ISO 45001 / UNI EN ISO 45001:2018

### SALES

**Domestic:** 30% - **International:** 70%

### EMPLOYEES

50

### COMPANY FOUNDED

1956

**Fluorital** is a dynamic, family owned and run company with its main plant located in Italy near Venice.

With more than 30 years of experience in the research and production of organic paints and silk-screen inks for glass decoration, Fluorital produces different types of spray paints, roller varnishes, and screen printing inks: UV-curable and solvent-based inks. The application fields of its products include perfume and cosmetic packaging, wine and spirit bottles, tableware, flat glass for furniture and interiors, and lighting glass.

All products are lead- and heavy metal free, and can be applied directly onto glass, as they do not require any primer.

All products are curable at low temperature or, when specified, with UV lamps, enabling important energy savings compared with other products.

The physical and mechanical resistance of Fluorital's products to the most severe tests required in the different mar-

ket fields makes them the top reference on the market.

Fluorital invests considerable resources in Research and in its laboratories; besides the continuous update of more consolidated products, research is aimed at developing new finishings and products with even more efficient resistance, and environmentally friendly characteristics.

Currently, as an alternative to vacuum metallization, Fluorital is introducing a simple, low temperature spray metallization process that can be run on most standard decoration lines.

Fluorital supplies top quality products to colour your imagination.
