Semi-automatic electric spinning machines.
- **Press-and-blow machines**
  - PAS9 and PAS12 automatic, single turntable jug forming machines can be equipped with Geneva Wheel mechanism or Torque motor for table motion. Dedicated stations for mould temperature control and mould conditioning available as per customers' requests.
- **Glass block lines for standard and high capacity.**

- **High voltage insulator lines and plants.**

MT Forni Industriali and OCMI-OTG can perform turnkey projects from batch plants to final take out for the production of different glassware articles: tableware, containers, stemware, jugs, lighting ware, electric insulators, glass blocks, etc. under the AMIG brand name.

FOREHEARTHS

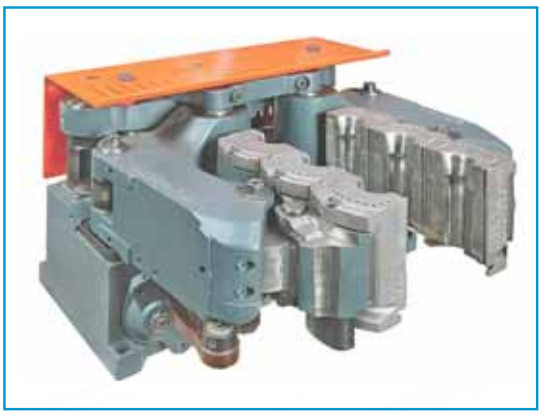

FEEDERS

- Manufacturing programmes: 344, 281, 703, 715 mechanical and servo types
- Operations: SG, DG, TG, QG

IS FORMING MACHINES

- Available from 2- to 20 section configuration, tandem system
  Operations: SG, DG 4-¼", 5", 5-½", 6-¼", TG 3", 3 -5/16", 4-¼"
- Blow & Blow, Press & Blow and NNPB process
- Variable production range for SG, DG and TG
- Servo mechanisms available as options
- Advanced forming technology through proportional valves
- E-MOC TECHNOLOGY
  DG 4-¼", 5", 5-½", 6-¼
  TG 3", 3-½", 4-¼

ELECTRONIC

Full range of electronic control systems:

- Flexible motor control module
- Electronic forming control module
- Servo mechanism control module
- Electronic pusher module - Twin axis
- Electronic pusher module

FORMING ENGINEERING TEAM: Serivice and training areas

- Cooling Design
- Parison and Mold Design
- New Containers Design
- Transition from D.G. to T.G. and from B&B to NNPB
- Production Support

TRAINING & SERVICE

- Remote Assistance
- Hot line
- Training, installation and services
- Engineering team available to discuss tailored solutions
- Consulting and advisor service for glass containers and special projects

HOT-END WARE HANDLING

- Ware transfers
- Cross conveyors
- Mechanical and servo stackers
- Hot treatment hoods
- Ancillary equipment

As the world's leader in equipment, services, and technology solutions, **Emhart Glass** continually sets new standards for glass container production flexibility. Offering the widest array of products available, Emhart Glass is able to meet the requirements of glassmakers, regardless of their technology level, to become the solution provider for the glass container industry.

Forming Machines

As the inventor of the modern-day IS machine, Emhart Glass revolutionized the glass production process. Today the machine port-folio includes:

- IS 4 1/4" → SG, 4 1/4" DG, 3" TG
  IS 5" → SG, 5" DG, 85mm TG
  IS 5 1/2" → SG, 5 1/2" DG
  IS 6 1/4" → SG, 6 1/4" DG, 4 1/4" TG
- AIS 6 1/4" → 6 1/4" DG, 4 1/4" TG
- NIS 5" → 5" TG, 95mm QG, 6 1/4" DG
- BIS → 140mm DG, 95mm TG, (70mm QG)

Glass Conditioning and Gob Forming

From the advanced design of the 555 servo feeders to plungers, gob distributors, and shears, Emhart Glass offers a full range of glass conditioning and gob forming equipment incorporating the latest technologies.

Control Technology

Controls from Emhart Glass are at the heart of the forming machine, which direct the key processes – ranging from conditioning the molten glass, to the seamless integration of complex mechanisms in the glass production process. Today, the FlexIS Process Control System is the primary control system for the forming machine, and will be the foundation for advanced process feedback and automation systems.

Ware Handling

Emhart Glass products include a complete line of leading technology servo-electric mechanisms that include take-out, the FlexPusher, Ware Transfers, Conveyors and Flex Stacker.

Inspection Systems

Emhart Glass provides quality assurance solutions designed to meet almost any inspection requirement. The Emhart Glass "total choice" portfolio includes the new FleXinspect family, consisting of the most precise mechanical and vision inspection machines, as well as high-precision on-line statistical sampling systems.

Hot End and Cold End Technical Services

As the technology leader and solution provider in the glass container industry for more than 100 years, Emhart Glass is able to offer a comprehensive portfolio of customer ser-vice, training, customer process support and project mangement.

The training center in Sundsvall, Sweden, offers modern and up-to-date theo-retical and pratical training on all Emhart Glass hot-end equipment. In addition to the training center in Sundsvall, Emhart Glass established a satellite hot end training center in Johor Bahru, Malaysia.

For the cold end, Emhart Glass has a Technical Competency Center in St. Petersburg, Florida, and in Leipzig, Germany, which serve as the central training, service and demonstration facilities.

The story of **Busellato Glass Moulds** is really no different from many Italian companies, and is based on long-term and family traditions. Busellato Glass Moulds is a synonym of innovation and technology. Founded in 1976, the company has always had experienced and well trained staff in terms of mould manufacturing, and now, its technicians are able to comply with the most demanding customers' needs. It first began as a mould repair and maintenance workshop, and then, in the 1990s, it started with automatic metallization, being the first mould manufacturer to weld bronze automatically. Busellato Glass Moulds is able to produce moulds of any shape and size – ranging from the smallest to the most complex containers all with the most complex decoration and engravings.

Product quality is guaranteed by main basic factors: optimization of the production processes, clean and tidy production halls, dimensional check of random samples during all production steps and sight and dimensional check before the packaging. With the researchn for more enhanced metallization processes and characteristics in mind, detailed studies were conducted regarding the metallization techniques and materials used for glass-contact surfaces in moulds.

This has enabled Busellato Glass Moulds to develop specific know-how in this area, allowing it to detect and correct defects, even in post-production phases. All products manufactured by Busellato Glass Moulds can be welded with excellent materials using different techniques such as Plasma, TIG and HVOF (High Velocity Oxy Fuel). Thanks to these methods it is possible to strengthen and protect some specific areas such as the contact edges of the different elements or the whole surfaces "touching the glass". The moulds are in cast iron, bronze and in steel.

PLANNED EXHIBITIONS

Glassman Europe 2017
Lyon, France - 6/7 September 2017
Glasstec 2018
Düsseldorf, Germany - 23/26 October 2018

Range of products

- TEMPERING LINES
- ANNEALING AND DECORATING LEHRS
- MOULD PRE-HEATING OVENS
- CROSS CONVEYORS
- SCRAPERS • STACKERS

Since 1965 **CAR-MET** has been working in the glass industry supplying technological machinery. During these years CAR-MET has gained experience, knowledge and enhancements in glass production thanks to its skilled personnel. The internal workforce is dedicated to the engineering and manufacture of machinery such as:

- Annealing lehrs for containers and special glasses
- Decorating lehrs
- Lehrs with double belts
- Toughening lines on belt and spindle
- Mould preheating ovens
- Cross conveyors
- Stackers with two and three axes
- Brushes for all the type of lehrs
- Hot glass scrapers
- Lehrs for special purposes

All machinery is manufactured entirely at CAR-MET's premises, in the north-east of Italy. Our services for clients include the pre-testing and inspection of machinery before delivery.

Annealing and decorating lehrs are among the best known products of the company; research and development is the guarantee that our technology is continuously evolving.

Gas or electrical heated lehrs are manufactured by means of modular design. The burners installed on the lehrs are patented by CAR-MET, adapted to almost any type of gas, having controlled air consumption. Size and configuration of each lehr is based on the space available for the installation and type of production. Heating and cooling systems installed have been developed in accordance with European energy-saving regulations; which reduce operating costs in energy consumptions.

Attention to the environment is not only reduction in energy consumption but also controlled emissions of exhausted fumes. A new technology of heat exchangers and radiant tubes has been developed, manufactured and installed by CAR-MET with the satisfaction of clients. This indirect heating technology is widely used in decorating processes to ensure the best results of final product quality.

Changshu Jianhua Mould Technology Co., Ltd. is a leading glass mould manufacturer in Asia.

JH Mould acquired OI Tianjin Mould in 2014; and currently operates three plants. The company operates the first automatic casting resin foundry in Asia, and its products are classified as container moulds and tableware moulds, with container moulds as its main production.

JH Mould is dedicated to providing worldwide first-class customers with various bottle and container moulds and accessories, which are applicable to NNPB, B&B and P&B processes, and is also to supply moulds, mould holders and accessories for tableware and kitchenware, produced using press, blow and P&B processes.

Jianhua Mould has more than 40 experienced engineers who use advanced CAD/CAM/CAE software to design the moulds, set the programmes and simulate real samples. In addition, to meet the demand of customers regarding complicated designs, the company's engineers always analyze heat distribution and simulate the glass forming process in the moulds using advanced software.

Jianhua Mould has established its leading position in the glass mould industry thanks to its complete quality control system, highly-trained quality control personnel, advanced inspection facilities, as well as the aim of continuous improvement in quality systems.

Jianhua Mould has always upholded the philosophy of the eternal golden triangle: customer's satisfaction, company's profitability, and employees' sense of achievement.

PLANNED EXHIBITIONS

China Glass 2018
Shanghai, China - 19/22 April 2018

Glasstec 2018
Düsseldorf, Germany
23/26 October 2018

Glass Engineering & Contracting is a division of Colorobbia Consulting, sister company of the Colorobbia Group, and dedicated to the supply of integrated services in the glass industry.

Thanks to the wide experience and expertise acquired in raw materials in the glass industry, the **GE&C** division aims at providing know-how in R&D, design, realization, supplying technical services in the main industries of flat glass, hollow glass, glass ceramic and technical glasses, as well as skilled contracting services required by these types of production.

The Colorobbia Group is specialized in the production and distribution of raw materials and semi-finished products for cthe eramic and glass industry. The head office is in Sovigliana, Vinci (Firenze) with 28 companies and more than 2,000 employees in 18 countries.

The **GE&C** division was constituted in March 2015, with the administrative and operating offices in Sovigliana, Vinci (Florence), via Pietramarina 53. Thanks to the many years of experience of our consultants and collaborators acquired in many countries all over the world, we are present in these countries to satisfy the requirements of our clients wherever they are, without overlooking in any case our origin and our Italian companies. The GE&C division is specialized in the following areas of the glass and glass ceramic industries:

Hollow glass	Tableware, Food & beverage, Pharmaceutical, Container glass
Flat glass	Float glass, rolled & patterned glass
Technical glass	Continuous fibers, fiber glass & basalt wool
Glass ceramic	Architectural glass

The new **GE&C** division aims at supplying its services both to glass industries working in the above described areas, and to companies designing machinery and equipment for the glass industry. Thanks to experience and know-how in technological solutions for glass ceramic systems, the **GE&C** division can also provide customized services to all companies interested in the realization of special glass and glass-ceramic systems; last but not least, our R&D and chemical laboratories can prove to be a winning support to the customization of specific production.

GE&C knows, compares and solves specific problems related to industrial investment projects and offers a wide range of services to clients eager to succeed in their projects.

We are also able to carry out and customize industrial feasibility studies, supply full range services of engineering – procurement – construction, and assist our clients in all phases of a new investment project, from design to realization, making sure that execution is adequate, on schedule and within budget. With our constant and reliable support, our clients will get the best from their projects.

PLANNED EXHIBITIONS

Glassman South America 2017
Buenos Aires, Argentina
29/30 March 2017

Schweissen Und Schneiden
Dusseldorf, Germany
25/29 September 2017

Numerical controlled automation is being introduced to glass mould production and repair by Italian welding equipment supplier **COMMERSALD IMPIANTI** srl. This task remained dependent on the manual application of spray-fused canisters and powder products long after other aspects of the manufacturing process had been automated. Commersald Engineering believes that its Robo series of workstations can perform all the necessary functions of manufacturing and repairing moulds and other glassmaking accessories. The welding equipment, complete with torches and power supplies compatible with various movements, designed and manufactured entirely by Commersald Engineering, can be selected according to need. It is available in various configurations and with power ranging from 200-400A.

All these work centres are managed by numerical control (NC), with dedicated software for both management of movements and for welding parameters. Programming is ISO standard, the same as normal NC machines for removing shavings.

The plants have the following characteristics:

- a torch with a copper tapering nozzle able to work in 200A continuous cycle on moulds and accessories of all dimensions for the glass industry, with constant penetration on the whole profile;
- 80kg max surfacing moulds, with pre-heating of pieces at temperatures up to 300°C for cast iron moulds and 400°C for bronze moulds;
- 20mm-thick metal structure, arc welded, quench and tempered steel with machined locator tables;
- programming simplified by the use of icons and windows.

All this equipment can be accessorized with Commersald Engineering induction heating units **HEAT 12-24** Kw for correct, fast, precise and economic pre-heating of the pieces.

Commersald Group's KOY trademark is one of the most complete, well-known and used line of welding materials and **PTA powders**, in particular in Europe. The quality sales system of the group's welding consumables has been certified EN-ISO 9001:08 as a further warranty of excellence of its products. Commersald Group's range of PTA powders includes specific Ni/Co/Fe grades for the glass industry with different hardness and with specific features for cast iron, bronze or steel moulds.

Commersald claims to be the leading European supplier of **Plasma Transferred Arc** equipment, as well as focusing on developing new products and improving its machinery in every aspect. It also places emphasis on the assistance it provides, often external, for customers. This includes customizing machines for their specific requirements.

BRUNO MARTINI
TECHNICAL MANAGER

Range of products

- ULTRASONIC CLEANING PLANTS

NEW POWDER CHEMICA LS:
ECOBASIC P
ECOAC ID P

ULTRASOUNDS VERSUS SANDBLASTING

1,800,000 bottles	800,000 bottles

With ultrasonic cavitation (molecular blasting) you will get:
- more than twice as long mould life;
- hight maintenance care;
- saving of mould edges;
- open and protected vent holes;
- save glass because of the unchanged dimensions of the moulds cavity.

Ecotecne, located in Galliera Veneta, Italy, is a leading manufacturer of ultrasonic cleaning equipment.

The company has released a new line of solid chemicals to foster the ultrasonic action of its system for the cleaning of moulds used in the hollow glass industry. The new chemicals – Ecobasic and Ecoacid – continue Ecotecne's tradition of integrating the latest technologies into its high-quality, easyto-use plants. The chemicals have been developed in-house with the assistance of regional universities and with the collaboration and technical expertise of a private laboratory specialized in formulating new chemicals for current industrial use.

The new chemicals now feature:
- powder form = products are added on site into the cleaning tanks and no longer transported and manipulated in liquid form;
- low concentration = 8-9%;
- increased chemical efficiency;
- less volume, which also means minimum storage, reduced transportation costs, reduced ecological impact, reduced transportation risks – solid compared to liquid form.

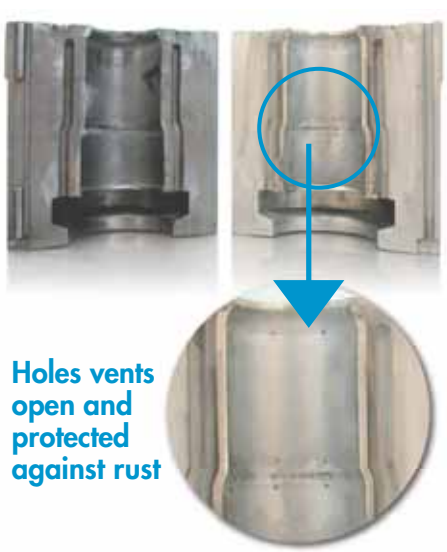

Products are supplied with instructions and can be easily managed by any operator without additional precautionary measures, unlike those normally in usage.

Ecotecne's team has, moreover, during the past two years, reviewed and innovated all parts of its patented machinery and its ultrasoun generators are now more powerful and multi-frequency, and can provide surplus energy whenever needed to achieve in-depth cleaning of particularly dirty items.

Transducers have been redesigned and upgraded in order to support and transmit maximum power efficiently, while the cleaning cycle has also been revised. In this way, Ecotecne can now offer the same quality of service and cleaning effect with different system sizes, ranging from the manual single-tank ECO1 to the most sophisticated, fully automated seven-tank ECO7.

Differences between sandblasting and ultrasonic cleaning (300x - 80 µm).

EME GmbH is a leading supplier of batch preparation plants, cullet handling equipment and batch charging technology to the global glass industry. Customized solutions ranging from single component supply through to complex turnkey batch plants for the whole variety of glass production such as:

• Container glass	• Float glass
• Fiber glass	• Solar glass
• Tableware	• Thin glass
• Special glass	• Display glass
• Water glass	• TV glass
• Lighting glass	

and for any environment. EME batch-charging technology provides for a completely sealed doghouse, reduced dust, lower energy consumption, fewer emissions and less rouge air entering the furnace. All benefits of the EME-NEND® batch-charging family are available with total sealed conveying systems.

Established almost 100 years ago the company has a long and proud history of service to the glass industry.

Since 1987 EME has been part of the SORG Group. The SORG Group, comprising EME, Nikolaus Sorg and Sorg Keramik Services (SKS), has the unique capability to supply all the necessary equipment and technology required in the complete batch and melting process, starting with the delivery of the raw materials right through to the transfer of the conditioned glass to the forming process.

Combined with the companies of the SORG Group and its sister company Shanghai Precision, EME delivers a truly global sales and service network to all its customers.

Emmeti and **Sipac** share their expertise in the glass and bottling industries with their wide range of machines installed worldwide. Previously, focus was on standard production lines in glass plants, however, as industry needs have evolved, so have those of Emmeti and Sipac, enabling them to redirect their capabilities and experience to resorting lines. Though not as demanding as production lines, which have to deal with the flow of glass 24/7, Emmeti and Sipac realize the importance of reselecting lines to the industry. Emmeti and Sipac understand that plants operating reselecting lines must improve line efficiency, reduce labor, and automate plants, or improve automation processes with leading capital equipment technology. Emmeti and Sipac engineer, design, manufacture and install the equipment to do just that: depalletizers, case packers, case palletizers which are mainly required on reselecting lines, repacking lines (mainly in the US), as well as labelling/printing lines.

Reselecting lines are required to double check the quality of glass bottles/jars, in the case of malfunctioning of the inspection equipment, or just as a random verification to ensure the inspection machines are properly adjusted and that quality standards are achieved.

Repacking lines are those where the market (main users) require bottles in cases. Bottles are depalletized and packed into cartons with or without partitions, depending on the type of cartons used by the customers. In some cases, partitions are an integral part of the carton itself, in other cases partitions are inserted right after the case packer and move down into position as they move along on a vibrating belt. This method of inserting partitions inside the cases after the bottles have been inserted is to safeguard the quality of any applied label. All cases are then palletized, up to 6 layers/min. with low-level machines, and up to 11 layers/min. with high-level machines.

Labelling/printing lines are those where the glass plants are required to label/print all bottles and then repack them, either in bulk or cases.

Emmeti and Sipac, together, can provide full service engineering, manufacturing and commissioning of production lines, as well as any type of resorting/repacking lines, in order to best suit your customers' demands.

ERMI Glass Control has celebrated 13 years of activities but the ERMI group (representing more than 90 people with 70 for glass activities) has been active for more than 30 years. ERMI Glass Control counts more than 45 people at its two sites: Nangis (60km from Paris) and Ovar (30km from Porto).

With more than 60 machines installed during these last five years, ERMI Glass Control has developed its technology with plant requests. Its collaborators enable it to offer complete inspection solutions for the cold end. ERMI carrousel machines are, today, the most flexible of the sector because they allow to add all types of independent controls, also providing an important part of maintenance with components of the market. ERMI Glass Control has also maintained the maintenance of numerous competitors' machines with new plants around the world.

Falorni Tech is the industrial division of Falorni Gianfranco Srl, a well-known Italian company operating in the hollow glass industry since 1958. The new division was founded with the aim of designing, planning, building and installing high capacity glass plants and machinery for large and modern industrial glassworks. Analyzing these new challenges, the corporate vision Falorni Tech has focused its mission on helping glass producers maintain their competitiveness and, at the same time, complying with environmental law-restrictions. Falorni Tech combines engineering, installations and tailored customer service with particular focus on delivery, timeliness, information, professionalism and staff attitude.

Falorni Tech has been conceived with a high-tech and extremely flexible company structure to face today's challenges, in particular those regarding industrial glassworks manufacturing tableware and containers.

Falorni Tech can supply furnaces and turnkey plants for any kind of glass: soda lime, crystal and crystalline glass, glass wool, fiber glass, sodium silicate, solar glass, pharmaceutical glass, and other glass.

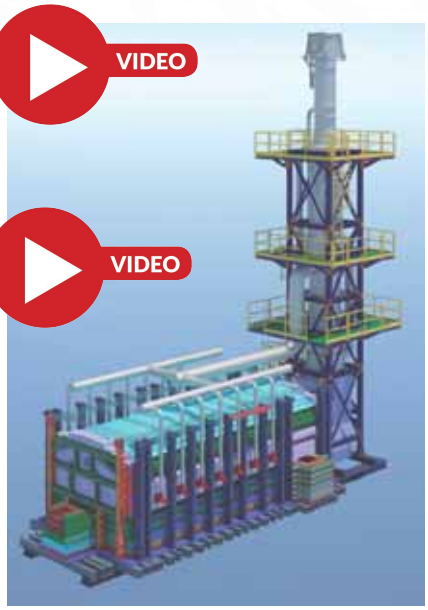

The plants designed by Falorni Tech are aimed at reducing the environmental footprint of the glass production process using efficient technologies, optimizing overall consumption, limiting the waste of materials and energy. In particular, Falorni Tech is specialized in oxyfuel furnaces with low NOx emission and high-efficiency operations.

An accurate and tailored assistance service program is provided in compliance with the project's needs and during all phases of the project's development in order to assist customers in all technical choices and financial issues.

Thanks to the experience acquired over the years, the company is able to offer systems with high quality standards meeting the specifications and expectations of the most demanding customers.

- CAST IRON AND ALLOYS FOR MOULDS

Fima Olimpia Fonderie is located in Tuscany, a few kilometers from San Gimignano (SI).

It is a foundry producing castings in special cast iron for glass moulds. Thanks to highly technological production facilities and advanced control instruments, the company offers the market high quality products at competitive prices.

The company's logistic and technical organization allows Fima Olimpia to provide fast solutions in productive terms, as well as in customer service.

Fima Olimpia Fonderie is a customer-oriented company which has client needs as its priority - from small to larger companies.

The company concentrates on research and development in order to offer the highest quality products and has had ISO 9001 certification since 1997.

Fima Olimpia Fonderie employs over 50 people and offers its clients:

- more than 50 years of foundry experience
- all the new technologies in terms of design and production of moulds
- new plants in order to have the maximum productive capacity
- 14 different kinds of special cast iron that enable to satisfy all customer needs
- a modern analysis laboratory that gives us the capacity to monitor production constantly
- high speed deliveries within 7 days from the date of the order to all European countries
- competitive price on international markets.

Otto Junker induction melting plant, capacity of 7 tons per hour. This installation has greatly increased the capacity of production flexibility and improved the quality of products

Fluorital is a dynamic, family owned and run company with its main plant located in Italy near Venice.

With more than 25 years of experience in the research and production of organic paints and silk-screen inks for glass decoration, Fluorital produces different types of spray paints, roller varnishes, and screen printing inks: UV-curable and solvent-based inks.The application fields of its products include perfume and cosmetic packaging, wine and spirit bottles, tableware, flat glass for furniture and interiors, and lighting glass.

All products are lead- and heavy metal free, and can be applied directly onto glass, as they do not require any primer.

All products are curable at low temperature or, when specified, with UV lamps, enabling important energy savings compared with other products.

The physical and mechanical resistance of Fluorital's products to the most severe tests required in the different market fields makes them the top reference on the market.

Fluorital invests considerable resources in Research and in its laboratories; beside the continuous update of more consolidated products, research is aimed at developing new finishings and products with even more efficient resistance, and environmentally friendly characteristics.

Currently, as an alternative to vacuum metallization, Fluorital is introducing a simple, low temperature spray metallization process that can be run on most standard decoration lines.

Fluorital supplies top quality products to colour your imagination.

Fonderie Bartalesi was founded in 1962 and is one of the main manufacturers of bronze alloys for moulds for the production of glass bottles and jars.

The company concentrates on research and development in order to offer the highest quality products on the worldwide market and has ISO 9001 certificate.

Fonderie Bartalesi can offer its customers:

- more than 30 years' experience in the glass market;
- new plants and machines to improve production and decrease delivery times;
- more than five cast tons per day of bronze alloys for the glass industry;
- specialized production of bronze neck rings with Ni-insert;
- three induction furnaces;
- seven different types of bronze alloys for the glass industry;
- catalogues of standard models of bottom plates, baffles and neck rings;
- dimensional tests, chemical analysis, hardness tests and metallographies;
- new machine and high tech programme to produce new toolings, in order to improve casting precision and to decrease delivery times;
- very fast deliveries of 7/10 days from order date to all European countries;
- special bronze alloy studied and tested for mould production, with very good thermal conductivity, hardness, mould cleaning, easy weldability.

Recent developments

- The production of cast iron, which will complement that of bronze to respond completely to client requests. This cast iron will be used in the production of moulds, bottom plates, baffles, neck rings and accessories for the hollow glass industry.

- New automatic green sand facility.
- Investments in research and development of new alloys for mould production.
- New alloy B02 S1, the best for bronze moulds.
- Fonderie Bartalesi has also installed an electric furnace for thermal treatment testing on bronze moulds.

More than 55 years of activity!

Since 1961, Fonderie Valdelsane has always been increasing its specialization in research, production and services for the worldwide hollow glass sector.

Our experience has led us to constantly improve the ability to understand the needs and demands of the market. The company was a pioneer in the development of innovative materials for glass industries, our material has become a real reference - such as **K250** - for mould production all over the world, and Fonderie Valdelsane is still holding its leadership position through continuous investments in research, human resources and technologies.

However, the progress of the company does not regard only the quality of cast irons and copper alloys, but also the services reserved to our clients, **entirely customized** as per their individual needs.

