

COMPANY OVERVIEW

Meet **MAKO**: time-tested know-how in next-gen solutions

Mako may be a young player on the global stage, but its foundation rests on deep-rooted expertise. Specializing in the development of customized solutions for machinery, product handling systems, palletizing and depalletizing, the company serves the glass, food & beverage, canmaking and bagging sectors with both precision and purpose.

Drawing on the vast engineering experience of its technical and commercial teams, Mako approaches every end-of-line project from primary production through to the delivery of fully assembled pallets to storage - all with unmatched versatility and competence.

- CONVEYOR LINES
- ROBOT
- DEPALLETIZER
- PALLETIZER
- LABELLING MACHINE

- BOTTLES
- FOOD AND BEVERAGES
- BOXS
- CANS
- BAGS

Delivering innovative, tailor-made end-of-line solutions, MAKO is backed by robust technical support that's also sourced by decades of experience coupled with winning synergies with sister company FM Technology. Albeit young in the industry, the new arrival is already redefining flexibility and precision for glass, food and packaging.

CORE CAPABILITIES TO CREATE CUSTOMIZED SOLUTIONS FOR A RANGE OF INDUSTRIES

Flexibility in design, a relentless pursuit of innovation and a commitment to working closely with clients at every stage are all hallmarks that define the company's approach. Whether handling bulk goods, shrink packs, cartons or sacks, Mako designs and manufactures complete lines and individual machines for conveying, depalletizing and palletizing with exacting detail.

A key strength is its synergy with sister company FM Technology - fully owned by the same group - which contributes more than 150 skilled technicians dedicated to installation, assembly and technical support. Backed by two production facilities spanning 10,000 square metres, Mako can manage turnkey projects of any scale with confidence.

MAKO

Via Berna, 1
43010 Fontevivo (PR) - ITALY
Tel.: +39-0521-617346
info@makoitalia.it
www.makoitalia.it

Its technical and commercial teams offer a wealth of multi-disciplinary expertise, enabling the delivery of tailor-made, turnkey solutions that adapt seamlessly to client needs. Beyond new systems, the company provides comprehensive support services - available even for non-Mako machinery. These include:

- Scheduled and emergency maintenance
- Spare parts supply
- Targeted technological upgrades
- On-site and remote software assistance

A SHOWROOM THAT BRINGS INNOVATION TO LIFE

To offer a deeper insight into

its manufacturing philosophy and allow industry professionals to experience its capabilities first-hand, Mako will open the doors to its new company showroom in Fontevivo, Parma, Italy, starting October 2025.

The venue will showcase two full production lines in operator:

- first featuring a cutting-edge robotic palletizing system with innovative layer formation and head-loading technology
- second equipped with a high-speed stacker, bottle inliner, and 1-to-2 channel bottle diverder.

The showroom will signal a perfect opportunity to witness Mako's quality, innovation and performance as visitors are afforded the added chance to meet the passionate team behind it all. ■
