

How VOILÀP is shaping the Smart Industry landscape

In an era where digital transformation and smart technology define progress, VOILÀP emerges now as a global pioneer - seamlessly integrating advanced hardware and software solutions to optimize industrial and urban environments. With its robust dedication to intelligent systems, process digitalization, and energy efficiency, the company is redefining how industries can operate by leveraging greater connectivity.

ing, cutting, and finishing. Backed by the legacy of esteemed brands like Emmegi, Elumatec, and Tekna, Voilap delivers unparalleled technological expertise and innovation. A key driver of Voilap's success is its deep integration of software solutions. Through its dedicated brands, Emmegisoft and elusoft, the company ensures that its machines are not just high-performing but also scalable and future-ready. With continuous software updates and enhancements, manu-

REDRAWING THE URBAN MAP

As a Smart Industry protagonist, Voilap develops cutting-edge machinery tailored for material processing - particularly in the construction sector. The company specializes in high-precision equipment for aluminum, PVC and glass processing, providing manufacturers with state-of-the-art solutions for milling, drilling, thread-

facturers can rely on long-term operational efficiency and reliability. In the PVC processing sector, Voilap's Someco brand exemplifies the power of strategic consolidation. By uniting the expertise of Emmegi and Elumatec, Someco offers a comprehensive range of PVC profile processing solutions - strengthening the company's position as a key industry player.

LEADING INNOVATION IN GLASS PROCESSING

Voilap's expertise extends

to the glass industry, where its Keraglass and Mappi brands lead in the design of cutting-edge glass tempering furnaces. Keraglass also pioneers advanced solutions in glass decoration, lamination, and intelligent handling systems, ensuring seamless integration and efficiency throughout the production process. By combining precision engineering with digital intelligence, Voilap is elevating glass manufacturing to new heights of performance and automation.

TRANSFORMING DIGITAL URBAN SPACES

Beyond industrial applications, Voilap is reshaping urban experiences through its innovative digital division. Its brands -Imecon, Motiqa, Pladway and Voilap Digital- all stand at the forefront of digital signage, smart retail and out-of-home (DOOH) advertising. The company provides a holistic suite of services - from hardware development to data-driven advertising management, helping businesses and cities enhance public engagement through smart digi-

tal solutions. Among Voilap's standout innovations is the Smart Store, a groundbreaking concept that fuses physical and digital shopping into a 'phygital' experience. By leveraging real-time interactivity and personalized solutions, Voilap transforms the consumer journey - setting a new benchmark for retail innovation.

USHERING IN A GREENER WORLD

In addition to technological excellence, Voilap is dedicated to fostering a more sustainable future through its ESG initiatives. The company continually invests in eco-friendly production methods, optimizing energy consumption and minimizing environmental impact across its operations. By championing sustainability, Voilap not only drives industrial advancement but also ensures a greener, more responsible future. For businesses looking to embrace innovation and build a smarter, more connected world, Voilap stands out as the ultimate partner.
