

INTERNATIONAL TRAINING

INTRODUCTION TO GLASS TECHNOLOGY AND FURNACE MODELLING

Mathematical modelling of glass furnaces –
see the invisible!

Sustainable combustion system –
save energy and improve glass quality.

From batch to gob – the glass melting process.

Hybrid furnace – electric boost and its
configuration.

Glass quality requirements – how to optimise
product quality.

Speakers

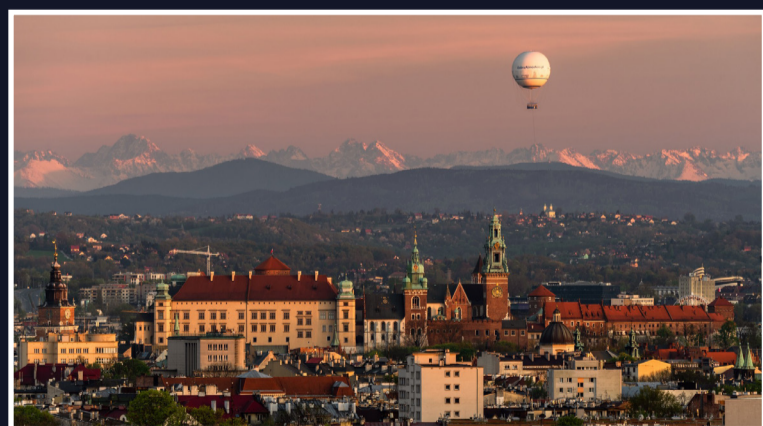

Marian Klisch PhD
Head of R&D Department

Bartłomiej Kubera
Head of Simulation&Analysis Department

Kasper Kaczmarek
Mathematical Modelling Specialist

Jan Ulicki PHOTOgraphy

Qubus Hotel,
