COMPANY PROFILE

NEPTUN Srl was founded in late 2008 as a machines and equipment manufacturer for flat glass cleaning. It quickly established itself thereafter as a key player for creating solutions for glass processing. Neptun's Mission is to produce new technical solutions that can provide a competitive advantage to its customers - for which it invests more than 12 percent of its turnover in Research and Development. Together with its sales distribution, the company's customer support is strengthened by its network of experienced collaborators. Neptun stands out as an ideal partner for all glass industry companies that require proven quality, performance and reliability. The company has a trio of product lines, namely straight-edging machines, washing machines and vertical NCs for drilling and milling. All three have a full range which spans both width and depth, while each can be fully-integrated - whether in-line or thanks to the company's anthropomorphic 'Bravo' series manipulators.

QUICK SERIES

Neptun has the widest range of vertical NCs on the market for drilling/milling and glass grinding for any type of processing and company size. From the entry-level milling machine to the latest generation fully-automatic Quick2 T10, up to the brand new Quickedge, the Quick series includes over 10 models that can work individually or combined in line.

Neptun offers work solutions from the small glass shop to the industry that works 24/7 with the NC machines inside robotic cell.

ROCK

Neptun's line of straight line edgers is the very definition of tradition and innovation - being characterized by a truly robust structure in thick steel and cast iron which guarantees long-lasting reliability. Rock also offers many patented solutions and cutting-edge functions, ETS squaring systems, the RC-4 for parallelogram processing and, lastly, the AWA version for fully-automatic wheel management.

WASHING MACHINES

As for glass washing, Neptun displays its expertise in a wide range of available washers. The company offers 3 horizontal washing machine models, namely the economical TORNADO EASY, the HP for high performance and the HP-S series for special applications (solar, ceramic ink, ultra-thin glass, medical). Neptun further proposes 4 vertical washer models - from the economical LV Top, going up in performance and automation terms to the LV EVO model and Wave before finally rising to the top-of-the-range, super-equipped standard Superinox.