WHAT WE OFFER:

- 100% made in Italy;
- Catalogue of standard material including **18 types of cast irons** and 5 types of specific copper alloys for glassmaking moulds, neckrings and accessories;
- Continuous research in our materials for even better performances;
- Full availability to develop new chemical composition, upon clients' request;
- ISO 9001, ISO 14001 and EMAS certifications for the whole supply chain, including production, service and respect for the environment;
- Competitive prices;
- **Fast delivery:** up to 5 working days from order;
- Shipment to final destination, thanks to our fleet of 5 trucks and strong partnerships with reliable couriers, for out-of-EU deliveries;
- Highest quality of cast irons and copper alloys in the international market;
- In-house laboratory, always available for pre- and post-sale services;
- Daily production capacity: **more than 60 tons** for cast iron and 4 tons for copper alloy;
- Internal modelling department, equipped with CAD/CAM programs and CNC machines;
- Every single item is accurately checked at various control points, from raw material selection up to packaging. No one of our products leaves the warehouse if not fully complies with the dimensional and chemical requirements;
- Enthusiastic and proactive approach facing any new challenge.

Fonderie Valdelsane.

Forma Glas machines + engineering

Forma Glas is an innovative manufacturer of glass production machines for stemware, tumblers and press articles from Austria. With more than 120 years of experience, we build individual machines and complete production plants.

Production lines for:

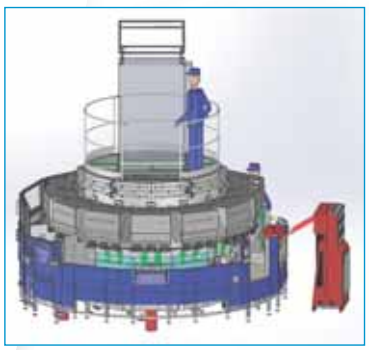

- Stemware production
- Tumbler production
- Vases and bowls
- Press glass lines
- Ophthalmic lenses
- Car headlights
- Thermos flasks
- Laboratory glass articles
- Lamp bulbs

Glass processing machines:

- Blowing machines IBS with from 8 up to 32 stations for the production of stemware bowls,
  – tumblers, laboratory articles, lamp bulbs, thermos flasks, vases and bolws etc.
  – up to 60pc./min.
- Presses type RPH with from 8 up to 20 stations, hydraulic or servo, for the production of stems for stemware (with bottom), ophthalmic lenses and smaller pressed glass articles.
- Double station presses up to 14 double stations (RPH 14/2)
- Presses type RPH, hydraulic or servo, with from 6 up to 16 stations for the production of
  – pressed table glassware.
- Presses for the production of technical glass (car headlights)

Cold processing machines

- Automatic cracking-off, grinding and polishing machine type ASA with 13, 26 or 39 stations for the finishing in standard cut-off process or laser cutting.
- Washing and drying belt
- Fire polishing machine
- Tableware inspection machine
- Container glass inspection machine

Fusiontec is a new company founded mainly to integrate the activities of Revimac in the field of forehearth system supply.

With more than 100 working ends and forehearths supplied and installed around the world, Revimac management decided to have **100 per cent control over the glass conditioning process** adding the internal production of refractory materials to its established combustion and control system based on proprietary design.

To avoid confusion regarding "a new company in the market ", Fusiontec decided to acquire the **solid know-how of Tarkus Refractories srl**, thus ensuring a smooth start based on **a wealth of experience** in the production of refractory materials.

Being a newcomer, Fusiontec is treasuring on Tarkus' technology on one side, **introducing, however, a fresh approach** to the conventional method of manufacturing the refractories deriving from the long experience of its mother company (Revimac) in the field of mechatronic engineering.

Professionalism and expertise, combined with a new approach to the manufacturing of refractory materials for the conditioning of glass, are the foundations of Fusiontec, which is focused on two relevant guidelines:

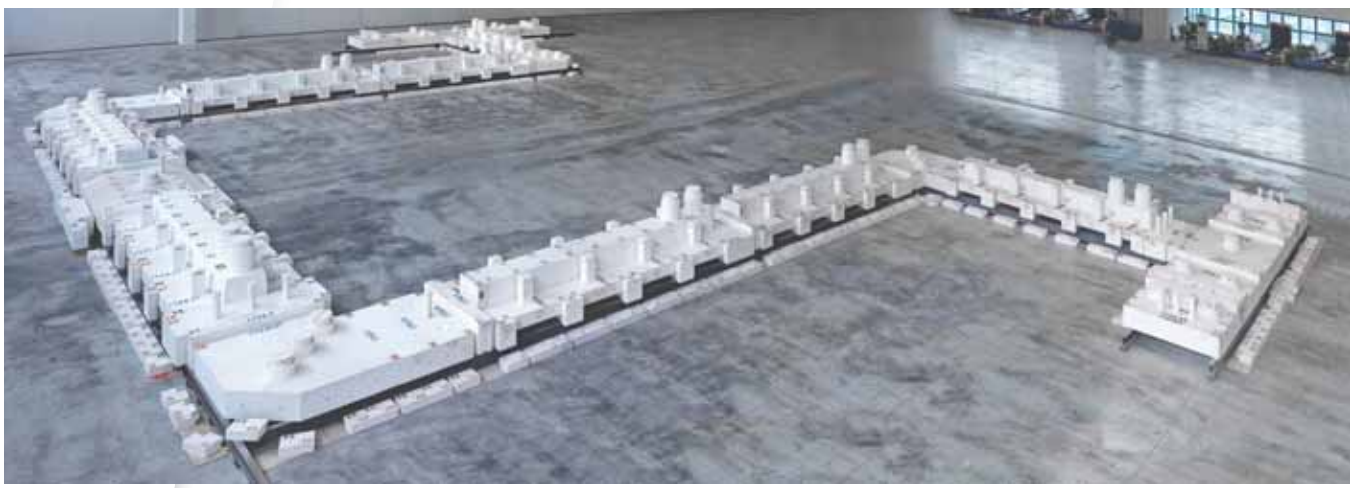

- quality as a rule.
- R&D as a mission.

Range of products

- ELECTRONIC CONTROL AND INFORMATION SYSTEMS

For more than four decades now, the South German firm **futronic** has been developing innovative and reliable controls and drives for container glass machines and equipment.

FMT24S – Everything Under Control

The FMT24S (Flexiblse Modular Timing System) is a distributed control system for IS machines with anything up to 24 sections. Thanks to its modern, low-maintenance bus technology, the system is fully scalable. Maximum flexibility – essential for efficient production – and maximum investment security are therefore guaranteed. The FMT24S integrates easily into a manufacturer's existing IT and data structures.

FDU24S – Synchronous Precision

futronic's FDU24S (Flexible Drive Unit) is a drive system that provides flexibility and maximum precision whenever individual motion sequences have to be synchronised in the machines. Thanks to the FDU24S, all servo mechanisms in the feeder, shear or gob distributor can be parametrised and monitored using a single, central control. The FDU24S is compatible not only with older futronic products like the CIMOG and EPRO IS machine control systems but also with third-party controls. Compared to conventional drive and control systems, this drive unit has much better usability and superior error diagnostics. The FDU24S has a modular design and can also be supplied as a standalone solution. Existing machines can be retrofitted without any problems.

EPRO Upgrade Kit

The EPRO (Economic Production) is one of futronic's most successful machine controls. More than 300 EPRO controlled systems are still productive today worldwide. In the meantime, however, the EPRO is getting on in years. The EPRO Upgrade Kit is a bridging technology developed by futronic which brings the control back up to date on the basis of the FMT24S in return for an altogether manageable investment. An EPRO retrofit involves replacing the old central processor rack with the so-called FMT24S machine processor (FMT24S-MPR) plus a new board specially developed for this purpose. The EPRO Interface Board (EIB) bridges the gap between the internal control algorithm of the EPRO components and the FMT system. The upgraded EPRO provides many new features and more components from the FMT range can be integrated if necessary.

Controls and Drives for Rotary Blowing Machines

The futronic portfolio also includes automation solutions for the tableware segment. The goals: more reliable production processes, higher product quality and improved productivity. The FBC (Futronic Blow machine Control system) is a motion control system which combines the control and the synchronous drive for rotary blowing machines with up to 32 moulding sections. This novel automation concept covers the complete requirements profile from the feeder through the glass moulding equipment to the conveyor for the finished product. The FPC (Futronic Press machine Control system) is a modular control and drive system for use on rotating press machines with up to 20 sections or 32 double gobs. The FPC control system combines the machine control and the synchronous drive. The technology for these control systems is based on the Siemens SIMOTION platform. The resulting control and drive are not only suited for latest-generation machines but also for retrofitting older lines.

Glass Service provides the highest standards of technology applied to the hollow glass industry. The Italian company designs, produces and maintains a wide and complete range of equipment.

GLASS MELTING TECHNOLOGY DIVISION

- automatic and semi-automatic batch plants and cullet recycling plants
- day tanks and pot furnaces
- recuperative and regenerative continuous melting furnaces
- boosting systems
- forehearths
- colouring forehearths with frit dosing systems
- batch chargers
- heat recuperators for day tanks and continuous furnaces
- automatic control level machines with platinum probe or radar model
- stirrers and stirring machines
- control boards
- combustion systems for any kind of fuel
- burners for any kind of fuel
- special machinery for the glass industry

Moreover, the company provides complete assistance service for customers, assembling and maintaining all the supplied plants. Start-up and training are also provided.

ROBOTICS DIVISION

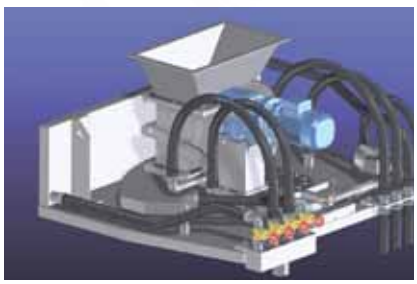

Glass service is, today, a leader in the field of robotics for the glass industry.

Continously. Worldwide. Around the clock.

Our Service:
- assembly and installation (mechanical and electrical)
- start-up support
- troubleshooting
- life time extension with long term maintenance contracts
- guaranteed prompt supply of spare parts & minimized downtime
- certified audits

We provide **IS Machines** in the best quality and with long lifetime for up to 20 years and more.

Together with our sophisticated components, we are able to give our **customers advantages** for their production:
- over 90% PTM from the first start up of a machine
- optimal production rates
- servo technology only where it is useful
- customized designs for your individual and specific requirements

Our Portfolio:
- new machines
- machine rebuild and conversion
- modernization
- focus on safety and ergonomics
- inspection and exchange of old technology
- customized designs

Range of products

- IS MACHINES
- ALL COMPONENTS FROM THE FEEDER TO THE CONVEYOR
- COMPONENTS WITH SERVO UNITS
- SERVICE 24/7; REPAIRS AND MAINTENANCE CONTRACTS
- OPERATION AND PRODUCTION TRAININGS
- WIDE RANGE OF SPARE PARTS AND EXTENSIVE CATALOGUE

- AUTOSWAB

Graphoidal Developments Ltd. is a specialist lubrication and engineering company, supplying systems to the glass container and tableware industries.

The company's expertise is in precise pumping, control of mixing, dosing and spraying of lubricants and coatings which are a vital part of the glass production process, both in hot- and cold-end areas.

Products include:
- Cold-end coating twin- and single-axis systems;
- Modular shear spray systems;
- Shear spray bars;
- Single feeder shear sprays;
- Cold-end dosing units;
- Hot-end row monitors;
- Multi-zone lubrication systems.

We are Glass People – Combining passion and experience

Heye International, based in Obernkirchen, Germany, is one of the foremost suppliers of production technology, high performance equipment and know-how for the container glass industry worldwide. Our mechanical engineering has been setting the standard in the industry for more than 50 years. The industry expertise, attitude and enthusiasm of the employees of Heye International form the motto "We are Glass People". The three sub-brands HiPERFORM, HiSHIELD and HiTRUST form the portfolio of Heye International.

HORN Glass Industries AG, a German glass melting technology specialist, designs and supplies complete plants and solutions to the worldwide glass industry. With its international subsidiary companies in the Czech Republic, India, Malaysia and China, HORN fulfils the glass industry requirements for rapid, local service.

With more than 130 years experience in glass melting, HORN has extensive experience in the design, manufacture and supply of different furnace types and forehearths for the production of lighting ware, tableware, containers, cast glass, float glass, solar glass and technical glassware.

The range of products includes utility equipment such as combustion systems, electric control equipment as well as modern process controlling with SCADA systems, operating at the highest standard, to name but a few.

Moreover, the HORN service team covers the diverse requirements of the glass industry. These experts are available to install and commission all melting tanks worldwide. The service staff is able to react quickly in order to provide assistance in the case of problems during glass production.

The fact that more than 20,000 tonnes of glass per day are produced with furnaces made by HORN shows the professional and reliable performance of the market leader in glass melting furnaces. Customers appreciate HORN Glass Industries AG because of its unique properties:

- **Technology and systems solution partner**
- **Flexibility and customer orientation**
- **High vertical integration of manufacturing**

With a workforce of 40 engineers in Research and Development, IRIS is recognized as a leading and innovative supplier of glass container camera inspection. IRIS has recently widened its range of products with the new machines Evolution Dim and Evolution Ultimate. Evolution Dim is designed for sidewall and finish profile measurement. This in-line machine measures diameter and roundness, verticality, article height, finish and external profile and its diameter with high precision. Evolution Ultimate inspects high quality perfume articles, tableware or cosmetic wares to detect low contrasted aspect defects. Using the new generation of machines, IRIS is aiming to increase the productivity of inspection machine users.

Inventor of the 16 cameras concept

The success of IRIS' EVOLUTION 16 is based on both the advantage of a multi camera system providing 360° inspection of bottles and jars of any shape and colour, as well as on the simplicity of operations of a fully automatic camera machine with a user friendly Man-Machine interface.

Easy upgrade

The name EVOLUTION chosen for the range of equipment illustrates the possibility given to the end user of the machine to easily upgrade it with the latest algorithms developed by IRIS engineers.

Glassmakers using IRIS machines can rely on the latest software version for their EVOLUTION machines at any time. All the new improvements for Evolution machines are retrofitable: software and hardware upgrades can be implemented on all existing machines.

A full range of inspection machines

EVOLUTION 1 is a stand-alone finish inspector enabling to detect faults such as LOF (Line Over Finish), blisters, stones, scaly finish, unfilled finish, overpressed and wire edge. Finish inspection is available as a stand-alone machine, but also as an option of EVOLUTION 5, a machine designed for base, as well as base stress inspection and mould number reading. EVOLUTION 12 includes 12 cameras for sidewall inspection and can be extended to EVOLUTION 16 by adding 4 additional cameras for stress detection. EVOLUTION machines have already proven their enhanced capabilities on product as various as penicillin and pharmaceutical containers, Nutella jars, wine, beer, champagne and spirit bottles. Now with Evolution Dim and Evolution Ultimate IRIS proves its capabilities by inspecting cosmetics, perfume and high quality tableware too.

An international SERVICE TEAM

A reactive service team multilingual engineers (French, English, German, Spanish, Russian, Italian, Chinese, Portuguese, Thai,...) ensures not only installation and training but also servicing of the EVOLUTION equipment during the entire life cycle of the machines.

Lizmontagens Thermal Technologies Group (LTT) is the global leader in glass furnace construction and one of the world's leading references in heat containment for the industry. The creation of the LTT Group was the strategic leap to reinforce the overall management of the worldwide subsidiaries, formerly under the administration of the Portuguese company Lizmontagens. Headquartered in Lisbon, PORTUGAL, Lizmontagens parent company was established in 1978. After the consolidation of leadership in the Portuguese market, the company initiated the implementation of a strong internationalization strategy at the turn of the millennium, through direct investments in Europe, particularly in France, expanding their activity in the following years through acquisitions and holdings in the South America, Africa, Southeast Asia and Japan.

EXPERTISE

LTT Group focuses his activities on the following areas:

- Construction and maintenance of industrial furnaces;
- Design, construction and maintenance of industrialchimneys;
- Supplying industrial materials for the thermal industry;
- Technical services for industry, associated with the assembly and maintenance of refractory linings.

INDUSTRIAL EXPERIENCE

- Glass Industry;
- Iron and Steel Industry;
- Cement and Lime Industry;
- Chemical and Petrochemical Industry;
- Power Generation Industry;
- Environmental Industry;
- Ceramic Industry;
- Chimney Design, Construction and Repair;
- Non Ferrous industries

SCOPE

- Demolition and waste management;
- Steel structure fabrication and installation;
- Controlled furnace cool down;
- Special services (hot drilling and electrode insertion);
- Refractory materials management and procurement;
- Total refractory installation;
- Furnace construction and repair;
- Industrial chimneys construction and maintenance;
- Cold and hot repairs;
- Light-up control;
- Hot sealing and insulation;
- Procurement and sale of thermal products.

SERVICE AND MAINTENANCE CONTRACTS

We offer a comprehensive maintenance contract covering all industrial heating installations for the medium and long term. We manage the allocation of necessary resources from our highly qualified and accredited technical staff. Our teams of professional technicians are available to anticipate future problems and plan installation maintenance programs.

LTT Group offers the following services:

- Situation analysis;
- Technical analysis of repairs;
- Execution of repairs;
- Provision of material and tools;
- Spare parts and materials;
- Drying;
- Treatment of waste products.

Düsseldorf, Germany
23/26 October 2018

Merkad Makina Kalip San. Ve Tic. Ltd. Sti. is a professional Glass Moulds supplier located in Istanbul, Turkey since 1986. Being a pioneer in the glassware moulds industry, Merkad supplies a wide variety of **Glassware Moulds** and machine spare parts to well-known glassware manufacturers and machine producers of the worldwide glass industry, exporting to the three continents of America, Europe, and Asia.

Merkad manufactures glass moulds associated with **Manual Press, Automatic Press, Press & Blow, Blow & Blow, Stemware** and **Spinning production**.

Merkad's manufacturing facility offers "state-of-the-art" Four-Axes CNC Milling, CNC High Speed Machining Centers, CNC Lathe and Electro erosion machines. Merkad's process expertise starts with highly trained personnel utilizing a CAD/ CAM system that interacts over the worldwide web with individual customers.

INNOVATIONS

Merkad Makina Kalip San. Ve Tic. Ltd. Sti. has innnovated its machine lines with CNC High-Speed machining centres and as a part of its machine innovation process. In addition, Merkad will continue its investment in high technology CNC machining centres and the latest mould manufacturing equipment. These machine and advanced manufacturing technology investments will allow Merkad to serve its clients with lower production costs, on-time delivery and very high quality.

Merkad's process for engraved moulds begins with a 2-D technical drawing. The customer confirms the amount of engraving and positioning of the engraving on the mould. Conversion is then made from a 2-D image into a 3-D relief using CAD-CAM design software. Once the relief has been constructed, a computer simulates various scenarios to test the overall design and production feasibility of the mould. Upon customer acceptance of the design details, Merkad then submits the graphical data and image (supplied by DXF or IGES data translators) to the customer for final approval. Any additional design enhancements or modifications can be made quickly and simply to minimize time and cost. Customer interaction is through Merkad's website and includes a wide range of functions that allow clients to view and evaluate their designs as 3-D-Vrml objects. After final customer design approval, Merkad produces a set of trial moulds for evaluation "under glass", thus assuring customer satisfaction.

HVOF

NEW! Now Merkad is using the "HVOF (High Velocity Oxy-Fuel) Thermal Spray Coating System" to coat PLUNGERS with "High Nickel based material powders", in order to offer the best coated Plungers for its customers to have high quality Plungers and reduce their "Plunger costs" accordingly with benefits such as: Less porosity (No coating cracks), Improved wear resistance, Improved corrosion barier, Smoother Plunger surface. Accordingly, 3-4 times longer life time compared to other type of Plungers used in production with "Increased "production efficiency" and Increased "Inner glass surface quality".

PTA WELDING ON GLASSWARE MOULD EQUIPMENT

Plasma Transferred Arc Process is used to fuse a metallic coating to a substrate in order to improve its resistance against wear and/or corrosion. During the process, metal powder is fed into a molten weld puddle (fusion bath) generated by a plasma arc at high temperature.

Generally, PTA welding is applied on two-part Press Moulds (Split Moulds) and Stem Moulds at the mould profile edges in order to eliminate wear and increase the mould lifetime.

PTA welding is also applicable to Plungers made of Stainless Steel and different grades of cast iron material as a "band welding and also full covered welding".

For Glass moulds: Mould material (Stainless Steel) coated with high cobalt and nickel based powders. Hardness of the coated areas increased up to 38- 42 Hrc, where the base mould material hardness is 32-34 Hrc.

Range of products

- **GLASSWARE MOULDS FOR: AUTOMATIC PRESS, PRESS & BLOW, BLOW & BLOW, STEMWARE, STRETCHING, SPINNING MACHINES.**

COMPANY FOUNDED
1980

Messersì Packaging is a design, production and service platform processing customized solutions. An integrated production system - strapping bands, machines and packaging lines - that has changed the industrial packaging design philosophy and the technological, operating and logistic organization of the production plants. Trust and experience, competence and reliability, quality and innovation of processes and products, make this company a reference point for big manufacturers and the most important industrial groups in the world.

Messersi Packaging, one of the most important brand of Made in Italy related to packaging and industrial automation, operates in more than 60 countries, with an export share of over 70%, sales and after-sales services in all continents.

Horizontal strapping machine OR60

This machine can be easily connected to fully automatic lines and can operate without the help of the operator. The hold down device allows to compact packages on 4 sides before strapping, ensuring greater stability to the load during transport.

Vertical strapping machine PR90

The automatic strapping machine PR90 is suitable for the vertical compression of palletized loads.

It can have one or two strapping heads, one of which movable and completely automatic.

Squaring device

The squaring device allows to precisely squarer the palletized load before being packaged.

Combined hooding machine SH51

The machine combines and synchronizes three different and independent phases: preparation of the tubular film, hooding and heat shrinking, merging them together in a single process minimizing the downtime of various devices, providing exceptional levels of productivity (up to 140 packages per hour). The system for gripping and handling the tubular film is independent from the heat shrinking system ensuring maximum reliability in terms of wear resistance of the components and wires.

Top Pal protection

It is an automatic system applying a heat shrinking film sheet on the top of the palletized load to protect the part most exposed to damages during storage, stacking and transport.

Minerali Industriali Srl is an independent Italian mid-sized mining company that produces raw materials for the glass and ceramic sectors.

Minerali Industriali's global presence counts 14 production units in Italy, 4 in Europe, 3 in North Africa, 6 in Central and South America and 1 in Asia.

Currently, the following 10 companies that produce raw materials for the glass industries are:

- MAFFEI SARDA SILICATI S.p.A. (Italy) feldspatic sands for container glass (flint);
- MINERALI INDUSTRIALI S.r.l. (Italy) silica sands for containers, tableware, technical and float glass;
- SASIL S.r.l. (Italy) low iron quartz, silica and feldspatic sand, feldspar, cullet (glass sand) for containers, tableware, technical and float glass;
- MINERALI INDUSTRIALI TUNISIA SA (Tunisia) sand for float glass and container glass (flint);
- SUEZ COMPANY FOR MINERALS SA (Egypt) - micronized quarts for fiber glass;
- LOCHALINE QUARTZ SAND Ltd. (Scotland) - sand for float, solar, containers, tableware and technical glass;
- COLOMBIA MINERALES INDUSTRIALES SA (Colombia) sand for float and containers glass; tableware and technical glass;
- CZECH SILICAT Sro (Czech Republic) feldspar for float, containers, tableware and technical glass;
- GRUPPO MINERALI DO BRASIL Ltda (Brazil) feldspar for float, containers, tableware and technical glass;
- MEXICAN SILICATES Sa de CV (Mexico) feldspar for float, containers, tableware and technical glass.

Minerali Industriali products are able to satisfy all the most demanding sectors of flint glass: food and perfumery containers, articles for tableware and lighting, artistic, architectural glass, automotive glass, technical and solar glass. The chemical characteristics of some of the raw materials produced by Minerali Industriali companies can be seen in this table. Constant product quality is assured by a strict process control system and by systematic chemical and granulometric analysis.

Minerali Industriali staff is able to give all necessary information about the company's products and provide technical assistance. They can also advise clients on the most affordable solutions.

- CAMERA VISION SYSTEMS

Moderne Mecanique, a company of OCMI Group, is a worldwide leading manufacturer of ampoule forming machines and ampoule/vial after-forming lines.

The present production range includes:

- **MM30 Ampoule Forming Machines:** The most popular ampoule forming machine with more than 1.100 installations worldwide. Its sturdy construction assures the longest working life. This machine can be equipped with automatic tube loader Roboglass for continuous tube loading without operator support.

  The machine can be integrated with:

  - **Optistem/2**, an automatic stem vision device checking the forming operation by self-adjusting the oxygen flow in the last two heating burners before forming section.

    The new OPTISTEM/2 system will provide full dimensional control IN REAL TIME of the ampoules in order to realize 100% quality control during forming process.
- **LA502 Ampoule Afterforming Lines**, which handle all glass container finishing operations, such as electro-mechanical dimensional control, colour rings for ampoule breaking or identification, printing and predrying, annealing, sorting and packing.

  These lines can be integrated with:

  - New **Gas Powered Hood**, which can replace the standard electric one in the annealing lehr.
  - **OPTICUT/2**, an electronic device to apply the easiest and safest way of opening ampoules, using a predetermined breaking point;
  - **Closing device** for the production of ISO form "D" ampoules;
  - Extra **colour rings** devices.

- **LF520 and LF535 Vial Afterforming Finishing Lines** are able to perform important operations such as electro-mechanical dimensional control, printing and predrying, annealing, sorting and packing.

  The lines are produced using the well renowned technology of the Ampoule Afterforming Lines type LA and are able to match the high speed vial machines produced by OCMI-OTG S.p.A. such as **FLA20E, FLA20/S** and **FLA35**.

MSK Covertech Group - Your Cold End partner

More than 40 years of experience at the **cold end** have made **MSK** one of the leading equipment suppliers from lehrs to warehouses with **different levels of automation**. Customers appreciate MSK engineering, software and automation competence, as well as the unique and innovative MSK systems.

The modular construction of **MSK bottle conveying technology** guarantees a high degree of flexibility, the best possible layer pre-forming and fully automatic flow of bottle transport.

MSK's palletizing systems offer solutions whatever performance and flexibility is required. **MSK robots and palletizers** can handle bulk and cases. Thanks to **patented innovations**, down times for job changes are minimized.

MSK shrink-wrapping solutions rank among the most sold machines in the glass industry: user-friendliness, availability and safety are the distinguishing MSK characteristics, as well as efficiency and profitability. More than 500 reference projects or proven efficiencies of more than 99.5% underline MSK's leading position in the industry.

