PLANT AREA

13,000 sq.m.

COMPANY FOUNDED

1983

Euromatic, located in Treviglio (Italy), was founded in 1983 and is, today, a solid and well-organized group with facilities of over 13,000 square meters and 150 employees operating in technical, sales and administrative departments, all of whom are intensely loyal to the company, a result of the low personnel turnover.

Highly qualified design staff with significant expertise can guarantee the best synergy between mechanics and electronics for top level equipment efficiency and production quality.

Euromatic customers are market leaders in the field of glass primary packaging for the pharmaceutical sector; Euromatic equipment is commissioned all over the world in the best glass converting companies.

A strongly innovative approach, along with consolidated experience and commitment to quality, have been the impetuses for an increase in demand from international markets. It is also the true motivation behind customer loyalty that has made Euromatic a leader in its field.

MISSION

Euromatic is focused on designing and creating complete production units for converting glass tubes into containers for the pharmaceutical industry. The critical approach manifests itself in a driving force that refuses to be satisfied with past achievements.

ENGINEERING SOLUTIONS

Euromatic is a worldwide-known company in the production process of glass conversion.

The company's engineering and R&D teams are dedicated to developing technological state-of-the-art solutions to convert glass tube into vials, cartridges, syringes and ampoules.

The complete project cycle is developed and directly handled in-house by highly-specialized human resources.

PRODUCT PORTFOLIO

Euromatic's portfolio of products reflects the company's strong focus on glass conversion machines for the pharmaceutical industry. It covers the complete range of pharmaceutical products from vial, cartridges, syringes and ampoules:

- **Tube-loaders**
- **Forming machines**
 - for vials:
 - Zeta 098
 - Zeta 16 - 10
 - Zeta 18 - 10
 - Zeta 20 - 12
 - for cartridges:
 - Kappa 36 - 30
 - Kappa 16 - 10
 - Kappa 18 - 10
 - for syringes:
 - Sigma 22 - 18
 - and for ampoules:
 - Tau36
- **After-forming processing lines**
- **Annealing lehrs**
- **Automatic packing machines**

Our commitment to pharmaceuticals has enabled us to develop and supply "ready for filling" systems, for container preparation, including sterilization, approaching the "white area", offering the following units for syringes, cartridges and vials:

- **Washing machines**
- **Siliconization units**
- **Nest & tub units**
