

PUJOL expands its position with new success stories in North America and Europe

Reinforcing its good standing as a key player in the flat glass industry, Hornos Industriales PUJOL has now successfully placed its cutting-edge equipment in both North America and Europe. Continuing its leadership in high-tech industrial oven manufacturing, the Spanish company is now expanding once again - further cementing its rising reputation for quality and innovation.

A STRONGER NORTH AMERICAN PRESENCE

In a major development, Pujol has finalized an agreement with Hollander Glass for the sale of a Temper Flex 45x25 tempering oven. Renowned for its ability to produce high-quality tempered glass, the oven will be installed at Hollander Glass' Texas facility - boosting its production capabilities and reinforcing its position as a leading supplier in the United States.

A third-generation family-owned company with over 65 years in the glazing in-

dustry, Hollander Glass serves architects, designers and glass specialists

nationwide. With physical locations in Houston (TX) and Atlanta (GA), as well as service centres in New York

and Toronto, the company continues to expand its offerings with state-of-the-art technology.

Pujol 100 New Business Case

GTB
group

10 UNITS SOLD IN 2024

Jorge Pujol, CEO of Hornos Industriales Pujol, highlighted the significance of this partnership: “We are very pleased with this new alliance with Hollander Glass. The Temper Flex oven represents the latest in glass tempering technology, and we’re convinced it’ll contribute significantly to the improvement of their production processes. This agreement strengthens our position in the global market and in the North American market in particular.”

RECORD SALES FOR PUJOL 100 PVB+ LAMINATING OVEN

In Europe, the company has achieved a new sales milestone for its Pujol 100

PVB+ glass laminating oven - closing 2024 with record-breaking figures. The latest sale of the 40x24 model to GTB Glass in the Czech Republic marks the tenth unit sold this year - surpassing previous records and reinforcing the oven’s industry-leading position. A company with over 20 years of experience in flat glass processing, GTB Glass specializes in manufacturing components for refrigerated display cabinets, commercial refrigerators, and retail shelving. With an export rate exceeding 90 percent, GTB Glass also supplies the architectural, healthcare, furniture and automotive sectors - making it a key player in the European market.

Since its launch in 2011, the Pujol 100 PVB+ has set a new benchmark in laminated glass production, with 55 units sold across 29 countries on five continents. Its continued success underscores the growing demand for advanced, efficient laminating solutions worldwide.

A LEGACY OF EXCELLENCE

Founded in 1911, Hornos Industriales Pujol has a long-standing legacy in the glass industry - continuously adapting to market needs and pushing technological boundaries. With these recent sales, Pujol not only reinforces its presence in North America and Europe but also solidifies its role as

a global reference in industrial oven manufacturing. Glass processors worldwide recognize the company’s commitment to quality and innovation, as evidenced by its sustained market growth and expanding client base. Indeed all these latest achievements demonstrate how excellence is rewarded in results - ensuring that Pujol remains at the forefront of an evolving glass industry.