MSK EMSY visualization system controls the complete cold end. The processes in sophisticated bottle conveying, palletizing and packaging systems are becoming more complex. Increasing demands are placed on machines and systems with respect to their functions. As developments and enhancements have been carried out 100% in-house, MSK adapts the system to individual needs and is independent from third parties for adaptation. With the new and easy to handle operating software MSK EMSY 5.4 the MSK cold end will run almost on its own!

With subsidiaries and representations, MSK is located close to its customers, also with fast and economic help thanks to its 24-hour emergency and online service.

Moderne Mecanique S.a.s.

TUBULAR GLASS CONTAINER FORMING MACHINES FOR PHARMACEUTICAL AND COSMETIC USE:

- **FA 36S** ampoule forming machine. This 36-station machine is equipped with a special section to shape the first bottom of the glass tube in order to produce an additional ampoule for each glass tube. It can be integrated with optional equipment such as **ROBOGLASS** automatic loader and **OPTISTEM/2** camera control system.
- **FLA 20E, FLA 20/S** and **FLA 35** vial making machines. All models are able to produce all main types of vial necks, such as Penicillin, Blow-Back, Screw Neck. The continuous motion system and the mechanical structure allow performance speeds impossible to achieve with other index systems.
- **FLA 20-DROPPER** is a 20-station continuous rotary machine able to produce all types of glass droppers thanks to the special adaptation of tip forming and bending section of the FLA20 vial machine. Suitable for the installation of camera control systems such as OPTIVIAL.
- **FLA 20E-CAR** is a 20-station continuous rotary machine able to produce all types of dental cartridges thanks to a crack-off station for bottom cutting. Suitable for the installation of camera control systems such as OPTIVIAL.
- **PM-A** automatic ampoules / vials packing machine ready to be connected with after-forming lines made by Moderne Mecanique or by different suppliers. The vacuum picking device enables perfect gripping of the containers. The operator can be sure to insert the same number of ampoules / vials in each box without missing products.
  Furthermore, the problem of friction between containers during traditional manual packing is solved.
  The number of ampoules per box, the number of ampoule rows per box and the number of ampoules per each row can be set by means of a user-friendly touch screen.

AUTOMATIC MACHINES FOR STEMWARE PRODUCTION:

- The **SA42, SA48** and the **SA60** sealing machines for stemware are the answer to every market-oriented tableware factory. They allow to match the highest efficiency and production speed with a flexibility never before achieved by alternative systems. Equipped with a complete range of intelligent control systems able to control and maintain the final quality of products. SA sealing machines are equipped with loaders for bowls and stems and unloaders for finished products according to **OCMI** drawings. OCMI's sealing machines include a section for stem stretching if required, as per the type of article to be produced.
- The **ST42, ST48** and **ST60** are the new line of continuous rotary machines with 42, 48 and 60 spindles for the processing of one-piece stemware. These machines can be integrated with an electronic control system, able to manage production changeover parameters and control and adjust the distance between the grippers, thus ensuring maximum stretching quality.
- All OCMI stemware machines can be equipped with Vision Systems that allow 100% consistent control of chucks adjustment and surface defectiveness.

Technology, passion and tradition. A union that makes each mould the best solution.

Officine S.L. has been designing and manufacturing moulds for all glass machines since 1948.

The company is specialized in the manufacture of:

- moulds for blown glass production with IS machines, O90 and H28 machines, B&B and semi-automatic machines of bottles, jars, still blown glasses, stemware, tumblers etc.;
- moulds for pressed glass production of glasses, tableware, vases, goblets, stems, neck rings etc.;
- moulds for the technical glassware production of glass bricks, power insulators, lighting, lenses, borosilicate pots, washing machine windows;
- moulds for spinning machines (to produce dishes, cups, under plates, centrepieces).

Officine S.L. pays particular attention to the choice of selected materials: cast iron or steel, bronze, stainless steel also with high content of NiCr and powders for the metallization of mould parts.

Company mission is to guarantee to customers high quality standard of the products and services offered. We always make our experience available to our customers in order to provide cooperation, to be able to face any production requirements and to find the best solution with commitment, efficiency and professionalism.

PDF

A Quality Management System complying with the **UNI EN ISO 9001** norm was established in **1996** to better organize and systemize all the company's activities. The goal is to strongly and uniformly orient the company to its customers and to their profitability.

The high professionalism of our team enables us to assist our customers at all stages, from mould design right up to end products.

ANNUAL PRODUCTION VALUE

EUR 25 million

PLANNED EXHIBITIONS

Olivotto Glass Technologies S.p.A. (OGT) takes part in the major exhibitions and events planned during the year.

OLIVOTTO (Italy) has been working in the hollow glass sector since 1946, when it began supplying its first rotary-type glass blowing machine for hollow glass.

Research, innovation, on-going technological development have enabled the company to become a leading brand worldwide, supplying either machinery and equipment for glass industry or turnkey systems and services made to measure for any production need.

In August 2003, **Olivotto Glass Technologies S.p.A. (OGT)** acquired company ANTAS (Italy), a company with long-standing traditions and experience in the supply of press and spinning for any kind of glass.

In June 2007, OGT then went on to acquire the assets of **Lynch Systems (USA)**, a corporation that traces its roots back to 1914, the oldest hollow glass forming machinery manufacturer in the world. Moreover, in April 2008, OGT acquired the assets of **W. Lindner Maschinen (Germany)**.

As a result, **OLIVOTTO, ANTAS, LYNCH** and **LINDNER** – leaders in their respective market sectors – have strengthened and combined their capabilities to become the benchmark in the international scenario of hollow glass manufacturing plants, systems and machines.

At present, OGT is the leader in the engineering, production, installation and commissioning of hollow glass forming plants, systems and machines and is an all-round technological partner, that can address, highly effectively, any problem connected with the production of a variety of glass articles: stemware, tumblers, dishes, bowls, lamps and bulbs, glass tubes, glass bricks, etc.

OGT can also supply complete plants for the production of Glass Wool and Rock Wool, customized accord to customers' needs.

We ensure the perfect matching of all forming machines, combined with complete

assistance and services at each project stage, until the manufacturing process is on stream. As a function of the complex requirements of a vast, heterogeneous market, OGT has a philosophy that enables it to offer its customers technological solutions designed and implemented so as to achieve synergetic effects with their production strategies.

Technologies, products and services coming from the best know-how of **OLIVOTTO, ANTAS, LYNCH** and **LINDNER**.

Furthermore, OGT can supply a complete cold-end Automatic Packaging Line, which is a fully automatic line for Stemware and Tumbler packaging for a wide range of glassware. The OGT Automatic packaging line can be designed according to customers' existing layout, with different configurations and options for any automatic packaging needs and requests.

Machine, complete lines and turnkey plants of the production line:

- Stemware (all process)
- Tableware
- Ovenware
- Jars
- Large containers
- Lamps
- Lighting ware
- Lenses and reflectors
- Glass insulators
- Glass tubes
- Laboratory articles
- Glass bricks
- Glass wool and rock wool
- Stemware and tumbler automatic packaging

Range of products

• WELDING/SEALING MACHINES • MULTIFUNCTION MACHINES FOR STEMWARE PRODUCTION • FEEDERS • BLOWING LINES • TUBING LINES • PRESS AND BLOW MACHINES • PRESSES • FIRE POLISHING MACHINES • SPINNING MACHINES • GLASS WOOL LINES • STRETCHING MACHINES • BURN-OFF MACHINES • AUTOMATIC PACKAGING LINE

Pennine Industrial is one of the world's leading manufacturers of Silent Inverted Tooth Conveyor Chain and Sprockets that are used in the transportation and handling of hollow glass, container glass, tableware and stemware. Our conveyor chains are also used to transport larger items such as glass bricks and automotive glass light covers.

The company was founded in 1967 and has been involved in the conveying of hot glassware for over 30 years. Pennine now employs over 70 people at its two manufacturing plants in the UK and has agents and partners working in 30 countries throughout the world. Chain manufactured by Pennine in the UK is now used in glass plants in 60 countries.

Over the last 10 years, Pennine has continued to develop its range of Pennine Conveyor Chains, not only offering the standard All Link and Link and Spacer Chains, but now becoming the market leader in Double Assembly, and Special Assembly Conveyor chains that improve under belt cooling and increase container stability.

Customers can also maximize the life of their Conveyor Chains by using one of the 12 standard Head Protector Links that can be fitted onto all chains and used without sprocket modification. As the original designer of the Head Protector Link, Pennine can advise customers on the best type of Protector Link to meet customers' individual requirements.

Range of products

- MOULDS & ACCESSORIES

M **Modern technology** - More than 50 completely automatic CNC machines including 4 plasma welding robots. The main requirements for all the machines in our production line are precision, reliability, safety and versatility.

O **Organization - Giancarlo Perego** has completely restructured its organization, from senior management to the delivery department. Every single piece is checked during the working stage.

U **UNI EN ISO 9001/2008 certification** - obtained in July 1995 and renewed in 2013. The company has, so far, passed all the inspections carried out by the DNV certification body. This quality certification has clearly enabled us to improve our products by rationalizing production procedures.

L **Layout design** - Our technical department is equipped with ultra-modern software (CAD-CAM) and can provide technical support for mould designing. Our staff regularly attend training courses on the various technologies used by glassworks today.

D **Delivery** - Thanks to our new technological potential and to the reorganization of our production structure, our output has already increased considerably and we can now be more flexible in terms of delivery dates.

S **Service** - Giancarlo Perego Spa's quality, customer and post-sales services are always available at clients' disposal along with the on-line direct technical service available 6 days a week.

Giancarlo Perego Group has been manufacturing moulds for the glass industry since 1964. With more than 50 years of experience, and with continuous huge investments in new machineries and technology, the company is continously consolidating its leading position in the world mould market every day. With its mould shop in Eastern Europe, acquired in 2001 and completely renewed in 2012 Giancarlo Perego group has a total covered area of 12,000 square meters.

All the investments enable the Giancarlo Perego Group to significantly increase the production capacity; with more than 4500 cavities per month the company is able to supply tools all around the word, and has more than 75% of sales in non-European markets. South America, USA, Africa, Middle East and also Asia are now reached by our sales department each day, developing strong business relation with major international partners.

Well aware of the difficulty of communicating the full scope of our activity in a few lines, Giancarlo Perego Group invite you all to visit our plants of Italy and Croatia.

PLANNED EXHIBITIONS

Glassman Europe 2017
Lyon, France - 6/7 September 2017
Gulf Glass
Dubai,UAE - 25/27 September 2017
Glasstec 2018
Düsseldorf, Germany - 23/26 October 2018

Manufacturing more than 45,000 units since 1923, **Pneumofore** has long established its reputation as one of the first and most experienced manufacturers of high capacity rotary vane air compressors and vacuum pumps. Today, industrial plants worldwide benefit from the reliability and durability of Pneumofore systems in a great variety of applications, including the moulding of hollow glass. Vacuum on IS machines improves the forming process, especially for complicate shapes of containers, and is also used on the blank side to increase the production speed and improve quality by reducing settle blow marks. For these reasons, our UV range of vacuum pumps are installed on numerous IS machines in more than 60 countries. Pneumofore systems are ready-to-use with dedicated accessories for every specific glass application and for round-the-clock operations, also under tough climatic circumstances (tropical or polar), using exclusive air cooling to **reduce operational costs**.

Pneumofore simply offers the solution for the **lowest Life Cycle Cost** with **up to five years warranty** on efficiency and functionality of the air end. Three divisions within Pneumofore cover various activity fields: **Compressed Air, Vacuum and Service**.

A400
Air Compressor

UV50 and UV16 Vacuum Pumps

LUBRICATED AIR COMPRESSORS

Rotary Vane air-cooled compressors with power from 5.5 to 500 kW, capacity up to 5,120 m^3/h: each model has three different motor sizes for the pressure ranges from 2.5 to 4, from 4 to 8 and from 8 to 10 bar. Designed to run 24/7.

ROTARY VANE VACUUM PUMPS

Sliding vane, single-stage, oil lubricated, from 250 to 6,480 m^3/h and 0.5 mbar residual pressure. For fast and reliable production of quality hollow glass containers, we have developed the **variable speed** version of our UV Series. This option allows constant adaptation of the electrical motor's rotation speed in rpm in order to keep the same vacuum level all year through, independent from bottles' size, shape or weight.

CUSTOMER SATISFACTION

Pneumofore assists customers at every step: from process specifications throughout layout and definition, installation, commissioning, operation and long-term maintenance needs. Our **engineers and qualified technicians** provide support to all clients in order to ensure the choice of the right product and the best solution. Pneumofore also offers a complete **after-market service** for maintenance, spares delivery, on- or off-site repair and overhaul of the units.

MAIN FEATURES

- Complete turnkey system with cabin, control panel and inlet valve
- Easy to install - compact footprint, no water or foundation required
- Air-cooled through high-efficiency vertical radiator
- Special version for hot climates
- Variable Speed Drive optional
- High energy savings and low cost of maintenance.

Range of products

• AIR COMPRESSORS • VACUUM PUMPS • PNEUMATIC SYSTEM ENGINEERING

Range of products

- TECHNICAL SERVICES FOR GLASS FURNACES

Draining of furnaces

Preriscaldo Forni is a service and design company for glassworks and has been operating in national and overseas markets for the past 40 years.

The company name and the trademark "prefor" clearly indicate the features of the main technical service offered: furnace pre-heating, in particular of glass furnaces.

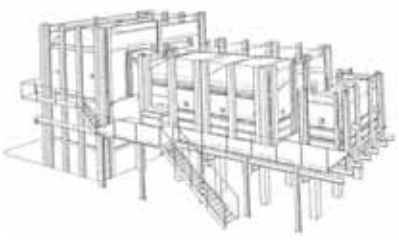

Other integrating services have been added, such as:

- draining of furnaces;
- filling of furnaces with glass granulate;
- drilling of holes for the installation of electrodes, thermocouples and bubblers;
- drilling of holes for electric furnace tapping;
- hot repairs with sealing;
- grenaillage with electrofuse crushed stones;
- thermal cleaning with appropriate burners.

Plant design and installation have also been expanded, now including:

- heating and combustible oil pumping sections;
- electrode-holders with accessories;
- bubbler installations complete with control and adjustment box;
- steel refractory electrode holders with reduced welding.

Ramsey Silent Chain

Since 1923, Ramsey has been the worldwide leader in the manufacture of silent chains (inverted tooth chains) for the Glass Industry. Ramsey offers the world's widest range of top quality products designed for both hot-end and cold-end bottle handling.

New Products:

Ramsey's NEW All-Steel Allguard FX chains are tough enough for the most demanding applications.

Protected against lateral chain and pin head wear by all steel, hardened, alloy side links, the links in this chain will never crack under pressure. So if you have tried other chains and had problems with sintered metal links cracking, those days are over.

Ramsey Today:

- Offers the highest level of quality, excellent customer service, and competitive prices.
- Takes pride in providing conveyor chains that can run at extreme speeds while providing smooth bottle transfer and delivering exceptional chain life.
- Performs extensive research and develops the industry's most innovative products, holding numerous patents in the US and Europe.
- Partners with top glass manufacturers around the world to provide the tools they need.

PLANNED EXHIBITIONS

Glassman Europe 2017
Lyon, France - 6/7 September 2017

Glasstec 2018
Düsseldorf, Germany
23/26 October 2018

Renold Tooth Chain has always worked closely with customers in glass production. Smooth running and consistent speed prevents vibrations in vacuum coating plants and ensures proper coating of solar glass. Constant, uniform transport makes all the difference in the production of hollow glassware.

The use of a 2-pin system makes it possible to reach high speeds while maintaining a long chain service life, while smooth lateral surfaces by innovative laser welding processes offer gap-free transition. The pins are permanently fixed in an outer plate of the same thickness.

Made within one component production run, Renold chains offer perfect pitch precision and consistent wear elongation.

Renold has invented the TRILEG silent tooth chain with a significantly enlarged contact area for extended pitch chains.

Renold stainless steel conveyor chains are the best choice in terms of lifetime, insulation rates and energy cost savings. The lifetime is increased even more by the use of rolling pivot joints made of wear resistant hardened steel and special grade stainless steel link plates. Any conveyor chain layout is possible.

Renold Tooth Chain now benefits from being part of a global chain company, with 120 years of experience in the field of research, development and production of inverted tooth chains. Renold itself has a great reputation for innovation, design and manufacturing skills. Its ranges of industrial chain, gearboxes and couplings are distributed around the world with operations in more than 20 countries and an international network of distribution partners.

COMPANY FOUNDED
1988

REVIMAC belongs to the BOTTERO group of companies.

The company boasts more than 25 years experience with global major glass containers manufacturers by supplying a wide range of machinery and equipment in the hot-end area.

Since the year 2000, REVIMAC has supplied more than 100 **forehearths**.

Numerous improvements have been introduced in terms of design of the refractory superstructure, air-gas mixing unit and control system to optimize glass conditioning.

HOT-END TREATMENT HOOD
HTH MK5 SERIES

REVIMAC is a leading supplier of **"Re-manufactured" IS machines and section boxes**, covering the full range of centre distances, in single-, double- and triple-gob operation in Blow & Blow, Press & Blow and NNPB processes.

In the last 10 years our 6,700 sq.m. assembly shop has been involved in the re-manufacturing of more than 100 IS machines and more than 800 section boxes.

The new type of control of 3- and 5-axes completes the REVIMAC range of **servo-stackers** suitable to run high-speed production lines and to handle unstable glassware.

The control of the RSS-950 5-axes servo stacker features a user-friendly touch screen interface and a self-learning function to minimise operator intervention.

To date Revimac has supplied over 500 stacker units to the glass industry.

3-AXES SERVO STACKER RSS930

Servo motor technology is also applied to the newly designed REVIMAC **arcuate shear mechanism**, which enables to retrofit any type of conventional mechanical feeder mechanisms with servo control.

REVIMAC ware handling solutions include **ware transfers** (up to 700 bpm) and **water cooled cross conveyors** with stand alone control or integrated within the IS machine drive system. Entirely stainless steel fabricated **Hot treatment hood** featuring anticorrosion components and easy maintenance access for the operators complete the range of equipment in the hot area.

Last but not least, REVIMAC **cold-end spray treatment** units with 2- and 3-axes control add the "final touch" to glass containers.

Range of products

- LEHR LOADERS
- WARE TRANSFERS AND TRANSFER DRIVES
- CROSS CONVEYORS
- CONVEYOR DRIVES
- SIX AXIS WARE HANDLING SYSTEM

Sheppee International Limited is a world leader in Hot Glass Ware Handling for both the container and tableware industries, with over 50 years of experience.

Sheppee supplies innovative and dependable solutions in the field of hot container conveying, lehr loading, glass contact materials and synchronous drive systems.

Specific Ware Handling equipment has been developed, including a range of servo driven lehr loaders, suitable for all types of production, and ware transfer units suitable for handling non-round and flask production, the smallest pharmaceutical containers through to the largest champagne bottles and delegated high speed handling packages inclusive of secondary belt systems through the transfer process.

The six-axes ware handling system provides total synchronisation.

Handling and positioning of containers from the sweep out of the forming machine though to the loading of the lehr can be controlled by a single windows based operator interface mounted at the rear of the lehr loader or remotely in an IEC standard control cabinet.

S.I.G.MA. GROUP takes part in the major exhibitions and events planned during the year.

Range of products

- FURNACE REFRACTORIES
- WORKING ENDS AND FOREHEARTHS
- FEEDER EXPENDABLES

S.I.G.MA. GROUP has been specialized in the production of refractory materials for the glass industry since 1990 and, today, operates on five continents, with international sales being more than 85% of its production.

Thanks to its two manufacturing facilities, one in Italy and the other in Bulgaria, coupled with the cooperation of specially selected and reliable partners, S.I.G.MA. GROUP can supply the complete range of materials for glass furnaces: from Fireclay to Sillimanite, Mullite, High alumina, Zircon/mullite, Zircon, Magnesia based materials, Silica and Fused cast.

Thanks to continuous and important investments both in state-of-the-art production equipment and Research & Development, S.I.G.MA. GROUP has engineered over the years unique products, as well as improved already widely used products such as a **specially grooved tube** which grants a better gob homogeneity, **a bonded high alumina for channel blocks** which represents the best alternative to fused cast - alumina for all glass contact applications for operating temperatures up to 1300°C, **a high grade mullite and new structural design for the regenerator chambers** which grants higher resistance to chemical attack, and increased structural stability at high temperatures.

Additionally, considering the growing demand of a faster and easier way of acquiring products, S.I.G.MA. GROUP has recently developed an **e-commerce Refractory Shop** to meet all needs, both programmed and urgent, as well to update its Customers with regards to product availability, special offers and technical innovations.

Range of products

- **REFRACTORY INSTALLATION SERVICES**

SKS provides refractory installation, maintenance and repair services to the glass industry.

SKS has extensive experience of refractory installation in all major sectors of the glass industry, ranging from the provision of supervisors to complete turnkey contracts using SKS specialists and a local workforce. The organization and management of large, complex building sites is an area in which SKS excels.

Over the past 10 years, SKS Group companies have built more than 200 furnaces in 30 countries worldwide.

Difficult hot work on operating furnaces is a particular SKS speciality, with experienced specialist technicians available for work such as hot repairs, drilling, electrode holder exchange and overcoating. An emergency service is also available which includes the supply of refractories for unplanned repair work.

The company is also able to supply and install furnace bracing steelwork.

Another field of activity within the SKS Group is ceramic welding. Fuse Tech International is a joint venture between SKS and the US Company Fuse Tech Inc. Fuse Tech International offers ceramic welding services for hot and cold faces on operating installations, and has already successfully completed many contracts all over the world. The addition of ceramic welding expertise to the SKS Group effectively completes the range of services on offer.

Sorg Keramik Service can be contacted through a wide network of local offices of SKS subsidiaries and strategic partners, as well as SORG representatives.

Range of products

- MELTING FURNACES
- FOREHEARTH TECHNOLOGY
- ENGINEERING
- EQUIPMENT

Companies belonging to the **SORG®** group offer unrivalled service to the glass industry, covering design and engineering, supply of equipment, installation and commissioning, maintenance and service for all areas of the glass manufacturing process, from raw material handling up to the processable glass.

The group has related companies providing a wide range of services for the glass industry, including difficult hot work such as drilling, ceramic welding and overcoating. EME, another subsidiary, designs and manufactures systems and equipment for all aspects of batch and cullet handling.

• Melting furnaces

SORG® has unique experience in the design and engineering of most types of furnaces for continuous or discontinuous glass melting for all types of glass. At any time, more than 250 furnaces designed by SORG® are in operation throughout the world.

• Glass conditioning systems

Distributors and forehearths for pulls from 2 to 200 t/24h, and a broad spectrum of forebays and overflows are available for a variety of applications. The latest standard forehearth design is the 340S+, an update of the successful 340S forehearth system, incorporating the newest Sorg forehearth developments.

• Glass types

SORG® installations are used to manufacture all types of glass, including lead crystal, fluoride opal, flat and float glass, as well as borosilicate glass, such as C glass, E glass, Pyrex® and neutral glass.

• Engineering

SORG® offers an engineering package specifically tailored to customer requirements, and normally including the detailed engineering for refractories, steelwork, heating, control and ancillary systems.

• Equipment

SORG® supplies a comprehensive range of equipment for furnaces, distributors and forehearths. The scope of supply may extend from individual components through to complete turnkey contracts.

• The environment

SORG® can also offer tried and tested solutions to the problem of emissions, especially NOx, ranging from the redesign of existing furnaces to advanced solutions. SORG® has substantial experience in oxy-fuel firing, with installations ranging from 12 to 470 tons per day. SORG®'s newest sustainability initiative is the BATCH3 approach to batch preheating.

Products: Glass tubing converting machines and visual inspection machines for pharmaceutical glass containers.

Range of products

- AMPOULE, VIAL, CARTRIDGE AND SYRINGE FORMING MACHINES
- AFTER-FORMING MACHINES
- NEEDLE ASSEMBLING MACHINES
- VISUAL INSPECTION MACHINES FOR PHARMACEUTICAL CONTAINERS

Spami and **Optrel** are part of the Engineering Systems Division of the Stevanato Group, which is among the leading suppliers of primary glass packaging for the global pharmaceutical industry.

The Engineering Systems Division also includes InnoScan (pharmaceutical inspection machines) and SVM (assembling and packaging machines, serialization solutions) and it is strongly connected to the Pharmaceutical Systems Division, consisting of the companies with the Ompi and Balda brands.

Spami specializes in the design, manufacture, installation and after-sales support of highspeed precision machineries for the production and control of glass containers as well as vision inspection systems.

Spami has the technological leadership in design and production of machineries for glass tubing converting for the production of vials, cartridges, syringes, ampoules and special devices.

A team of more than 100 employees builds complete forming lines based on vertical rotating technology with high capability and precision that includes: integrated fully automatic lines with auto-packaging units; 100% control of dimensional and visual parameters, statistics are collected and made available on line to the operators for appropriate adjustments; needle assembly technology.

Optrel has a long tradition in the inspection machines market for the pharmaceutical industry including parenteral drugs, injectable and solid dosage inspection with automatic and semiautomatic equipment.

With the merge with the Stevanato Group, Optrel has developed, based on the same field proven technology, a range of inspection machines for empty glass containers: ampoules, vials and syringes. The range of defects covered matches the requirement from the PDA glass task force and comprises also metrological controls recorded in a SCADA-like interface for production control. The system is 21CFR11 compliant relating to recipes and batch recording.

The strategic target of the Stevanato Group is to offer a complete range of pharmaceutical containers based on glass tubing. Its global footprint provides not only manufacturing flexibility, but is also an important attribute in Risk Management.

Stewart Engineers values integrity, honesty, openness, personal excellence, continual self-improvement, and mutual respect. Stewart Engineers is committed to its customers and partners and has a passion for technology.

As the pace of change accelerates, innovations are more important than ever, and the company is ready to take on big challenges and to see them through, providing results and striving for the highest quality.

Project Management

At Stewart Engineers, project management, detailed design and engineering are performed by a diverse group of engineers and project professionals.

Experts in scheduling, cost management, work flows, scope, and document control work in concert to make everything run like clockwork.

Multi-Discipline Engineering Services

When it comes to Glass Manufacturing Projects, Stewart Engineers' experienced multi-discipline engineers and scientists are among the many professionals here to serve you. Our fully staffed departments have the very latest in 3D CAD software and hardware to bring your project to life. From beginning to end, we will work closely with you, engineering the success of the project.

