COMPANY PROFILE

Keraglass represents an all-round approach to the glass industry. Founded in 1996 by Stefano Spezzani, the company has established itself in just a few years as a world leader in the glass processing equipment sector, offering integrated technologies that cover the entire manufacturing process: flat and curved glass tempering, laminating, screen printing and traditional enamelling, digital printing, handling and storage.

Part of the Voilàp Group, Keraglass is now an international benchmark for quality, innovation and reliability. Its strength lies in a 360° approach, supported by continuous research, international patents and established partnerships with customers and suppliers.

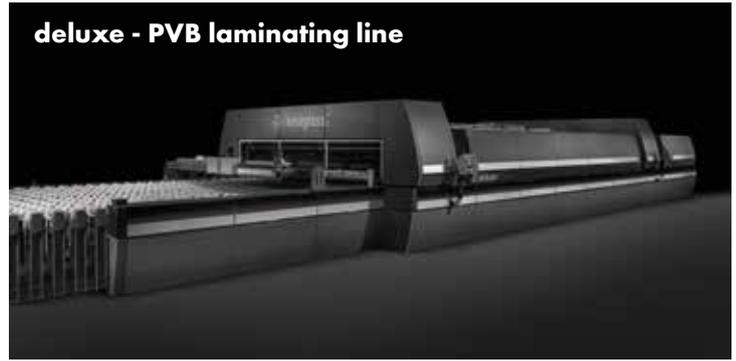

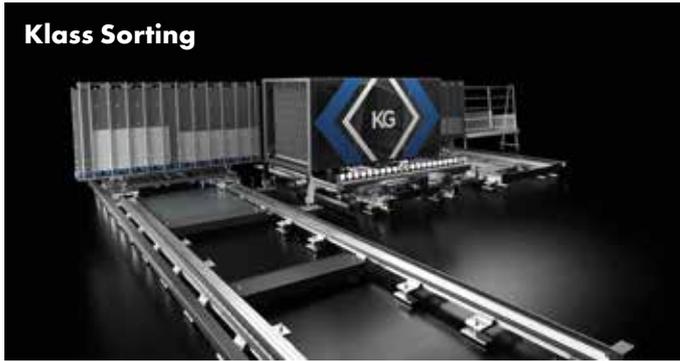

Keraglass is headquartered in Baiso (Italy) and has strategic branches in São Paulo (Brazil) and New York (United States).
