### COMPANY DATA

#### Contacts

**Matteo Dal Santo** - C.E.O.  
**Paolo Reffo Scarso** - Sales Manager  
**Andrea Dal Santo** - Technical Manager

#### Sales

National (20%) / International (80%)

#### Founding year

1999

#### Planned Exhibitions 2026

- Mir Stekla** - Moscow, Russia - 4 / 6 March
- China Glass** - Shanghai, China - 7 / 10 April
- Glasstech Mexico** - Mexico City, Mexico - 15 / 17 July
- GlassBuild America** - Las Vegas, USA (NV)- 23 / 25 September
- Glasstec** - Düsseldorf, Germany - 20 / 23 October
- Veteco** - Madrid, Spain - 10 / 13 November
- Eurasia Glass** - Istanbul, Turkey - 21 / 24 November
- Zak Glass Technology** - New Dehli, India  
10 / 12 December

### NEW PERSPECTIVES OF PERFECTION

#### VERTICAL CNC CENTERS

SKILL E-D is the vertical CNC center for grinding, milling, drilling and polishing rectangular and shaped flat sheet glass. The machine can process both rectilinear and shaped flat sheet glass and combines all the technology for vertical drilling and milling with the features of a vertical grinding machine.

### COMPANY PROFILE

Since 2000, we have specialized in the design and manufacture of vertical CNC machines for flat glass processing. Drawing on know-how developed since the 1980s, the company has become a benchmark in vertical glass machine engineering. Our solutions combine advanced technology, exclusive engineering choices, and robust construction to ensure maximum quality, precision, and long-term reliability. Each machine is designed to simplify daily operations while delivering excellent processing results, enhancing productivity and the quality of the finished product.

**SKILL GLASS** represents the highest expression of vertical processing, enabling optimal use of space and meeting the demands of large-scale architectural, glass for specialized sectors, and structural glass production.

The product range includes **E-D** vertical work centers, **DRILL** drilling and milling machines, and the complete **SFILL** edging line-fast, precise, and engineered to maintain performance and accuracy over time.

Customers can rely on Skill Glass products and a highly organized multilingual after-sales service, recognized for efficiency and prompt delivery.

For your investments, trust true industry professionals: choose Skill Glass.

Its main feature is its versatility, which allows for different types of processes at high speeds and optimal precision.

**DRILLING AND MILLING**

DRILL 1600FF is a 5-axis CNC drilling and milling machine designed for producing holes, inserts and countersinks on rectangular flat sheet glass with a thickness of 3-20 mm. The machine

is composed of five axes, X Y V Z W, and two electro-spindles which, as opposite drilling heads, create a double-sided drilling system that drills perfect holes.

**GRINDING, ARRISING AND POLISHING**

SKILL SFILL is the vertical center for arissing, grinding and polishing straight and shaped glass panes.

The machine is composed of nine axes and two electro-spindles mounted in parallel, allowing to process the pieces with two heads at the same time.

Edging is done using diamond wheels with a diameter of 150mm and can be carried out on straight and shaped glass, including laminated or treated glass.