Procurement Services

Stewart Engineers offers industry-leading procurement services through our project engineering and management team. We provide these services on all equipment and materials for any Glass Industry project. This greatly enhances speed and efficiency – especially advantageous with bid development, sizing and specification of equipment, and negotiation of final pricing.

Strada is a leading company in the production of moulds for glass containers, which are manufactured using Blow and Blow, Press and Blow and Narrow Neck Press and Blow technology. In addition to moulds, the company's production range includes mould accessories, finishing moulds and neck rings.

The company was founded in 1945 and, since then, has grown steadily, now employing more than 50 people in four departments - the Technical, Quality Control and Commercial Departments, and the Production Workshop.

In the Technical Department, the latest CAD/CAM software is used by skilled technicians to develop moulds for almost any type of glassware that customers may require.

The Production Workshop uses automatic and NC machines at every production stage except for those operations where human ability is still indispensable.

In addition, a production programme follows each item individually from the time the order is placed through to delivery to the customer.

Every stage of production is closely controlled by the Quality Control Department. All raw materials, semi-processed goods and finished products are subjected to rigorous quality control checks so that they conform to the most up-to-date international technical standards.

In 2016, quality was upgraded to the strictest ISO 9001:2008 certification.

The Commercial Department is almost a bridge between customers and the rest of the company, and the Technical Department in particular. It is the experience and expertise of the skilled technicians working there that enable Strada to offer solutions to any kind of technical problem or produce the most intricate moulds.

The company is proud of its ability to offer extensive cooperation to glassworks, to help them solve their daily problems. Why not see if it can help you?

Henry F. Teichmann, Inc. (HFT), founded in 1947, is dedicated to providing engineering services, melting furnaces, turkey plants and annealing lehrs for the glass industry worldwide. During 70 years of service to the glass industry, HFT has carried out projects in more than 40 countries.

Engineering (including 3D design), construction management, commissioning services and annealing lehrs support the following areas of activity:

Turnkey glass plants: for manufacturing high quality float glass, container glass, fiberglass, tableware, sodium silicate, foam glass and other specialty glass.

Batch plants: automatic material processing and weighing for precise batching for the complete range of glass compositions.

Melting furnaces: for melting a wide range of glass products , with end-fire, cross-fire, and oxy-fuel technologies

Plant modernization and rebuilds: the staff of engineers and construction crew of HFT continues to meet the very short turn-around schedules for float, container, fiberglass, tableware, sodium silicate, foam glass and other specialty glass producers around the world. Providing state-of-the-art engineering design and quality installations with excellent safety and environmental performance as well as optimum fuel efficiency is HFT's commitment to customers

Annealing lehrs: the acquisition of EW Bowman broadens HFT's capability to provide clients with world's top quality annealing equipment and services.

Thimon, worldwide leader in overwrapping glass products for more than 40 years, bases its know-how on a continuous innovation policy and a real culture of dialogue with its customers.

Thimon, the only manufacturer to propose an all-comprehensive range of overwrapping technologies, puts its expertise at the service of your hollow glass products, fitted out with systems patented and widely referenced abroad.

Our commitment towards your activities:

- optimal operation rate with machines capable of working non-stop;
- waterproof overwrapping on 5 or 6 sides;
- perfect control of hot-air shrink wrapping in complete safety;
- Optimized load resistance thanks to highly resistant wrapping without folds or holes, from the bottom to the top of the pallet;
- alongside the quality of our machines, we are also responsible for the good conditions ofyour products after being delivered.

As world leader in Production Monitoring solutions, **VERTECH'** helps container glass manufacturers to improve their productivity.

The SIL system offers a clear view of production by supplying information in real time about losses and defects to all actors of a glass plant.

Benefits of the SIL system:

- Saving time by sharing information;
- Improving output by reacting quickly to important events;
- Reducing customer risks thanks to total traceability of production.

The SIL is able to communicate with all types of inspection machines on lines and control devices in laboratories.

With more than 550 lines equipped worldwide and 22 years' experience, VERTECH' has become a confident partner of major international glassmakers for the monitoring of production and quality controls.

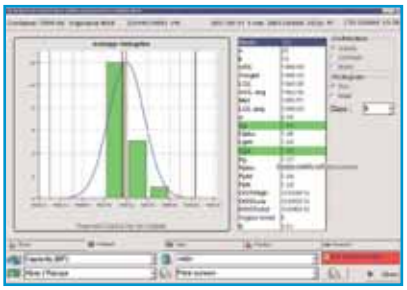

Production line monitoring

SILC: Real time performance follow up along production lines, from Hot End to palletizers.

Quality traceability

SILQUAL: Quality control management and follow-up on line or in the laboratory, using SPC methods.

Mould management

SILMould: Efficient management of mould set performance, changes and defects.

Pallet tracking

SILPallet Audit: Final control capabilities as well as resorting management.

Plant Performance Management

SILX: Personalized and secured access to general plant information as well as key performance indicators (Dashboard) through web technology.

Data mining

SILXtractor: New solution for the extraction of production data and set-outs results.

Products and Business fields:
- **TMC** (**T**hickness **M**easurement system for **C**ontainer glass), on-line and off-line
- **TMF** (**T**hickness **M**easurement system for **F**loat glass), at hot-end and cold-end
- **Special solutions** like thickness and dimensional systems for tubular glass (TMT, TC, OD) at hot-end and cold-end, on-line and off-line; thickness measurement for patterned rolled glass (TMP); diameter measuring systems for quartz glass resizing machines

VMA is specialized in designing and manufacturing opto-electronic measuring and testing equipment for the glass industry worldwide. The company's equipment is designed in accordance with the special requests and needs of its customers, and contains all necessary components for turnkey systems.

VMA's engineers have been working in the glass industry for many years and are therefore familiar with the special demands regarding the testing of glass articles as well as the technological problems of glass manufacturing.

VMA's strength is to provide its clients with a complete system of know-how and service, combining its experience with innovative solutions and sophisticated technologies.

Range of products

- **PRODUCTION LINES FOR TABLEWARE AND TECHNICAL GLASS**

WALTEC Maschinen GmbH is one of the largest glass machinery manufacturers in the world, supplying its machines to glass processing companies in more than 100 countries around the world. WALTEC's product range includes automatic, electronically controlled feeders, pressing and spinning machines, press-blow machines, blow machines, blow-blow machines, twin table machines, handling systems, as well as fire polishing machines for the glass industry. WALTEC's customers are glassworks that produce tableware glass, but also technical products such as washing machine glass panels, cold light reflectors, glass insulators, glass blocks and so on.

The company, which is based in Wilhelmsthal, offers its customers not only the design and construction of machinery and equipment, but also the implementation of turnkey projects and glass factories. Distribution is worldwide; with sales representatives in China, India, Indonesia, Iran, Italy, Russia, Singapore and Turkey.

In its over 115-years history, the company has supplied more than 500 glass processing lines.

The main innovations of WALTEC are:

- the first servo-driven feeder with ball gathering spindle;
- the first direct drive for press tables;
- the first burner tracking system;
- the first linear motor-driven feeder;
- the first high-speed press line;
- the first servo-electric hydraulic pump in the glass industry;
- the first fully servo-electrically driven press-blow machine;
- pioneering technologies for production lines for high-quality stemware products in the blow-blow process.

With modern machinery and experienced staff, the systems are manufactured in-house, made in Germany. The in-house software department always guarantees state-of-the-art-technology.

Since 2006, the company, which is managed by the owner and Managing Director Britta Höfer and the Managing Director Ulrich Zirfas, has operated under the name WALTEC.

- MAINTENANCE AND SERVICE

Our core business is the development and construction of **batch and cullet systems**.

We regard ourselves as a **reliable partner** to our customers and have at our disposal the expertise and capabilities to deliver projects of any magnitude.

As one of the few **full-service providers in our industry**, our spectrum covers all service ranges within plant construction – engineering, planning, design, production, automation technology, installation, site management for all disciplines, commissioning, training for personnel, and services for ongoing operations.

With over **550 batch plant projects realised**, we have the greatest wealth of experience in our industry sector.

ZIPPE batch plants ensure that the batch for every glass type is fed fully automatically into the furnace with the exact consistency and homogeneity needed, at the required amount and at the right point in time – 24 hours a day, every day.

State-of-the-art control technology is a key part of the optimal operation of a batch plant. Nearly 50 of our employees are involved in the creation of **next generation automation and control systems**. This means we are one of the few companies able to carry out complete control development and realisation in-house.

Our **24-hour support service** enables our customers to phone or email an expert around the clock.

YOUR PRODUCTION HAS A GREAT FUTURE.

An IS machine keeps going almost indefinitely – provided the control system doesn't let you down first. In practice, however, discontinued products or obsolete interfaces can seriously impact your competitiveness ahead of time. This is where we step in.

With more than 40 years' experience in automation, FMT24S distributed control systems and FDU24S drive solutions, we have the know-how to refurbish any IS machine in the market. Now and in the future.

GLASSWORKS EUROPE

CONTAINER GLASS | DOMESTIC GLASS | PHARMACEUTICAL GLASS | TECHNICAL & INDUSTRIAL GLASS

Stölzle Glass Group

Fabrikstrasse 11 - 8580 Köflach – Austria
Tel.: +43 - 3144 - 706 - Fax: +43 - 3144 - 706251
E-mail: office@stoelzle.com
www.stoelzle.com

The austrian headquarters of the **Stölzle Glass Group** started its manufacture of hollow and packaging glass in 1871, formerly being a production site of flat glass. Over the past 20 years, Stölzle has turned into one of the leading producers of high-end glass packaging worldwide. The company is located in the city of Köflach.

Investments in all aspects of production, quality control and logistics together with its motto "*STO success is based on successful employees*" have turned Stölzle into Europe's leanest and most efficient producer of pharmaceutical glass packaging as well as miniatures for food & spirits.

The production amounts to almost 1.5 billion pieces of container glass in white flint, amber and green glass each year, what reflects an impressive output of 250 tons of glass every day.

This will earn and enable the company to sustain a leading role in HEALTHCARE, PERFUMERY & COSMETICS and PRESTIGE SPIRITS markets.

Stölzle regards itself as well-equipped for both the present and the future. The firm integration within the CAG-Holding creates key synergies with Stölzle's partner companies. Since the end of the nineteen eighties 100% of Stölzle's shares were held by CAG which, in turn, is completely owned by the industrialist, Dr. Cornelius Alexander Grupp. Within the CAG-Holding all affiliated companies offer bespoke solutions and all-round competence in processing a whole series of modern materials. They specialise in the production of aluminium, viscose, plastics, and glass and manufacture products such as aerosol cans, anti-friction bearings, plastic tubes, aluminium roofs and chassis parts for the automotive industry.

Your glasswork is not listed? Ask to marketing@a151.eu

Those are the company's highlights for being expert in high-end packaging glass:

- **6 production sites in Austria, Great Britain, France, Czech Republic and Poland**
- **3 decoration sites in Great Britain, France and Poland**
- **2,450 employees worldwide**
- **3 billion glass containers produced per year**
- Europe's only manufacturer of packaging glass aimed at Pharma, Perfumery & Cosmetics, Spirits as well as Tableware markets
- One-stop-shop for development, production, decoration and closures
- Firmly embedded in the CAG holding

Certification
The flagship for Healthcare & Consumer products is proud of its important role as pioneer in glass production:

- certification according to GMP since 2002
- certification according to ISO 15378 since 2008
- certification according to BRC/IoP standards for food packaging since 2009
- Austria Gütezeichen

Saverglass, located in the French city of Feuquières, is considered one of the leading global player in the market for Premium and Super Premium bottles. Its production tool and expertise are used to manage significant volumes of orders while meeting the specific needs of its customers for special and short runs.

The Feuquières glassworks, the current of the Group, was founded in 1897 and is part of the regional tradition of Bresle Valley, which has been a stronghold of French glassmaking since the 15th century. From 1969 to 1976, the Feuquières plant belonged to the Société Autonome de Verreries, part of the Saint-Gobain Group. When Loïc Quentin de Gromard, the current CEO of Saverglass, became President of the Company in 1985, he made the choice of hyperspecialization: the niche market of luxury bottle manufacturing, which is where Saverglass set out its strategic position.

Flexible, small production runs allowed Saverglass to offer products that did not exist in the 1980s. Since then, the Company has based its development on aspiring to make exceptional products, especially in the world of spirits.

The decoration business launched in 1991 on the Feuquières site complements the high-end service and provides new solutions for demand that is growing in terms of sophistication and customization.

This gives the Company a special position in the glass landscape, with expertise ranging from manufacturing to customized glass.

This technological expertise, the quality of its services and its capacity for creation place Saverglass in a unique position on the market.

As world's leading specialist in the manufacture and decoration of high-end bottles, the Saverglass Group provides innovative solutions to groups and brands in the sectors of premium and super-premium wine and spirits, fragrances, cosmetics and food products.

With its glass and decorative expertise, and recognized for its innovation and the quality and design of its products, Saverglass is the preferred partner of brand creators, design agencies, independent producers and the largest global wine and spirits groups.

Saverglass also targets fragrance and cosmetics groups, and offers original solutions for the olive oil market, for example.

With its dual expertise in the manufacture and decoration of high-end glass bottles and carafes, Saverglass offers its customers comprehensive, personalized sup-

Your glasswork is not listed? Ask to marketing@a151.eu

port for each project.
In addition to its expertise in production, quality, decoration and product finishing, Saverglass supports its customers and provides advice throughout the product development process.

Because each project is unique, the Group makes a dedicated project team available at a single site.

By doing so, each project is studied individually, while taking into account its particular characteristics, its complexity and its constraints. The teams, made up of a project manager and a technical manager, provide an expert view and well thought out design and technical advice throughout the product development process.

Main Markets: Wine, Aperitifs & Spirits, Soft Drinks

Exports
VOA exports around 23 % of its production to over 20 countries.

2010 Sales
EUR 99 million

Investments
EUR 4 million per year

VOA Glass - located in Albi (France) - has carried on the great glassware tradition that grew up in the Tarn from the 14th Century. People have used their talent to master the alchemy of glass from its molten state when it emerges from the fire that gives it all its nobility.

Windows, bottles or works of art

Glass melted in the furnace will always be a noble material suitable for communicating every type of feeling.
VOA has two furnaces with a capacity of 180,000 tons feeding production lines for every kind of liquid market, from the humble to the most prestigious.
At the heart of the great vineyards of Southern Europe, VOA is constantly improving its work through that legacy, to make it its motto for your satisfaction.

Key points

The first glassmaking company in Europe to obtain an integrated quadruple certification.
The actions of the VOA are part of a national (VERRE-AVENIR) and European (European Container Glass Federation) movement whose objective is that 75% of glass used in France be recovered and recycled. In 2012, 7 glass bottles of 10 are recycled in France.
In 2012, VOA recycled more than 85,000 tons of glass coming from households in the Midi Pyrenees, Cantal and Aude.

Ambitious objectives

In 35 years of recycling the company has managed to recover 70% of household glass; that's 2000 kt in 2012 for France alone.
The target of 75% recycling is close but the last percentages are the most difficult to win. Who is concerned by and must therefore act towards this shared objective:
- The consumer that sorts all its glass household packaging (bottles and jars) for deposit in Recup Verre.
- Communities and their service providers, to provide quality services (logistics and communication)

The VOA and its partner, Briane Environement, engage with you to recycle more :
- Separation of white glass and colored glass
- Automated sorted colors
- Increased rate of cullet in the white and colored glass

THE COMPANY

Bormioli Luigi is an Italian glass manufacturing group, founded in Parma in 1946, 100% privately owned by the Bormioli family, glass makers since the 18th century.

We are a leading partner of the leading prestige perfume and spirits companies for the design, production and decoration of high quality, challenging shaped-glass packaging. The pillars of our strategy to stand as a leader in the prestige glass packaging market are INNOVATION, QUALITY, SERVICE and SUSTAINABILITY.

We operate in three distinct businesses:

- Prestige Fragrance and Cosmetic glass bottles and jars
- Premium quality spirit glass bottles
- High quality glass tableware and houseware

BESPOKE PRODUCTS DEVELOPMENT

We provide full development service: from initial technical studies, to the shipment of the finished decorated bottles. We ensure the best development and production lead times and the best quality.

All decoration techniques are available to customise your product: screen printing, hot stamping, coating, acid etching, metallisation, sublimation, gluing accessories …

INSIDE – AN INNOVATIVE SOLUTION FOR INTERNAL DECORATION

INSIDE is a decorative coating applied on the internal glass surface of the bottle, resistant to long term contact with alcohol-based fragrances and spirits.

INSIDE magnifies the depth and thickness of internal glass distribution, creating a virtual 3D effect of the packaging.

INSIDE is compatible with all traditional decorative techniques that can be applied on the outer surface of glass, such as screen printing, hot-stamping, spraying and others.

INSIDE can be enriched by using the laser technology: any high definition pattern or text can be engraved and thus stand out of the coating.

INSIDE is subject to strict safety procedures: it does not contain heavy metals, SVHC or solvents and it does not in compliance with international under REACH. INSIDE is in compliance with international food safety regulations and can be used with white and brown spirits.

BORMIOLI LUIGI COLLECTIONS FOR PREMIUM GLASS PACKAGING

A wide collection of bottles, decanters and jars are available for high end super premium and prestige spirits, perfumery and cosmetics products.

FEEDER COLOURED GLASS

From the lightest shade to deep blue, we develop bespoke feeder colours based on a pantone, a sample or just an idea.

ULTRA CLEAR GLASS

Bright, transparent, white. Only one glass quality is used for all our productions: perfumery grade Ultra

Owens-Illinois, Inc. (NYSE: OI) is the world's largest glass container manufacturer and preferred partner for many of the world's leading food and beverage brands. Founded in 1903 as Owens Bottle Company, the company merged with Illinois Glass Company in 1929 to become Owens-Illinois, Inc. The founder, Michael J. Owens, invented the automatic bottle-making machine, which became the foundation for today's glassmaking industry. With an unparalleled impact spanning 79 plants in 23 countries, O-I is the only truly global maker of glass packaging, holding market leadership positions in each of its four operating regions: Asia Pacific, Europe, Latin America and North America. The company had revenues of USD 6.7 billion in 2016 and employs more than 27,000 people. With global headquarters in Perrysburg, Ohio, O-I delivers safe, sustainable, pure, iconic, brand-building glass packaging to a growing global marketplace. O-I is committed to sustainability, with a focus on energy reduction, and invests on innovation and brand-building design capabilities.

Your glasswork is not listed? Ask to marketing@a151.eu

Glass packaging offers an image that other packaging options do not have, showcasing brands in the marketplace better than other packaging material. Glass is pure, safe, healthy and is reusable and recyclable infinitely. From engineering and manufacturing to brand development, design and innovation, O-I is dedicated to providing unique solutions to exceed its customers' expectations and fuel consumers' desire for glass. The company's experts imagine innovative new packaging design concepts and team of Ph.D. scientists, packaging designers and manufacturing experts transform those ideas into iconic glass containers. O-I has also renewed its approach to developing new partnerships with its clients, orienting it to a better understanding of their markets and to the development of packaging solutions that differentiate their brands and reflect the quality and value of their products. Thanks to a wide offer of shapes, lines and colors and to the introduction of innovations in the pipeline, O-I is able to offer its clients an infinite range of options.

www.verallia.it

Verallia, third global producer of glass packaging for food and beverages, offers innovative, customized and environmentally friendly solutions to more than 10,000 customers around the world. In 2016, Verallia produced approximately 16 billion bottles and jars intended mainly for still and sparkling wines, spirits, food products, beers and nonalcoholic beverages.

Verallia's operational model is based on the combination of the strength of its international network (industrial presence in 13 countries, commercial presence in 46 countries, 5 technical and 13 product development centers) and the proximity maintained in its relations with customers through approximately 10,000 employees. In 2016, Verallia achieved sales of EUR 2.4 billion.

Our strategy is based on service and innovation backed by efficient manufacturing facilities operating under the world's highest standards. This strategy is reflected in the significant levels of capital expenditure both in mature and emerging countries.

Verallia's unique business model combines "strength" with "proximity" – the strength of a global leader offering efficient state-of-the-art industrial facilities to meet the exact needs of global players, together with the proximity of a local market presence to serve customers of all sizes. With its constant focus on quality and manufacturing excellence, Verallia has implemented best practices at all its manufacturing facilities, including best-available technologies. With its flexible manufacturing facilities, Verallia can tailor the size of production runs based on customers' forecasts.

Verallia is committed to a continuous improvement approach to constantly enhance packaging quality and food and beverage safety. Therefore, its manufacturing facilities are equipped with inspection equipment that incorporates the latest technological advances.

Verallia adapts its industrial resources to changing customer requirements through its Operational Excellence program focused on four main areas: innovation, production, investments and purchasing. This translates into greater manufacturing flexibility, allowing Verallia to offer customers an extensive range of products tailored to their requirements, spanning from 2 oz sauce bottles to 15 L champagne bottles.

HEALTHY CONTENTS. RESPONSIBLE AIMS. EXPERTISE AND PASSION.

Verallia Italia can rely on people who make a difference to design and produce glass packaging for food with high technical contents. People who act with the strength of an independent international group and the ability to assist the customer to find effective solutions to the needs of all. To do this through the talent and expertise of each person, through production innovation, production flexibility and quality and the responsible and sustainable management of ethical matters that concern it. Verallia Italia supports the values of glass, collaborating with those who share them.

Vetri Speciali is a leading worldwide company specialized in the production and commercialization of special containers for foods on a global scale, whose headquarters are located at Palazzo Fugger Galasso, in the historic heart of the city of Trento.
Vetri Speciali is a place where traditional craftsmanship is combined with the most innovative technologies at the service of industry, creating a unique alchemy in the global scene: the company is indeed able to fulfill in a short time the demands of production of significant amounts as well as the production of micro batches, starting from 4 cl mini formats up to 30 liter containers - numbers that nowadays have no equal in the international market.
Vetri Speciali has established a unique position in the scenario of the industrial production of hollow glass containers for food: Vetri Speciali reaches its customers throughout Italy from where, thanks to its in-house and well-structured commercial department – supported by external sales representatives – it sends out over 60% of its production. Vetri Speciali is furthermore present in over 52 Countries with its commercial department, which is specialized in foreign markets and made up of English, German, French and Spanish native speakers.
We also have a Quality Assurance team dedicated to the care of clients' needs and to the solving of any problem that may occur.
Each day, the creative forge of Vetri Speciali designs and creates a multitude of shapes and colors according to the most diverse inspirations and demands, in every possible shape and form of the imagination. Vetri Speciali indeed stands out for the versatility of its offer, combined with the application of the most advanced technologies: we undertake design and production projects of artifacts with companies of every size and inspiration, interpreting with the tools of visual language every customer's idea and translating his or her intuitions into prestigious special containers.

BA Glass is located in Avintes, Portugal. The company has perfected a business model inspired by the group's values (HeART - Humbleness, Ambition, Rigor and Tansparency, with emotion) and which is based on continuous innovation and internal enterprising. The values are the main features that promote shareholders business sustainability and benefit and which also satisfies:

- the customers - with differentiated and quality services, supported by state of the art technologies;
- the employees - with a challenging agenda and our collective ambition, which promotes each persons personal development;
- the communities where the company is located - with the responsibility to contribute to the creation of local wealth.

With a total of eight factories and **2.400 employees, 1.600 in the Iberia plants, 660 in the Polish plants and 140 in the German plant, BA Glass has an annual production over 6 thousand million containers in 10 colors:** Amber, Dark Amber, Flint, UV Flint, Light Blue, Georgia Green, Black, UV Green, Dark Green, Emerald Green.

The factories are structured – in terms of size and technology – and the production lines are specialized to satisfy the different needs for glass packaging of the food & beverage industries. All factories are equipped with modern automatic inspection machines that verify 100% of the products to guarantee the conformity of their physical and dimensional characteristics. In addition to this inspection on the production lines, laboratory tests are also performed to control the surface treatment, capacity, resistance to heat and pressure and others.

As a result of these efforts BA Glass became a reference supplier to the main food & beverage industries, where it stands out due to the quality of its products and the ability to, together with the customers, find innovative and flexible solutions.

The company has a long story, which today includes also important acquisitions of other groups.

This are the history's highlights:

1912: Incorporation of the company 'Barbosa e Almeida' (dedicated to the commercialization of bottles) by the partners Raul da Silva Barbosa and Domingos de Almeida.

1930: Beginning of industrial activity in Campanhã (Porto) with semi-automatic technology. The company changes it's name to 'Fábrica de Vidros Barbosa e Almeida, Lda.'

1947: Introduction of Automated Technology: introduction of innovated technology in Portugal by the installation of automatic feeder mechanism and molding machine in bottle manufacturing.

1965: Purchase of the third automatic machine, increasing weekly production to approximately 350 thousand bottles (a capacity six times superior to that of eighteen years before).

1969: Beginning of operation of the new industrial unit in Avintes (Vila Nova de Gaia), with two regenerative furnaces (with heat recovery) - state-of-the-art technology in relation to the traditional melting method of raw-materials.

1971: Installation of the first automatic IS (Individual Section) machine, which lead to a substantial increase of the installed capacity.

1975: Transformation in a public limited liability company with the name 'BA - Fábrica de Vidros Barbosa & Almeida, SARL'

1979: The production depends on five IS machines, one of which computerized.

1983: Installation of a new regenerative furnace. Reconversion of equipment, introduction of a new technology in the area of computerized molding and extending automated product quality control to all production lines.

1986: José Augusto da Silva Domingues acquires the sares owned by Sogrape (77%) and Vinícola Vale do Dão (3%) and controls 80%of the social capital.

1987: Listing in the Lisbon Stock Exchange. José Augusto Silva Domingues remains a reference shareholder, owning a majority interest of about 54% of the social capital.

1988: Construction of a new furnace that increased capacity by approximately 40%, and confirming the company's leadership in Portugal in manufacturing glass packaging.

1993: BA acquires 94,5% of 'CIVE - Companhia Industrial Vidreira, SA', from the state, a company located in Marinha Grande, with three furnaces.

