

Strategic partner for a smart, sustainable future: **KERAGLASS**

From architecture to household appliances and interior design, KERAGLASS stands out in the ever-changing industrial landscape as an essential ally for companies in its sectors of reference.

The company stands out for its ability to integrate multidisciplinary skills - offering customised solutions ranging from design to the creation of intelligent systems. It is committed to optimising energy consumption and transforming the way we work, thereby contributing to the transition to a Smart Industry while reducing the environmental impact of industrial operations by making every stage of the process more efficient.

ADVANCED TECHNOLOGIES FOR INTELLIGENT GLASS PROCESSING

A leader in the design and manufacture of advanced glass processing systems, Keraglass offers complete solutions covering every stage of the production process: from automation with sorting systems to decoration and safety glass, including tempering and laminating. The company's ability to meet the needs of increasingly demanding

manufacturers is supported by continuous technological innovation, which enables companies to face market challenges with advanced solutions. An example here is the integrated IoT platform that allows real-time monitoring of machines, energy consumption and production status. This not only optimises operations. It also collects strategic data for proactive resource management - further improving the overall efficiency and sustainability of industrial and urban processes.

SUSTAINABILITY, INNOVATION AND A GLOBAL VISION

The link with the Voilap group further strengthens Keraglass' mission: to operate according to clear principles of sustainability, digitalisation, energy efficiency and responsible innovation - all of which guide the development of technologies designed to improve not only production processes but also the quality of life in the cities of the future. Keraglass is also dedicated to tailor-made solutions, which are designed to ensure maximum efficiency, thanks to total system integration. Here constant investment in research and development allows the company to offer the most advanced technologies - making it the ideal partner for those who want to adopt innovative and sustainable solutions. With a global presence, it is able to guarantee assistance and support to its customers anywhere in the world. This is how Keraglass advances the future of production: smarter, more efficient, greener and perfectly aligned with the principles of the Voilap group.
