COMPANY DATA

Contacts

Barbara Mazza - General Manager
Marino Bonetti - Chief Sales Officer
Paolo Bardotti - Chief Engineering Officer
Andrea Zorzitto - Project Manager Officer
Silvia Viva - Sales Account
Marianna Croci - Marketing Manager

Mother Company

Cugher Glass srl

Annual Company Turnover

EUR 15,000,000

Percentage of turnover from glass (%)

95

Sales

Domestic 5% / International 95%

Quality certifications

QMS ISO 9001:2015

Area

Office area 1,000 m² / Plant area 10,000 m²

Number of Employees

130

Founding Year

1967

Planned Exhibitions 2026

China Glass - Shanghai, China - 7/10 April
GlassBuild America - Las Vegas, USA (NV) - 23/25 September
Glasstec - Düsseldorf, Germany - 20/23 October
Eurasia - Istanbul, Turkey - 21/24 November

CUGHER INSTALLATIONS

● AUTOMOTIVE ● HOME APPLIANCE ● ARCHITECTURAL ● SOLAR

COMPANY PROFILE

Cugher's more than 50 years of success in glass screen-printing machinery are the result of an effective combination of production expertise, advanced technologies and a highly qualified professional team. The company focuses on delivering customized, high-performance solutions tailored to each specific application sector.

AUTOMOTIVE

Fully automated and integrated printing lines for tempered and laminated glass used in windshields, backlites, sidelites and rooftops. The plants ensure extremely high productivity, excellent print repeatability (± 0.08 mm) and short cycle times ranging from 6 to 15 seconds.

HOME APPLIANCE

Solutions designed for industries where speed and flexibility are essential. Fast and simple changeovers allow easy processing of different glass types, with batch operations managed efficiently by a single operator.

BUILDING & INTERIOR DESIGN

Architectural LAB, the company's dedicated research center, is specialized in developing long-term solutions for float, tempered and laminated glass used in civil and industrial applications, from windows and balconies to furnishing elements and shower enclosures.

SOLAR

Development and engineering of machinery for handling solar panels along the production line, including silk-screen printing of backsheets. Systems ensure excellent film uniformity, up to 98% good parts, 24/7 operation and high reliability.

Cugher's commercial offering includes a cutting-edge product range:

- **Screen-printing machines** configured to best match production requirements, ensuring high image definition, precision and ink uniformity. Machines can be integrated into turnkey automated lines or used as stand-alone units.
- **Dryers (IR, UV or combined)** designed for both screen and digital printing on glass, capable of accurately drying ink thicknesses from 15 to 100 microns.
- **Vision and quality control systems** for continuous monitoring and process optimization, including automatic screen centering and broken glass detection.
- **Dedicated systems for handling, transport and storage** of glass of any size and shape, ensuring optimal integration and synchronization with all line components.
- **Robotic applications for automated glass handling** are fully integrated systems ensuring precision, repeatability, safety and high production efficiency.