Your glasswork is not listed? Ask to marketing@a151.eu

1995: Merge by incorporation of CIVE in BA.
1998: A company by Sonae Group acquires 19,9% of the social capital from the inherators of José Augusto Domingues and, as a result of a shareholder agreement, 49,9% of the voting rights and controls management of the company.
Incorporation of the Spanish company 'BA - Fabrica de Envases de Vidrio Barbosa & Almeida, SA', (90,15% of the capital held by BA), and construction of a factory with one furnace in Villafranca de los Barros.
1999: Acquisition, by means of Public Offer of Acquisition, of 54,3% of 'Vidriera Leonesa, SA' (VILESA), a company with a industrial unit in Léon (Spain), with two furnaces. Progressive increase of BA's ownership stake until 99% of the social capital.
Capital increase to 37,5 million euros (the current share capital).
2000: The Sonae Group ownership stakes reaches 49,9%.
2001: Merge of the Spanish companies 'BA - Fábrica de Envases de Vidrio Barbosa & Almeida, SA' and 'Vidriera Leonesa, SA' and change of the company name to 'BA Vidrio, SA'.
2003: BA ceases to be listed on the stock exchange and has as its sole shareholder 'Bar-Bar-Idade Glass - Serviços de Gestão e Investimentos, SA' a company whose shareholders are a Sonae Capital, SGPS, SA; Bar-Bar-Idade, SGPS, SA (held by Carlos Moreira da Silva); and the Silva Domingues Family.
2004: Management Buy Out (MBO): Carlos Moreira da Silva, the Silva Domingues Family and the Board members and Senior Employees of the BA acquire the entire share capital.
2005: The company changes its name to 'BA Vidro, SA' and the mother company changes its name to 'BA Glass I - Serviços de Gestão e Investimentos, SA'.
2008: Acquisition of the Sotancro Group which allowed the BA group's to broaden its product range and client portfolio to include the pharmaceutical and cosmetics sectors.
2012: Acquisition of the Polish group Warta Glass.
The above mentioned acquisition allows BA Group to achieve a geographical expansion of its market to Eastern Europe, which represents a step forward into the

Groups internationalization. On the other hand the referred acquisition allows BA Group to broaden its product range and client portfolio, reinforcing its position on the spirits segment.
2016: **Acquisition of HNG Global,** a German glass packaging company headquartered in Gardelegen, Berlin.
With this new plant, BA expands its market into Central Europe adding it to its current portfolio of sales in the largest European Market.
This new plant allows us to create synergies between operations and improves the service to our international customer base, while increasing our understanding of the market. Consequently, BA Group currently comprises eight factories and has a daily production of more than 14 million units - bottles and jars - for customers operating in the Food & Beverage industries.

Actis is a producer of the wide range of high quality glass containers for packing products in beer, spirits and food industries. The plant is located in the Southern Federal District, in the city of Novocherkassk, Rostov Region (Russia).

Large-scale modernization of the company was completed in 2010, and the newest, modern glass manufacturing plant was built and launched. The first stage capacity of new production totals 360 million units of glass containers a year. In March 2011, the second stage was launched with capacity 360 million units of glass containers a year. One of the Actis Firm's main advantages is the technological equipment from European manufacturers at all stages of the production cycle, including the product quality control system that meets international requirements.

Following the launch of the third stage in 2013, Actis plant's production capacity reached **1,080,000 units of glass containers per year.** Currently, three stages of the plant are able to concurrently manufacture products with three basic colors: colorless, green, and brown.

The equipment produced in Germany, France, Italy, Czech Republic, and UK allows to reduce costs, widen the product range and produce high quality glass containers, both standard based on the "blow blow" technology and lightweight ones based on NNPB technology as well as wide neck glass containers based on the "press blow" system.

The plant is equipped with three glass melting furnaces, each with the capacity of up to 440 tons of glass (1 million units of glass containers) per day. The furnaces were designed by **Teplotechna Prima** (Czech Republic). The plant is also equipped with annealing lehrs and cold end spraying units from **Pennekamp** (Germany), hot treatment units from **Revimac** (Italy), four IS-12 glass-forming machines from **Sklostroj** (Czech Republic) and eight machines from **GPS** (Germany), as well as modern inspection equipment from SGCC/**TIAMA** (France), packaging equipment from **Zecchetti** (Italy) and shrink machine from **Thimon** (France).

SIMVOL Inc.

1, Volodarsky street - Vladimir Province
Gus-Khrustalny district - 601570 Kurlovo – Russia
Tel.: +7 - 49241 - 55762 - Fax: +7 - 49241 - 55364
E-mail: td@firmasimvol.ru - **www.firmasimvol.ru**

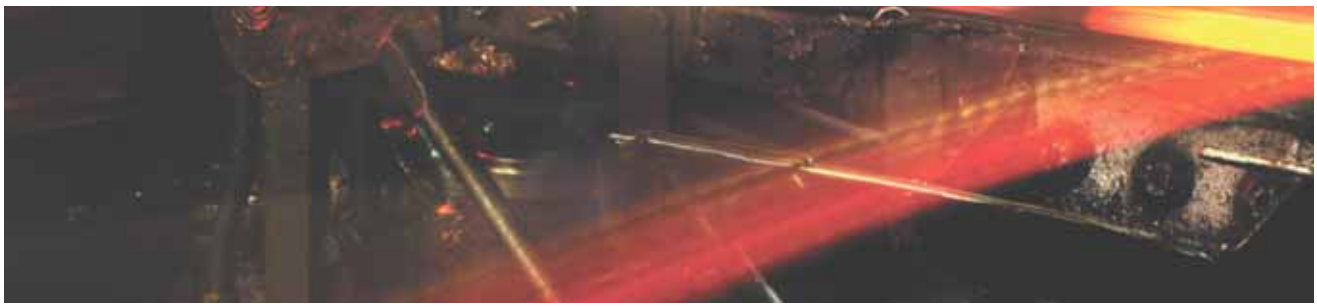

SIMVOL is one of the oldest glass enterprises of Russia which history begins in 1811. The company developed from a small workshop till modern highly technological enterprise. Nowadays the Joint Stock Company the firm SIMVOL is the leading plant of glass industry having great significance within Russian and international market. For all these years the Joint Stock Company the firm SIMVOL became a multisectoral enterprise manufacturing sheet glass, glass bottles, tinted glass, special equipment glass, multiple glass panes, multilayer shock-proof and bullet-proof glass, automobile glass, for all the brands of Russian and foreign cars. The manufacture of quartz ceramics made of quartz glass waste has been mastered at the enterprise. There has been developed and mastered the technology of manufacture of decorative souvenir products made of coloured glass sticks, which are also produced at our enterprise.

All the goods of the firm SIMVOL are united by two main characteristics: high quality and ecological cleanness. That is why, having taken part in the competition «Russian brand of the third millenium. High-quality mark of the 21-st century.» the firm was rewarded with the diploma as a winner for the high quality products. It is also confirmed by such rewards as «Leader of Russian economy», «International Gold star for quality».

The monitoring results show that SIMVOL is in the top ten best Russian enterprises. It can combine the glass manufacture with careful attitude to nature. The company pays great attention to ecological policy, developing an ecological programme containing the measures on the decrease of air waste, exhaust gas heat recycling, sewage treatment. SIMVOL is the finalist of the competition «The best Russian enterprise 2000» in the nomination «For the efficient ecological policy».
For 20 years there has been held the complex work to create technical possibilities and staff for the improvement of the production and its product line widening. These efforts were especially required during the transmission to market relations.

It should be observed that the staff and manufacturing facilities were kept due to these efforts. During this period the salary was paid regularly, working places were kept. The construction of accommodation for the employers of the firm is going on. But the staff achievements had to

Your glasswork is not listed? Ask to marketing@a151.eu

be directed to a new quality level. For this purpose there was executed the programme of technical re-equipment, entrepreneurship acquirement. To keep and strengthen the positions on the product market the high quality and competitive production is manufactured.

All this resulted in realization of investment programme and setting in operation of the new workshop **producing glass bottle containers with the capacity of 112 million bottles per year**. It is the most important achievement of the enterprise staff for the last few years. The new workshop made it possible to create 170 working places; the professional level of the staff increased considerably. Not so many enterprises pay such great attention to social development as it does SIMVOL.
Which is a town-forming enterprise, and it is responsible for the well-being of many inhabitants of the town of Kurlovo. The enumeration of the social privileges is large and it covers all the categories of the firm staff.

Steklarna Hrastnik has been making top quality glass products for over 150 years. Today, we dedicate our expert knowledge to three production lines:

- **Special glass packaging** (Steklarna Hrastnik is leading partner in Premium and Super Premium segment),
- **Tableware** (Premium tableware partner with complete service),
- **Lighting** (Manufacturer for design lighting made from glass).

Our engineers are able to make the most technically demanding glass products using one of the world's clearest glass materials.

In order to be able to offer such advanced glass products, we make important investments into **research and development**.

Since 2013, we have been producing glass using a state-of-the-art furnace, using the so called 'oxy-fuel' technology that improves the power used/production amount ratio, reduces environmental impact and raises glass quality.

We see our **adaptability to our clients needs** as our key competitive advantage. We can offer our clients: the design and manufacture of a glass product, the manufacture of a glass product according to existing blueprints provided by the client, cooperation with the client, develop and design a glass product and then make it at Steklarna Hrastnik.

We can produce also **smaller quantities**.

Our motivated and dedicated staff are the foundation of our success. We are very attentive towards our employees and provide them with the possibilities of promotion, further education and training, coaching and preventive leave of absence.

We are proud to be certified a 'Family-Friendly Company', helping our workers to harmonise their family and professional lives.

Vidrala Group

Barrio Munegazo 22 - 01400 Llodio – Alava – Spain
Tel.: +34 - 946 - 719714 - Fax: +34 - 946 - 719764
E-mail: secretaria.direccion@vidrala.com
www.vidrala.com

Since it was installed in Llodio, (Alava – Spain), **Vidrala Group** has kept on growing, incorporating the most recent technological developments to its manufacturing processes and finished product control, becoming an obligatory reference in the sector of glass production.

Its manufacturing activity began in 1966, under the name of Vidrierías de Alava S.A, with one furnace, two machines and a yearly output of 25,000 tons with only a dozen models.

The beginning of press and blow production of light bottles enabled Vidrala to become the technological leader of the national market, reducing the average weight of its containers.

In 1981 production reached 130,000 tons per year, and the company began to transform its two furnaces obtaining an energy saving of 50%, although productive capacity is maintained. The corporate name was changed to Vidrala S.A.

In 1989 Crisnova, a 100% subsidiary of Vidrala, started its activity in Caudete (Albacete) with one furnace and a production capacity of 95,000 tons per year. Vidrala Group thus achieved an annual capacity of 225,000 tons with three melting furnaces.

A third furnace was built up in 1995, increasing annual production capacity by 110,000 tons, totalling 340,000 tons per year for the Group.

Year 2005 was marked by the acquisition of plants from BSN Glasspack at Castellar del Vallés (Spain) and from Avir at Corsico (Italy), as a result of the strategic plan and reaching a production capacity of 805.000 tons for the Iberian Peninsula and 950.000 tons for the whole Group. Valvitrum S.A. and Corsico Vetro S.r.l. was put into operation.

Vidrala S.A. has a Share Capital of € 25,290,227.82 comprised by 24,794,341 ordinary shares with a unitary par value of €1.02. The shares are listed in Madrid and Bilbao Stock Exchanges.

Productive process of the company with glass is very accurate, through this steps:

- **Raw materials:** component can be found in nature, like "sand" or "soda ash";
- **Melting:** the batch mixture is heated in furnaces at about 1,500 °C, creating molten glass;
- **Forming:** the gobs are louded into moulds where they are blown to get finished shape of the container;
- **Lehr:** to guarantee the strength of the container they pass through the lehr where they are firstly reheated and gradually cooled down slowly;
- **Inspection:** every container undergoes strict automatised quality control;
- **Packaging and expedition:** the containers are palletised and wrapped hermetically so they can be delivered to the customers in the best condition.

Vetropack Holding AG

Schützenmattstrasse 48
Ch-8180 Bülach – Switzerland
Tel.: +41- 44-8633434 - Fax: +41- 44-8633123
E-mail: vetropack.holding@vetropack.ch - **www.vetropack.com**

The **Vetropack Group** is ranked among the leading european manufacturers of glass for packaging. Its activity started in 1911 when Henri Cornaz founded Verrerie S.A. in St-Prex (Switzerland), where the company still have today its headquarter. From this very first glassware through the years the company is grown becoming Vetropack Group.
Today is a, public company and has a total of over 3000 employees. It supplies to the beverage and food packaging made of high quality. The Group has expanded through strategic acquisitions and mergers, thanks to technological advances and to conquer new markets.

Your glasswork is not listed? Ask to marketing@a151.eu

It has over 3000 employees and other plants – besides Switzerland – in Austria, Czech Republic, Croatia, Slovakia, Ukraine and Italy. In factories, all certified according to the ISO 9001 standard, 18 are active melting tanks with a daily production capacity of over 4,000 tons of glass for packaging.
Vetroconsult AG, based in Switzerland, operates instead in the following areas: technical area, production, IT and procurement of all capital goods. These services are provided to all of the Vetropack Group.
They are also part of the Swiss group Vetropack trading company Müller + Krempel AG and companies operating in the real estate management industry VETROREAL AG.
In July of 2015, Vetropack acquires the Italian plant of Trezzano sul Naviglio and integrates within the existing organizational structure as the **Vetropack Italy** Srl. The plant has two melting tanks and annually produces about 140,000 tonnes of glass packaging. With this acquisition, Vetropack strengthened its position on the important Italian market in a sustainable way. Vetropack is one of the most qualified producers in Italy and is therefore an important supplier of glass containers for the domestic food and beverage industry.
Vetropack Austria produces glass packaging in Austria. The company sells and distributes the goods in Austria and on selected export markets. The sites are located in Pöchlarn (Lower Austria) and Kremsmünster (Upper Austria). As the leading manufacturer in Austria, it is the main supplier of glass packaging to the domestic food and beverages industry.
Vetropack Croatia produces, sells and distributes glass packaging to the Croatian domestic market as well as to the neighbouring markets in Slovenia, Italy, Hungary, Bosnia, Serbia and other countries in south-eastern Europe. The site is in Hum na Sutli.
Vetropack Czech Republic produces, sells and distributes glass packaging in Czech Republic. The site is in Kyjov.
Vetropack Slovakia produces, sells and distributes glass packaging in Slovak Republic. The site is in Nemšová.
Vetropack Ukraine produces, sells and distributes glass packaging in Ukraine. The site is situated in Gostomel, Kiev region.

All the companies offer a full product range, tailored to meet regional needs.

Producing specially designed glass packaging with various volumes and colors for the food, beverages, pharmaceuticals, and cosmetics sectors, **Şişecam Glass Packaging Group** has a history that dates back to 1935, when the first plant was founded in Paşabahçe-Beykoz. Demand rapidly increased after that date, and production had to be transferred to the Topkapı Bottle Plant in 1969. In 1976, **Anadolu Cam Sanayii A.Ş.** company in Mersin (Turkey) was acquired. NNPB, which is an important milestone in glass packaging technology, was used for the first time at this plant in 1988. Today's company headquarter is in Mersin as well.

All companies and plants operating as part of the glass packaging were incorporated under Anadolu Cam Sanayii A$ in 2000. The Group's domestic production plants further grew with the addition of Bursa Yenişehir and Eskişehir plants in 2006 and 2013, respectively, further cementing the leadership of the Group in the industry. Şişecam Glass Packaging Group aims to become an international glass packaging supplier that is a regional leader thanks to investments and cooperation initiatives in surrounding countries, and owes half of its turnover to foreign operations. As such, its first investment outside Turkey was the acquisition of the **Mina Plant in Georgia** in 1997. This investment was followed by the establishment of **Ruscam Glass Packaging** company which was founded to follow the opportunities offered by the dynamic structure of the Russian market and to carry out the operations in Russia in 2002. Ruscam started to operate the Gorokhovets Plant as of 2002, the Pokrovsky Plant as of 2004, the Ufa Plant as of 2005, the Kirishi Plant as of 2008, and the Kuban Plant as of 2009 Şişecam Glass Packaging has most recently acquired an existing glass packaging plant in **Merefa, Ukraine** in 2011, thus increasing its production capacity abroad to 1.3 million tons. The Şişecam Glass Packaging Group currently has a total production capacity of 2.3 million tons/year, which makes it the biggest glass packaging producer in Turkey, and the fourth biggest in Europe and the world. **The business continues its production in a total of ten plants, three of which are in Turkey, five in Russia, one in Ukraine and one in Georgia.**

Rokitnovskiy Glass Work, the history of which dates back to 1898, is one of the leading Ukrainian manufacturers of glassware industry. Today its headquarter is in Rokytne, an urban-type settlement in Rivne Oblast (province) in western Ukraine.

More than a century of experience in glass manufacturing, close location to quartz sand pits, systematic technical improvement of the production process made it possible for the enterprise at the certain time to enter the top three manufacturers of glass bottles in Ukraine.

The products of the company meet the European quality standards and are able to satisfy the most demanding tastes. It develops different forms of bottles depending on the wishes and demands of the customers. The enterprise specializes in the production of green and brown glass bottles with the capacity of from 0.2 to 1.0 liter. The factory is the owner of about 50 designs of bottles and it produces glass bottles for beer, alcoholic beverages, wine, cognac, low-alcoholic, alcohol-free beverages and juicy drinks.

To achieve and hold such prestigious positions, Rokitnovskiy Glass Work spent decades of hard work of glass makers, multiple talented engineers and technicians, managers, ensuring the effective operation of the enterprise, consistent quality of products regardless of the twists of history and economics.

The main customers of the company are the following well-known companies and brands: PJSC Carlsberg, PJSC Obolon, LLC Trade and Production Company Persha Pryvatna Brovarnya (First Private Brewery "For people like for ourselves", PJSC Radomyshl Beer and Non-Alcoholic Beverages Plant, LLC Poltavpyvo, LLC Berdichevsky Brewery, PJSC Khmelnytsky Regional Brewery, LLC Riven, LLC Pavlivka Brewery, LLC Lysychansk Brewery Plant, TM Morshynska, LLC Aqua Polyana, LLC Svalyava Mineral Waters, LLC Iodanka and many others. The products of our factory meet the European quality standards and are exported abroad to: Greece, Belarus, Armenia, Georgia, Russia, the Czech Republic, Germany, Poland, Croatia and etc.

In 2014, the share of export in total sales volumes amounted to 20.3%, or 38.8 million pcs. Since 2007, the company also has been working with Carlsberg Ukraine. **Rokitnovskiy Glass Work produces bottles for such brands as: "Slavutych", "Carlsberg", "Tuborg", "Lvivske", "Robert Doms", "Baltyka"**.

Allied Glass Containers Ltd

69 South Accommodation Road - Leeds,
West Yorkshire Ls10 1nq - United Kingdom
Tel.: +44-113-2451568 - Fax: +44-113-2449349
E-mail: info@alliedglass.co.uk - **www.allied-glass.com**

Allied Glass is an independently owned premium glass bottle manufacturer which designs, develops and manufactures luxury glass packaging. The company aims to be a supplier of inspirational bespoke glass packaging available to the entire spirits industry, producing beautiful glass bottles for a range of iconic international brands whilst also supporting the very smallest craft producers of whisky and gin. Allied Glass offers an extensive range of general sale containers, created to meet the demands of the food, beverage and spirits sectors, supplying a wide variety of shapes and sizes.

There are specialised ranges including lightweight spirits bottles with volumes from 350ml to 1 litre and mineral water bottles which range from 330ml to 1 litre. A number of the items come in multiple ring finishes in order to completely meet each individual requirement.

At Allied Glass, the focus is on making and supplying exceptional glass bottles. Therefore, there is a policy of continuous investment including the creation of an outstanding Design function whilst continually investing in the latest production technology. Innovation and speed to market are both key to Allied's successful glass bottle design offering, along with a flexible manufacturing capability and a bespoke service that provides customers with a personal approach to new product development.

Allied Glass operates **two manufacturing sites, one in Leeds and another in Knottingley.** Together, these two factories have the ability to produce 13 million units every week. **Two flint furnaces are installed at Leeds, with a combined maximum capacity of 550 tonnes per day, feeding nine production lines. Another seven lines are installed at Knottingley, served by 2 flint furnaces**, one of which produces premium quality flint Gicel Glass, the other benefits from a feeder colour system.

A mixture of 6 and 8 section IS machines are operated at both sites, including an increasing number of 51/2in and 6¼in CD models to achieve enhanced flexibility, especially when making specially shaped bottles.

The bulk of production is achieved using the blow-blow process, together with a small amount of press-blow manufacture, which is used to produce wide mouth ware at the company's Knottingley facility.

Beatson Clark PLC

Greasbrough Road - Rotherham - South Yorkshire S60 1TZ
United Kingdom
Tel.: +44-1709-828141 - Fax: +44-1709-835388
E-mail: sales@beatsonclark.co.uk - **www.beatsonclark.co.uk**

Founded in 1751 in Rotherham (South Yorkshire, UK), **Beatson Clark** is proud of its long heritage. Originally manufacturing glass containers for the Pharmaceutical industry, it diversified into the Food & Beverage markets during the 1970's and 1980's. Both the food & beverage ranges have become hugely successful for the company, with the food sector now being its largest market. Beatson Clark, with its headquarter still in Rotherham , is one of the UK's largest manufacturer of pharmaceutical glass containers.
Beatson Clark has been designing and manufacturing glass bottles and jars for over 260 years, and produces a wide range of general sale glass containers for the food, pharmaceutical and beverage markets, many available from stock.
Many of its glass drinks bottles are suitable for carbonated beverages and can be produced in both white flint and amber glass. In addition, several beer bottles have been lightweighted to reduce the impact on the environment.
Beatson Clark's bottles are made from Soda-limesilica (type III) glass, which meets the requirements of the British and European Pharmacopoeia. All its glass bottles for beverages are produced in accordance with the regulations under the Materials and Articles in Contact with Food regulations.

SAHM

Westerwaldstrasse 13 - 56203 Höhr-Grenzhausen – Germany
Tel.: +49-2624-1880 - Fax: +49-2624-18860
E-mail: sahm@sahm.de
www.sahm.de

Founded by Emil Sahm in 1900 as a small pewter factory, **SAHM** has developed with each generation over the decades, adjusting to meet the needs and requirements of its customers, expanding into new markets and growing at a steady pace. To this day, it is driven by markets and designs – high product quality, flexibility and innovative strength have been core values of the company's business for over 116 years. As a medium-sized company managed by its owners, SAHM is one of the world's leading suppliers of glasses for the beverage industry, with a total of more than **450 employees in Europe, Asia and America**. The headquarter in Höhr-Grenzhausen remains the competence and design centre of the corporate group, while its customers range from regional drinks manufacturers to international corporations. They all place their confidence in SAHM's expertise: highly competent, in-depth consulting on brand positioning, modern and innovative glass and decoration designs combined with impressive customer service and logistics departments.

The company's philosophy is to monitor markets and get involved wherever the variety of beers and glasses is gaining in importance. To this end, SAHM is currently focusing on the craft brewers' scene in the USA. Since 2013 Sahm has been represented by a manufacturing facility in the USA (in the city of Toledo), enabling it to serve the american market. This has been the company's philosophy for many years.

Among the products, a special place is taken by manufacturing of brand glasses based in the Westerwald, beer glasses: Germany is a country of beer drinkers, so this is quite logical. But the company also works special glass for soft drinks, wine and champagne and many accessories.

Tarján Glass Hungary Ltd. newly founded glass factory in an area where the glassmaking tradition is still strong : modern machinery meets special glass making skills, the result is crystal clear-look, soda lime products with some very special technical characteristics.
Production of high quality, sophisticated stemware, tableware and giftware is the main activity of the company where the traditional, mouth-blown hand-made glass manucturing received new impulses and creates special beauties every day.

RCR Cristalleria Italiana SpA

Localita' Catarelli - 53034 Colle Val d'Elsa (SI) - Italy
Tel.: +39 - 0577 - 910111 - Fax: +39 - 0577 - 920313
E-Mail: info@rcrcrystal.com
www.rcrcrystal.com

RCR Cristalleria Italiana is the Italian quality glass industry which in the world of tableware covers classic and contemporary design; is the only company that can offer excellence in all segments and with all the **LUXION®** production techniques, RCR's innovative, ultraclear, ecologically sound and dishwasher-safe top quality glass, with the same transparency, brilliance and crystal-clear sound characteristics.

Established in 1967 by the merger of two small handicrafts of master glassmakers, with its headquarters and establishment in Colle di Val d'Elsa, RCR is one of the most famous italian brands for home table and household items: a 100% Made in Italy brand, a symbol of Italian design and of Italian lifestyle in the world, which, from its factory in the heart of the Tuscan country, exports its products to more than 80 countries.

Your glasswork is not listed? Ask to marketing@a151.eu

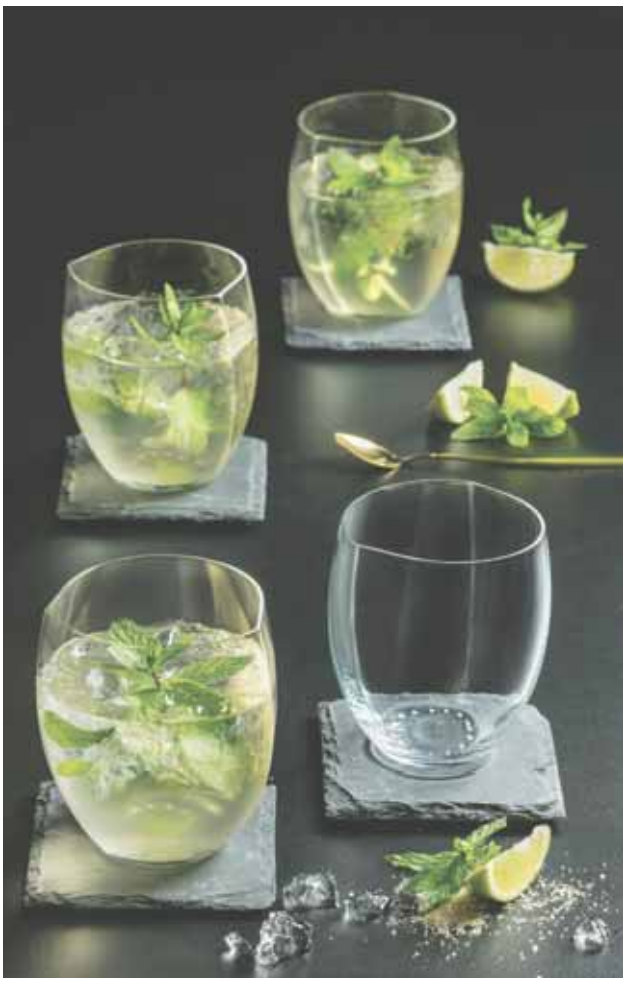

RCR stands for the quality of materials, processes and products, blown or pressed.

RCR is a true GREEN Company for process typology and ecological policy.

RCR colors, cuts, personalizes and designs each product with proposals for all generations.

RCR emphasizes brand values to the consumer: quality, Made in Italy, prestige, eco sustainability; with new collections: RCR Style and Style Prestige, RCR Trends and LUXION Professional for the professional sector.

The www.rcrcrystal.com, the online shop and the corporate video RCR Stand Up show a dynamic company that introduces itself to trade and consumers as an innovative and enthusiastic company that works and renewes with strength and determination, pushing forward in the world the Made in Italy values .

www.sylcomsrl.com

Sylcom, located in Spinea (Venice) stands for the authentic expressions of the finest Italian craftsmanship and in particular the Venetian tradition. A charm achieved through the selection of precious materials, the composition of pure glass, gold leaf 24 Kt expertly machined, hand-forged metals in its internal workshop. To all this, it is associated with a particular attention to the design, which while remaining within the classic style is always new reasons inspiring, spirited variations on the theme, continuing review of the forms.

Each stage of the production process, from the realization of the vitreous mixtures to all other manufacturing operations, is always conducted by Sylcom in a careful and scrupulous in full compliance with environmental legislation.

However Sylcom decided to do more by pursuing its policy of continuous commitment to the environment, has implemented in its production process an environmental management system in order to ensure that every single environmental aspect related to business activities (from the choice of raw materials, emission monitoring, energy consumption) is always kept under control and managed in the best possible way.

The Sylcom commitment is rewarded in February 2009 when he gets for its management system the most important award in the field of environmental protection: the certification according to ISO 14001: 2004 for the production and processing of blown glass and plate and realization of lighting and glass furniture equipment.

Sylcom he obtained from the Institute for the protection of Italian manufacturers certified 100% Made in Italy: a recognition that, through rigorous quality control is the only one to ensure the effective implementation of the whole product in Italy, unequivocally. Each creation Sylcom is equipped with its own warranty bindello, released directly from Promindustria S.p.A., with a progressive numbering code that certifies its total authenticity. By entering their numbered code in the website www.madeinitalycert.it, the customer can check and integrally trace the origin and the production of the product.

Biaglass Huta Szkla Bialystok

Ul. KS. A. Syczewskiego 8 - 15-139 Bialystok – Poland
Tel.: +48 - 85 - 6539918 - Fax: +48 - 85 - 6539919
E-mail: biaglass@biaglass.pl - **www.biaglass.pl**

The polish company **Biaglass** was established in 1929 year and is specialized in production of hand-blown glass shades for lighting industry. Biaglass, whose headquarter is in the city of Białystok, belongs to elite group of lighting glass works where 100% production is hand-made.

The company has over 3000 different moulds for production of lighting glass shades and it still produces new ones. Every year over 120 new moulds – from very small to over a meter high. Thanks to following possibilities: cutting, grinding, painting, sandblasting and acid matting, all in production through thousands of different models.

Currently Biaglass has **4 furnaces for glass production**:

- **opal glass**, in continuous operation 24 hours a day
- **clear glass**, in continuous operation 24 hours a day
- **seta glass**, pot furnace
- **day tank**, furnace for production, depending on demand, clear (transparent) glass very high quality or color glass

Outstanding manual and technical skills of its blowers and specialist in glass processing provide the highest quality of our products. This allows Biaglass to create products with the highest degree of difficulty, eg. globes diameter of 600mm, glass shades with a diameter of 900 mm, 300x300 mm cubes, tubes with a diameter of 250 mm and a height of 670 mm or 190 x 1000 mm. We are also able to produce products length up to 2500 mm.

Most of its products are made on special orders of the biggest world's lighting manufacturers as well as individual designers. The range of the company's services includes also the possibility of the production of wooden and metal molds.

Alma Sotapharm

Domaine Du Joncheray - B. p. 143
72400 La Ferté Bernard - France
Tel.: +33-2-43601280 - Fax: +33-2-43712392
E-mail: info@alma-sotapharm.com - **www.alma-sotapharm.fr**

Founded in 1972, **Alma-Sotapharm** is an company specializing in the manufacture of ampoules in the field of pharmacy, food, cosmetics and industry. Its headquarter is located in the French city of La Ferté-Bernard.
The Alma-Sotapharm proposes a wide range of clients and partners to the types of ampoules in order to make the best of products, injectables, buvables, cosmetiques, etc. .
The company also offers the cutting and forming of custom-made glass tubes for any industrial application.
Turning to innovation and the development of new products through its Research & Development department, Alma-Sotapharm has thus put on the market the ampoules operculées which are more particularly intended for food supplements.
Being a specialist producer for the pharmaceutical industry, the company deals mostly with two sections:
-Ampoules for the pharmaceutical and diet industries, mainly for drinkable products;
-Injection ampoules are packed in a clean room environment.

VERRETUBEX Sas

Rue des Réservoirs - F-28210 Nogent-le-Roi – France
Tel.: +33 - 2 - 37380838 - Fax: +33 - 2 - 37513673
E-mail: contact@verretubex.com
www.verretubex.com

Created in 1967 in Choisy-le-Roi near Paris, **VERRETUBEX** is animated from its creation by a spirit of ingenuity. Its founder, Miroslav HOSNEDL, invented and developed with its teams the first production equipment of the company. The company quickly acquired an excellent technical reputation.

In 2014 the company H-FINANCE, headquartered at Vésinet (Yvelines) in France, takes over all the assets and the VERRETUBEX business in October.

H-FINANCE creates VERRETUBEX INDUSTRIE and appoints François-Xavier Huille as its president, with a strong management team.

At the end of 2014, at the time of the takeover led by François-Xavier Huille, a new commitment policy was put in place within VERRETUBEX INDUSTRIE. This one puts in responsibility all the teams on the respect, on contract, of 100% of rate of service. The VX 100 commitment is born and formalizes the commitments of VERRETUBEX INDUSTRIE in writing to its customers.

Mobilized on a strategy of industrial excellence at all levels of the company, the company sets itself the goal of becoming the European reference in the production of tubular glass packaging in medium series.

VERRETUBEX INDUSTRIE has been a supplier to the pharmaceutical and cosmetics industry since 1967, that means being fully aware of the specificities and quality requirements of these major sectors of the industry. The range of products currently manufactured has nearly 500 references, all of which meet the definitions issued by its customers.

VERRETUBEX INDUSTRIE specializes exclusively in the production of stretch glass packaging. This technique ensures a constant thickness of the glass of the package. The stretched glass ensures the finished product a perfect transparency and without deformation, unlike molded glass for example.

Glass is a neutral product and remains the only product guaranteeing 100% neutrality. It does not generate any migration, unlike some composite products which are now close to the characteristics of the glass but cannot guarantee their total impermeability. This is the main reason for its success in the sensitive pharmacy sector.

This characteristic is also particularly appreciated by perfumery for its neutrality with regard to fragrances.

Glass is a 100% natural product. It is composed of sand, limestone and baking soda. It has the characteristic of resisting perfectly to the cold as to very high heats, without dilating or breaking.

VERRETUBEX INDUSTRIE has a production capacity of 120 million vials / year

Its industrial facilities include:

- 4 production lines dedicated to vials
- Clean room packaging
- Final / IQ cameras
- Online printing

VERRETUBEX INDUSTRIE has a production capacity of 250 million bottles and tubes / year

Its industrial facilities include:

- 22 production lines dedicated to bottles including 13 lines with packaging in the clean room class "100 000" and 9 lines with in-room packaging ISO 7 - CLASS C
- Dimensional Cameras
- Cosmetic camera & particles
- Online processing and printing
- Space dedicated to silicone products

VERRETUBEX INDUSTRIE has a production capacity of 100 million bulbs / year

Its industrial facilities include:

- 6 "vertical" production lines
- 6 lines with glass rod loader
- Clean room packaging
- 100% dimensional control
- Online processing and printing

Thüringer Pharmaglas GmbH

Schwarzburger Strasse 86 - D-98724 Neuhaus am Rennweg – Germany
Tel.: +49-3679-79150 - Fax: +49-3679-791550
E-mail: info@pharmaglas.de - **www.pharmaglas.de**

Thüringer Pharmaglas GmbH & Co. KG is a glass company located in Neuhaus am Rennweg (in the federal state of Thuringia, in central Germany).
Its range of products is quite wide: injection vials, screw vials, tablet vials, rimmed vials, snap vials, flat bottom vials.
Since over 400 years the history of the region around Neuhaus am Rennweg is related to the production and processing of glass in all of its facets. With the first concessioned glassworks in the valley of the creek Lauscha in the year 1597 the glassmakers Hans Greiner and Christoph Mueller laid the foundation for the glass production in this area.
Back in the year 1904 it was real hand crafting - this gave Thuringia the reputation to be the center of the glass manufacturing in Germany.
Between 1949 and 1989 a progressive nationalisation to the "VEB Glasverarbeitung Neuhaus" took place. With 1.200 employees working in 45 parts of the company the entire pharmaceutical industry of the GDR could be delivered.with vials and ampoules.
The foundation of the Thüringer Pharmaglas GmbH in 1990 was the new start after the reunion of Germany. First of all, it was a time of reorganisation, till 1993 the company was reduced from 45 to 3 effective company parts with about 120 employees.
Due to a change of the owner, which secured the preservation of jobs, the Thüringer Pharmaglas GmbH & Co. KG was founded in 2005. In consequence of many investments since 2006 in modern production lines, the company is able to raise the maximum annual production quantities up to 260 Mio. vials and ampoules.
The production and optoelctronic measurement technology meets the requirements of todays quality standards and secures a high level of manufacturing precisision.

Agrado S.A. has a solid experience in the field of manufacturing ampoules and vials for the pharmaceutical sector. Its current facilities, located in one of the best industrial parks of the south of Madrid, inglobe a total area of 6,700 m2, where stands the company's plant of 4,800 m2. Each and every one of the departments of the facilities has been designed according to the requirements of the pharmaceutical industry, on the basis of the different external audits realized to Agrado. Product handling areas controlled ISO-8, duly separate warehouses, quarantine zones and other departments, make the factory one of the most modern facilities of the domestic and international market. Through the years, starting from its foundation date in 1966, Agrado has achieved to stand out among the competitors turning into one of the leading companies in the pharmaceutical industry as much into Spain as internationally.
The glass ampoules are based on French machinery **Moderne Mecanique** MM-30 in the same manner as in vials, number one manufacturer worldwide since the 40s. The current capacity is **75 million ampoules per year** and it includes all market formats, from the opened ampoules to the closed ampoules ISO, and all intermediate approved formats for the pharmaceutical industry. All the company's production machines are constantly updated through a R & D department and through new equipment improved by the same manufacturer.

Our philosophy, based on total reinvestment of all our benefits for more than 40 years of experience and makes us one of the glass manufacturers of reference for the sector of packaging material for the pharmaceutical industry, is complemented with optimal facilities, machinery and constant application of R & D to all our production processes and quality.

Birgi Mefar Group

Ramazanoglu Mah. Ensar Cad. No : 20
P.O. Box 22, Kartal - Kurtkoy / Pendik - 34906 Istanbul – Turkey
Tel.: +90 - 216 - 3784400 - Fax: +90 - 216 - 3784411
E-mail: info@birgi.com - **www.mefar.com**

The **Birgi-Holding**, including three companies dealing with glass production, is situated in the city of Birgi near the west coast of Turkey and is well known for some of the finest examples of early Turkish architecture in Asia Minor. The tradition of pride displayed in the works of the old craftsmen of this ancient little town is reflected in the products of the BirgiMefar group of companies.
Starting in 1963 with the establisment of Birgi Sanayi A.Ş., and enjoying a vigorous growth since then, the group presently comprises several manufacturing, trading, distributing and service companies.
In June 2011, a controlling interest in the Group was acquired by Ethemba Capital and NBGI Private Equity under the new company called Mefar International.

The holding controls three companies: **Birgi** and **Mefar** for glass production; **Defar** as a logistics and distribution company. Here their details:

Birgi
- Founded in 1963
- Producer of tubular glass containers for pharmaceutical, medical, and cosmetic industries
- ISO 9001 certified by Bureau Veritas since 1996
- D.M.F. Type III numbers, approved and given by Food and Drugs Administration (FDA), in January 2006

Mefar
- Founded as a joint venture in 1985
- Toll-manufacturer of small- and medium- volume parenteral solutions, in ampoules, syringes (polypropylene or glass), vials and bottles, as well as sterile solutions in blow- fill- seal containers
- GMP certified by German and British Health Authorities
- Actively exports to the EU and other international markets
- Equipped with fully automatic production lines

Defar
Defar has been established in 2006 by BirgiMefar as a logistics and distribution company. The company management is based on good manufacturing and warehousing / logistics practices and BirgiMefar quality policies.

TECHNOSKLO s.r.o. is a glass company located in Držkov (Czech Republic).
TECHNOSKLO constantly develops and innovates its line of products on the basis of continuous identification of the customers' needs. Its highly sophisticated production, own research and development, high-quality marketing and experienced team of highly skilled employees in the production increase the added value of the products.
The company is profiled in four basic production areas:

- **Laboratory glass**;
- **Technical glass**;
- **Health care products**;
- **Chandelier components**.

The long-term tradition of the company and successful export of its products to more than 80 countries worldwide confirm a high level of professionalism. **TECHNOSKLO manufactures over 2,500 types of glass products.**
The company has presented its high-quality manufactured products on the market for a long time. This has been assured through:

- Processing high-quality entry raw materials;
- Rigorous assurance of precision in production parameters (up to 0.005 mm tolerance);
- High qualification standards for production staff;
- Quality output control;
- Everything is supported by ISO certification for processes with regular annual renewal.

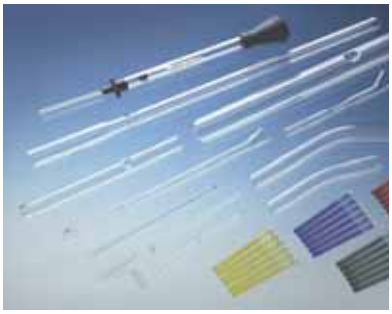

TECHNOSKLO owns a development platform, which provides:

- Production of machinery and equipment providing precision in production parameters handin-hand with sufficient productivity during processing;
- Preparation of foundations and samples for non-standard production orders;
- Regular revision of all production equipment;
- Flexible modification of production equipment during changes in order structures.

The certification system DIN EN ISO 9001:2008 is an inseparable part of the company production procedures. The quality of all manufactured products is guaranteed thanks to this system.

S Murray & Co Ltd

Holborn House - Old Woking Gu22 9lb Surrey - United Kingdom
Tel.: +44 - 1483 - 740099 - Fax: +44 - 1483 - 755111
E-mail: sales@smurray.co.uk
www.smurray.co.uk

S Murray & Co is a leading British manufacturer of laboratory glassware, surgical instruments and plastic containers. Family owned for four generations and represented worldwide, S Murray & Co has an international reputation for quality, service and value.

S Murray & Co was founded in 1915 by Samuel Muntz, the grandfather of the current Managing Director. Initially a manufacturer of medical glassware, the company quickly diversified into the manufacture and supply of products for the healthcare, medical, laboratory and domestic industries – both for the UK market and also on an international scale. It was Samuel who gave his name to the now internationally known and respected **SAMCO brand**. The brand is still manufactured in the UK today as the company enters its fourth generation of owner management.

S Murray & Co has been manufacturing laboratory glassware in England under the SAMCO brand since 1915. In 1941 test tube production relocated from London to Woking, still the site of production today.

Whether intended for school, laboratory, industrial or pharmaceutical applications, the SAMCO name is now synonymous not only with quality glassware, but also the complete range of laboratory consumables manufactured and supplied under the brand today.

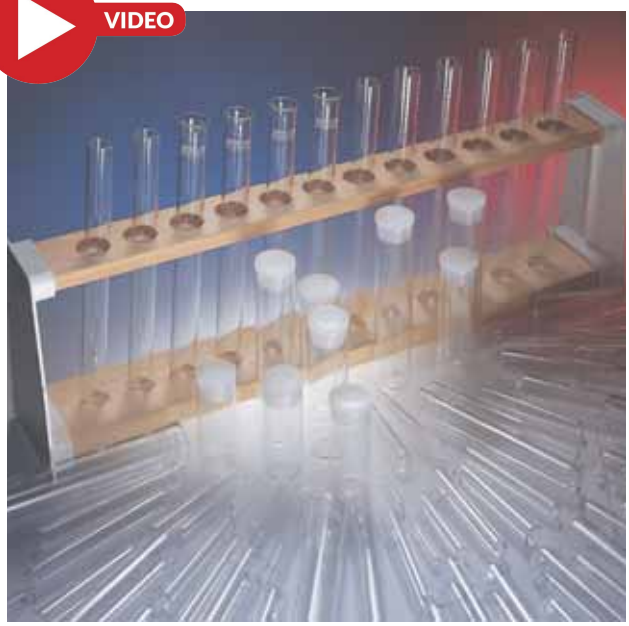

The company's offices were originally located at Farringdon Street, London, with the glassworks based at King's Cross. In 1941, in order to ensure the continuity of the supply of the company's health care products in particular, the factories and offices relocated to Woking, Surrey – still the base of the company's head office and glass manufacture today. The address Holborn House is a reminder of the company's London roots.

S Murray & Co has manufactured high quality surgical instruments since 1948, following the acquisition of Sheffield-based manufacturers George Gill & Sons, who in turn had over 80 years' experience of surgical instrument production. The subsequent acquisitions of Nowlin & Son in 1990 and Heeley Surgical in 1999 saw the range of own-manufactured instruments expand significantly and in 2003 the company relocated to a brand new, purpose-built, 10,000 sq ft factory, still in the Sheffield area.

The company's involvement with plastic bottles began in 1963, through a distribution agreement with Fibrenyle Ltd of Beccles. In-house manufacture began in 1984 and expanded in 1989 with the acquisition of blow-moulding and printing specialists Miller Mouldings Ltd. The company's range of products expanded in the 1990s as S Murray & Co became the principle supplier to The Body Shop through their formative years.

In 2001, production relocated to a brand new blow-moulding factory, situated alongside the glassworks at Woking. Still a British manufacturer, S Murray & Co is proud to supply a number of household brands today.

Vidrul is leader in glass production in Angola (the company is located in Luanda). It supplies the largest national companies and the most important global brands. Led by a Franco/Angolan partnership, Vidrul has shown unprecedented growth, with **two furnaces and four production lines** to meet increasingly demanding markets, breaking records each year for the manufacture of bottles for beer, juices and spirits.

Vidrul has more than 50 years of history, with unique experience that motivates us and demands high levels of technical and human rigour.

With a second furnace in operation, it's a renewed company, optimistic and prepared for an increasingly demanding and professional future. Vidrul counts on around five hundred employees, technicians and specialists, who every day demand of themselves constant rigour in the improvement of the manufacturing processes.

After a thorough process of modernization, Vidrul has increased the production to very significant numbers, becoming a reference in sub-Saharan Africa and one of the largest exporters in Angola.

The company has been increasingly achieving results that favour local development, creating jobs, boosting partners, leading a business dynamic that is already projecting Angola beyond borders.

Vidrul is already a reference in the Angolan industry, gaining market share at a rapid pace. Its glass containers protect and preserve the original and unique characteristics of the customers' products.

The quality and versatility of the manufacturing process, allows for an infinity of options that can be tailored to the needs of the Angolan food industry, and which offer huge potential for export.

Majan Glass Company

P.o. Box 17, Sohar Industrial Estate - 327 Sohar Oman
Tel.: +968 - 26751654 - Fax: +968 - 26751658
E-mail: info@majanglass.com
www.majanglass.com

Majan Glass Company SAOG was promoted in the year 1994 and established in the year 1997 with a sole objective of catering to the huge demand for Glass Containers within Sultanate of Oman. The company strated the commercial production in the year 1997. The Project was envisaged to cater to the needs of Soft Drink, Food & Beverages Industry sector mainly within the Sultanate and was promoted by leading and well reputed Industrial groups and by well known and respected personalities of the Sultanate. The Company is a publicly listed on the MSM and with the Ministry of finance, Sultanate of Oman holding share of 75.3 % and balance by the Public. The Company's shares are listed on Muscat Security Market.

Majan Glass is located at Sohar Industrial Estate which is about 200 kms away from Muscat and Dubai, is one of the most high-tech manufacturing companies in the Sultanate. The Company has installed capacity of producing 250 MT per day of Glass and has 2 Furnaces, five Production Lines and equipments designed to produce Glass containers in 88ml – 1000ml range, in different sizes and in Flint and coloured glass. The Plant is put up with a "State-of-the Art Technology" with latest up to date modern Equipments available in the Industry supplied by well known Equipment manufacturers like **Emhart Glass** – Switzerland, **BDF Industries** – Italy, **Ernst Pennekamp** – Germany, **Antonini** - Italy, **Raute Precision** Industrial Weighing – Finland, **Emmeti** – Italy, **AGR International** – USA and **SGCC/TIAMA** – France to name a few.

The initial Project was completed at the cost of RO 11.01 Million i.e. approximately USD 28.4 Million and the Plant was made operational in March 1997. The company is currently producing Empty Glass containers and Jars for various Soft Drinks/Food and Beverages like Colas, Juices, Ketchups, Sauces, Mayonnaise, and Malt Beverages etc. Majan Glass caters to most of the Glass Container/Jars requirements of the Sultanate and also exports its Glass Containers to Countries in Middle East, Far East other than all over GCC region.

The company has improved its performance since its inception and has now firmly turned around. Since year 2004, the Company has started making Net operational Profits. The turnaround was made possible due to implementation of Restructuring Plan put forward by the Govt of Sultanate of Oman in year 2005 and with the help of several stringent measures taken by the Management under the dynamic leadership of the Govt. appointed Steering Committee Members and General Manager for revival of operations.

Majan Glass has registered Sales turnover of 63,832 MT during year 2009 and achieved Gross revenue of RO 10.634 Million during that year.

The Company is approved Empty Glass Containers **supplier to Pepsi Cola International and Coca Cola International worldwide**. The Company has received Certification for ISO 9001:2008 Quality Management Systems and ISO 22000:2005 Food Safety Management Systems. The Company also has been bestowed with "Omani Quality Mark" by Directorate General of Specifications & Measurements – Ministry of Commerce and Industry- Govt. of Sultanate of Oman.

Majan Glass is managed by experienced professionals from the Industry and all of them work as a well-knit group to offer the best quality products to the customers. The Company also gives preference and utmost importance to train and recruit Omani citizens at various levels in the Organisation. The Company presently has about 36% Omani employees out of the total workforce of 168 employees, and is led by Mr. Ramesh Mani – Chief Executive Officer who reports to the Board of Directors comprising of representatives from well known business houses, Banks and Governmental agencies.

Consol Glass (Pty) Ltd. manufactures and markets glass packaging products. It offers bottles, jars, and glass products for wines, food, spirits, alcoholic beverages, cosmetics, fruit juice, mineral water, pharmaceutical, and tableware markets in South Africa and internationally. The company also produces silica sands for external markets. It sells its products through its shops, as well as through distributors and online. Consol Glass was founded in 1946 and is based in Johannesburg (South Africa). The company produces up to a million tons of glass annually—the equivalent of around 4 billion glass containers. To gain a clear view of its supply chain across multiple locations and ensure that processes run efficiently at all times, the company relies on a comprehensive suite of SAP ERP, logistics and analytics applications.

It has manufacturing sites in Western Cape, Midrand, Johannesburg, and Germiston, South Africa; and Kenya. Consol Glass (Pty) Ltd. operates as a subsidiary of Consol Holdings (Proprietary) Limited.

These sites produce a range of glass packaging for the food and beverage industries inclusive of the beer, alcoholic fruit beverage, wine, fruit juice, soft drinks, mineral water and spirits markets. Consol Glass has also acquired a majority shareholding in Glassforce, Nigeria, with a manufacturing plant located in Aba which produces glass packaging for the food and beverage industries, including beer, as well as the pharmaceutical industry. Its portfolio has also expanded over the years to include packaging for the pharmaceutical and cosmetics industries – serving a wide range of local and international customers.

An unwavering commitment to quality and world-class in-house expertise, coupled with a customer-centric approach to providing specialised, turnkey solutions to packaging requirements, has ensured the company's expansion and investment in capacity and infrastructure.

Saudi Canadian Glass - trademarked as Crystal Glass - is a leading glass manufacturer that was founded in June 2007 with a total capital investment of 55 million Egypt pounds. The company, with its headquarter in Cairo, celebrated its start of production at the beginning of May 2009. In between, plant, buildings, machinery were designed, built or purchased according to the latest technology standards. High skilled labor was chosen to run these huge premises in a well controlled and managed manner.
Tea cup, sugar bowl, crystal mug and water cup are the main highlights of its production.
During the mean time, the company's production is being sold and distributed around the four corners of Egypt. In addition, it is engaging in long term exporting strategy that will spread the production outsidemthe country.
Some of the countries the company is already exporting to, includes but not limited to Syria, Lebanon, Morocco, Sudan, Libya, Palestine and Romania.
Saudi Canadian Glass is committed to increase the quality of production through two main processes:
- increasing the technical expertise of labor through frequent and high end training;
- always allowing implementation of the latest technology advances in the lines of production.

Noritazeh Glass Company (Private Joint Stock) is considered as one of the largest manufacturers of patterned glass in Middle East. With over 50 years of trading experience from its founders - M.N. Kalafchi and partners - Noritazeh was established in 1997 and rapidly launched its first phase of production with a 30 metric ton furnace. Soon after shaking the industry with highest quality of glassware produced in Iran, Noritazeh formed a licensing agreement with SOGA Glass of Japan producing SOGA designs in Iran. Since 2008, Noritazeh Company continued to production independently from SOGA.

The main focus of Noritazeh Company is on production of:

- Giftware and serve ware
- Daily use soda lime glass
- Press serving platters and bowls
- Press tumblers and mugs
- Press n Blow tumblers and stemware
- Water and fridge jugs
- Centrifuge dinnerware

Many products of Noritazeh are exported to the most Asian, European, African and some southern American countries. Currently, Noritazeh Company using with homogeneous diversification strategy seeking for development of products and market.

In 2004, a 150 Ton furnace, the largest of its kind, was inaugurated in Iran and Noritazeh became the first manufacturer in Iran to automatically produce jugs and spin dinnerware.

Noritazeh today employs over 1,000 people directly in manufacturing and carries the most competitive and complete range of tabletop glassware in Iran.

With broad knowledge and understanding of local market demand and requirements, today Noritazeh is the leading tabletop glassware brand in Iran.

www.apgglass.com

Arab Pharmaceutical Glass Company (APG) is the largest manufacturer of pharmaceutical glass in the middle east. Its headquarter is in Suez (Egypt).
Through its advanced manufacturing technology, superior technical expertise, APG's reliable quality and perfect services (focusing on aftersale services), has gained the domestic and international customer's extensive trust.
Its products are sold to more than 100 local and regional pharmaceutical companies. Over 25 years of experience in the glass production field has earned APG an immense understanding of customers needs. This has led to greater flexibility in producing standardized & customized products.
Its range of standard and custom products covers the following categories in different specifications; Ogivals, Verals, Vials, Drops, Jars, Other Syrup Bottles, Juice bottles and Foodstuff jars.
APG has invested extensively in modern manufacturing tools & production infrastructure to meet and exceed the needs of its quality conscious customers.
APG modern facilities include: electronically controlled batch house, glass melting furnaces, 6 automated production lines, electronically controlled state- of-the-art forming machines and inspection machines.
Using the latest technology that is being handled with professional staff, APG is able to produce **1.25 million glass bottles and vials every day throughout the year**.
APG main strategy was built on customers' needs and expectations, through which the company was able to achieve sustainable development and strong market presence.

The **Razi Glass Group**, located in Tehran, is one of Iran's leading manufacturers of packaging and pharmaceutical glass aimed at serving both the national and international food and drug markets.
The use of state of the art technologies in glass production has given the Razi Glass Group an edge in the Iranian market by offering superior products that equal or better foreign imports. Driving down the costs of production, including labor and energy, has given the company an edge in the international marketplace by offering competitively priced high quality products.
The company is able to offer a variety of products and services to the customers and has two specific branchs – as a group – to create tailor made and unique molds to suite almost any need: **Razi Pharmaceutical Glass** and **Takestan Packaging Glass**.
Razi Pharmaceutical Glass was founded in 1993 aiming to produce pharmaceutical bottles to supply the needs of local market so that after utilization all imports of pharmaceutical bottles were stopped. This branch of the group is now exporting to many foreign countries.
Takestan Packaging Glass was founded in 1997. It deals with packaging glass, and its furnace has a production capacity of 40.000 tons per the year.

RAK Ghani Glass LLC

P.O.Box 6672 - Al Jazeera Al Hmara - Ras Al Khaimah
UAE - United Arab Emirates
Tel.: +971 - 7 - 2444524 - Fax: +971 - 7 - 2434719
E-mail: info@rakghaniglass.com - **www.rakghaniglassllc.com**

RAK Ghani Glass LLC is a venture between Ghani Glass – Pakistan (market leaders in glass containers, float glass and value added glass manufacturing in South Asia), **RAK Investment Authority – UAE (investment wing of Government of Ras Al Khaimah), JS Group – Pakistan (one of the leading investment groups of Pakistan engaged in number of businesses) and Swicorp – KSA (Saudi based experts in financing,** investment and strategic planning with projects running globally). Experts from the fields of glass industry, packaging, finance, investment and strategic planning from around the globe are committed to deliver the best glass packaging for pharmaceutical brands of the world.

Located most strategically in United Arab Emirates (near Dubai – the global business hub), RAK Ghani Glass is supported by the business friendly economic policies of UAE, which features an enviable infrastructure of swift communications, modern network of roads and most of all the freight friendly sea port for easy global exports and other support facilities that are extremely reliable and one of the best in the world. Glass packaging by RAK Ghani Glass is shaped with comprehensive quality assurance, according to international glass containers manufacturing standards and procedures. Commitment to quality and customer care has enabled the company to start achieving dominant market shares in it targeted areas of GCC, Europe, Africa and Asia and achieving high customer satisfaction levels. The quality centered approach is evident from the fact that RAK Ghani Glass is fulfilling the glass requirements of numerous satisfied customers globally with regular exports to over 30 countries.

With the technical expertise from Ghani Glass Limited, RAK Ghani Glass is positioned to develop as one of the leading pharmaceutical glass packaging manufacturers, globally. The company is producing and developing European quality light weight pharmaceutical glass containers ready to be delivered at the doorsteps of GCC, Middle East, Asian and European pharmaceutical companies. RAK Ghani Glass is the only plant in the MENA region, featuring a certified Class 100,000 Clean Room Facility, giving it a strategic and competitive edge over other glass players of the region. The alpha pharmaceutical amber glass containers being produced at RGG are ready and safe for filling lines of the pharmaceutical companies.

Since its inception, which is recent, RAK Ghani Glass has earned its repute and is on the way to getting its brand name registered as the leader in the container glass industry not only in the region but globally. Featuring highly sophisticated plant, state of the art manufacturing facilities, latest machinery, incessant R&D, steady innovations and provision of value added glass containers fulfilling customized demands of international pharmaceutical customers to their ultimate level of satisfaction, the company is emerging as a promising brand name amongst the global pharmaceutical glass manufacturers RAK Ghani Glass possesses a strong technology base with well trained human resource in all divisions for design & engineering of projects, products and processes in all its areas of interests. **RGG is a 40 KTPA plant, producing 600 Million (p.a.) light weight pharmaceutical glass containers** of European Standards, as per latest NNPB technology and according to desired sizes and shapes of its pharmaceutical customers. The plant is fully equipped with latest machineries and covers all relevant international accreditations and quality certifications, which are required by the pharmaceutical companies, globally and is a pre requisite for exports to European markets.

Manufacturing facility being located in almost the virtual center of the global map, RAK Ghani Glass's reach on the world wide level is superlative, giving it an edge over sundry competitors. Its glass plant's location in the central business mainstream of UAE, supported with highly flexible and friendly economic, labor and export policies, gives the company an extra boost to deliver extra value with world class quality, while promising competitive prices.

Orora Global Head Office

109 Burwood Road Hawthorn VIC 3122 – Australia
Tel.: +61 - 3 - 9811 7111 - Fax: +61 - 3 - 9811 7171
www.ororagroup.com

With 40 manufacturing plants and 87 distribution centres across seven countries and 6,200 team members, the Australian **Orora Group** supplies packaging products and services to the grocery, fast moving consumer goods and industrial markets. The company is is headquartered in Hawthorn, an inner suburb of Melbourne.

Orora works closely with its customers to provide an extensive range of tailored packaging solutions. This includes the design and manufacture of packaging products such as glass bottles, beverage cans, corrugated boxes, recycled paper, cartons, multi-wall paper bags and point-of-purchase displays. The company also offers broad end-to-end packaging solutions, including global product sourcing, distribution, design, printing and warehousing optimisation. Every day, millions of consumers buy and use goods in packaging designed, developed, produced or supplied by Orora.

Orora's Innovation & Design team combine brand and design knowledge with manufacturing intelligence. This approach to innovation ensures Orora produces packaging that delivers superior commercial outcomes.

The Australian business group is focused on beverage packaging within Australia and New Zealand. The North American business group is focused on providing total packaging solutions in the USA, Canada and Mexico. It also has integrated corrugated sheet and box manufacturing and equipment sales capabilities.

Orora's customers include some of the world's best known brands. In Australia and New Zealand it partners with customers in the food, beverage & industrial markets, and in North America customers include those in the industrial, food, warehousing and shipping, technology and healthcare industries.

Rockwood & Hines Glass Group Co. Ltd.

Room 2528, 6th Floor, Block 2, No.20 - Xuhong Middle Road
Xuhui district, Shanghai - China - Tel.: +86-21-34610550 - Fax: +86-21-34610553
E-mail: export@rockwood-glass.com - **www.rockwoodglass.com**

Established in 2005, **Rockwood & Hines Glass** China is a subsidiary of European based Rockwood Hines Ltd. This Asian-based arm of the business caters to the needs of global clients in their glass requirements.
The company, with its headquarter located in the city of Jiaxing, is the largest glass factory in China with **16 furnaces, 12 fully automatic lines and 10 semi-automatic production lines, a Joint venture between a French and Chinese company**.
Rockwood & Hines Glass produces super flint glass of the highest quality, comparable to what Saverglass or Saint Gobain would supply in France. Already many European or USA customers moved from these above mentioned companies to produce with it.
The production includes glass bottles and containers for drinks, perfumes, and other specialities.

Custom made glass bottles is Rockwood's specialty. Most of its clients based in USA, Latin America (Brazil, Venezuela, Columbia, Cuba), Dubai, Europe (France, Italy, Germany, United Kingdom) choose to go with a customized and personalised glass mould. This mould and glass bottle design is private and exclusively owned by our customer's brands. Rockwood offers European know-how and technology as well as artistic inspiration for glass bottle design and manufacturing. Many of its competitors based in China and around the world have a standard glass bottle catalogue.
Producing bespoke bottles is also an area of specialization for Rockwood. Whereas most bottles purchased in the EU/US are standard stock products, 90% of the bottles the company makes are custom made.
Its high quality, flexibility, reactivity and competitive prices have projected the company among the top glass manufacturers in the world. It does export to major companies in the USA, Europe, South America, Japan, Middle east: over 60 different countries sell bottles around the world that have been produced in its glass bottle factory in China.
The key advantages of Rockwood & Hines Glass are:

- Super flint glass quality, flint glass, amber glass, blue or green glass;
- A 13 to 28mm crystal clear glass slug at the bottom;
- Any embossing or debossing name or logo in the glass FREE of charge;
- Minimum quantity for custom made bottles: 20 000 bottles; (the bigger the order the lower the price);
- Serigraphy or silk screening, frosting, spray paint and sand blasting are in addition and available as decoration for your bottles.

Koa Glass Co., Ltd. it's a leading glass container manufacturer for cosmetics, pharmaceuticals and specialities in Japan. The company has combined reliability and performance for its many customers as a glass bottle manufacturer for nearly 70 years since its establishment in 1943 in Tokyo, the city where still today its headquarter is located.
The company continues to produce bottles for cosmetics and glass containers that go on to be used in various ways, but also has branched out into fine ceramics products in recent years, and they too are becoming a pillar in its enterprise. Exporting countries are more than 25, in North America, South America, Europe, Asia, Oceania and Africa.
The production embraces a lot of variety of glass solutions; the most important are:

- Mini Bottle
- Nail Enamel Bottle
- Lotion Bottle
- Pump Bottle
- Cream Jar
- Fragrance Bottle
- Pharmaceutical Bottle

The company contributes to environmental preservation and saving resources on the earth through its various activities to reduce environmental loading and sustainable society.

Located in Johor Bahru, **O-I BJC Glass Malaysia** is a leading glass container manufacturer in Southeast Asia. The company was incorporated on 15th May 1961. Over the years, it expanded from 1 furnace operation to 3 furnace operation producing different size containers and jars for the diverse customers.

O-I BJC Glass Malaysia is owned by Owens-Illinois Incorporation (O-I), world largest glass containers manufacturer and Berli Jucker Public Co. Ltd (BJC), Thailand's leading commercial conglomerate.

With three furnaces and eight production lines the company is renowned for working at optimum speed and efficiency. These quality glass bottles and jars have helped enhanced the image of their customers' brands.

O-I BJC Glass Malaysia offers the solution to packaging needs by delivering high levels of service, quality, security of supply, innovation, new product development and sustainability in the glass manufacturing industry. The services provided are able to assist customers in every step of the process, from designing and manufacturing to order fulfilment, storage and delivery.

Combining this with ability to produce diversified glass containers of various designs and sizes in amber, green and flint has won the support of multinational customers from the beer, beverage, liquor, food and sauce and pharmaceutical industries.

As far as **Glass Making Process**, O-I BJC Glass Ma-

Your glasswork is not listed? Ask to marketing@a151.eu

laysia has different services:

The Glass Recipe
O-I BJC Glass Malaysia uses all natural raw materials - silica sand, limestone, soda ash and recycled glass (cullet), in its glass recipe or batch mixture. Once combined, these ingredients are transferred to the furnace for melting.

Melting
The furnace heats the batch mixture to about 1,500 degrees Celsius or 2,700 degree Fahrenheit, creating molten glass.

The 'Gob'
The molten glass is conditioned from the furnace, cooled to a uniform temperature and cut into "gobs". Each gob will form a single glass container.

Forming
Gobs are diverted into forming machines where they are molded into glass containers.

Annealing
Formed containers pass through the lehr, where they are reheated and gradually cooled to relieve any stresses in the glass. This conditioning step strengthens the glass containers and helps prevent breakages.

Inspection
Each glass container undergoes a rigorous inspection process to ensure the highest quality. Any rejected containers are remelted as cullet.

Packaging & Shipping
Glass containers are stacked on pallets with corrugated sheets between each layer. The pallets are then strapped and shrinkwrapped to ensure stability before shipping it out.

Tel.: +63 - 2 - 7024200 - Fax: +63 - 2 - 6376368
E-mail: actan@smg.sanmiguel.com.ph - **www.smypc.com**

San Miguel Yamamura Packaging Corporation provides total packaging solutions across the globe: a wide range of quality products - glass, plastics, metal, flexibles, PET, molds, and paper - and reliable services and technical expertise. The company's headquarter is located in Mandaluyong City (Philippines)

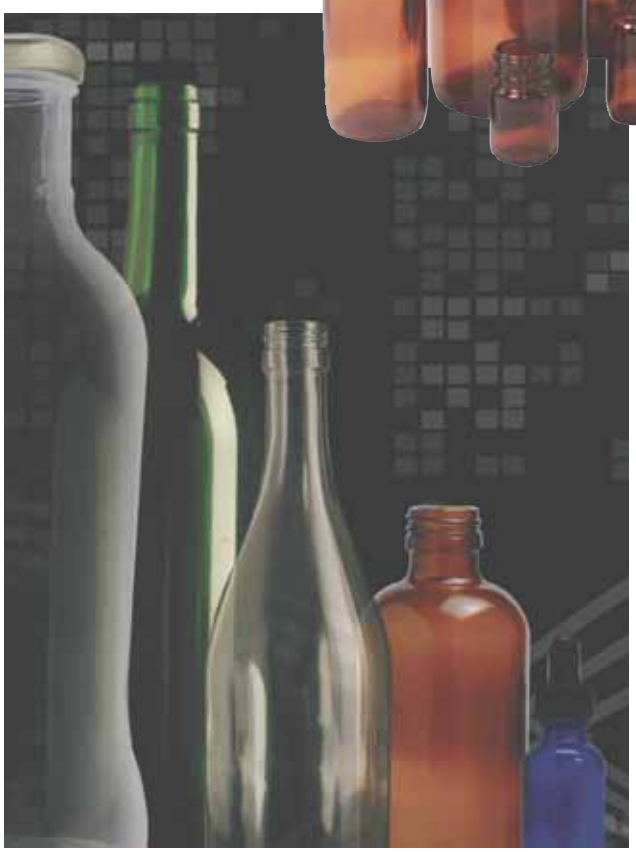

Its plants and facilities provide a dynamic, strategically accessible, and world-class supply base, creating a sustainable competitive advantage in the global business.

San Miguel Yamamura Packaging Corporation combines the competencies of two recognized Asian brands - one of Southeast Asia's biggest conglomerates, **San Miguel Corporation and Japan's Nihon Yamamura Glass Company, Ltd.**

The company's technology allows production of one-way, environment responsive, lightweight glass containers that are of the same quality and strength as the heavier kind but are easier to transport and handle.

Premium, efficient, and unique glass containers are popular choices for attractive and image-enhancing solutions in displaying, preserving, handling, and transporting products.

Another part of the production involves **Applied Color Label (ACL)**: decorated bottles, novelty bottles, bottles, custom-designed bottles and jars, and stock glass bottles in amber, green and flint.

Being one of Southeast Asia's glass producers with the most modern glass manufacturing facilities, San Miguel Yamamura Packaging Corporation provides faster decision-making and product development lead-time.

Glass mold production with robotics technology and CAD/CAM System will allow customers to view and enhance bottle designs on the spot.

Thai Glass Industries has operated the glass packaging business in Thailand for 60 years. Thai Glass Manufacturer Co., Ltd was established by joint venture with Australia Consolidated Industries Co., Ltd., which is recently Owen Illinois Inc or O-I with supporting in modern technology, Thai Glass Industries is the first glass packaging factory in Thailand and Asia that uses automatic machine. Presently, the company's capacity is 2,400 tons per day.

This came about at apoint where **BJC held 98.59 per cent of the shares in TGI, expands business by joint venture with Owen Illinois Inc.** the world leader of glass packaging, to establish **Berli Jucker Public Company** (BJC) as production base in Asia (with headquarter in Bangkok). With acquisition of Malaya Glass Products in Thailand, Malaysia, and Vietnam, BJC can increase production capacity of glass packaging, and this is an important step of BJC and TGI in penetrating glass packaging business in South East Asia.

The company's inception was first created through a partnership between the Berli and Jucker families. This was the first of many strong partnerships that led to one of the Kingdom of Siam's earliest and most successful trading companies.

Originally, BJC engaged in rice milling, mining, timber, shipping, importing, and other activities that laid a foundation instrumental for Thailand's progress towards an "industrial" stage. By carefully selecting and nurturing its local and international partners, BJC continuously prospered over the years to become a major Thai import and export firm. After World War II, BJC diversified its operations into manufacturing, packaging and distribution.

BJC continued to grow, increasing its BJC Cellox capacity up to 45,000 tons per year by 2006, thus becoming the largest producer of tissue in Thailand. With more capital, it also acquired in 2007 a 50 percent stake in Thai Beverage Can Co., Ltd., Thailand's leading manufacturer of aluminium cans and can ends, and in the next year also acquired a 100 percent stake in Jacy Foods Snd Bhd, a Malaysian manufacturer and distributor of potato chips and extruded snacks both in its domestic market and other Asian countries, including Hong Kong, Singapore, the Philippines, and Brunei. From 2008, the company was also able to increase its production capacity of glass bottles by constructing a new furnace capable of producing 434 tons per day.

Product Lines:

- Packaging Supply Chain: Glass Container, Aluminum Can, Rigid Plastic Container
- Consumer Supply Chain: Snack, Beverage, Candy, Dairy Products, Soap, Shower, Baby Care Products, Cosmetics, Tissue Paper, Cleaning Products, Integrated Logistics Solutions
- Healthcare & Technical Supply Chain: Pharmaceutical Products, Medical Supplies and Equipment, Galvanized Steel Structures, Electrical and Engineering Equipment and Services, Graphics Products, Specialty Ingredients
- Others Business Group: Stationery Products, Bookstore, Drug and Health Store, Convenience Store in Vietnan.

JSC Asl Oyna is the guiding glass container manufacturer in the region of Central Asia (located in Tashkent, Uzbekistan). The plant was commissioned in October 2009 in close cooperation and support from the company "Heye International" (Germany).

The company **can produce up to 140 thousand tons of glass per day and 108 million units of finished products per year**. It was originally planned to produce only container colorless color, but the increased demand caused by the production of glass containers of brown and green. The company is able to produce bottles of any capacity from 275 ml to 1 liter, and various shapes. The company has a presence in more than 150 different forms and types of mold sets that allow producing more than 200 combinations of glass, as well as equipment for the restoration of forms. The main competitive advantage from the first years of its existence the company has been equipping modern equipment from leading European manufacturers. In addition, the advantages of the company are such factors as: the continuous improvement of the production and management process, the exchange of experience with leading European companies, search and innovation in the process of glass production.

Since 2011 the company has implemented the ISO 9001 quality management system under the international standard: 2008. In February 2014 in the conference hall of JSC Asl Oyna a solemn presentation of the factory of the international certificate of conformity Management System ISO 9001 Company Quality: 2008. During the ceremony, which was attended by heads and employees of the plant part, as well as representatives of the international certification body "Russian Register", summed up the implementation of the system, discussed the effect of its introduction, praised the work done.

Since March 2014 the plant began production of lightweight bottles **NNPB technology**, which allows reducing bottle weight by an average of 20-25%. The introduction of technology has been made possible through close cooperation with the world's leading manufacturer of glass equipment - now **HEYE International** (Germany).

For the purpose of this project were carried out tenders for the supply of the main technological equipment among the leading manufacturers in Europe and the US glass industry. In accordance with the technical requirements of the project, based on the results of tenders were selected company **Stara Glass** (Italy), **Bottero** (Italy) and **EME Maschinenfabrik** (Germany).

ANHUI DELI HOUSEHOLD GLASS CO has its headquarter in Fengyang (China), quite popular as the "hometown of quartz sand". It is the first listed household glass company in China.

The company has **twelve furnaces**, which include four furnaces that are over fifty square mt., thus making it the only company in China whose daily capacity is more than 650 ton. With a complete range of advanced machine blown, machine press and man-made production lines. And more than **2000 employees,** which includes more than 500 professional and technical personnel. Its annual selling is more than a billion, and share value is over five billion.

The production covers cover top, middle, low level in market: meals cups, kettles, chalices and various kitchen supplies.

ANHUI DELI HOUSEHOLD is the only Chinese company in glass industry who owns provincial level of technical research center and engineering research center, as well as lab test and pilot test laboratory.

With 25 years of experience, **KIM Glass Indonesia** is established as one of the leading table glassware manufacturers in Indonesia. At KIM Glass the commitment is to produce and deliver quality products, customer satisfaction and product diversification. Its headquarter is in Balaraja, a town and district within Tangerang Regency in the province of Bante.

KIM Glass Indonesia **employs more than 800 personnel and produced an average of 180 tons of glassware daily at full capacity**. The company exports to more than 30 countries including South East Asia, U.S.A, Japan, Mexico, Brazil, Argentina and Turkey.

For the big chain retail customers, KIM Glass Indonesia has underwent and passed a series of audits to verify that the factory complies to the social, health, safety and good manufacturing aspects of the overall working conditions.

The glass production involves many kind of items, such as:

- Bowl
- Plate
- Mug
- Tumbler
- Cup and Saucer
- Miscellaneous

Taiwan Glass Group has been established for 50 years with dedication to its management philosophy, persistence of advanced technology and total quality control in order to provide high-quality products to customers.
Since it was founded in 1964 by Mr. Ling Yu-chia, the Taiwan Glass Group has transformed itself into a world-class glass manufacturing giant through its global outlook, attention to its area of expertise, its solid business strategy, and sound financial foundation. The Taiwan Glass Group established the Taiwan Glass China Holding Ltd. in 1993 in order to increase its scale of production and boost its domestic and foreign competitiveness, and began expanding its role in the Chinese market through a series of plant development projects in China.
In order to strengthen economic cooperation across the Taiwan Strait and support the Chinese government's development plan for the western part of the country, the Taiwan Glass Group decided in 2002 to establish the subsidiary **TG Chengdu Glass Co., Ltd**. in Chengdu's Qingbai River Industrial Area. Thanks to government support, good infrastructure, and a favorable environment, TG Chengdu Glass has grown steadily over the last six years; it currently has investment of US$195,280,000, occupies 46 ha, and has 1,300 employees.
TG Glass Containers are non-porous, with exceptional transparency to allow your products to show their true colors. High tensile strength means these containers retain their shape, resist shattering, and are easy to seal, preserving flavor, color and aroma for the long term. In addition, glass containers can withstand gradual heating without losing their shape. With a wide variety of bottle shapes, you can always find a TG container that will make your product look its very best.
All products are categorized by functions – Container (for liquor, wine, Oil, ecc.), Tableware (Bowls and Plates, Wine Glass, Candleholder, ecc.), Kitchenware (Tea Pot, Glass Cover, Bubble Ball, ecc).
Looking ahead to the future, TG Tianjin Glass will continue to develop new types of glass manufacturing technology, focus on the R&D and production of high-quality glass, and respond to global aesthetic trends. It will also employ advanced management concepts, absorb highly-competitive aesthetic designs from around the world, and offer highly competitive customized products with superior quality, reasonable prices, and excellent accompanying service.
After the global financial crisis began in 2008, TG Chengdu Glass relied on its sound finances to continue to install a superior float glass production line with a daily melt capacity of 900 tons and a high-end low-E gloss production line with an annual capacity of 8 million m2. The plant has now began mass production on both lines. These two production lines have established TG Chengdu Glass as the largest float glass production facility in southwestern China.
TG Tianjin Glass's production line employs the world's most advanced float glass production technology, which was acquired from the British company Pilkington. The plant's main product consists of high-end transparent float glass. Annual production capacity is 200,000 tons, and annual sales are roughly ¥300 million renminbi. The glass thickness is 3-15mm, and maximum sheet size is 3300 x 5000mm. The plant's products are chiefly used to make high-end processed glass through coating, mirror coating, tempering, and auto glass processing. Due to high product quality, large amounts of glass are exported to eager foreign buyers.

Shandong Pharmaceutical Glass Company is the largest manufacturer of pharmaceutical glass packaging in China, and was established in 1970 with a registered capital of approximately USD34,781,096 and gross assets valued at over US$200million. The company possesses advanced manufacturing technology and expertise and its product range covers various containers used for the storage and use of medicines, vaccines and other pharmaceutical preparations. The headquarter is located in Zibo City (Shandong Province).
The range covers nine major series of 500 products with different specifications. Among them the molded glass vial and bottle are in conformity with USP Type I, II, III. The annual production of the leading products reaches more than 9billion pieces.
The company's products are sold to more than 1000 medical enterprises here in China, to many provinces, cities, autonomous regions as well as Taiwan. Shandong Pharmaceutical Glass Company exports more than 65 countries, including Korea, Pakistan, USA, Mexico, Spain, India, Philippines, Italy, Middle East Countries, Thailand, Vietnam, Syria, etc.
In details Shandong Pharmaceutical Glass Company manufactures:

- Molded injectable vial, USP type I,II,III;
- Glass tubing, USP type I;
- Ampoule, USP type I;
- Tubular vial for injection, USP type I;
- Amber glass bottle;
- Infusion bottle;
- Cosmetic bottle,(nail polish bottle, perfume bottle);
- Small food & beverage bottle;
- Butyl rubber stopper;
- AL-plastic multi-caps;
- Accessories for dropper bottle;
- Prefilled glass syringe;
- Dental glass cartridge.

Kapoor Glass India Pvt. Ltd. has been at the forefront of Ampoules & Vials production in India, across 3 generations, spanning 52 years of production. Its headquarter is in the Indian city of Mumbai.

The Kapoor family operates **two facilities for the production of High Quality Ampoules and Vials - Kapoor Glass (India) Pvt. Ltd. & Dinshi Ampoule Makers Pvt. Ltd.** Kapoor Glass is led by a team of strong leaders and engineers with the necessary attitude and aptitude to be able to produce only the highest quality product. The company imports the best quality Neutral Borosilicate Glass Tubing from leading producers in Europe, Japan & USA.

The company operates an ultra-modern facility producing Ampoules & Vials of the highest quality, using cutting edge technology. Majority of the production is exported worldwide to over 12 countries including the United States of America and other such tightly regulated markets.

Kapoor Glass manufactures high quality ampoules on latest European lines. All ampoules are produced with "Hot End" Closed Loop Camera Vision systems for inspection and dimension control to produce tolerances tighter than ISO standards. Robotic loading and automatic feeding of Glass tubes minimizes human intervention and improves yield and efficiency. Vials are produced with Japanese 'Hot End' Camera Vision systems for dimension inspection for all critical parameters.

Kapoor Glass partners with leading cosmetic companies to produce high quality, attractive and chic perfume samplers / testers. These come in a variety of sizes from 0.5ml to 10ml and can be decorated with high quality ceramic printing. The company partners with leading spray pump manufacturers to offer a speciality product that improves brand value and customer perception.

Sichuan Yibin Global Group is the backbone group company of China Wuliangye Group.
It is important part of the diversified development strategy of Wuliangye and a wholly state-owned subsidiary. The company is located in the city of Chengdu.
Sichuan Yibin Global Group is composed of eight subsidiary companies, including Chengdu Global Special-Glass Manufacture Co., Ltd. (Longquanyi District, Chengdu), Sichuan Zhongke Better Technology Co., Ltd. (Shuangliu, Chengdu), GLASS Glass Manufacturing Co., Ltd., Shenzhou Glass Co., Ltd., Teamwork Trading Co., Ltd. (Longquanyi District,Chengdu), Chengdu Huayu Glass Manufacturing Co., Ltd. (Longquanyi District,Chengdu) and Sichuan Mars Technology Co., Ltd., as well as state level research center and product testing center, etc. **The Company has the total assets of 2.56 billion Yuan and 7,000 employees**. It is a diversified modern manufacturing enterprise integrating research & development, design, production, marketing and international & domestic commercial and trading transactions.
Sichuan Yibin Global Group has advanced glass products testing equipment and R&D team. It has accumulated strong technical strength and advanced manufacturing processes during over twenty years of glass production and management. To further meet market needs, support power grid construction of China and build national industry, the Group introduced a number of international top class production and inspection equipment, including foreign advanced technologies of glass insulators (**Waltec and SORG from Germany, Antonini from Italy,** etc.) and established two glass insulator production lines with production equipment and technology of advanced international level and annual output of 9 million pieces of toughened glass insulators. The 70KN-530KN standard, anti-pollution toughened glass insulator and 70KN-300KN aerodynamic toughened glass insulator of the Company can fully meet the requirements of transmission line construction of different voltage levels.
Currently, the toughened glass insulators supplied to the State Grid, China Southern Power Grid and foreign users by Global Group, have been in safe operation in various 35KV-765KV Alternating and±800KV Direct current lines. The overall annual rate of self-explosion is controlled under one ten-thousandth. The product has completely covered the major foreign domestic power grid companies. A large number of glass insulator products of the company have entered the market, which can effective guarantee the safety and efficient operation of transmission lines and contributes to the technical strength and smart grid. The product quality has been fully recognized and highly valued by all users. The glass insulator industry has become a new growth point in the development strategy of the Group.
Sichuan Yibin Global Group implements the management philosophy of "basing on talent", possesses a batch of experienced, skilled, dedicated and responsible scientific research technicians and management personnel and has built a young workforce with knowledge and skills.
The Company has always adhered to reform & innovation and leapfrog development. Its business performance is impressive and its products have spread over the whole country and the whole world.

United Oriental Glass, established in 1972 by President Chung-Yi Lin, dedicated itself to the integration of glass process technologies. **The Group has each one factory in Taiwan and Shanghai** and enjoys a market share of 90% in both Taiwan and China in the field of glass cover OEM market for motorcycles and automobiles.

The Group integrated the three core technologies - mold development, optical design and glass process technology - successfully over the past 30 years and developed the optical thin-film coating technology in 2000. The Group further integrates this three core elements and the new technology to produce reflective components for data projectors and, thus, enter the optoelectronics fields successfully.

The Mold Business Division of United Oriental Glass is enriched with its experience accumulated over the past 17 years and is capable to develop molds for glass covers, plastic covers, reflectors, rear-view mirrors, and even optoelectronics products based on the drawings provided by customers.

The Group dedicates itself to the implementation of the management philosophy "Best Quality, Excellent Service", creates a premium enterprise culture, provides systematic training for cultivating the capability of perators an enhances its management capabilities positively. The time to market is shortened with the help of the strong technological background and the quick response capability so as to ensure the quality and lead time of the products and satisfy the various demands of customers.

These are the main company's products:

Glass covers for auto lamps

This product is a major part of auto lamps. Since glass covers must resist against the high temperature and rebounced gravels on the road surface, they must have the heat resistant and shock resistant capabilities. The pattern on the surface of glass covers is also very important for their quality, because the beam radiated from the lamp is distributed through the pattern. The pattern must be so designed that the illumination of the lamp should not be hindered and the sight of the drivers on the opposite lane should not be affected.

Mould for glass

The glass molds developed by the Company are mainly provided to the Glass Manufacturing Department of the Company for the production of glass materials for the glass cover and reflector. The molds are usually developed upon the request of customers and on their account, so the ownership of the molds belongs to individual customers. The accuracy of such molds is much higher than ordinary glass molds. If the pattern of the glass cover mold is not perfectly accurate, for example, diffusion may arise when the beam is reflected through the pattern and affect the sight of the drivers on the opposite lane. The accuracy of the reflector will also be affected if the mold is not accurate. The beam of the projector, for example, may not be fully reflected forward to the screen and an insufficient brightness may occur.

Reflex mirror for projector light sources

This is one of the major parts for the lamps of data projectors. The technological threshold of the reflector is high. Since the core temperature of the filament reaches up to 960 , the reflector must be capable to resist against a temperature of more than 450 . High precision is another feature that the reflector must have. The internal curved surface of the reflector must be capable to reflect the beam radiated from the lamp to the screen in front of the lamp (this is why the product is named "reflector"), and the five core elements - high precision mold technology, accurate optical design, heat resistant glass material, precision glass molding technology and optical thin-film coating technology - must be combined perfectly to produce the product.

Aspherical Pess Lens

The traditional headlamp is large in size and low in the light rate. The new projection headlamp, however, is better than the traditional headlamp in size, light rate, mechanical strength and designs. It is suitable for front fog lamps and the high and low beams of any double headlamp design. The aspherical pess lens is the major component of the projection headlamp. The Company acquires a perfect monochromatic on-Axis lens design by using advanced CAD operations, and meet the requirements for highly precise small reflectors with precise materials and forming technologies.

Dien Quang

125 Ham Nghi Street - 1 District, Ho Chi Minh City – Vietnam
Tel.: +84 - 1900 1257 - Fax: +84 - 61 - 836123
E-mail: info@dienquang.com
dienquang.com

According to the 2006 survey data conducted by AC Nielsen Company, Dien Quang is the top national brand in Vietnam in respect of brand awareness and customer trust in electrical products and equipment. Its rich production also includes bulbs made with glass tube.

In operation since 1973, with the headquarter in Ho Chi Minh (once Saigon), **Dien Quang** has specialized in lighting and electrical equipment, continuing commitments to provide the customer with high quality products. So far, Dien Quang has steadfastly pursued the intensive development in the chosen field. The company has incessantly invested in researching and developing high-technology lighting solutions and professional services in both civil and industrial projects.

With criteria "Safe-Saving-Environment Friendliness", Dien Quang currently provides the market with more than 1000 categories of lighting products and electrical equipment.

Main product lines such as: LED types; compact fluorescent lamps; Double Wing super-bright bulbs; tube fluorescent lamps; incandescent lamps; desk lamps and decorative lamps; fixtures and luminaires; civil and industrial downlights; heat-resistant sockets and plugs; dust-proof and water-proof lighting products in use of the civil and industrial works, agriculture and fishery.

With 5 international standard factories equipped with synchronous and modern production lines (including one factory in Venezuela), Dien Quang has ability to strictly control every production process from raw materials to finished products. Dien Quang is honored to have its products obtained many prestigious awards for good quality and brand such as CE Compliance with EU Safety Standards (CE mark), "Vietnam Energy Star" Trademark granted by Ministry of Industry and Trade, "Vietnam Green Label" for environment- and user-friendly products certified by Ministry of Natural Resources and Environment.

Yue Ho Glass CO. Ltd.

No. 60, Fu An Street Yingge Dist.
New Taipei City 239 - Taiwan
Tel.: +886 - 2 - 26796630 - Fax: +886 - 2 - 26702991
E-mail: yueho@yueho-glass.com.tw • **www.yueho-glass.com.tw**

Creating high quality products is the ultimate goal of Yue Ho Glass (New Taipei City, Taiwan). Its' actual profile is born from three different companies: in 1979 **Yue Ho Glass Co.** was established and started production of glass products; in 1988 **Yue Hwa Glass Co.** was established and started production of glass lenses for auto lamps and glass meter covers; in 1989 **U-large Industrial Co.** was established and started molding production for glass products. In 2000 the three merged into one firm (Yue Ho Glass Co.).

Through the years it has grown with many technological changes. For instance, in 1991 Yue Ho Glass introduced **DAITO, the electric furnace made in Japan**, and expanded the equipment with robot arms and automatic pressing machines.

In 2003 it added more electric furnaces and increased more production lines (with a total of nine production lines) to become Taiwan the largest glass factory for auto lamps in Taiwan.

After countless hardships and overcoming numerous challenges, via continuing technologies enhanced and market information exchanged among partners, the company has been devoting itself in promoting the added value of our products or reducing manufacturing costs by

Your glasswork is not listed? Ask to marketing@a151.eu

shortening processes.
Cohering full quality awareness of the entire members, it implement quality management throughout the enterprise.
According to ISO/ TS 16949: 2009 quality system, Yue Ho Glass established the quality manual covering all file records, programs instructions and the standard guidebooks to ensure the continued effective implementation.
Through the years Yue Ho Glass has been accredited to be a qualified supplier for big partners, such as Japan **SANYO Electric Co.** and Japan **Panasonic Corporation.**

The company presents a wide typology of products:
- LED street light & shades;
- Automotive lighting & lenses;
- Exterior Lighting & Shades;
- Optical illuminations;
- Blender Glass Cups;
- Household Appliance Glass;
- Meter Covers;
- Laundry Glass Doors;
- Molding Developments.

The most important facilities supporting the company's activity are:
- Electric Glass Melting Furnace
- NC Processing Machines
- Robot Arm Operation
- Electric Furnace
- 3D Optical Measuring Device

Vidrio Formas is a company located in Lerma (Mexico) that produces and sales glass containers since 1988. The company is specialized in manufacturing exclusive and generic glass containers with the best quality, service and price.

In 2004 the company has increased their installation capacity to 180 ton due the operation of an additional system of burners in the vault of the furnace. Utilizing the resources generated by the last 8 years of successful performance, and taking advantage of the favorable macroeconomic conditions at the moment, the business lives a new one financial restructures that permits to the Fund HMTF Inc. to be disinvested. In 2004 Vidrio Formas becomes 100% Mexican capital. The business is guaranteed like a world class producer, utilizing the most advanced technology of combustion in the market and achieves exceptional levels of quality and service recognized by its main clients.

The skilled personnel work closely with each and every customer to identify their requirements and providing containers that entirely satisfy their expectations.

Vidrio Formas manufactures glass containers for an important number of companies, also exporting to the United States, Central America, the Caribbean and all over the world.

Here's the main steps for the company manufactures:

RAW MATERIALS

The main raw materials that are used in the manufacture process of the glass containers are silica sand, soda ash, limestone, feldspar and other minor components. Vidrio Formas adds recycled glass (cullet). It is important to mention that glass is one of the few materials that can be recycled indefinitely. Raw materials are mixed and later on feed into the melting furnace.

MELTING

Raw materials are melted in a furnace at a temperature above the 2700 ºF. Once melted, the glass goes through the furnace throat arriving at the distributor and finally to the feeders. Vidrio Formas uses Oxy Fuel -Technology, which is a hi-tech process where an almost perfect combustion is obtained and practically there is no polluting emissions into the atmosphere. The feeders are used to prepare the temperature of the glass

GLASS CONTAINERS

The IS machine (Independent Sections) is the one that forms our bottles from the gobs. Inside the machine a series of similar molds in line are fed by with originating gobs of the forehearth.

ANNEALING

Once the glass containers are formed, they pass to an annealing lehr. Its function is to cool down the glass in a homogenous and controlled way to release the tensions and compression stresses in the walls of the containers and to avoid possible forces that could break it; some bottles take a different external treatments to give bottle's surface specific characteristics.

QUALITY

Bottles and jars are inspected by several manual and automatic controls of quality with the purpose of verifying that they fulfill the different specification: form, dimension, resistance, configuration, aspect, etc.

PACKAGING

At the end of the production line, and after checking the quality of the glass containers, they are packaging according to the specifications and requirements of the client.

Carib Glassworks Limited (CGL) is a member of the ANSA McAL Group of Companies with a rich history dating back to 1948. Its founding fathers laid the platform for a highly automated manufacturing facility, employing some of the region's best technical professionals. Its headquarter is located in Port of Spain, the capital city of the Republic of Trinidad and Tobago.

Growing strategically throughout and beyond the region, Carib Glassworks produces both standard and custom made containers in three colours – flint, green and amber.

Its commitment and dedication is driven by the knowledge that glass is the preferred packaging material for your health, taste buds and your environment.

Driven by customers' demands, Carib Glassworks continuously invest in people, install cutting edge machinery and technology and work towards new milestones in safety, quality and precision.

Carib Glassworks' priority lies in manufacturing glass products that fully satisfy customer and user needs in terms of safety, performance, durability and aesthetics. The glass production involves bottle for soft drink, beer, alcoholic beverages, juices and recipient for food.

www.rigolleau.com.ar

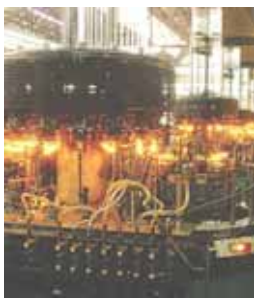

Rigolleau S.A. manufactures and sells glassware in Argentina and internationally. It offers cups, glasses, chopps, crockery, mugs and bowls, salad dressing products, and pitchers; and food packaging, bottles, and medicine packaging products. The company was founded in 1882 and is based in Berazategui, Argentina.

Today Rigolleau has a line of home products, composed of glasses, dishes, vases, ashtrays and other items for the table, distributed across the country and neighboring countries. It also provides packaging Rigolleau to major food companies, beverage, drugs and cosmetics and perfumery in the country and also from abroad.

The Company's main activities include the manufacture of glass bottles and containers, through three business divisions: Glassware, Containers and Promotional Glassware. Glassware comprises dishes, glasses, goblets, bowls, pots and jars, among others; Containers offers food containers and bottles for perfumes, cosmetics, medicines and beverages; and Promotional Glassware includes glass articles decorated with the brand of other companies. As of December 31, 2012, the Company owned such subsidiaries as **Amposan SA**, a producer of glass ampoules and injectable medicine containers. In addition, **Industrias Integrales del Vidrio SA** was the Company's majority shareholder.

Through the years Rigolleau has become one of the largest manufacturers of glassware in the country and Latin America, offering integral solutions to support its customers and consumers.

Employing more than 1000 people in a direct way Rigolleau is still an Argentinian company that is projected to the world and continues to invest year after year in order to achieve constant improvement in each process, to remain: "the symbol of glass."

In Blumenau-SC, a Brasilian city of great natural beauty, is located **CRISTALLERIE STRAUSS S.A.**, specializing in the art of manufacturing the crystal, technique and knowledge brought to Brazil in 1950 by German immigrant Karl Friedrich Eugen Strauss.

It was founded on august 5, 1983 by Karl Friedrich Eugen Strauss and his son, Frederico Werner Strauss, both with expertise in the field of crystal, with the main objective to have the best and best equipped factory producing lead crystal items, with content of 24% (PbO), only compared to the best in the world.

The key factors of great success are dedication and art employed in his work, produced by artisans with much experience and technique, blow and cut with hand, giving them a touch of class and art.

Professionalism, good taste, integrity and hard work are the ingredients for success and achievement of competitive markets and demanding consumers, in Brazil and overseas. These are the pillars that support the incredible performance of Cristallerie Straus S.A.

Mouth blown and hand-cut, Cristallerie Straus S.A. is the only factory in the Americas with know-how of producing the legitimate **Overlay Crystal 24% PbO, produced in the colors light green, blue, amethyst, green, ruby, light blue, yellow, black and red.**

This product requires the superposition of two types of materials: colored crystal and the transparent crystal. First, colored pieces are produced in a half moon shape. Starting the process of manufacturing, harvest with cane glassmaker the transparent crystal that is in the crucible foundry (pot which focuses the incandescent material) which then, is coupled within the colored part preheated. This done, it is brought back to a specific furnace to be heated until it reaches the ideal temperature to be blown by the artisan. After this conformation step, the piece will undergo several operations culminating in the choice of the cutting to be applied. At the stage of cutting, the artisan works the piece using a grinding wheel that will devastate the layer of colored crystal, giving the appearance of transparent crystal as design of the cutting. Finally, it made the whole process of quality control to avoid possible imperfections. The Overlay Crystal, as well as all other manufactured products, are in accordance with the nature, and the factory is located in an entirely wooded region, using the foundry process that does not pollute the environment, their furnaces are electric and controlled electronically and the water, after used, is treated and returned to nature.

Invicta SA

Al. Manoel Antônio Sobral, 701 - Distrito Industrial
37550-000 – Pouso Alegre – MG - Brazil
Tel.: +55 - 35 - 34497100 - Fax: +55 - 35 - 34497109
E-mail: sac@invictaonline.com.br - **www.invictaonline.com.br**

Invicta is currently the only Brazilian company that manufactures all the glass vials for its thermos line by itself. The 20,600 m2 facility is installed in a 110.000 m2 area. Established in 1952 by João Fernando Sobral, Invicta is a synonym for products that preserve the best flavors and fragrances at the ideal temperature.

Several manufacturing divisions operate within a highly functional system:

- Glass manufacturing (glass flasks, pots, glasses, and jars);
- The plastic injector and plastic blower line (components for thermos bottles, isothermal products, and the homeware and organizers line).
- The stainless steel manufacturing line (thermos components).

The acknowledgement of its work and efforts has resulted in the fact that Invicta has become the TOP OF MIND brand in the thermos industry.

The company is proud to be a synonym for thermal conservation products, to be a market leader, and to have been ranked consecutively among the Top Five best suppliers in the thermos bottles category.

More than 850 employees make Invicta an important player in urban development, which also results in hundreds of indirect jobs. With dozens of representatives throughout the country, its sales force covers Brazil entirely.

The company exports to more than 40 countries in the Americas, Europe, Africa, and Asia, which certainly makes it a world-class company.

With a deep passion for what it does, Invicta constantly invests in new alternatives, in line with the changes in behavior and focused on the future.

This is the company's history in pills:

- In 1963, molding and tooling rooms are set up to build and maintain the plastic injection molds.
- In 1967, the company becomes a joint stock company.
- In 1985, a new industrial plant is built in Pouso Alegre, State of Minas Gerais, to centralize all the manufacturing lines.
- On August 1, 2012, Sobral Invicta S.A. is purchased by The Coleman Company, Inc. – an international innovation and sales leader of outdoor recreation products.
- Merging with Coleman was a huge opportunity for Invicta to achieve global expansion.

Cristal Art Ltda

Lo Lopez 1638 - Cerro Navia - Casilla 68-5 – Santiago – Chile
Tel.: +56 - 2 - 7730773 - Fax: +56 - 2 - 7734386
E-mail: info@cristalart.cl
www.cristalart.cl

Cristal Art is born in 1964 and founded by Mr. Renzo Fenzo de Marchi, authentic venetian glass technician and superb hand maker, who transmitted his knowledge and experiences of decades to his chilean collaborators. Over 44 years his sons and Cristal Art ´s employees has been very proud of its position in South america creating beautiful and elegant hand made cristal designs and marketer high quality cristalin items and glass tableware for the domestic use and Hotel management service.
Its quality level is the result of heredity of decades venetian glass makers experiences and continuos research in the tableware field. Cristal Art headquarter is in Santiago, the most important city of Chile.
Cristal Art is proud to be heir to the long and old cristal venetian history to providing superior quality products, and to improve the quality products, and hand processes. Seeking and finding new opportunities to develop hand made work, creating fresh and new tableware designs, shapes colors and patterns.
Each item of the **Cristal Art "professional line"** corresponds to a specific and elegant selection of products in lead-free cristal or Flint glass with the high standards of quality and utility developed for hotel segments and gastronomic professional workers. Each item of the **Cristal Art "hand made"** collection is mouth-blown and hand made. All the little imperfections are the unique characteristics to preserve the individual crafting of each piece there have been no any mechanical processes involved.
For both the areas those are the articles: Coffee & Accessories, Stemware, Decoration, Jars & Glassware, Glass Lampshade.

libbey.com

Libbey Glass hails originally from East Cambridge, Massachusetts, home of the New England Glass Company which was founded in 1818. In 1888, Edward Drummond Libbey, son of the first corporate owner, William, moved the company to Toledo, Ohio. In 1892, the name was changed to The Libbey Glass Company, but the headquarter was still in the same location, Toledo, which represents today's company as well.
Libbey Glass designs, manufactures, and markets glass tableware products to the foodservice, retail, and business-to-business markets. It offers glass tableware products, such as cups and mugs, trays and platters, tumblers and barware, bowls, stemware, beer glasses, cocktail glasses, drinkware, home décor products, kitchen products, wine glasses, spirit glasses, jars, after dinner, serving ware, and accessories.
The company also provides dinnerware products, including bowls, plates, trays, and other tableware accessories; metal flatware including knives, steak knives, forks, spoons, and other products; metal hollowware, such as serving trays, bowls, servers, and accessories; and specialty products. The company sells its products through distributors in the United States and internationally, as well as online.

Since 1960 **Accu-Glass** has been exclusively dedicated to the engineering and manufacturing of precision glass tube products. Its numerous clients in the **medical, laboratory, point-of-care, fiber optic and electronic component industries** have come to rely upon the American company as a trusted resource. Commitment to quality, engineering and service is our strength. The primary goal of Accu-Glass is to provide customers with the best glass tubing solutions by using its proprietary glass melting processes, customized glass manufacturing equipment, and advanced measurement systems.

For over 50 years, Accu-Glass has translated the customers' design concept into a precision glass tubing solution. Markets served include medical device, point-of-care, clinical, laboratory, and fiber optics. The Accu-Glass sales and engineering team is ready to assist the clients in the design and development of their glass application. The company's engineers work to develop a new product or enhance an existing product.

As a premier precision glass tubing manufacturer, flexibility is a hallmark of the business's company. Custom-designed systems are employed to provide the precise dimensional measurements for any requirements. Accu-Glass' proprietary glass forming process allow the fastest response in the industry. From concept to finished product packaging, Accu-Glass is a leader in innovation. After successful prototype evaluation, the company implements the design solution into the manufacturing process.

www.vitrocom.com

VitroCom, **formerly Vitro Dynamics**, has been providing standard and custom technical glass products for industrial, medical, telecom, and R&D markets since 1968. The company, located in Mountain Lakes (NJ), offers a full inventory of glass tubing and capillary products in a full spectrum of sizes, materials and finishes.

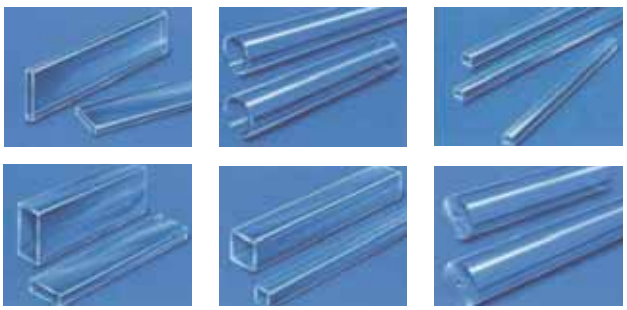

Its customers include the largest scientific and high Technical glass companies, suppliers and manufacturers in the world.

VitroCom combine traditional glass-blowing expertise with in-house drawing, computer automation and production-control equipment to fabricate glass products of extraordinary quality. The products can be found in space, on the moon and in the world's most advanced biomedical R&D centers. Many of the substrates and capillary tubing products commonly used today were designed by the VitroCom team.

The company is specialized in:
- Rapid prototyping
- Extreme quality for small tolerance, high precision glass product
- Large-volume, economical production
- Small quantity productions

VitroCom fabricates glass products ranging from **micro-tubing to 100 millimeter/10 centimeter cross-sections,** in small quantity runs through economical large production operations. The company is a **subsidiary of Fabrinet**, a large contract manufacturing company specializing in precision manufacturing for the world's most demanding OEMs. **Casix, a sister company located in China, offers high quality crystal and precision optics products, lenses, coatings and more**. Products and services from all three companies are complimentary in nature. This partnership offers customers essentially one-stop shopping for crystal and glass components, precision Technical glass products and complex sub-assembly incorporating these and other products.

Also VitroCom offers a complete line of custom and standard Borosilicate, clear fused quartz and synthetic fused silica glass tubing and rods. To complement the glass rod and tubing products, the company provides high quality crystal and precision optics products, lenses and coatings through our sister company, Casix. Casix products include laser crystals, nonlinear crystals, birefringent crystals, optical window, prism, waveplates, mirror, lenses, beamsplitter, light pipe, optical coating and optical component assemblies.

WWW.BORMIOLILUIGI.COM

THE COMPANY

Bormioli Luigi is an Italian glass manufacturing group, founded in Parma in 1946, 100% privately owned by the Bormioli family, glass makers since the 18th century.

We are a leading partner of the leading prestige perfume and spirits companies for the design, production and decoration of high quality, challenging shaped-glass packaging. The pillars of our strategy to stand as a leader in the prestige glass packaging market are INNOVATION, QUALITY, SERVICE and SUSTAINABILITY.

We operate in three distinct businesses:
- Prestige Fragrance and Cosmetic glass bottles and jars
- Premium quality spirit glass bottles
- High quality glass tableware and houseware

BESPOKE PRODUCTS DEVELOPMENT

We provide full development service: from initial technical studies, to the shipment of the finished decorated bottles. We ensure the best development and production lead times and the best quality.

All decoration techniques are available to customise your product: screen printing, hot stamping, coating, acid etching, metallisation, sublimation, glueing accessories ...

INSIDE – AN INNOVATIVE SOLUTION FOR INTERNAL DECORATION

INSIDE is a decorative coating applied on the internal glass surface of the bottle, resistant to long term contact with alcohol-based fragrances and spirits.
